1	The Cepheid period-luminosity zero-point from Hipparcos trigonometrical parallaxes. Monthly Notices of the Royal Astronomical Society, 1997, 286, L1-L5.	4.4	328
2	A period-luminosity-colour relation for Mira variables. Monthly Notices of the Royal Astronomical Society, 1989, 241, 375-392.	4.4	317
3	Hubble Space TelescopeFine Guidance Sensor Parallaxes of Galactic Cepheid Variable Stars: Period-Luminosity Relations. Astronomical Journal, 2007, 133, 1810-1827.	4.7	295
4	AGB variables and the Mira periodâ€“luminosity relation. Monthly Notices of the Royal Astronomical Society, 2008, 386, 313-323.	4.4	214
5	The IRSF Magellanic Clouds Point Source Catalog. Publication of the Astronomical Society of Japan, 2007, 59, 615-641.	2.5	212
6	The Brightest Stars in the Magellanic Clouds. Monthly Notices of the Royal Astronomical Society, 1960, 121, 337-385.	4.4	188
7	Cepheid parallaxes and the Hubble constant. Monthly Notices of the Royal Astronomical Society, 2007, 379, 723-737.	4.4	178
8	High-mass-loss AGB Stars in the South Galactic Cap. Monthly Notices of the Royal Astronomical Society, 1994, 267, 711-742.	4.4	173
9	Infrared colours for Mira-like long-period variables found in the Catalogue. Monthly Notices of the Royal Astronomical Society, 2002, 319, 728-758.	4.4	151
10	Near-infrared photometry of carbon starsâ˜.... Monthly Notices of the Royal Astronomical Society, 2006, 369, 751-782.	4.4	150
11	Cepheids as Distance Indicators. Annual Review of Astronomy and Astrophysics, 1987, 25, 345-375.	24.3	148
12	Obscured asymptotic giant branch variables in the Large Magellanic Cloud and the period-luminosity relation. Monthly Notices of the Royal Astronomical Society, 2003, 342, 86-104.	4.4	131
13	Cepheids as Distance Indicators. Publications of the Astronomical Society of the Pacific, 1999, 111, 775-793.	3.1	128
14	IRAS sources and the nature of the Galactic Bulge. Monthly Notices of the Royal Astronomical Society, 1991, 248, 276-312.	4.4	127
15	First results from HIPPARCOS trigonometrical parallaxes of Mira-type variables. Monthly Notices of the Royal Astronomical Society, 1997, 287, 955-960.	4.4	117
16	DISTANCE SCALE ZERO POINTS FROM GALACTIC RR LYRAE STAR PARALLAXES. Astronomical Journal, 2011, 142, 187.	4.7	115
17	Spectroscopic and photometric observations of SN 1987a-II. Days 51 to 134. Monthly Notices of the Royal Astronomical Society, 1987, 229, 15P-25P.	4.4	111
18	The luminosities and distance scales of type II Cepheid and RR Lyrae variables. Monthly Notices of the Royal Astronomical Society, 2008, 386, 2115-2134.	4.4	102

#	ARTICLE	IF	CITATIONS
19	A Spitzer mid-infrared spectral survey of mass-losing carbon stars in the Large Magellanic Cloud. Monthly Notices of the Royal Astronomical Society, 2006, 370, 1961-1978.	4.4	94
20	Luminosities and mass-loss rates of carbon stars in the Magellanic Clouds. Monthly Notices of the Royal Astronomical Society, 2007, 376, 313-337.	4.4	94
21	Spectroscopic and photometric observations of SN 1987A – III. Days 135 to 260. Monthly Notices of the Royal Astronomical Society, 1988, 231, 75P-89P.	4.4	93
22	The Long Period Variables. Monthly Notices of the Royal Astronomical Society, 1962, 125, 367-415.	4.4	84
23	Multicolour photoelectric photometry of Magellanic Cloud cepheids - II. An analysis of BVI observations in the LMC. Monthly Notices of the Royal Astronomical Society, 1979, 188, 139-157.	4.4	79
24	Long-period variables in the Sgr I field of the Galactic Bulge. Monthly Notices of the Royal Astronomical Society, 1995, 273, 383-400.	4.4	79
25	The 2003 shell event in θ Carinae. Monthly Notices of the Royal Astronomical Society, 2004, 352, 447-456.	4.4	79
26	Hipparcos parallaxes for Mira-like long-period variables. Monthly Notices of the Royal Astronomical Society, 2002, 319, 759-770.	4.4	76
27	The pulsation, temperatures and metallicities of Mira and semiregular variables in different stellar systems. Monthly Notices of the Royal Astronomical Society, 1996, 278, 11-21.	4.4	75
28	Mira kinematics from Hipparcos data: a Galactic bar to beyond the Solar circle. Monthly Notices of the Royal Astronomical Society, 2000, 317, 460-487.	4.4	75
29	Asymptotic giant branch stars in the Fornax dwarf spheroidal galaxy. Monthly Notices of the Royal Astronomical Society, 2009, 394, 795-809.	4.4	73
30	Three classical Cepheid variable stars in the nuclear bulge of the Milky Way. Nature, 2011, 477, 188-190.	27.8	72
31	A Spectroscopic and Photometric Study of the Pulsating R Coronae Borealis Type Variable, RY Sagittarii. Monthly Notices of the Royal Astronomical Society, 1972, 158, 305-360.	4.4	70
32	The period-luminosity relation for type II Cepheids in globular clusters. Monthly Notices of the Royal Astronomical Society, 2006, 370, 1979-1990.	4.4	67
33	Spitzer spectroscopy of carbon stars in the Small Magellanic Cloud. Monthly Notices of the Royal Astronomical Society, 2007, 376, 1270-1284.	4.4	67
34	The infrared properties of Mira-type variables and other cool stars as determined from JHK <sub>L</sub> photometry. Monthly Notices of the Royal Astronomical Society, 1982, 201, 439-450.	4.4	64
35	Variability of θ Carinae. Monthly Notices of the Royal Astronomical Society, 1994, 270, 364-372.	4.4	64
36	The R Coronae Borealis stars -- I. Infrared photometry and long-term variations. Monthly Notices of the Royal Astronomical Society, 1997, 285, 317-338.	4.4	63

#	ARTICLE	IF	CITATIONS
37	Spitzer observations of acetylene bands in carbon-rich asymptotic giant branch stars in the Large Magellanic Cloud. <i>Monthly Notices of the Royal Astronomical Society</i> , 2006, 371, 415-420.	4.4	60
38	Cepheid variables in the flared outer disk of our galaxy. <i>Nature</i> , 2014, 509, 342-344.	27.8	60
39	The age and structure of the Galactic bulge from Mira variables. <i>Monthly Notices of the Royal Astronomical Society</i> , 2016, 455, 2216-2227.	4.4	60
40	Three-micron spectra of AGB stars and supergiants in nearby galaxies. <i>Astronomy and Astrophysics</i> , 2005, 434, 691-706.	5.1	56
41	Cepheids and other short-period variables near the Galactic Centre. <i>Monthly Notices of the Royal Astronomical Society</i> , 2013, 429, 385-397.	4.4	53
42	Analysis of Radial Velocities of Stars and Nebulae in the Magellanic Clouds. <i>Monthly Notices of the Royal Astronomical Society</i> , 1961, 122, 433-453.	4.4	50
43	Infrared photometry of Mira variables in the Baade windows and the distance to the Galactic Centre. <i>Monthly Notices of the Royal Astronomical Society</i> , 1982, 198, 199-214.	4.4	49
44	Period-luminosity relations of type II Cepheids in the Magellanic Clouds. <i>Monthly Notices of the Royal Astronomical Society</i> , 2011, 413, 223-234.	4.4	49
45	The Kinematics of Planetary Nebulae in the Magellanic Clouds. <i>Monthly Notices of the Royal Astronomical Society</i> , 1968, 140, 345-367.	4.4	48
46	Mass-loss variations among carbon-rich AGB variables. <i>Monthly Notices of the Royal Astronomical Society</i> , 1997, 288, 512-532.	4.4	48
47	Globular clusters and the Mira period-luminosity relation. <i>Monthly Notices of the Royal Astronomical Society</i> , 2002, 329, L7-L12.	4.4	43
48	Carbon-rich Mira variables: kinematics and absolute magnitudes. <i>Monthly Notices of the Royal Astronomical Society</i> , 2006, 369, 791-797.	4.4	42
49	Spectroscopic and photometric observations of SN 1987A-IV. Days 260-385. <i>Monthly Notices of the Royal Astronomical Society</i> , 1988, 234, 5P-18P.	4.4	41
50	Variability of - Carinae - III. <i>Monthly Notices of the Royal Astronomical Society</i> , 2001, 322, 741-748.	4.4	41
51	Spitzer Space Telescope spectral observations of AGB stars in the Fornax dwarf spheroidal galaxy. <i>Monthly Notices of the Royal Astronomical Society</i> , 2007, 382, 1889-1900.	4.4	41
52	The Local Group galaxy NGC 6822 and its asymptotic giant branch stars. <i>Monthly Notices of the Royal Astronomical Society</i> , 2013, 428, 2216-2231.	4.4	40
53	Infra-red Photometry of R Coronae Borealis Type Variables and Related Objects. <i>Monthly Notices of the Royal Astronomical Society</i> , 1973, 161, 293-303.	4.4	39
54	The period-luminosity relation for Mira variables and the distance of the Large Magellanic Cloud. <i>Monthly Notices of the Royal Astronomical Society</i> , 1984, 211, 51P-55P.	4.4	39

#	ARTICLE	IF	CITATIONS
55	Dust shell objects in the SMC. <i>Monthly Notices of the Royal Astronomical Society</i> , 1989, 238, 769-776.	4.4	39
56	The infrared variability and nature of symbiotic stars. <i>Monthly Notices of the Royal Astronomical Society</i> , 1977, 179, 499-508.	4.4	38
57	Period-luminosity relations for type II Cepheids and their application. <i>Monthly Notices of the Royal Astronomical Society</i> , 2009, 397, 933-942.	4.4	38
58	Is there a metallicity gradient in the Large Magellanic Cloud?. <i>Monthly Notices of the Royal Astronomical Society: Letters</i> , 2010, 408, L76-L79.	3.3	38
59	New planetary nebulae in the Galactic bulge. <i>Astronomical Journal</i> , 1988, 95, 804.	4.7	38
60	Interferometric Angular Diameters of Mira Variables with the Hubble Space Telescope. <i>Astrophysical Journal</i> , 1997, 485, 328-332.	4.5	38
61	The Kinematics of B Stars, Cepheids, Galactic Clusters and Interstellar Gas in the Galaxy. <i>Monthly Notices of the Royal Astronomical Society</i> , 1965, 130, 245-280.	4.4	37
62	Spectroscopic Observations of SC Stars. <i>Monthly Notices of the Royal Astronomical Society</i> , 1971, 154, 197-208.	4.4	37
63	The Cluster NGC 330 in the SMC (Paper II): H $\alpha$ Emission in Main Sequence Stars. <i>Monthly Notices of the Royal Astronomical Society</i> , 1972, 159, 113-118.	4.4	37
64	The bolometric, infrared and visual absolute magnitudes of Mira variables. <i>Monthly Notices of the Royal Astronomical Society</i> , 1981, 196, 111-120.	4.4	37
65	Asymptotic giant branch stars in the Phoenix dwarf galaxy. <i>Monthly Notices of the Royal Astronomical Society</i> , 2008, 385, 1045-1052.	4.4	37
66	Spectroscopic and photometric observations of SN1987A V. Days 386-616. <i>Monthly Notices of the Royal Astronomical Society</i> , 1989, 237, 55P-68P.	4.4	36
67	SAGE-VAR: AN INFRARED SURVEY OF VARIABILITY IN THE MAGELLANIC CLOUDS. <i>Astrophysical Journal</i> , 2015, 807, 1.	4.5	35
68	The Kinematics of Semi-Regular Red Variables in the Solar Neighbourhood. <i>Monthly Notices of the Royal Astronomical Society</i> , 1972, 158, 23-46.	4.4	33
69	Infrared photometry of Mira variables in the LMC and the pulsational properties of Miras. <i>Monthly Notices of the Royal Astronomical Society</i> , 1982, 199, 245-253.	4.4	33
70	The 1987 outburst of the recurrent nova U Sco. <i>Monthly Notices of the Royal Astronomical Society</i> , 1988, 234, 281-289.	4.4	33
71	Carbon-rich Mira variables: radial velocities and distances. <i>Monthly Notices of the Royal Astronomical Society</i> , 2006, 369, 783-790.	4.4	33
72	Asymptotic giant branch stars in the Leo I dwarf spheroidal galaxy. <i>Monthly Notices of the Royal Astronomical Society</i> , 2010, 406, 86-94.	4.4	33

#	ARTICLE	IF	CITATIONS
73	The Local Group Galaxy IC1613 and its asymptotic giant branch variables. Monthly Notices of the Royal Astronomical Society, 2015, 452, 910-923.	4.4	33
74	A lack of classical Cepheids in the inner part of the Galactic disc. Monthly Notices of the Royal Astronomical Society, 2016, 462, 414-420.	4.4	33
75	Spectroscopic and photometric observations of SN1987A - VI. Days 617 to 792. Monthly Notices of the Royal Astronomical Society, 1989, 240, 7P-24P.	4.4	32
76	Asymptotic giant branch stars in the Sculptor dwarf spheroidal galaxy. Monthly Notices of the Royal Astronomical Society, 2011, 414, 3492-3500.	4.4	32
77	The infrared variability and nature of symbiotic stars II. RR Tel. Monthly Notices of the Royal Astronomical Society, 1983, 202, 951-960.	4.4	30
78	The R Coronae Borealis stars -- II. Further inferences from the infrared data. Monthly Notices of the Royal Astronomical Society, 1997, 285, 339-357.	4.4	30
79	Mira Variables and the Galactic Bulge Population. Astrophysics and Space Science Library, 1987, , 33-46.	2.7	30
80	An Emission Band System Attributed to the Molecule NH <sup>+</sup> .. Astrophysical Journal, 1951, 114, 344.	4.5	30
81	A Study of the 30 Doradus Region of the Large Magellanic Cloud. Monthly Notices of the Royal Astronomical Society, 1961, 122, 1-16.	4.4	29
82	The Radial Velocities of Distant Cepheids and Galactic Models. Monthly Notices of the Royal Astronomical Society, 1967, 136, 141-164.	4.4	29
83	A period-luminosity relation for supergiant red variables in the Large Magellanic Cloud. Monthly Notices of the Royal Astronomical Society, 1980, 193, 377-380.	4.4	29
84	Absolute Magnitudes of Mira Variables from Statistical Parallaxes. Monthly Notices of the Royal Astronomical Society, 1969, 146, 411-421.	4.4	28
85	The brightest asymptotic giant branch stars in the Leo I dwarf spheroidal galaxy. Monthly Notices of the Royal Astronomical Society, 2002, 335, 923-927.	4.4	28
86	The Cepheid distance to the Local Group galaxy NGC 6822. Monthly Notices of the Royal Astronomical Society, 2012, 421, 2998-3003.	4.4	28
87	RR Lyraes, Galactic and extragalactic distances, and the age of the oldest globular clusters. Monthly Notices of the Royal Astronomical Society, 1997, 284, 761-766.	4.4	27
88	On the Schumann-Runge O2Bands emitted at Atmospheric Pressure. Proceedings of the Physical Society Section A, 1949, 62, 114-121.	1.1	26
89	Spectral Classification and Photometry of Southern B Stars. Monthly Notices of the Royal Astronomical Society, 1961, 122, 239-253.	4.4	26
90	Spectral Types and Radial Velocities in the Galactic Cluster NGC 3293. Monthly Notices of the Royal Astronomical Society, 1958, 118, 618-630.	4.4	25

#	ARTICLE	IF	CITATIONS
91	A New Determination from OB Stars of the Galactic Rotation Constants and the Distance to the Galactic Centre. <i>Monthly Notices of the Royal Astronomical Society</i> , 1974, 167, 621-634.	4.4	25
92	CH stars in the Large Magellanic Cloud and in our Galaxy. <i>Monthly Notices of the Royal Astronomical Society</i> , 1992, 259, 6-16.	4.4	25
93	The case for asymmetric dust around a C-rich asymptotic giant branch star. <i>Monthly Notices of the Royal Astronomical Society</i> , 2003, 346, 878-884.	4.4	25
94	Infra-red Photometry of Some Old Novae. <i>Monthly Notices of the Royal Astronomical Society</i> , 1974, 167, 81-85.	4.4	24
95	Discovery of the first symbiotic star in NGC $\epsilon$ f6822 <sup>a</sup> ... <sup>b</sup> . <i>Monthly Notices of the Royal Astronomical Society</i> , 2009, 395, 1121-1126.	4.4	24
96	The yellow hypergiant HR 5171 A: Resolving a massive interacting binary in the common envelope phase. <i>Astronomy and Astrophysics</i> , 2014, 563, A71.	5.1	24
97	A Note on the Spectra of Some Variable Stars in the Magellanic Cloud. <i>Monthly Notices of the Royal Astronomical Society</i> , 1956, 116, 583-586.	4.4	23
98	Recent changes in the optical, infrared and radio emission from Circinus X-I. <i>Monthly Notices of the Royal Astronomical Society</i> , 1980, 191, 293-299.	4.4	23
99	Peculiar Object near X2+5. <i>Nature: Physical Science</i> , 1973, 245, 39-40.	0.8	22
100	The infrared variability and nature of symbiotic stars - III. R Aquarii. <i>Monthly Notices of the Royal Astronomical Society</i> , 1983, 203, 351-361.	4.4	22
101	The ALMA detection of CO rotational line emission in AGB stars in the Large Magellanic Cloud. <i>Astronomy and Astrophysics</i> , 2016, 596, A50.	5.1	22
102	47 Tucanae: Radial Velocities and Spectral Types of Individual Stars. <i>Monthly Notices of the Royal Astronomical Society</i> , 1960, 120, 463-482.	4.4	21
103	Photometry and Spectroscopy of Red Variables in Omega Centauri. <i>Monthly Notices of the Royal Astronomical Society</i> , 1972, 159, 337-348.	4.4	21
104	The Luminosities of the Beta Canis Majoris Variables, the Zero Age Main Sequence and the Distance of the Sco-cen Association. <i>Monthly Notices of the Royal Astronomical Society</i> , 1975, 172, 191-203.	4.4	21
105	Bias in absolute magnitude determination from parallaxes. <i>Monthly Notices of the Royal Astronomical Society</i> , 2002, 337, 1035-1037.	4.4	21
106	The infrared spectrum and variability of Eta Carinae. <i>Monthly Notices of the Royal Astronomical Society</i> , 1983, 203, 385-392.	4.4	20
107	Metal-rich carbon stars in the Sagittarius dwarf spheroidal galaxy. <i>Monthly Notices of the Royal Astronomical Society</i> , 2009, 396, 598-608.	4.4	20
108	The Schumann-Runge O2Emission Bands in the Region 3100 Å-2500 Å. <i>Proceedings of the Physical Society Section A</i> , 1950, 63, 549-556.	1.1	19
