#	ARTICLE	IF	CITATIONS
1	Interoception and Mental Health: A Roadmap. <i>Biological Psychiatry: Cognitive Neuroscience and Neuroimaging</i> , 2018, 3, 501-513.	1.5	524
2	Symptoms and the body: Taking the inferential leap. <i>Neuroscience and Biobehavioral Reviews</i> , 2017, 74, 185-203.	6.1	323
3	Contingency awareness in evaluative conditioning: A case for unaware affective-evaluative learning. <i>Cognition and Emotion</i> , 1990, 4, 3-18.	2.0	267
4	Flavor-flavor and color-flavor conditioning in humans. <i>Learning and Motivation</i> , 1990, 21, 434-455.	1.2	231
5	Human evaluative conditioning: Acquisition trials, presentation schedule, evaluative style and contingency awareness. <i>Behaviour Research and Therapy</i> , 1992, 30, 133-142.	3.1	214
6	Persistent Physical Symptoms as Perceptual Dysregulation: A Neuropsychobehavioral Model and Its Clinical Implications. <i>Psychosomatic Medicine</i> , 2018, 80, 422-431.	2.0	180
7	Food-related personality traits, food choice motives and food intake: Mediator and moderator relationships. <i>Food Quality and Preference</i> , 2005, 16, 714-726.	4.6	170
8	Once in contact always in contact: Evaluative conditioning is resistant to extinction. <i>Advances in Behaviour Research and Therapy</i> , 1988, 10, 179-199.	3.0	166
9	Extinction, generalization, and return of fear: A critical review of renewal research in humans. <i>Biological Psychology</i> , 2013, 92, 51-58.	2.2	134
10	Inaccurate perception of asthma symptoms: A cognitive affective framework and implications for asthma treatment. <i>Clinical Psychology Review</i> , 2009, 29, 317-327.	11.4	131
11	Learning to have Psychosomatic Complaints. <i>Psychosomatic Medicine</i> , 1997, 59, 13-23.	2.0	127
12	Respiratory Changes in Response to Cognitive Load: A Systematic Review. <i>Neural Plasticity</i> , 2016, 2016, 1-16.	2.2	126
13	Pain and respiration: a systematic review. <i>Pain</i> , 2017, 158, 995-1006.	4.2	118
14	Sigh rate and respiratory variability during mental load and sustained attention. <i>Psychophysiology</i> , 2011, 48, 117-120.	2.4	111
15	The content of learning in human evaluative conditioning: Acquired valence is sensitive to US-revaluation. <i>Learning and Motivation</i> , 1992, 23, 200-224.	1.2	105
16	Dyspnea Perception in COPD. <i>Chest</i> , 2011, 140, 618-625.	0.8	105
17	Affective Instability in Daily Life Is Predicted by Resting Heart Rate Variability. <i>PLoS ONE</i> , 2013, 8, e81536.	2.5	104
18	Dyspnea: The role of psychological processes. <i>Clinical Psychology Review</i> , 2004, 24, 557-581.	11.4	103

#	ARTICLE	IF	CITATIONS
19	Accuracy of respiratory symptom perception in different affective contexts. <i>Journal of Psychosomatic Research</i> , 2005, 58, 537-543.	2.6	102
20	The Food Choice Questionnaire: Factorial invariant over western urban populations?. <i>Food Quality and Preference</i> , 2006, 17, 344-352.	4.6	101
21	Stress Reduction Through Psychoeducation. <i>Health Education and Behavior</i> , 2012, 39, 474-485.	2.5	95
22	High symptom reporters are less interoceptively accurate in a symptom-related context. <i>Journal of Psychosomatic Research</i> , 2008, 65, 417-424.	2.6	92
23	Understanding fear of pain in chronic pain: Interoceptive fear conditioning as a novel approach. <i>European Journal of Pain</i> , 2011, 15, 889-894.	2.8	92
24	Accuracy and bias in retrospective symptom reporting. <i>Current Opinion in Psychiatry</i> , 2016, 29, 302-308.	6.3	85
25	Learning subjective health complaints. <i>Scandinavian Journal of Psychology</i> , 2002, 43, 147-152.	1.5	83
26	Generalization of Acquired Somatic Symptoms in Response to Odors: A Pavlovian Perspective on Multiple Chemical Sensitivity. <i>Psychosomatic Medicine</i> , 2000, 62, 751-759.	2.0	81
27	Hyperventilation beyond fight/flight: Respiratory responses during emotional imagery. <i>Psychophysiology</i> , 2001, 38, 961-968.	2.4	79
28	Respiratory learning and somatic complaints: A conditioning approach using CO2-enriched air inhalation. <i>Behaviour Research and Therapy</i> , 1995, 33, 517-527.	3.1	77
29	Distorted symptom perception in patients with medically unexplained symptoms.. <i>Journal of Abnormal Psychology</i> , 2010, 119, 226-234.	1.9	77
30	Negative affectivity and enhanced symptom reports: Differentiating between symptoms in men and women. <i>Social Science and Medicine</i> , 2005, 61, 1835-1845.	3.8	72
31	Letters from the heart: Affective categorization of letter combinations in typists and nontypists.. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 1990, 16, 1153-1161.	0.9	68
32	Resting Heart Rate Variability Predicts Safety Learning and Fear Extinction in an Interoceptive Fear Conditioning Paradigm. <i>PLoS ONE</i> , 2014, 9, e105054.	2.5	68
33	Respiratory variability and sighing: A psychophysiological reset model. <i>Biological Psychology</i> , 2013, 93, 24-32.	2.2	64
34	The influence of CS-UCS perceptual similarity/dissimilarity on human evaluative learning and signal learning. <i>Learning and Motivation</i> , 1989, 20, 322-333.	1.2	60
35	Acquiring Symptoms in Response to Odors: A Learning Perspective on Multiple Chemical Sensitivity. <i>Annals of the New York Academy of Sciences</i> , 2001, 933, 278-290.	3.8	60
36	Illness-specific catastrophic thinking and overperception in asthma.. <i>Health Psychology</i> , 2008, 27, 93-99.	1.6	60

#	ARTICLE	IF	CITATIONS
37	Can Subjective Asthma Symptoms Be Learned?. <i>Psychosomatic Medicine</i> , 2005, 67, 454-461.	2.0	59
38	Negative affect, respiratory reactivity, and somatic complaints in a CO2 enriched air inhalation paradigm. <i>Biological Psychology</i> , 1998, 49, 109-122.	2.2	57
39	Better Safe Than Sorry: A Common Signature of General Vulnerability for Psychopathology. <i>Perspectives on Psychological Science</i> , 2021, 16, 225-246.	9.0	57
40	Memory effects on symptom reporting in a respiratory learning paradigm.. <i>Health Psychology</i> , 1998, 17, 241-248.	1.6	56
41	Idiopathic Environmental Intolerance: A Comprehensive Model. <i>Clinical Psychological Science</i> , 2017, 5, 551-567.	4.0	55
42	Empowerment implementation: enhancing fidelity and adaptation in a psycho-educational intervention. <i>Health Promotion International</i> , 2014, 29, 212-222.	1.8	53
43	Negative affective pictures can elicit physical symptoms in high habitual symptom reporters. <i>Psychology and Health</i> , 2010, 25, 685-698.	2.2	52
44	Repetition and Boredom in a Perceptual Fluency/ Attributional Model of Affective Judgements. <i>Cognition and Emotion</i> , 1998, 12, 533-553.	2.0	50
45	Illness and symptom perception: A theoretical approach towards an integrative measurement model. <i>Clinical Psychology Review</i> , 2011, 31, 428-439.	11.4	49
46	Categorical Interoception. <i>Psychological Science</i> , 2014, 25, 1059-1066.	3.3	49
47	Accuracy of respiratory symptom perception in persons with high and low negative affectivity. <i>Psychology and Health</i> , 2004, 19, 213-222.	2.2	48
48	Are media reports able to cause somatic symptoms attributed to WiFi radiation? An experimental test of the negative expectation hypothesis. <i>Environmental Research</i> , 2017, 156, 265-271.	7.5	48
49	A sigh following sustained attention and mental stress: Effects on respiratory variability. <i>Physiology and Behavior</i> , 2012, 107, 1-6.	2.1	47
50	Learning to fear suffocation: A new paradigm for interoceptive fear conditioning. <i>Psychophysiology</i> , 2012, 49, 821-828.	2.4	43
51	Circadian Rhythm of Autonomic Cardiovascular Control During Mars500 Simulated Mission to Mars. <i>Aviation, Space, and Environmental Medicine</i> , 2013, 84, 1023-1028.	0.5	43
52	Anxiety and respiratory variability. <i>Physiology and Behavior</i> , 2006, 89, 189-195.	2.1	42
53	Learning to fear obstructed breathing: Comparing interoceptive and exteroceptive cues. <i>Biological Psychology</i> , 2013, 92, 36-42.	2.2	41
54	Was it so bad? The role of retrospective memory in symptom reporting.. <i>Health Psychology</i> , 2015, 34, 1166-1174.	1.6	40

#	ARTICLE	IF	CITATIONS
55	Fear-relevant images as conditioned stimuli for somatic complaints, respiratory behavior, and reduced end-tidal pCO ₂ . Journal of Abnormal Psychology, 1999, 108, 143-152.	1.9	39
56	Inducing symptoms in high symptom reporters via emotional pictures: The interactive effects of valence and arousal. Journal of Psychosomatic Research, 2013, 74, 191-196.	2.6	38
57	Influence of Interoceptive Fear Learning on Visceral Perception. Psychosomatic Medicine, 2016, 78, 248-258.	2.0	38
58	Respiratory variability preceding and following sighs: A resetter hypothesis. Biological Psychology, 2010, 84, 82-87.	2.2	37
59	Hyperventilation and attention: effects of hypocapnia on performance in a Stroop task. Biological Psychology, 2000, 53, 233-252.	2.2	36
60	Negative affectivity and bodily sensations induced by 5.5% CO ₂ enriched air inhalation: Is there a bias to interpret bodily sensations negatively in persons with negative affect?. Psychology and Health, 2000, 15, 513-525.	2.2	34
61	Learning to drive safely: Social-cognitive responses are predictive of performance rated by novice drivers and their instructors. Transportation Research Part F: Traffic Psychology and Behaviour, 2005, 8, 59-74.	3.7	34
62	Dyspnea-related anxiety: The Dutch version of the Breathlessness Beliefs Questionnaire. Chronic Respiratory Disease, 2011, 8, 11-19.	2.4	34
63	Interoception and symptom reporting: disentangling accuracy and bias. Frontiers in Psychology, 2015, 06, 732.	2.1	34
64	A European Research Agenda for Somatic Symptom Disorders, Bodily Distress Disorders, and Functional Disorders: Results of an Estimate-Talk-Estimate Delphi Expert Study. Frontiers in Psychiatry, 2018, 9, 151.	2.6	34
65	Persistent SOMATIC symptoms ACROSS diseases – from risk factors to modification: scientific framework and overarching protocol of the interdisciplinary SOMACROSS research unit (RU 5211). BMJ Open, 2022, 12, e057596.	1.9	33
66	Defense reactions to interoceptive threats: A comparison between loaded breathing and aversive picture viewing. Biological Psychology, 2010, 84, 98-103.	2.2	32
67	On the Psychology of Cough. Lung, 2012, 190, 55-61.	3.3	32
68	Observing dyspnoea in others elicits dyspnoea, negative affect and brain responses. European Respiratory Journal, 2018, 51, 1702682.	6.7	32
69	The relation between conspiracism, government trust, and COVID-19 vaccination intentions: The key role of motivation. Social Science and Medicine, 2022, 301, 114926.	3.8	32
70	Individual differences in cardiorespiratory measures of mental workload: An investigation of negative affectivity and cognitive avoidant coping in pilot candidates. Applied Ergonomics, 2017, 59, 274-282.	3.1	31
71	Reduced neural gating of respiratory sensations is associated with increased dyspnoea perception. European Respiratory Journal, 2018, 52, 1800559.	6.7	31
72	Sigh rate and respiratory variability during normal breathing and the role of negative affectivity. International Journal of Psychophysiology, 2011, 82, 175-179.	1.0	29

#	ARTICLE	IF	CITATIONS
73	Repeated experiences of air hunger and ventilatory behavior in response to hypercapnia in the standardized rebreathing test: Effects of anxiety. <i>Biological Psychology</i> , 2008, 77, 223-232.	2.2	28
74	Repeated Breathlessness Experiences Induced by Hypercapnia. <i>Chest</i> , 2009, 135, 455-461.	0.8	28
75	Can words heal? Using affect labeling to reduce the effects of unpleasant cues on symptom reporting. <i>Frontiers in Psychology</i> , 2014, 5, 807.	2.1	28
76	Unraveling the Relationship between Trait Negative Affectivity and Habitual Symptom Reporting. <i>PLoS ONE</i> , 2015, 10, e0115748.	2.5	28
77	Emotion, sighing, and respiratory variability. <i>Psychophysiology</i> , 2015, 52, 657-666.	2.4	28
78	The motilin receptor agonist erythromycin stimulates hunger and food intake through a cholinergic pathway. <i>American Journal of Clinical Nutrition</i> , 2016, 103, 730-737.	4.7	28
79	The role of respiratory measures to assess mental load in pilot selection. <i>Ergonomics</i> , 2016, 59, 745-753.	2.1	28
80	Inducing Somatic Symptoms in Functional Syndrome Patients: Effects of Manipulating State Negative Affect. <i>Psychosomatic Medicine</i> , 2017, 79, 1000-1007.	2.0	28
81	A sigh of relief or a sigh to relieve: The psychological and physiological relief effect of deep breaths. <i>Physiology and Behavior</i> , 2016, 165, 127-135.	2.1	27
82	Enhancing Placebo Effects in Somatic Symptoms Through Oxytocin. <i>Psychosomatic Medicine</i> , 2018, 80, 353-360.	2.0	27
83	Imagined Risk of Suffocation as a Trigger for Hyperventilation. <i>Psychosomatic Medicine</i> , 2005, 67, 813-819.	2.0	26
84	Context-evoked overperception in asthma. <i>Psychology and Health</i> , 2007, 22, 737-748.	2.2	26
85	A Study of the Relationship Among Self-Reported Noncompliance, Symptomatology, and Psychological Variables in Patients with Asthma. <i>Journal of Asthma</i> , 2000, 37, 503-510.	1.7	25
86	Sleep-Wake Differences in Heart Rate Variability During a 105-Day Simulated Mission to Mars. <i>Aviation, Space, and Environmental Medicine</i> , 2012, 83, 125-130.	0.5	25
87	Psychophysiological responses to CO2 inhalation. <i>International Journal of Psychophysiology</i> , 2012, 84, 45-50.	1.0	24
88	Do not worry, be mindful: Effects of induced worry and mindfulness on respiratory variability in a nonanxious population. <i>International Journal of Psychophysiology</i> , 2013, 87, 147-151.	1.0	23
89	Can Slow Deep Breathing Reduce Pain? An Experimental Study Exploring Mechanisms. <i>Journal of Pain</i> , 2020, 21, 1018-1030.	1.4	23
90	Predicting vaccine uptake during COVID-19 crisis: A motivational approach. <i>Vaccine</i> , 2022, 40, 288-297.	3.8	23

#	ARTICLE	IF	CITATIONS
91	Predictability and perceived control during 5.5% CO ₂ -enriched air inhalation in high and low anxious subjects. <i>Journal of Anxiety Disorders</i> , 1993, 7, 61-73.	3.2	22
92	Sensitization in Medically Unexplained Dyspnea. <i>Chest</i> , 2012, 141, 989-995.	0.8	22
93	Overgeneral autobiographical memory predicts changes in depression in a community sample. <i>Cognition and Emotion</i> , 2014, 28, 1303-1312.	2.0	22
94	Geriatric dyspnea: Doing worse, feeling better. <i>Ageing Research Reviews</i> , 2014, 15, 94-99.	10.9	22
95	Attentional Modulation of Reflex Cough. <i>Chest</i> , 2014, 146, 135-141.	0.8	22
96	Symptom Perception From a Predictive Processing Perspective. <i>Clinical Psychology in Europe</i> , 2019, 1, .	1.1	22
97	Peak-End Memory Bias in Laboratory-Induced Dyspnea. <i>Psychosomatic Medicine</i> , 2012, 74, 974-981.	2.0	21
98	Defensive activation to (un)predictable interoceptive threat: The NPU respiratory threat test (NPUr). <i>Psychophysiology</i> , 2016, 53, 905-913.	2.4	21
99	Perception of induced dyspnea in fibromyalgia and chronic fatigue syndrome. <i>Journal of Psychosomatic Research</i> , 2018, 106, 49-55.	2.6	21
100	Psychophysiological responses to inspiratory resistive loads. <i>International Journal of Psychophysiology</i> , 2011, 80, 161-165.	1.0	20
101	Breath holding duration as a measure of distress tolerance: examining its relation to measures of executive control. <i>Frontiers in Psychology</i> , 2013, 4, 483.	2.1	20
102	Healing Words: Using Affect Labeling to Reduce the Effects of Unpleasant Cues on Symptom Reporting in IBS Patients. <i>International Journal of Behavioral Medicine</i> , 2015, 22, 512-520.	1.7	20
103	The impact of dyspnea and threat of dyspnea on error processing. <i>Psychophysiology</i> , 2019, 56, e13278.	2.4	19
104	“Symptoms associated with environmental factors” (SAEF) – Towards a paradigm shift regarding “idiopathic environmental intolerance” and related phenomena. <i>Journal of Psychosomatic Research</i> , 2020, 131, 109955.	2.6	19
105	Symptoms, Lung Function, and Perception of Asthma Control: An Exploration into the Heterogeneity of the Asthma Control Construct. <i>Journal of Asthma</i> , 2012, 49, 63-69.	1.7	18
106	Fear of suffocation alters respiration during obstructed breathing. <i>Psychophysiology</i> , 2012, 49, 829-832.	2.4	18
107	Anxiety, pCO ₂ and cerebral blood flow. <i>International Journal of Psychophysiology</i> , 2013, 89, 72-77.	1.0	18
108	Generalization of Fear to Respiratory Sensations. <i>Behavior Therapy</i> , 2015, 46, 611-626.	2.4	18

#	ARTICLE	IF	CITATIONS
109	Sensory and affective components of symptom perception. <i>Journal of Experimental Psychopathology</i> , 2018, 9, jep.059716.	0.8	18
110	Adherence to COVID-19 measures: The critical role of autonomous motivation on a short- and long-term basis.. <i>Motivation Science</i> , 2021, 7, 487-496.	1.6	18
111	The impact of harmfulness information on citric acid induced cough and urge-to-cough. <i>Pulmonary Pharmacology and Therapeutics</i> , 2015, 31, 9-14.	2.6	17
112	Endogenous Pain Modulation: Association with Resting Heart Rate Variability and Negative Affectivity. <i>Pain Medicine</i> , 2018, 19, 1587-1596.	1.9	17
113	The presence of others reduces dyspnea and cortical neural processing of respiratory sensations. <i>Biological Psychology</i> , 2019, 140, 48-54.	2.2	17
114	Feeling Lightheaded: The Role of Cerebral Blood Flow. <i>Psychosomatic Medicine</i> , 2010, 72, 672-680.	2.0	16
115	The impairing effect of dyspnea on response inhibition. <i>International Journal of Psychophysiology</i> , 2018, 133, 41-49.	1.0	15
116	The Impact of Unpredictability on Dyspnea Perception, Anxiety and Interoceptive Error Processing. <i>Frontiers in Physiology</i> , 2019, 10, 535.	2.8	15
117	Intrinsic functional brain connectivity patterns underlying enhanced interoceptive sensibility. <i>Journal of Affective Disorders</i> , 2020, 276, 804-814.	4.1	15
118	“My mind's made up by the way that I feel”: affect, cognition and intention in the structure of attitude toward condom use. <i>Health Education Research</i> , 1997, 12, 15-24.	1.9	14
119	Hyperventilation in patients with chronic fatigue syndrome: The role of coping strategies. <i>Behaviour Research and Therapy</i> , 2007, 45, 2679-2690.	3.1	14
120	Interoceptive fear learning to mild breathlessness as a laboratory model for unexpected panic attacks. <i>Frontiers in Psychology</i> , 2015, 6, 1150.	2.1	14
121	Ways of encoding somatic information and their effects on retrospective symptom reporting. <i>British Journal of Health Psychology</i> , 2017, 22, 362-378.	3.5	14
122	Modeling the development of panic disorder with interoceptive conditioning. <i>European Neuropsychopharmacology</i> , 2017, 27, 59-69.	0.7	14
123	Perception and misperception of bodily symptoms from an active inference perspective: Modelling the case of panic disorder.. <i>Psychological Review</i> , 2021, 128, 690-710.	3.8	14
124	The Language of Medically Unexplained Dyspnea. <i>Chest</i> , 2008, 133, 961-968.	0.8	13
125	Differentiating progress in a clinical group of fibromyalgia patients during and following a multicomponent treatment program. <i>Journal of Psychosomatic Research</i> , 2017, 98, 47-54.	2.6	13
126	Central Sensitization: Explanation or Phenomenon?. <i>Clinical Psychological Science</i> , 2018, 6, 761-764.	4.0	13

#	ARTICLE	IF	CITATIONS
127	Prospective study of nocebo effects related to symptoms of idiopathic environmental intolerance attributed to electromagnetic fields (IEI-EMF). <i>Environmental Research</i> , 2020, 190, 110019.	7.5	13
128	The Interoceptive Sensitivity and Attention Questionnaire: Evaluating Aspects of Self-Reported Interoception in Patients With Persistent Somatic Symptoms, Stress-Related Syndromes, and Healthy Controls. <i>Psychosomatic Medicine</i> , 2022, 84, 251-260.	2.0	13
129	Affective modulation of inspiratory motor drive. <i>Psychophysiology</i> , 2009, 46, 12-16.	2.4	12
130	Social comparison and anxious mood in pulmonary rehabilitation: The role of cognitive focus. <i>British Journal of Health Psychology</i> , 2012, 17, 463-476.	3.5	12
131	Reduced memory specificity predicts the acquisition of problem solving skills in psychoeducation. <i>Journal of Behavior Therapy and Experimental Psychiatry</i> , 2013, 44, 135-140.	1.2	12
132	Interoception and the uneasiness of the mind: affect as perceptual style. <i>Frontiers in Psychology</i> , 2015, 6, 1408.	2.1	12
133	Home nurses and patient depression. Attitudes, competences and the effects of a minimal intervention. <i>Journal of Advanced Nursing</i> , 2015, 71, 126-135.	3.3	11
134	The error-related negativity for error processing in interoception. <i>NeuroImage</i> , 2019, 184, 386-395.	4.2	11
135	The influence of fear of symptoms and perceived control on asthma symptom perception. <i>Journal of Psychosomatic Research</i> , 2011, 71, 154-159.	2.6	10
136	Predicting Asthma Treatment Outcome at Diagnosis: The Role of Symptom Perception during a Histamine Challenge Test. <i>Journal of Asthma</i> , 2012, 49, 230-236.	1.7	10
137	Respiratory hypoalgesia? Breath-holding, but not respiratory phase modulates nociceptive flexion reflex and pain intensity. <i>International Journal of Psychophysiology</i> , 2016, 101, 50-58.	1.0	10
138	The Specificity of Health-Related Autobiographical Memories in Patients With Somatic Symptom Disorder. <i>Psychosomatic Medicine</i> , 2017, 79, 43-49.	2.0	10
139	The Effects of Repeated Dyspnea Exposure on Response Inhibition. <i>Frontiers in Physiology</i> , 2019, 10, 663.	2.8	10
140	Categorical interoception and the role of threat. <i>International Journal of Psychophysiology</i> , 2020, 148, 25-34.	1.0	10
141	Olfactory classical conditioning in neonatal mouse pups using thermal stimuli. <i>Behavioural Brain Research</i> , 2012, 229, 250-256.	2.2	9
142	Learning to breathe? Feedforward regulation of the inspiratory motor drive. <i>Respiratory Physiology and Neurobiology</i> , 2014, 201, 1-6.	1.6	9
143	Emotional disorders in adult mice heterozygous for the transcription factor <i>Phox2b</i> . <i>Physiology and Behavior</i> , 2015, 141, 120-126.	2.1	9
144	A psychometric evaluation of a Dutch version of the Job Content Questionnaire and of a short direct questioning procedure. <i>Work and Stress</i> , 2001, 15, 131-143.	4.5	8
