

Lidia Struzynska

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/6705935/lidia-struzynska-publications-by-year.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

48
papers

1,083
citations

#	Paper	IF	Citations
48	Alterations in the transcriptional profile of genes related to glutamatergic signalling in animal models of Alzheimer's disease. The effect of fingolimod.. <i>Folia Neuropathologica</i> , 2022 , 60, 10-23	2.6	
47	Early and Delayed Impact of Nanosilver on the Glutamatergic NMDA Receptor Complex in Immature Rat Brain. <i>International Journal of Molecular Sciences</i> , 2021 , 22,	6.3	3
46	Response of immature rats to a low dose of nanoparticulate silver: Alterations in behavior, cerebral vasculature-related transcriptome and permeability. <i>Ecotoxicology and Environmental Safety</i> , 2021 , 208, 111416	7	2
45	Dysfunctional glia: contributors to neurodegenerative disorders. <i>Neural Regeneration Research</i> , 2021 , 16, 218-222	4.5	4
44	Astroglial and Microglial Purinergic P2X7 Receptor as a Major Contributor to Neuroinflammation during the Course of Multiple Sclerosis. <i>International Journal of Molecular Sciences</i> , 2021 , 22,	6.3	5
43	Nanosystems and exosomes as future approaches in treating multiple sclerosis. <i>European Journal of Neuroscience</i> , 2021 , 54, 7377-7404	3.5	1
42	Prolonged inflammation leads to ongoing damage after spinal cord injury. <i>PLoS ONE</i> , 2020 , 15, e0226584	3.7	30
41	A Low Dose of Nanoparticulate Silver Induces Mitochondrial Dysfunction and Autophagy in Adult Rat Brain. <i>Neurotoxicity Research</i> , 2020 , 38, 650-664	4.3	14
40	Early Postnatal Exposure to a Low Dose of Nanoparticulate Silver Induces Alterations in Glutamate Transporters in Brain of Immature Rats. <i>International Journal of Molecular Sciences</i> , 2020 , 21,	6.3	4
39	Silver, Ag 2019 , 655-691		
38	Astroglial contribution to tau-dependent neurodegeneration. <i>Biochemical Journal</i> , 2019 , 476, 3493-3504	5.8	11
37	Early P2X7R-dependent activation of microglia during the asymptomatic phase of autoimmune encephalomyelitis. <i>Inflammopharmacology</i> , 2019 , 27, 129-137	5.1	9
36	Prolonged Exposure to Silver Nanoparticles Results in Oxidative Stress in Cerebral Myelin. <i>Neurotoxicity Research</i> , 2019 , 35, 495-504	4.3	31
35	Mechanisms Underlying Neurotoxicity of Silver Nanoparticles. <i>Advances in Experimental Medicine and Biology</i> , 2018 , 1048, 227-250	3.6	24
34	Administration of an antagonist of P2X7 receptor to EAE rats prevents a decrease of expression of claudin-5 in cerebral capillaries. <i>Purinergic Signalling</i> , 2018 , 14, 385-393	3.8	12
33	Ultrastructural and biochemical features of cerebral microvessels of adult rat subjected to a low dose of silver nanoparticles. <i>Toxicology</i> , 2018 , 408, 31-38	4.4	12
32	Blockade of the kinin B1 receptor affects the cytokine/chemokine profile in rat brain subjected to autoimmune encephalomyelitis. <i>Inflammopharmacology</i> , 2017 , 25, 459-469	5.1	2

31	Influence of a low dose of silver nanoparticles on cerebral myelin and behavior of adult rats. <i>Toxicology</i> , 2016 , 363-364, 29-36	4.4	25
30	Perinatal exposure to lead (Pb) induces ultrastructural and molecular alterations in synapses of rat offspring. <i>Toxicology</i> , 2016 , 373, 13-29	4.4	49
29	Zinc Modulates Nanosilver-Induced Toxicity in Primary Neuronal Cultures. <i>Neurotoxicity Research</i> , 2016 , 29, 325-43	4.3	17
28	Early P2X7R-related astrogliosis in autoimmune encephalomyelitis. <i>Molecular and Cellular Neurosciences</i> , 2016 , 74, 1-9	4.8	33
27	Perinatal exposure to lead (Pb) promotes Tau phosphorylation in the rat brain in a GSK-3 β and CDK5 dependent manner: Relevance to neurological disorders. <i>Toxicology</i> , 2016 , 347-349, 17-28	4.4	43
26	Oxidative stress in rat brain but not in liver following oral administration of a low dose of nanoparticulate silver. <i>Food and Chemical Toxicology</i> , 2016 , 97, 307-315	4.7	40
25	Synaptic degeneration in rat brain after prolonged oral exposure to silver nanoparticles. <i>NeuroToxicology</i> , 2015 , 46, 145-54	4.4	74
24	Toxic effects of silver nanoparticles in mammals--does a risk of neurotoxicity exist?. <i>Folia Neuropathologica</i> , 2015 , 53, 281-300	2.6	28
23	The influence of glutamatergic receptor antagonists on biochemical and ultrastructural changes in myelin membranes of rats subjected to experimental autoimmune encephalomyelitis. <i>Folia Neuropathologica</i> , 2015 , 53, 317-26	2.6	2
22	The role of the glutamatergic NMDA receptor in nanosilver-evoked neurotoxicity in primary cultures of cerebellar granule cells. <i>Toxicology</i> , 2014 , 315, 38-48	4.4	51
21	Markers of oxidative stress in hepatopancreas of crayfish (<i>Orconectes limosus</i> , raf) experimentally exposed to nanosilver. <i>Environmental Toxicology</i> , 2014 , 29, 1283-91	4.2	12
20	Modulation of glutamate transport and receptor binding by glutamate receptor antagonists in EAE rat brain. <i>PLoS ONE</i> , 2014 , 9, e113954	3.7	32
19	Effects of antagonists of glutamate receptors on pro-inflammatory cytokines in the brain cortex of rats subjected to experimental autoimmune encephalomyelitis. <i>Journal of Neuroimmunology</i> , 2013 , 261, 67-76	3.5	35
18	Modulation of neurological deficits and expression of glutamate receptors during experimental autoimmune encephalomyelitis after treatment with selected antagonists of glutamate receptors. <i>BioMed Research International</i> , 2013 , 2013, 186068	3	13
17	Aroclor 1254 selectively inhibits expression of glial GLT-1 glutamate transporter in the forebrain of chronically exposed adult rat. <i>Toxicology</i> , 2012 , 300, 12-8	4.4	9
16	Repeated exposure of adult rats to Aroclor 1254 induces neuronal injury and impairs the neurochemical manifestations of the NMDA receptor-mediated intracellular signaling in the hippocampus. <i>NeuroToxicology</i> , 2012 , 33, 16-22	4.4	11
15	Regional changes in purines and selected purinergic receptors in immature rat brain exposed to lead. <i>Toxicology</i> , 2011 , 279, 100-7	4.4	15
14	Ultrastructural and immunochemical studies of glial scar formation in diabetic rats. <i>Acta Neurochirurgica Supplementum</i> , 2010 , 106, 251-5	1.7	

13	Temporal expression of P2X7 purinergic receptor during the course of experimental autoimmune encephalomyelitis. <i>Neurochemistry International</i> , 2010 , 57, 823-9	4.4	25
12	A glutamatergic component of lead toxicity in adult brain: the role of astrocytic glutamate transporters. <i>Neurochemistry International</i> , 2009 , 55, 151-6	4.4	43
11	Alterations in glutamate transport and group I metabotropic glutamate receptors in the rat brain during acute phase of experimental autoimmune encephalomyelitis 2009 , 47, 329-37		12
10	Inflammation-like glial response in lead-exposed immature rat brain. <i>Toxicological Sciences</i> , 2007 , 95, 156-62	4.4	78
9	Changes in expression of neuronal and glial glutamate transporters in lead-exposed adult rat brain. <i>Neurochemistry International</i> , 2005 , 47, 326-33	4.4	19
8	The role of astroglia in Pb-exposed adult rat brain with respect to glutamate toxicity. <i>Toxicology</i> , 2005 , 212, 185-94	4.4	32
7	CNPase activity in myelin from adult rat brains after prolonged lead exposure in vivo. <i>Chemico-Biological Interactions</i> , 2004 , 150, 171-8	5	8
6	Relationships between glutamine, glutamate, and GABA in nerve endings under Pb-toxicity conditions. <i>Journal of Inorganic Biochemistry</i> , 2004 , 98, 951-8	4.2	50
5	Astrocytic response in the rodent model of global cerebral ischemia and during reperfusion. <i>Experimental and Toxicologic Pathology</i> , 2002 , 54, 31-8		11
4	Lead stimulates the glutathione system in selective regions of rat brain. <i>Folia Neuropathologica</i> , 2002 , 40, 203-9	2.6	16
3	Astroglial reaction during the early phase of acute lead toxicity in the adult rat brain. <i>Toxicology</i> , 2001 , 165, 121-31	4.4	66
2	Lead-induced abnormalities in blood-brain barrier permeability in experimental chronic toxicity. <i>Molecular and Chemical Neuropathology</i> , 1997 , 31, 207-24		57
1	Does lead provoke the peroxidation process in rat brain synaptosomes?. <i>Molecular and Chemical Neuropathology</i> , 1996 , 29, 127-39		13
