#	ARTICLE	IF	CITATIONS
1	Characterization of a porcine intestinal epithelial cell line for in vitro studies of microbial pathogenesis in swine. <i>Histochemistry and Cell Biology</i> , 2006, 125, 293-305.	1.7	313
2	A High Amount of Dietary Zinc Changes the Expression of Zinc Transporters and Metallothionein in Jejunal Epithelial Cells in Vitro and in Vivo but Does Not Prevent Zinc Accumulation in Jejunal Tissue of Piglets. <i>Journal of Nutrition</i> , 2013, 143, 1205-1210.	2.9	61
3	Effects of <i>Enterococcus faecium</i> NCIMB 10415 as probiotic supplement on intestinal transport and barrier function of piglets. <i>Archives of Animal Nutrition</i> , 2006, 60, 35-48.	1.8	54
4	Effects of <i>Bacillus cereus</i> var. <i>toyoi</i> as probiotic feed supplement on intestinal transport and barrier function in piglets. <i>Archives of Animal Nutrition</i> , 2008, 62, 87-106.	1.8	46
5	Effects of diet and osmotic pressure on Na ⁺ transport and tissue conductance of sheep isolated rumen epithelium. <i>Experimental Physiology</i> , 2006, 91, 539-550.	2.0	43
6	<i>Enterococcus faecium</i> NCIMB 10415 Modulates Epithelial Integrity, Heat Shock Protein, and Proinflammatory Cytokine Response in Intestinal Cells. <i>Mediators of Inflammation</i> , 2015, 2015, 1-11.	3.0	32
7	Effects of the Probiotic <i>Enterococcus faecium</i> and Pathogenic <i>Escherichia coli</i> Strains in a Pig and Human Epithelial Intestinal Cell Model. <i>Scientifica</i> , 2015, 2015, 1-10.	1.7	25
8	Effects of Ex Vivo Infection with ETEC on Jejunal Barrier Properties and Cytokine Expression in Probiotic-Supplemented Pigs. <i>Digestive Diseases and Sciences</i> , 2017, 62, 922-933.	2.3	17
9	Regulation of intracellular Zn homeostasis in two intestinal epithelial cell models at various maturation time points. <i>Journal of Physiological Sciences</i> , 2015, 65, 317-328.	2.1	16
10	The Inflammatory Response to Enterotoxigenic <i>E. coli</i> and Probiotic <i>E. faecium</i> in a Coculture Model of Porcine Intestinal Epithelial and Dendritic Cells. <i>Mediators of Inflammation</i> , 2018, 2018, 1-16.	3.0	16
11	Altered Cytokine Expression and Barrier Properties after In Vitro Infection of Porcine Epithelial Cells with Enterotoxigenic <i>Escherichia coli</i> and Probiotic <i>Enterococcus faecium</i> . <i>Mediators of Inflammation</i> , 2017, 2017, 1-13.	3.0	13
12	Characterization of Inflammasome Components in Pig Intestine and Analysis of the Influence of Probiotic <i>Enterococcus Faecium</i> during an <i>Escherichia Coli</i> Challenge. <i>Immunological Investigations</i> , 2017, 46, 742-757.	2.0	12
13	Effects of a pathogenic ETEC strain and a probiotic <i>Enterococcus faecium</i> strain on the inflammasome response in porcine dendritic cells. <i>Veterinary Immunology and Immunopathology</i> , 2018, 203, 78-87.	1.2	11
14	Dose Effects of Apical versus Basolateral Zinc Supplementation on Epithelial Resistance, Viability, and Metallothionein Expression in Two Intestinal Epithelial Cell Lines. <i>Journal of Biochemical and Molecular Toxicology</i> , 2015, 29, 410-417.	3.0	5
15	Inflammatory Responses of Porcine MoDC and Intestinal Epithelial Cells in a Direct-Contact Co-culture System Following a Bacterial Challenge. <i>Inflammation</i> , 2020, 43, 552-567.	3.8	4
