#	ARTICLE	IF	CITATIONS
1	Enhancing rehabilitation of mechanically ventilated patients in the intensive care unit: A quality improvement project. <i>Journal of Critical Care</i> , 2015, 30, 13-18.	2.2	107
2	An Environmental Scan for Early Mobilization Practices in U.S. ICUs. <i>Critical Care Medicine</i> , 2015, 43, 2360-2369.	0.9	96
3	Intensive Care Unit Structure Variation and Implications for Early Mobilization Practices. An International Survey. <i>Annals of the American Thoracic Society</i> , 2016, 13, 1527-1537.	3.2	95
4	Surviving critical illness: what is next? An expert consensus statement on physical rehabilitation after hospital discharge. <i>Critical Care</i> , 2016, 20, 354.	5.8	89
5	Improving rehabilitation after critical illness through outpatient physiotherapy classes and essential amino acid supplement: A randomized controlled trial. <i>Journal of Critical Care</i> , 2015, 30, 901-907.	2.2	64
6	Rehabilitation Levels in Patients with COVID-19 Admitted to Intensive Care Requiring Invasive Ventilation. An Observational Study. <i>Annals of the American Thoracic Society</i> , 2021, 18, 122-129.	3.2	60
7	Earlier and enhanced rehabilitation of mechanically ventilated patients in critical care: A feasibility randomised controlled trial. <i>Journal of Critical Care</i> , 2018, 44, 407-412.	2.2	52
8	Feasibility and impact of a structured, exercise-based rehabilitation programme for intensive care survivors. <i>Physiotherapy Theory and Practice</i> , 2009, 25, 566-571.	1.3	51
9	Outpatient-based physical rehabilitation for survivors of prolonged critical illness: A randomized controlled trial. <i>Physiotherapy Theory and Practice</i> , 2016, 32, 179-190.	1.3	23
10	Exercise testing in survivors of intensive care—“is there a role for cardiopulmonary exercise testing?”. <i>Journal of Critical Care</i> , 2012, 27, 89-94.	2.2	22
11	The Sara Combilizer Â® as an early mobilisation aid for critically ill patients: A prospective before and after study. <i>Australian Critical Care</i> , 2017, 30, 189-195.	1.3	21
12	The feasibility of early pulmonary rehabilitation and activity after COPD exacerbations: external pilot randomised controlled trial, qualitative case study and exploratory economic evaluation. <i>Health Technology Assessment</i> , 2018, 22, 1-204.	2.8	21
13	Introducing early and structured rehabilitation in critical care: A quality improvement project. <i>Intensive and Critical Care Nursing</i> , 2019, 53, 79-83.	2.9	11
14	A comparison of earlier and enhanced rehabilitation of mechanically ventilated patients in critical care compared to standard care (REHAB): study protocol for a single-site randomised controlled feasibility trial. <i>Pilot and Feasibility Studies</i> , 2017, 3, 19.	1.2	5
15	Reading between the lines, the key to successfully implementing early rehabilitation in critical care. <i>Intensive and Critical Care Nursing</i> , 2017, 42, 5-7.	2.9	4
16	Prehospital physical function and strength can influence clinical outcomes of critically ill older adults. <i>Evidence-based Nursing</i> , 2018, 21, 74-74.	0.2	0
