

Harshinie Karunaratna

List of Publications by Citations

Source: <https://exaly.com/author-pdf/6743973/harshinie-karunaratna-publications-by-citations.pdf>
Version: 2024-04-09

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.
The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

78 papers	1,089 citations	18 h-index	29 g-index
107 ext. papers	1,322 ext. citations	2.8 avg, IF	4.95 L-index

#	Paper	IF	Citations
78	The effects of storm clustering on beach profile variability. <i>Marine Geology</i> , 2014 , 348, 103-112	3.3	94
77	A statistical-process based approach for modelling beach profile variability. <i>Coastal Engineering</i> , 2013 , 81, 19-29	4.8	66
76	Effects of storm clustering on beach/dune evolution. <i>Marine Geology</i> , 2015 , 370, 63-75	3.3	56
75	The cumulative impact of tidal stream turbine arrays on sediment transport in the Pentland Firth. <i>Renewable Energy</i> , 2015 , 80, 755-769	8.1	49
74	Modelling storm-induced beach/dune evolution: Sefton coast, Liverpool Bay, UK. <i>Marine Geology</i> , 2014 , 357, 225-242	3.3	45
73	An experimental study of rip channel flow. <i>Coastal Engineering</i> , 2002 , 45, 223-238	4.8	44
72	Long-term morphodynamic evolution of estuaries: An inverse problem. <i>Estuarine, Coastal and Shelf Science</i> , 2008 , 77, 385-395	2.9	43
71	A classification system for global wave energy resources based on multivariate clustering. <i>Applied Energy</i> , 2020 , 262, 114515	10.7	37
70	A Comparison of Numerical Modelling Techniques for Tidal Stream Turbine Analysis. <i>Energies</i> , 2015 , 8, 7833-7853	3.1	37
69	Comparison of storm cluster vs isolated event impacts on beach/dune morphodynamics. <i>Estuarine, Coastal and Shelf Science</i> , 2015 , 164, 301-312	2.9	33
68	Experimental study on vegetation flexibility as control parameter for wave damping and velocity structure. <i>Coastal Engineering</i> , 2020 , 157, 103648	4.8	32
67	Impacts of storm chronology on the morphological changes of the Formby beach and dune system, UK. <i>Natural Hazards and Earth System Sciences</i> , 2015 , 15, 1533-1543	3.9	32
66	An analysis of the cross-shore beach morphodynamics of a sandy and a composite gravel beach. <i>Marine Geology</i> , 2012 , 299-302, 33-42	3.3	23
65	Data-driven and hybrid coastal morphological prediction methods for mesoscale forecasting. <i>Geomorphology</i> , 2016 , 256, 49-67	4.3	22
64	Consistent Particle Method simulation of solitary wave impinging on and overtopping a seawall. <i>Engineering Analysis With Boundary Elements</i> , 2019 , 103, 160-171	2.6	21
63	Multi-timescale morphological modelling of a dune-fronted sandy beach. <i>Coastal Engineering</i> , 2018 , 136, 161-171	4.8	21
62	On the prediction of long-term morphodynamic response of estuarine systems to sea level rise and human interference. <i>Continental Shelf Research</i> , 2009 , 29, 938-950	2.4	20

61	Morphodynamics of sandy beaches under the influence of storm sequences: Current research status and future needs. <i>Water Science and Engineering</i> , 2019 , 12, 221-234	4	18
60	Investigation of pressure variations over stepped spillways using smooth particle hydrodynamics. <i>Advances in Water Resources</i> , 2014 , 66, 52-69	4.7	18
59	Annual down-glacier drainage of lakes and water-filled crevasses at Helheim Glacier, southeast Greenland. <i>Journal of Geophysical Research F: Earth Surface</i> , 2016 , 121, 1819-1833	3.8	18
58	A Boolean Approach to Prediction of Long-Term Evolution of Estuary Morphology. <i>Journal of Coastal Research</i> , 2008 , 2, 51-61	0.6	16
57	A new analysis of the Slapton barrier beach system, UK. <i>Proceedings of the Institution of Civil Engineers: Maritime Engineering</i> , 2005 , 158, 147-161	1.8	16
56	Modelling Extreme Wave Overtopping at Aberystwyth Promenade. <i>Water (Switzerland)</i> , 2017 , 9, 663	3	15
55	Beach profile evolution as an inverse problem. <i>Continental Shelf Research</i> , 2009 , 29, 2234-2239	2.4	15
54	Numerical modelling of storm and surge events on offshore sandbanks. <i>Marine Geology</i> , 2016 , 371, 106-119	3.9	15
53	Large scale three-dimensional modelling for wave and tidal energy resource and environmental impact: Methodologies for quantifying acceptable thresholds for sustainable exploitation. <i>Ocean and Coastal Management</i> , 2017 , 147, 67-77	3.9	14
52	iCOASST □TEGRATING COASTAL SEDIMENT SYSTEMS. <i>Coastal Engineering Proceedings</i> , 2012 , 1, 100	1.4	14
51	Climate Change Impacts on Future Wave Climate around the UK. <i>Journal of Marine Science and Engineering</i> , 2016 , 4, 78	2.4	14
50	Linkages between sediment composition, wave climate and beach profile variability at multiple timescales. <i>Marine Geology</i> , 2016 , 381, 194-208	3.3	14
49	Analysis of Climate Change Effects on Seawall Reliability. <i>Coastal Engineering Journal</i> , 2015 , 57, 1550010-1550018	2.8	10
48	Numerical modelling of hydrodynamic and morphodynamic response of a meso-tidal estuary inlet to the impacts of global climate variabilities. <i>Marine Geology</i> , 2019 , 407, 229-247	3.3	12
47	3D modelling of the impacts of in-stream horizontal-axis Tidal Energy Converters (TECs) on offshore sandbank dynamics. <i>Applied Ocean Research</i> , 2019 , 91, 101882	3.4	11
46	Numerical experiments of swash oscillations on steep and gentle beaches. <i>Coastal Engineering</i> , 2005 , 52, 497-511	4.8	11
45	A hybrid approach to model shoreline change at multiple timescales. <i>Continental Shelf Research</i> , 2013 , 66, 29-35	2.4	10
44	Modelling 3D hydrodynamics governing island-associated sandbanks in a proposed tidal stream energy site. <i>Applied Ocean Research</i> , 2017 , 66, 79-94	3.4	10

43	Numerical experiments on low-frequency fluctuations on a submerged coastal reef. <i>Coastal Engineering</i> , 1995 , 26, 271-289	4.8	10
42	Modelling wave attenuation by quasi-flexible coastal vegetation. <i>Coastal Engineering</i> , 2021 , 164, 103820	4.8	10
41	A statistical-dynamical method for predicting estuary morphology. <i>Ocean Dynamics</i> , 2011 , 61, 1033-1044	2.3	9
40	Storm sequencing and beach profile variability at Hasaki, Japan. <i>Marine Geology</i> , 2020 , 424, 106153	3.3	8
39	Computational modelling of morphodynamic response of a macro-tidal beach to future climate variabilities. <i>Marine Geology</i> , 2019 , 415, 105960	3.3	7
38	Analysis of key parameters in a diffusion type beach profile evolution model. <i>Continental Shelf Research</i> , 2011 , 31, 98-107	2.4	7
37	Computational Modelling of the Impacts of Saltmarsh Management Interventions on Hydrodynamics of a Small Macro-Tidal Estuary. <i>Journal of Marine Science and Engineering</i> , 2020 , 8, 373	2.4	6
36	Evaluation of spatio-temporal variability of ocean wave power resource around Sri Lanka. <i>Energy</i> , 2020 , 200, 117503	7.9	6
35	IMPACTS OF TIDAL ENERGY EXTRACTION ON SEA BED MORPHOLOGY. <i>Coastal Engineering Proceedings</i> , 2015 , 1, 33	1.4	6
34	Prediction of cross-shore beach profile evolution using a diffusion type model. <i>Continental Shelf Research</i> , 2012 , 48, 157-166	2.4	6
33	Spatial Variation in Coastal Dune Evolution in a High Tidal Range Environment. <i>Remote Sensing</i> , 2020 , 12, 3689	5	6
32	Effects of Swell on Wave Height Distribution of Energy-Conserved Bimodal Seas. <i>Journal of Marine Science and Engineering</i> , 2019 , 7, 79	2.4	5
31	Modelling the long-term morphological evolution of the Clyde Estuary, Scotland, UK. <i>Journal of Coastal Conservation</i> , 2011 , 15, 499-507	1.9	5
30	A comprehensive study of the tides around the Welsh coastal waters. <i>Estuarine, Coastal and Shelf Science</i> , 2021 , 254, 107326	2.9	5
29	Gravel Barrier Beach Morphodynamic Response to Extreme Conditions. <i>Journal of Marine Science and Engineering</i> , 2021 , 9, 135	2.4	5
28	Computational investigation of hydraulic performance variation with geometry in gabion stepped spillways. <i>Water Science and Engineering</i> , 2019 , 12, 62-72	4	4
27	Stability formula and failure probability analysis of wave-dissipating blocks considering wave breaking. <i>Journal of Ocean Engineering and Marine Energy</i> , 2015 , 1, 45-54	1.5	4
26	An evaluation of methods available for quantifying extreme beach erosion. <i>Journal of Ocean Engineering and Marine Energy</i> , 2015 , 1, 31-43	1.5	4

25	The influence of waves on morphodynamic impacts of energy extraction at a tidal stream turbine site in the Pentland Firth. <i>Renewable Energy</i> , 2018 , 125, 630-647	8.1	4
24	Comparison between wave generation methods for numerical simulation of bimodal seas. <i>Water Science and Engineering</i> , 2016 , 9, 3-13	4	4
23	Developing methodologies for large scale wave and tidal stream marine renewable energy extraction and its environmental impact: An overview of the TeraWatt project. <i>Ocean and Coastal Management</i> , 2017 , 147, 1-5	3.9	3
22	A new perspective on meso-scale shoreline dynamics through data-driven analysis. <i>Geomorphology</i> , 2019 , 341, 169-191	4.3	3
21	Reflection Analysis of Impermeable Slopes under Bimodal Sea Conditions. <i>Journal of Marine Science and Engineering</i> , 2020 , 8, 133	2.4	3
20	Two-dimensional reduced-physics model to describe historic morphodynamic behaviour of an estuary inlet. <i>Marine Geology</i> , 2016 , 382, 200-209	3.3	3
19	Investigation of deep sea shelf sandbank dynamics driven by highly energetic tidal flows. <i>Marine Geology</i> , 2016 , 380, 245-263	3.3	3
18	Coastal wetlands mitigate storm flooding and associated costs in estuaries. <i>Environmental Research Letters</i> , 2021 , 16, 074034	6.2	3
17	Impacts of Global Climate Change on the Future Ocean Wave Power Potential: A Case Study from the Indian Ocean. <i>Energies</i> , 2020 , 13, 3028	3.1	2
16	Performance of a data-driven technique applied to changes in wave height and its effect on beach response. <i>Water Science and Engineering</i> , 2016 , 9, 42-51	4	2
15	A hybrid beach morphology model applied to a high energy sandy beach. <i>Ocean Dynamics</i> , 2015 , 65, 1411-1422	1.3	2
14	On low-frequency waves in the surf and swash. <i>Ocean Engineering</i> , 2007 , 34, 2115-2123	3.9	2
13	Long-period water surface fluctuations on a horizontal coastal shelf with a steep seaward face. <i>Coastal Engineering</i> , 1996 , 29, 123-147	4.8	2
12	Impacts of storm chronology on the morphological changes of the Formby beach and dune system, UK		2
11	A Computational Investigation of Storm Impacts on Estuary Morphodynamics. <i>Journal of Marine Science and Engineering</i> , 2019 , 7, 421	2.4	2
10	Analysis of multi-scale morphodynamic behavior of a high energy beach facing the Sea of Japan. <i>Frontiers in Marine Science</i> , 2015 , 2,	4.5	1
9	A HYBRID-REDUCED PHYSICS MODELLING APPROACH APPLIED TO THE DEBEN ESTUARY, UK. <i>Coastal Engineering Proceedings</i> , 2015 , 1, 76	1.4	1
8	Coastal flood alleviation through management interventions under changing climate conditions. <i>International Journal of Disaster Resilience in the Built Environment</i> , 2019 , 11, 187-203	1.4	1

7	Seasonal to Decadal Variability of Shoreline Position on a Multiple Sandbar Beach. <i>Journal of Coastal Research</i> , 2018 , 85, 261-265	0.6	1
6	Forecasts of seasonal to inter-annual beach change using a reduced physics beach profile model. <i>Marine Geology</i> , 2015 , 365, 14-20	3.3	0
5	Investigating skimming flow conditions over stepped spillways using particle image velocimetry. <i>IOP Conference Series: Materials Science and Engineering</i> , 2020 , 888, 012023	0.4	0
4	Investigation of wind and tidal forcing on stratified flows in Greenland fjords with TELEMAC-3D. <i>European Journal of Computational Mechanics</i> , 2016 , 25, 249-272	0.5	
3	MODELLING MEMORY OF COASTAL FLOOD SYSTEMS. <i>Coastal Engineering Proceedings</i> , 2015 , 1, 19	1.4	
2	Reply to: Pye, K., 2008. Discussion of: Karunaratna, H. and Reeve, D., 2008. A Boolean Approach to Prediction of Long-Term Evolution of Estuary Morphology. <i>Journal of Coastal Research</i> , 24(2B), 511-513; <i>Journal of Coastal Research</i> , 24(5), 1351-1352. <i>Journal of Coastal Research</i> , 2009 , 252, 523-525	0.6	
1	Wave overtopping of smooth impermeable seawalls under unidirectional bimodal sea conditions. <i>Coastal Engineering</i> , 2021 , 165, 103792	4.8
