#	Article	IF	Citations
1	Association between age-related kidney function and vascular subclinical state in a healthy Chinese population. Chinese Medical Journal, 2021, Publish Ahead of Print, 2376-2378.	2.3	0
2	The relationship between transforming growth factor Î² superfamily members (GDF11 and BMP4) and lumbar spine bone mineral density in postmenopausal Chinese women. Archives of Gynecology and Obstetrics, 2021, , 1.	1.7	0
3	Role of CNS in the increased sympathoexcitation in rats with femoral artery ligation. Minerva Medica, 2021, , .	0.9	0
4	Association of cathepsin B and cystatin C with an age-related pulmonary subclinical state in a healthy Chinese population. Therapeutic Advances in Respiratory Disease, 2020, 14, 175346662092175.	2.6	3
5	The relationship between serum fibroblast growth factor 23, Klotho, and lumbar spine bone mineral density in northern Chinese postmenopausal women. Menopause, 2019, 26, 546-553.	2.0	8
6	Biomarkers of Aging. Advances in Experimental Medicine and Biology, 2018, 1086, 217-234.	1.6	21
7	Association between lumbar bone mineral density and serum uric acid in postmenopausal women: a cross-sectional study of healthy Chinese population. Archives of Osteoporosis, 2017, 12, 50.	2.4	31
8	Association between circulating fibroblast growth factorâ€23 and ageâ€related cardiovascularâ€“renal parameters in a healthy Chinese population. Geriatrics and Gerontology International, 2017, 17, 1221-1231.	1.5	1
9	Changes with aging in gastric biomarkers levels and in biochemical factors associated withHelicobacter pyloriinfection in asymptomatic Chinese population. World Journal of Gastroenterology, 2017, 23, 5945.	3.3	26
10	The association of serum cathepsin B concentration with age-related cardiovascular-renal subclinical state in a healthy Chinese population. Archives of Gerontology and Geriatrics, 2016, 65, 146-155.	3.0	13
11	Association between Kidney Function and Framingham Global Cardiovascular Disease Risk Score: A Chinese Longitudinal Study. PLoS ONE, 2014, 9, e86082.	2.5	7
12	Select aging biomarkers based on telomere length and chronological age to build a biological age equation. Age, 2014, 36, 9639.	3.0	57
13	Associations Between Bone Mineral Density and Subclinical Atherosclerosis: A Cross-Sectional Study of a Chinese Population. Journal of Clinical Endocrinology and Metabolism, 2014, 99, 469-477.	3.6	39
14	Gender Differences in the Relationship Between Age-Related Carotid Intima-media Thickness and Cardiac Diastolic Function in a Healthy Chinese Population. Journal of Cardiac Failure, 2013, 19, 325-332.	1.7	9
15	Association between kidney and cardiac diastolic function in Chinese subjects without overt disease: correlation with ageing and inflammatory markers. European Journal of Clinical Investigation, 2011, 41, 1077-1086.	3.4	5
16	SIRT1 variants are associated with aging in a healthy Han Chinese population. Clinica Chimica Acta, 2010, 411, 1679-1683.	1.1	36
17	Evaluation of Biological Aging Process â€“ A Population-Based Study of Healthy People in China. Gerontology, 2010, 56, 129-140.	2.8	42
