#	ARTICLE	IF	CITATIONS
1	The Pyeongan Supergroup (upper Paleozoic–Lower Triassic) in the Okcheon Belt, Korea: A review of stratigraphy and detrital zircon provenance, and its implications for the tectonic setting of the eastern Sino-Korean Block. <i>Earth-Science Reviews</i> , 2018, 185, 1170-1186.	4.0	13
2	Mercury evidence from the Sino-Korean block for Emeishan volcanism during the Capitanian mass extinction. <i>Geological Magazine</i> , 2019, 156, 1105-1110.	0.9	10
3	Characterization of Fines Produced by Degradation of Polymetallic Nodules from the Clarion–Clipperton Zone. <i>Minerals (Basel, Switzerland)</i> , 2021, 11, 205.	0.8	8
4	The stratigraphy and correlation of the upper Paleozoic Pyeongan Supergroup of southern Korean Peninsula - A review. <i>Journal of the Geological Society of Korea</i> , 2017, 53, 321-338.	0.3	5
5	The tectonic setting of the eastern margin of the Sino-Korean Block inferred from detrital zircon U–Pb age and Nd isotope composition of the Pyeongan Supergroup (upper Palaeozoic – Lower) <i>Tj ETQq1 1 0.784314 rgBT /Over</i>	0.3	1
6	Tectonic Setting of the Eastern Margin of the Sino-Korean Block in the Pennsylvanian: Constraints from Detrital Zircon Ages. <i>Minerals (Basel, Switzerland)</i> , 2020, 10, 527.	0.8	3
7	Geochemically Defined Mean Position of the Intertropical Convergence Zone in the Central Pacific. <i>Geophysical Research Letters</i> , 2021, 48, e2021GL094432.	1.5	3
8	Geochemistry and Nd isotopic composition of the Permian Ko Sire Formation, Phuket Island, Thailand: implications for palaeoclimate and palaeogeographical configuration of the Sibumasu Terrane. <i>Journal of the Geological Society</i> , 2020, 177, 866-881.	0.9	1
9	Zircon U-Pb ages from Paleoproterozoic migmatites in the western part of Yeongnam Massif: implication for the depositional ages of sedimentary protoliths. <i>Journal of the Geological Society of Korea</i> , 2022, 58, 51-66.	0.3	1
