

# Andrew P Schurer

## List of Publications by Year in Descending Order

**Source:** <https://exaly.com/author-pdf/6786612/andrew-p-schurer-publications-by-year.pdf>

**Version:** 2024-04-10

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

48  
papers

2,750  
citations

24  
h-index

52  
g-index

57  
ext. papers

3,329  
ext. citations

7.1

5.13  
L-index

#	Paper	IF	Citations
48	Widespread Persistent Extreme Cold Events Over South-East China: Mechanisms, Trends, and Attribution. <i>Journal of Geophysical Research D: Atmospheres</i> , <b>2021</b> , 126, e2020JD033447	4.4	4
47	Orbital Forcing Strongly Influences Seasonal Temperature Trends During the Last Millennium. <i>Geophysical Research Letters</i> , <b>2021</b> , 48, e2020GL088776	4.9	4
46	High-resolution marine data and transient simulations support orbital forcing of ENSO amplitude since the mid-Holocene. <i>Quaternary Science Reviews</i> , <b>2021</b> , 268, 107125	3.9	3
45	Large-scale emergence of regional changes in year-to-year temperature variability by the end of the 21 century.. <i>Nature Communications</i> , <b>2021</b> , 12, 7237	17.4	1
44	Volcanic-induced global monsoon drying modulated by diverse El Niño responses. <i>Science Advances</i> , <b>2020</b> , 6,	14.3	11
43	Ocean and land forcing of the record-breaking Dust Bowl heatwaves across central United States. <i>Nature Communications</i> , <b>2020</b> , 11, 2870	17.4	8
42	Natural drivers of multidecadal Arctic sea ice variability over the last millennium. <i>Scientific Reports</i> , <b>2020</b> , 10, 688	4.9	6
41	Forced and Unforced Decadal Behavior of the Interhemispheric SST Contrast during the Instrumental Period (1881–2012): Contextualizing the Late 1960s/Early 1970s Shift. <i>Journal of Climate</i> , <b>2020</b> , 33, 3487-3509	4.4	5
40	Observational constraints on the effective climate sensitivity from the historical period. <i>Environmental Research Letters</i> , <b>2020</b> , 15, 034043	6.2	10
39	Human influence strengthens the contrast between tropical wet and dry regions. <i>Environmental Research Letters</i> , <b>2020</b> , 15, 104026	6.2	9
38	Assessing opportunities to support coral reef climate change refugia in MPAs: A case study at the Revillagigedo Archipelago. <i>Marine Policy</i> , <b>2020</b> , 112, 103769	3.5	4
37	Quantifying human contributions to past and future ocean warming and thermohaline sea level rise. <i>Environmental Research Letters</i> , <b>2019</b> , 14, 074020	6.2	17
36	Effects of Memory Biases on Variability of Temperature Reconstructions. <i>Journal of Climate</i> , <b>2019</b> , 32, 8713-8731	4.4	14
35	A Limited Role for Unforced Internal Variability in Twentieth-Century Warming. <i>Journal of Climate</i> , <b>2019</b> , 32, 4893-4917	4.4	52
34	Detection of human influences on temperature seasonality from the nineteenth century. <i>Nature Sustainability</i> , <b>2019</b> , 2, 484-490	22.1	10
33	Attribution of Detected Temperature Trends in Southeast Brazil. <i>Geophysical Research Letters</i> , <b>2019</b> , 46, 8407-8414	4.9	9
32	Consistent multi-decadal variability in global temperature reconstructions and simulations over the Common Era. <i>Nature Geoscience</i> , <b>2019</b> , 12, 643-649	18.3	123

31	Last phase of the Little Ice Age forced by volcanic eruptions. <i>Nature Geoscience</i> , <b>2019</b> , 12, 650-656	18.3	41
30	Disentangling the causes of the 1816 European year without a summer. <i>Environmental Research Letters</i> , <b>2019</b> , 14, 094019	6.2	6
29	Causes of climate change over the historical record. <i>Environmental Research Letters</i> , <b>2019</b> , 14, 123006	6.2	47
28	Interpretations of the Paris climate target. <i>Nature Geoscience</i> , <b>2018</b> , 11, 220-221	18.3	23
27	Detectable Impact of Local and Remote Anthropogenic Aerosols on the 20th Century Changes of West African and South Asian Monsoon Precipitation. <i>Journal of Geophysical Research D: Atmospheres</i> , <b>2018</b> , 123, 4871-4889	4.4	40
26	Estimating the Transient Climate Response from Observed Warming. <i>Journal of Climate</i> , <b>2018</b> , 31, 8645-8663	8.6	27
25	The early 20th century warming: Anomalies, causes, and consequences. <i>Wiley Interdisciplinary Reviews: Climate Change</i> , <b>2018</b> , 9, e522	8.4	67
24	Possible causes of data model discrepancy in the temperature history of the last Millennium. <i>Scientific Reports</i> , <b>2018</b> , 8, 7572	4.9	16
23	Estimating Changes in Global Temperature since the Preindustrial Period. <i>Bulletin of the American Meteorological Society</i> , <b>2017</b> , 98, 1841-1856	6.1	182
22	Last millennium Northern Hemisphere summer temperatures from tree rings: Part II, spatially resolved reconstructions. <i>Quaternary Science Reviews</i> , <b>2017</b> , 163, 1-22	3.9	112
21	The PMIP4 contribution to CMIP6 [Part 3: The last millennium, scientific objective, and experimental design for the PMIP4 &lt;i>past1000&lt;/i> simulations. <i>Geoscientific Model Development</i> , <b>2017</b> , 10, 4005-4033	6.3	94
20	Importance of the Pre-Industrial Baseline in Determining the Likelihood of Exceeding the Paris Limits. <i>Nature Climate Change</i> , <b>2017</b> , 7, 563-567	21.4	67
19	The Maunder minimum and the Little Ice Age: an update from recent reconstructions and climate simulations. <i>Journal of Space Weather and Space Climate</i> , <b>2017</b> , 7, A33	2.5	35
18	European summer temperatures since Roman times. <i>Environmental Research Letters</i> , <b>2016</b> , 11, 024001	6.2	185
17	Last millennium northern hemisphere summer temperatures from tree rings: Part I: The long term context. <i>Quaternary Science Reviews</i> , <b>2016</b> , 134, 1-18	3.9	223
16	The PMIP4 contribution to CMIP6 [Part 3: the Last Millennium, Scientific Objective and Experimental Design for the PMIP4 &lt;i>past1000&lt;/i> simulations <b>2016</b> ,		11
15	The importance of ENSO phase during volcanic eruptions for detection and attribution. <i>Geophysical Research Letters</i> , <b>2016</b> , 43, 2851-2858	4.9	60
14	Determining the likelihood of pauses and surges in global warming. <i>Geophysical Research Letters</i> , <b>2015</b> , 42, 5974-5982	4.9	33

13	Continental-scale temperature variability in PMIP3 simulations and PAGES 2k regional temperature reconstructions over the past millennium. <i>Climate of the Past</i> , <b>2015</b> , 11, 1673-1699	3.9	75
12	Small influence of solar variability on climate over the past millennium. <i>Nature Geoscience</i> , <b>2014</b> , 7, 104-108	4.3	118
11	grasil-3d: an implementation of dust effects in the SEDs of simulated galaxies. <i>Monthly Notices of the Royal Astronomical Society</i> , <b>2014</b> , 439, 3868-3889	4.3	29
10	Assessing the Significance of Changes in ENSO Amplitude Using Variance Metrics. <i>Journal of Climate</i> , <b>2014</b> , 27, 4911-4922	4.4	6
9	Separating Forced from Chaotic Climate Variability over the Past Millennium. <i>Journal of Climate</i> , <b>2013</b> , 26, 6954-6973	4.4	111
8	Climate models without preindustrial volcanic forcing underestimate historical ocean thermal expansion. <i>Geophysical Research Letters</i> , <b>2013</b> , 40, 1600-1604	4.9	44
7	Discrepancies between the modeled and proxy-reconstructed response to volcanic forcing over the past millennium: Implications and possible mechanisms. <i>Journal of Geophysical Research D: Atmospheres</i> , <b>2013</b> , 118, 7617-7627	4.4	19
6	The effect of volcanic eruptions on global precipitation. <i>Journal of Geophysical Research D: Atmospheres</i> , <b>2013</b> , 118, 8770-8786	4.4	89
5	The HadGEM2-ES implementation of CMIP5 centennial simulations. <i>Geoscientific Model Development</i> , <b>2011</b> , 4, 543-570	6.3	662
4	Modelling the spectral energy distribution of galaxies: introducing the artificial neural network. <i>Monthly Notices of the Royal Astronomical Society</i> , <b>2010</b> , no-no	4.3	9
3	Modelling the effects of dust evolution on the SEDs of galaxies of different morphological type. <i>Monthly Notices of the Royal Astronomical Society</i> , <b>2009</b> , 394, 2001-2021	4.3	27
2	The importance of following the evolution of the dust in galaxies on their SEDs. <i>Proceedings of the International Astronomical Union</i> , <b>2008</b> , 4, 147-151	0.1	
1	Continental-scale temperature variability in PMIP3 simulations and PAGES 2k regional temperature reconstructions over the past millennium		1
