

# Nadim James Hallab

## List of Publications by Year in Descending Order

**Source:** <https://exaly.com/author-pdf/679895/nadim-james-hallab-publications-by-year.pdf>

**Version:** 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

30  
papers

2,136  
citations

#	Paper	IF	Citations
30	Metal-induced delayed type hypersensitivity responses potentiate particle induced osteolysis in a sex and age dependent manner. <i>PLoS ONE</i> , <b>2021</b> , 16, e0251885	3.7	2
29	The Inflammatory Effects of Breast Implant Particulate Shedding: Comparison With Orthopedic Implants. <i>Aesthetic Surgery Journal</i> , <b>2019</b> , 39, S36-S48	2.4	30
28	Transition from metal-DTH resistance to susceptibility is facilitated by NLRP3 inflammasome signaling induced Th17 reactivity: Implications for orthopedic implants. <i>PLoS ONE</i> , <b>2019</b> , 14, e0210336	3.7	6
27	CoCrMo alloy . UHMWPE Particulate Implant Debris Induces Sex Dependent Aseptic Osteolysis Responses using a Murine Model. <i>The Open Orthopaedics Journal</i> , <b>2018</b> , 12, 115-124	0.3	5
26	SMART Biosensor for Early Diagnostic Detection of Metal Ion Release in Orthopedic Patients: Initial Outcome. <i>Journal of Bio- and Tribo-Corrosion</i> , <b>2018</b> , 4, 1	2.9	2
25	Cobalt Alloy Implant Debris Induces Inflammation and Bone Loss Primarily through Danger Signaling, Not TLR4 Activation: Implications for DAMP-ening Implant Related Inflammation. <i>PLoS ONE</i> , <b>2016</b> , 11, e0160141	3.7	33
24	CORR Insights(□): do patients with a failed metal-on-metal hip implant with a pseudotumor present differences in their peripheral blood lymphocyte subpopulations?. <i>Clinical Orthopaedics and Related Research</i> , <b>2015</b> , 473, 3915-7	2.2	2
23	The pathology of orthopedic implant failure is mediated by innate immune system cytokines. <i>Mediators of Inflammation</i> , <b>2014</b> , 2014, 185150	4.3	106
22	Implant debris particle size affects serum protein adsorption which may contribute to particle size-based bioreactivity differences. <i>Journal of Long-Term Effects of Medical Implants</i> , <b>2014</b> , 24, 77-88	0.2	15
21	Metal sensitivities among TJA patients with post-operative pain: indications for multi-metal LTT testing. <i>Journal of Long-Term Effects of Medical Implants</i> , <b>2014</b> , 24, 37-44	0.2	6
20	Design of a tribocorrosion bioreactor for the analysis of immune cell response to in situ generated wear products. <i>Journal of Long-Term Effects of Medical Implants</i> , <b>2014</b> , 24, 65-76	0.2	9
19	Macrophage reactivity to different polymers demonstrates particle size- and material-specific reactivity: PEEK-OPTIMA(□) particles versus UHMWPE particles in the submicron, micron, and 10 micron size ranges. <i>Journal of Biomedical Materials Research - Part B Applied Biomaterials</i> , <b>2012</b> , 100, 480-92	3.5	52
18	Quantifying subtle but persistent peri-spine inflammation in vivo to submicron cobalt-chromium alloy particles. <i>European Spine Journal</i> , <b>2012</b> , 21, 2649-58	2.7	15
17	Biologic Aspects of Implant Wear <b>2012</b> , 157-168		1
16	In vitro reactivity to implant metals demonstrates a person-dependent association with both T-cell and B-cell activation. <i>Journal of Biomedical Materials Research - Part A</i> , <b>2010</b> , 92, 667-82	5.4	31
15	A review of the biologic effects of spine implant debris: Fact from fiction. <i>SAS Journal</i> , <b>2009</b> , 3, 143-60		44
14	Th1 type lymphocyte reactivity to metals in patients with total hip arthroplasty. <i>Journal of Orthopaedic Surgery and Research</i> , <b>2008</b> , 3, 6	2.8	109

13	Analysis of metal ion-induced DNA damage, apoptosis, and necrosis in human (Jurkat) T-cells demonstrates Ni <sup>2+</sup> and V <sup>3+</sup> are more toxic than other metals: Al <sup>3+</sup> , Be <sup>2+</sup> , Co <sup>2+</sup> , Cr <sup>3+</sup> , Cu <sup>2+</sup> , Fe <sup>3+</sup> , Mo <sup>5+</sup> , Nb <sup>5+</sup> , Zr <sup>2+</sup> . <i>Journal of Biomedical Materials Research - Part A</i> , <b>2008</b> , 86, 905-13	5.4	107
12	In vitro assessment of serum-saline ratios for fluid simulator testing of highly modular spinal implants with articulating surfaces. <i>International Journal of Spine Surgery</i> , <b>2008</b> , 2, 171-83	1.4	3
11	Lymphocyte responses in patients with total hip arthroplasty. <i>Journal of Orthopaedic Research</i> , <b>2005</b> , 23, 384-91	3.8	176
10	Effects of soluble metals on human peri-implant cells. <i>Journal of Biomedical Materials Research - Part A</i> , <b>2005</b> , 74, 124-40	5.4	94
9	Differences in the fretting corrosion of metal-metal and ceramic-metal modular junctions of total hip replacements. <i>Journal of Orthopaedic Research</i> , <b>2004</b> , 22, 250-9	3.8	145
8	Immune responses correlate with serum-metal in metal-on-metal hip arthroplasty. <i>Journal of Arthroplasty</i> , <b>2004</b> , 19, 88-93	4.4	93
7	Lymphocyte transformation testing for quantifying metal-implant-related hypersensitivity responses. <i>Dermatitis</i> , <b>2004</b> , 15, 82-90	2.6	30
6	Biomaterial optimization in total disc arthroplasty. <i>Spine</i> , <b>2003</b> , 28, S139-52	3.3	70
5	Interfacial kinetics of titanium- and cobalt-based implant alloys in human serum: metal release and biofilm formation. <i>Journal of Biomedical Materials Research Part B</i> , <b>2003</b> , 65, 311-8		57
4	Concentration- and composition-dependent effects of metal ions on human MG-63 osteoblasts. <i>Journal of Biomedical Materials Research Part B</i> , <b>2002</b> , 60, 420-33		207
3	Differential lymphocyte reactivity to serum-derived metal-protein complexes produced from cobalt-based and titanium-based implant alloy degradation. <i>Journal of Biomedical Materials Research Part B</i> , <b>2001</b> , 56, 427-36		90
2	Metal sensitivity in patients with orthopaedic implants. <i>Journal of Bone and Joint Surgery - Series A</i> , <b>2001</b> , 83, 428-36	5.6	595
1	Differential lymphocyte reactivity to serum-derived metal-protein complexes produced from cobalt-based and titanium-based implant alloy degradation <b>2001</b> , 56, 427		1
