citing authors

| # | ARTICLE | IF | CITATIONS |
|----|--|-----|-----------|
| 1 | Antioxidant and anti-inflammatory effects of zinc. Zinc-dependent NF- κ B signaling. <i>Inflammopharmacology</i> , 2017, 25, 11-24. | 1.9 | 413 |
| 2 | Essential elements in depression and anxiety. Part I. <i>Pharmacological Reports</i> , 2014, 66, 534-544. | 1.5 | 122 |
| 3 | Zinc deficiency induces behavioral alterations in the tail suspension test in mice. Effect of antidepressants. <i>Pharmacological Reports</i> , 2012, 64, 249-255. | 1.5 | 80 |
| 4 | Essential elements in depression and anxiety. Part II. <i>Pharmacological Reports</i> , 2015, 67, 187-194. | 1.5 | 74 |
| 5 | Zinc as a marker of affective disorders. <i>Pharmacological Reports</i> , 2013, 65, 1512-1518. | 1.5 | 66 |
| 6 | The involvement of the GPR39-Zn(2+)-sensing receptor in the pathophysiology of depression. Studies in rodent models and suicide victims. <i>Neuropharmacology</i> , 2014, 79, 290-297. | 2.0 | 66 |
| 7 | GPR39 (Zinc Receptor) Knockout Mice Exhibit Depression-Like Behavior and CREB/BDNF Down-Regulation in the Hippocampus. <i>International Journal of Neuropsychopharmacology</i> , 2015, 18, . | 1.0 | 66 |
| 8 | Time course of zinc deprivation-induced alterations of mice behavior in the forced swim test. <i>Pharmacological Reports</i> , 2012, 64, 567-575. | 1.5 | 62 |
| 9 | Zinc in the Glutamatergic Theory of Depression. <i>Current Neuropharmacology</i> , 2015, 13, 505-513. | 1.4 | 60 |
| 10 | Zinc in the Monoaminergic Theory of Depression: Its Relationship to Neural Plasticity. <i>Neural Plasticity</i> , 2017, 2017, 1-18. | 1.0 | 58 |
| 11 | The role of the GPR39 receptor in zinc deficient-animal model of depression. <i>Behavioural Brain Research</i> , 2013, 238, 30-35. | 1.2 | 56 |
| 12 | The role of glutamatergic, GABA-ergic, and cholinergic receptors in depression and antidepressant-like effect. <i>Pharmacological Reports</i> , 2016, 68, 443-450. | 1.5 | 54 |
| 13 | Zinc signaling and epilepsy. , 2019, 193, 156-177. | | 52 |
| 14 | Zinc deficiency in rats is associated with up-regulation of hippocampal NMDA receptor. <i>Progress in Neuro-Psychopharmacology and Biological Psychiatry</i> , 2015, 56, 254-263. | 2.5 | 43 |
| 15 | GPR39 Zn ²⁺ -sensing receptor: A new target in antidepressant development?. <i>Journal of Affective Disorders</i> , 2015, 174, 89-100. | 2.0 | 38 |
| 16 | Berberine produces antidepressant-like effects in ovariectomized mice. <i>Scientific Reports</i> , 2017, 7, 1310. | 1.6 | 37 |
| 17 | GPR39 up-regulation after selective antidepressants. <i>Neurochemistry International</i> , 2013, 62, 936-939. | 1.9 | 34 |
| 18 | Zinc deficiency alters responsiveness to antidepressant drugs in mice. <i>Pharmacological Reports</i> , 2013, 65, 579-592. | 1.5 | 32 |

| # | ARTICLE | IF | CITATIONS |
|----|--|-----|-----------|
| 19 | Targeting zinc metalloenzymes in coronavirus disease 2019. <i>British Journal of Pharmacology</i> , 2020, 177, 4887-4898. | 2.7 | 32 |
| 20 | Antidepressant-like effect of chromium chloride in the mouse forced swim test: involvement of glutamatergic and serotonergic receptors. <i>Pharmacological Reports</i> , 2008, 60, 991-5. | 1.5 | 31 |
| 21 | Study of antidepressant drugs in GPR39 (zinc receptor) knockout mice, showing no effect of conventional antidepressants, but effectiveness of NMDA antagonists. <i>Behavioural Brain Research</i> , 2015, 287, 135-138. | 1.2 | 30 |
| 22 | Alterations of Bio-elements, Oxidative, and Inflammatory Status in the Zinc Deficiency Model in Rats. <i>Neurotoxicity Research</i> , 2016, 29, 143-154. | 1.3 | 30 |
| 23 | Investigation of the GPR39 zinc receptor following inhibition of monoaminergic neurotransmission and potentialization of glutamatergic neurotransmission. <i>Brain Research Bulletin</i> , 2015, 115, 23-29. | 1.4 | 28 |
| 24 | Antidepressant activity of fluoxetine in the zinc deficiency model in rats involves the NMDA receptor complex. <i>Behavioural Brain Research</i> , 2015, 287, 323-330. | 1.2 | 27 |
| 25 | Potential antidepressant-like properties of the TC G-1008, a GPR39 (zinc receptor) agonist. <i>Journal of Affective Disorders</i> , 2016, 201, 179-184. | 2.0 | 27 |
| 26 | Up-regulation of the GPR39 Zn(2+)-sensing receptor and CREB/BDNF/TrkB pathway after chronic but not acute antidepressant treatment in the frontal cortex of zinc-deficient mice. <i>Pharmacological Reports</i> , 2015, 67, 1135-1140. | 1.5 | 24 |
| 27 | Long-lasting antidepressant-like activity of the GPR39 zinc receptor agonist TC-G 1008. <i>Journal of Affective Disorders</i> , 2019, 245, 325-334. | 2.0 | 23 |
| 28 | Evaluation of anti-inflammatory and ulcerogenic potential of zinc-ibuprofen and zinc-naproxen complexes in rats. <i>Inflammopharmacology</i> , 2017, 25, 653-663. | 1.9 | 19 |
| 29 | Zinc-mediated Neurotransmission in Alzheimer's Disease: A Potential Role of the GPR39 in Dementia. <i>Current Neuropharmacology</i> , 2019, 18, 2-13. | 1.4 | 19 |
| 30 | Interaction between Zinc, GPR39, BDNF and Neuropeptides in Depression. <i>Current Neuropharmacology</i> , 2021, 19, 2012-2019. | 1.4 | 17 |
| 31 | The role of melatonin, neurokinin, neurotrophic tyrosine kinase and glucocorticoid receptors in antidepressant-like effect. <i>Pharmacological Reports</i> , 2017, 69, 546-554. | 1.5 | 16 |
| 32 | The Role of Elements in Anxiety. <i>Vitamins and Hormones</i> , 2017, 103, 295-326. | 0.7 | 15 |
| 33 | Evaluation of the role of NMDA receptor function in antidepressant-like activity. A new study with citalopram and fluoxetine in the forced swim test in mice. <i>Pharmacological Reports</i> , 2015, 67, 490-493. | 1.5 | 14 |
| 34 | Immune malfunction in the GPR39 zinc receptor of knockout mice: Its relationship to depressive disorder. <i>Journal of Neuroimmunology</i> , 2016, 291, 11-17. | 1.1 | 12 |
| 35 | Interaction between zinc, the GPR39 zinc receptor and the serotonergic system in depression. <i>Brain Research Bulletin</i> , 2021, 170, 146-154. | 1.4 | 11 |
| 36 | Early lifetime zinc supplementation protects zinc-deficient diet-induced alterations. <i>Pharmacological Reports</i> , 2010, 62, 1211-1217. | 1.5 | 9 |

| # | ARTICLE | IF | CITATIONS |
|----|---|-----|-----------|
| 37 | GPCR oligomerization as a target for antidepressants: Focus on GPR39. , 2021, 225, 107842. | | 7 |
| 38 | Neuronal correlates underlying the role of the zinc sensing receptor (GPR39) in passive-coping behaviour. <i>Neuropharmacology</i> , 2021, 198, 108752. | 2.0 | 6 |
| 39 | Alterations of Serum Magnesium Concentration in Animal Models of Seizures and Epilepsy – The Effects of Treatment with a GPR39 Agonist and Knockout of the Gpr39 Gene. <i>Cells</i> , 2022, 11, 1987. | 1.8 | 5 |
| 40 | Chronic but not acute antidepressant treatment alters serum zinc/copper ratio under pathological/zinc-deficient conditions in mice. <i>Journal of Physiology and Pharmacology</i> , 2014, 65, 673-8. | 1.1 | 1 |
| 41 | P.1.020 The role of CREB/BDNF/TrkB signalling in the zinc deficiency model of depression. <i>European Neuropsychopharmacology</i> , 2013, 23, S19-S20. | 0.3 | 0 |
| 42 | P.1.g.105 Effect of dietary zinc deprivation on expression of NMDA receptor subunits and depressive-like behaviour: a time-course study. <i>European Neuropsychopharmacology</i> , 2014, 24, S265-S266. | 0.3 | 0 |
