citing authors

#	ARTICLE	IF	CITATIONS
1	Foot-and-Mouth Disease Virus Viroporin 2B Antagonizes RIG-I-Mediated Antiviral Effects by Inhibition of Its Protein Expression. <i>Journal of Virology</i> , 2016, 90, 11106-11121.	3.4	86
2	MGF360-9L Is a Major Virulence Factor Associated with the African Swine Fever Virus by Antagonizing the JAK/STAT Signaling Pathway. <i>MBio</i> , 2022, 13, e0233021.	4.1	50
3	Diagnosis and phylogenetic analysis of Orf virus from goats in China: a case report. <i>Virology Journal</i> , 2010, 7, 78.	3.4	40
4	Cellular DNAJA3, a Novel VP1-Interacting Protein, Inhibits Foot-and-Mouth Disease Virus Replication by Inducing Lysosomal Degradation of VP1 and Attenuating Its Antagonistic Role in the Beta Interferon Signaling Pathway. <i>Journal of Virology</i> , 2019, 93, .	3.4	40
5	African Swine Fever Virus F317L Protein Inhibits NF- κ B Activation To Evade Host Immune Response and Promote Viral Replication. <i>MSphere</i> , 2021, 6, e0065821.	2.9	32
6	Exosomes-mediated transmission of foot-and-mouth disease virus in vivo and in vitro. <i>Veterinary Microbiology</i> , 2019, 233, 164-173.	1.9	27
7	Comparison and phylogenetic analysis based on the B2L gene of orf virus from goats and sheep in China during 2009-2011. <i>Archives of Virology</i> , 2014, 159, 1475-1479.	2.1	18
8	The Distribution of Different Clades of Seneca Valley Viruses in Guangdong Province, China. <i>Virologica Sinica</i> , 2018, 33, 394-401.	3.0	17
9	Foot-and-Mouth Disease Virus Structural Protein VP1 Destroys the Stability of the TPL2 Trimer by Degradation of TPL2 To Evade Host Antiviral Immunity. <i>Journal of Virology</i> , 2021, 95, .	3.4	12
10	Diagnosis and phylogenetic analysis of ovine pulmonary adenocarcinoma in China. <i>Virus Genes</i> , 2014, 48, 64-73.	1.6	10
11	Advancement in TPL2-regulated innate immune response. <i>Immunobiology</i> , 2019, 224, 383-387.	1.9	10
12	Molecular Mechanisms of Immune Escape for Foot-and-Mouth Disease Virus. <i>Pathogens</i> , 2020, 9, 729.	2.8	9
13	FoxJ1 inhibits African swine fever virus replication and viral S273R protein decreases the expression of FoxJ1 to impair its antiviral effect. <i>Virologica Sinica</i> , 2022, 37, 445-454.	3.0	9
14	Molecular epidemiological investigation of porcine reproductive and respiratory syndrome virus in Northwest China from 2007 to 2010. <i>Virus Genes</i> , 2012, 45, 90-97.	1.6	8
15	Intercellular transmission of Seneca Valley virus mediated by exosomes. <i>Veterinary Research</i> , 2020, 51, 91.	3.0	7
16	FMDV 3A Antagonizes the Effect of ANXA1 to Positively Modulate Viral Replication. <i>Journal of Virology</i> , 2022, 96, .	3.4	7
17	Inhibition of orf virus replication in goat skin fibroblast cells by the HSPA1B protein, as demonstrated by iTRAQ-based quantitative proteome analysis. <i>Archives of Virology</i> , 2020, 165, 2561-2587.	2.1	6
18	A Seroprevalence Survey of Maedi-Visna Among Twenty-Four Ovine Floks from Twelve Regions of China. <i>Journal of Integrative Agriculture</i> , 2013, 12, 2321-2323.	3.5	5

#	ARTICLE	IF	CITATIONS
19	Foot-and-mouth disease virus degrades Rab27a to suppress the exosome-mediated antiviral immune response. <i>Veterinary Microbiology</i> , 2020, 251, 108889.	1.9	4
20	In vitro and in vivo analyses of co-infections with peste des petits ruminants and capripox vaccine strains. <i>Virology Journal</i> , 2021, 18, 69.	3.4	3
21	Adverse Effects of Inactivated Foot-and-Mouth Disease Vaccine—Possible Causes Analysis and Countermeasures. <i>World Journal of Vaccines</i> , 2018, 08, 81-88.	0.8	2
22	Profiling and functional analysis of differentially expressed circular RNAs identified in foot-and-mouth disease virus infected PK-15 cells. <i>Veterinary Research</i> , 2022, 53, 24.	3.0	2
23	Functional Analysis and Proteomics Profiling of Extracellular Vesicles From Swine Plasma Infected by African Swine Fever Virus. <i>Frontiers in Cellular and Infection Microbiology</i> , 2022, 12, 809135.	3.9	0
