|----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|-----------|
| 1  | Origin of the Bipolar Doping Behavior of SnO from X-ray Spectroscopy and Density Functional Theory. <i>Chemistry of Materials</i> , 2013, 25, 3114-3123.                                                                                                                                                         | 6.7  | 135       |
| 2  | Direct Observation of Decoupled Structural and Electronic Transitions and an Ambient Pressure Monocliniclike Metallic Phase of $\text{VO}_{2}$ . <i>Physical Review Letters</i> , 2014, 113, 216402.                                                                                                             | 7.8  | 98        |
| 3  | Graphene aerogel prepared by thermal evaporation of graphene oxide suspension containing sodium bicarbonate. <i>Journal of Materials Chemistry A</i> , 2015, 3, 7950-7958.                                                                                                                                       | 10.3 | 57        |
| 4  | Controlling Selectivity in Unsaturated Aldehyde Hydrogenation Using Single-Site Alloy Catalysts. <i>ACS Catalysis</i> , 2019, 9, 9150-9157.                                                                                                                                                                      | 11.2 | 55        |
| 5  | Synthesis and Properties of Star-Comb Polymers and Their Doxorubicin Conjugates. <i>Bioconjugate Chemistry</i> , 2011, 22, 617-624.                                                                                                                                                                              | 3.6  | 38        |
| 6  | Electronic structure of EuN: Growth, spectroscopy, and theory. <i>Physical Review B</i> , 2011, 84, .                                                                                                                                                                                                            | 3.2  | 38        |
| 7  | Metal-insulator transition induced in CaVO <sub>3</sub> thin films. <i>Journal of Applied Physics</i> , 2013, 113, .                                                                                                                                                                                             | 2.5  | 31        |
| 8  | Strain dependence of bonding and hybridization across the metal-insulator transition of $\text{VO}_{2}$ . <i>Physical Review B</i> , 2012, 85, .                                                                                                                                                                 | 3.2  | 30        |
| 9  | $\text{V}_{2}\text{O}_{5}$ nanowires: Growth, Spectroscopy, and Theory. <i>Journal of Physical Chemistry C</i> , 2014, 118, 1081-1094.                                                                                                                                                                           | 3.2  | 28        |
| 10 | Large-area high quality MoS <sub>2</sub> monolayers grown by sulfur vapor counter flow diffusion. <i>RSC Advances</i> , 2016, 6, 50306-50314.                                                                                                                                                                    | 3.6  | 26        |
| 11 | Lattice vibration fundamentals in nanocrystalline anatase investigated with Raman scattering. <i>Journal of Physics Condensed Matter</i> , 2008, 20, 085212.                                                                                                                                                     | 1.8  | 24        |
| 12 | Soft X-Ray Spectroscopic Study of Dense Strontium-Doped Lanthanum Manganite Cathodes for Solid Oxide Fuel Cell Applications. <i>Journal of the Electrochemical Society</i> , 2011, 158, B99.                                                                                                                     | 2.9  | 21        |
| 13 | Electronic Structure of $\text{Na}_{x}\text{V}_2\text{O}_5$ Polycrystalline Films: Growth, Spectroscopy, and Theory. <i>Journal of Physical Chemistry C</i> , 2014, 118, 1081-1094.                                                                                                                              | 3.1  | 21        |
| 14 | Lattice vibration fundamentals of nanocrystalline anatase: Temperature-dependent study using micro-Raman scattering spectroscopy. <i>Journal of Applied Physics</i> , 2007, 101, 113501.                                                                                                                         | 2.5  | 17        |
| 15 | The effects of acute alcohol exposure on the response properties of neurons in visual cortex area 17 of cats. <i>Toxicology and Applied Pharmacology</i> , 2010, 243, 348-358.                                                                                                                                   | 2.8  | 16        |
| 16 | Orbital anisotropy and low-energy excitations of the quasi-one-dimensional conductor Sr <sub>2</sub> Mo <sub>3</sub> O <sub>8</sub> . <i>Physical Review Letters</i> , 2013, 111, 047402.                                                                                                                        | 3.2  | 15        |
| 17 | Resonant Soft-X-Ray Emission as a Bulk Probe of Correlated Electron Behavior in Metallic $\text{Ca}_{7/8}\text{Sr}_{1/8}\text{O}$ . <i>Physical Review Letters</i> , 2013, 111, 047402.                                                                                                                          | 7.8  | 15        |
| 18 | Multi-technique x-ray and optical characterization of crystalline phase, texture, and electronic structure of atomic layer deposited Hf <sub>1-x</sub> Zr <sub>x</sub> O <sub>2</sub> gate dielectrics deposited by a cyclical deposition and annealing scheme. <i>Journal of Applied Physics</i> , 2013, 113, . | 2.5  | 14        |

| #  | ARTICLE                                                                                                                                                                                                                             | IF  | CITATIONS |
|----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 19 | Activation of the dimers and tetramers of metal amidinate atomic layer deposition precursors upon adsorption on silicon oxide surfaces. <i>Journal of Vacuum Science and Technology A: Vacuum, Surfaces and Films</i> , 2017, 35, . | 2.1 | 12        |
| 20 | Enhanced electron correlations at the $\text{Sr}_{x}\text{Lu}_{1-x}\text{VO}_3$ . <i>Physical Review B</i> , 2015, 91, .                                                                                                            |     |           |
| 21 | Effects of rare-earth size on the electronic structure of $\text{La}_{1-x}\text{Lu}_x\text{VO}_3$ . <i>Journal of Physics Condensed Matter</i> , 2015, 27, 105503.                                                                  | 1.8 | 11        |
| 22 | Gas-Phase Electron-Impact Activation of Atomic Layer Deposition (ALD) Precursors: $\text{MeCpPtMe}_3$ . <i>Journal of Physical Chemistry Letters</i> , 2018, 9, 4602-4606.                                                          | 4.6 | 11        |
| 23 | Photo-induced degradation of Ru(II) complex absorbed on anatase $\text{TiO}_2$ thin film electrode. <i>Science Bulletin</i> , 2007, 52, 2012-2014.                                                                                  | 1.7 | 10        |
| 24 | The band structure of $\text{WO}_3$ and non-rigid-band behaviour in $\text{Na}_0.67\text{WO}_3$ derived from soft x-ray spectroscopy and density functional theory. <i>Journal of Physics Condensed Matter</i> , 2013, 25, 165501.  | 1.8 | 10        |
| 25 | Thermal Chemistry of Metal Organic Compounds Adsorbed on Oxide Surfaces. <i>Organometallics</i> , 2020, 39, 928-940.                                                                                                                | 2.3 | 10        |
| 26 | Hydrogenation of Cinnamaldehyde on Cu(110) Single-Crystal Surfaces. <i>Journal of Physical Chemistry C</i> , 2021, 125, 14709-14717.                                                                                                | 3.1 | 10        |
| 27 | Effect of $\text{MgO}$ on $\text{WO}_3/\text{SiO}_2$ -catalyzed light olefin metathesis using different feedstocks. <i>Molecular Catalysis</i> , 2017, 442, 49-56.                                                                  | 2.0 | 9         |
| 28 | Rational Design of Metalorganic Complexes for the Deposition of Solid Films: Growth of Metallic Copper with Amidinate Precursors. <i>Chemistry of Materials</i> , 2019, 31, 1681-1687.                                              | 6.7 | 8         |
| 29 | Role of oligomer structures in the surface chemistry of amidinate metal complexes used for atomic layer deposition of thin films. <i>Journal of Materials Research</i> , 2020, 35, 720-731.                                         | 2.6 | 7         |
| 30 | Low-energy $\text{Vt}2$ orbital excitations in $\text{NdVO}_3$ . <i>Journal of Physics Condensed Matter</i> , 2014, 26, 455603.                                                                                                     | 1.8 | 4         |
