#	ARTICLE	IF	CITATIONS
1	What is needed to guide testing for anorectal and pharyngeal <i>Chlamydia trachomatis</i> and <i>Neisseria gonorrhoeae</i> in women and men? Evidence and opinion. <i>BMC Infectious Diseases</i> , 2015, 15, 533.	1.3	78
2	Standard Symptom- and Sexual History-Based Testing Misses Anorectal <i>Chlamydia trachomatis</i> and <i>Neisseria gonorrhoeae</i> Infections in Swingers and Men Who Have Sex With Men. <i>Sexually Transmitted Diseases</i> , 2013, 40, 285-289.	0.8	62
3	High co-occurrence of anorectal chlamydia with urogenital chlamydia in women visiting an STI clinic revealed by routine universal testing in an observational study; a recommendation towards a better anorectal chlamydia control in women. <i>BMC Infectious Diseases</i> , 2014, 14, 274.	1.3	62
4	Evaluation of the anatomical site distribution of chlamydia and gonorrhoea in men who have sex with men and in high-risk women by routine testing: cross-sectional study revealing missed opportunities for treatment strategies: Table A1. <i>Sexually Transmitted Infections</i> , 2014, 90, 58-60.	0.8	60
5	High Proportion of Anorectal <i>Chlamydia trachomatis</i> and <i>Neisseria gonorrhoeae</i> After Routine Universal Urogenital and Anorectal Screening in Women Visiting the Sexually Transmitted Infection Clinic. <i>Clinical Infectious Diseases</i> , 2017, 64, 1705-1710.	2.9	44
6	What explains anorectal chlamydia infection in women? Implications of a mathematical model for test and treatment strategies. <i>Sexually Transmitted Infections</i> , 2017, 93, 270-275.	0.8	43
7	Prevalence of and Factors Associated with Rectal-Only Chlamydia and Gonorrhoea in Women and in Men Who Have Sex with Men. <i>PLoS ONE</i> , 2015, 10, e0140297.	1.1	40
8	Spontaneous clearance of urogenital, anorectal and oropharyngeal <i>Chlamydia trachomatis</i> and <i>Neisseria gonorrhoeae</i> in women, MSM and heterosexual men visiting the STI clinic: a prospective cohort study. <i>Sexually Transmitted Infections</i> , 2019, 95, 505-510.	0.8	23
9	A comprehensive overview of urogenital, anorectal and oropharyngeal <i>Neisseria gonorrhoeae</i> testing and diagnoses among different STI care providers: a cross-sectional study. <i>BMC Infectious Diseases</i> , 2017, 17, 290.	1.3	18
10	Anorectal <i>Chlamydia trachomatis</i> Load Is Similar in Men Who Have Sex with Men and Women Reporting Anal Sex. <i>PLoS ONE</i> , 2015, 10, e0134991.	1.1	15
11	Incidence of repeat testing and diagnoses of <i>Chlamydia trachomatis</i> and <i>Neisseria gonorrhoeae</i> in swingers, homosexual and heterosexual men and women at two large Dutch STI clinics, 2006-2013. <i>Sexually Transmitted Infections</i> , 2017, 93, 383-389.	0.8	14
12	High rate of loss to follow-up and virological non-suppression in HIV-infected children on antiretroviral therapy highlights the need to improve quality of care in South Africa. <i>Epidemiology and Infection</i> , 2021, 149, e88.	1.0	14
13	Men and Women Have an Equal Oropharyngeal and Anorectal <i>Chlamydia trachomatis</i> Bacterial Load: A Comparison of 3 Anatomic Sites. <i>Journal of Infectious Diseases</i> , 2021, 223, 1582-1589.	1.9	12
14	Genital and anal <i>Chlamydia trachomatis</i> bacterial load in concurrently infected women: a cross-sectional study. <i>Sexually Transmitted Infections</i> , 2019, 95, 317-321.	0.8	11
15	<i>Chlamydia trachomatis</i> bacterial load, estimated by Cq values, in urogenital samples from men and women visiting the general practice, hospital or STI clinic. <i>PLoS ONE</i> , 2019, 14, e0215606.	1.1	10
16	What Is the Optimal Testing Strategy for Oropharyngeal <i>Neisseria gonorrhoeae</i> in Men Who Have Sex With Men? Comparing Selective Testing Versus Routine Universal Testing From Dutch Sexually Transmitted Infection Clinic Data (2008-2017). <i>Clinical Infectious Diseases</i> , 2020, 71, 944-951.	2.9	10
17	Antibiotic Use before Chlamydia and Gonorrhoea Genital and Extragenital Screening in the Sexually Transmitted Infection Clinical Setting. <i>Antimicrobial Agents and Chemotherapy</i> , 2015, 59, 121-128.	1.4	9
18	Use of doxycycline and other antibiotics to prevent STIs among men who have sex with men visiting sexual health clinics in the Netherlands. <i>Sexually Transmitted Infections</i> , 2020, 96, 550-551.	0.8	9

#	ARTICLE	IF	CITATIONS
19	Routine universal testing versus selective or incidental testing for oropharyngeal <i>Neisseria gonorrhoeae</i> in women in the Netherlands: a retrospective cohort study. <i>Lancet Infectious Diseases</i> , The, 2021, 21, 858-867.	4.6	9
20	Test of cure, retesting and extragenital testing practices for <i>Chlamydia trachomatis</i> and <i>Neisseria gonorrhoeae</i> among general practitioners in different socioeconomic status areas: A retrospective cohort study, 2011-2016. <i>PLoS ONE</i> , 2018, 13, e0194351.	1.1	9
21	Standardisation is necessary in urogenital and extragenital <i>Chlamydia trachomatis</i> bacterial load determination by quantitative PCR: a review of literature and retrospective study. <i>Sexually Transmitted Infections</i> , 2019, 95, 562-568.	0.8	6
22	Prevalence of drug use during sex among swingers and perceived benefits and risks – a cross-sectional internet survey in the Netherlands. <i>Sexually Transmitted Infections</i> , 2020, 96, 40-46.	0.8	6
23	The added value of chlamydia screening between 2008-2010 in reaching young people in addition to chlamydia testing in regular care; an observational study. <i>BMC Infectious Diseases</i> , 2014, 14, 612.	1.3	5
24	Men and Women Repeatedly Infected With <i>Chlamydia trachomatis</i> Have a Lower Urogenital Bacterial Load. <i>Sexually Transmitted Diseases</i> , 2020, 47, e51-e53.	0.8	2
25	Routine universal testing versus selective or incidental testing for oropharyngeal <i>Chlamydia trachomatis</i> in women in the Netherlands: a retrospective cohort study. <i>Lancet Infectious Diseases</i> , The, 2022, 22, 552-561.	4.6	2
