

Edyta Hetmaniok

List of Publications by Citations

Source: <https://exaly.com/author-pdf/6841328/edyta-hetmaniok-publications-by-citations.pdf>

Version: 2024-04-24

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
67	Application of the homotopy perturbation method for the solution of inverse heat conduction problem. <i>International Communications in Heat and Mass Transfer</i> , 2012 , 39, 30-35	5.8	37
66	Usage of the homotopy analysis method for solving the nonlinear and linear integral equations of the second kind. <i>Numerical Algorithms</i> , 2014 , 67, 163-185	2.1	23
65	Solution of the one-phase inverse Stefan problem by using the homotopy analysis method. <i>Applied Mathematical Modelling</i> , 2015 , 39, 6793-6805	4.5	21
64	Determination of Optimal Parameters for the Immune Algorithm Used for Solving Inverse Heat Conduction Problems with and without a Phase Change. <i>Numerical Heat Transfer, Part B: Fundamentals</i> , 2012 , 62, 462-478	1.3	19
63	A study of the convergence of and error estimation for the homotopy perturbation method for the Volterra-Fredholm integral equations. <i>Applied Mathematics Letters</i> , 2013 , 26, 165-169	3.5	17
62	Experimental verification of immune recruitment mechanism and clonal selection algorithm applied for solving the inverse problems of pure metal solidification. <i>International Communications in Heat and Mass Transfer</i> , 2013 , 47, 7-14	5.8	15
61	A stronger version of the second mean value theorem for integrals. <i>Computers and Mathematics With Applications</i> , 2012 , 64, 1612-1615	2.7	15
60	Using the swarm intelligence algorithms in solution of the two-dimensional inverse Stefan problem. <i>Computers and Mathematics With Applications</i> , 2015 , 69, 347-361	2.7	14
59	Solution of the Inverse Heat Conduction Problem by Using the ABC Algorithm. <i>Lecture Notes in Computer Science</i> , 2010 , 659-668	0.9	14
58	Restoration of the cooling conditions in a three-dimensional continuous casting process using artificial intelligence algorithms. <i>Applied Mathematical Modelling</i> , 2015 , 39, 4797-4807	4.5	13
57	Comparison of the Adomian decomposition method and the variational iteration method in solving the moving boundary problem. <i>Computers and Mathematics With Applications</i> , 2011 , 61, 1931-1934	2.7	13
56	Convergence and error estimation of homotopy perturbation method for Fredholm and Volterra integral equations. <i>Applied Mathematics and Computation</i> , 2012 , 218, 10717-10725	2.7	12
55	Homotopy Approach for Integrodifferential Equations. <i>Mathematics</i> , 2019 , 7, 904	2.3	9
54	Identification of the heat transfer coefficient in the two-dimensional model of binary alloy solidification. <i>Heat and Mass Transfer</i> , 2017 , 53, 1657-1666	2.2	9
53	Convergence and error estimation of homotopy analysis method for some type of nonlinear and linear integral equations. <i>Journal of Numerical Mathematics</i> , 2015 , 23,	3.4	9
52	Comparison of ABC and ACO Algorithms Applied for Solving the Inverse Heat Conduction Problem. <i>Lecture Notes in Computer Science</i> , 2012 , 249-257	0.9	9
51	Inverse problem for the solidification of binary alloy in the casting mould solved by using the bee optimization algorithm. <i>Heat and Mass Transfer</i> , 2016 , 52, 1369-1379	2.2	8

50	Experimental Verification of Selected Artificial Intelligence Algorithms Used for Solving the Inverse Stefan Problem. <i>Numerical Heat Transfer, Part B: Fundamentals</i> , 2014 , 66, 343-359	1.3	8
49	Using the Artificial Bee Colony Algorithm for Determining the Heat Transfer Coefficient. <i>Advances in Intelligent and Soft Computing</i> , 2011 , 369-376		8
48	More subtle versions of the Hadamard inequality. <i>Linear Algebra and Its Applications</i> , 2017 , 532, 500-511	0.9	7
47	Determination of the Heat Transfer Coefficient by Using the Ant Colony Optimization Algorithm. <i>Lecture Notes in Computer Science</i> , 2012 , 470-479	0.9	7
46	Solution of the inverse heat conduction problem with Neumann boundary condition by using the homotopy perturbation method. <i>Thermal Science</i> , 2013 , 17, 643-650	1.2	7
45	An analytical method for solving the two-phase inverse Stefan problem. <i>Bulletin of the Polish Academy of Sciences: Technical Sciences</i> , 2015 , 63, 583-590		6
44	Solution of the two-dimensional inverse problem of the binary alloy solidification by applying the Ant Colony Optimization algorithm. <i>International Communications in Heat and Mass Transfer</i> , 2015 , 67, 39-45	5.8	6
43	Inverse alloy solidification problem including the material shrinkage phenomenon solved by using the bee algorithm. <i>International Communications in Heat and Mass Transfer</i> , 2017 , 87, 295-301	5.8	5
42	Solution of the direct alloy solidification problem including the phenomenon of material shrinkage. <i>Thermal Science</i> , 2017 , 21, 105-115	1.2	5
41	A certain analytical method used for solving the Stefan problem. <i>Thermal Science</i> , 2013 , 17, 635-642	1.2	4
40	On similarities between exponential polynomials and Hermite polynomials. <i>Journal of Applied Mathematics and Computational Mechanics</i> , 2013 , 12, 93-104	2.1	4
39	Binomials transformation formulae for scaled Fibonacci numbers. <i>Open Mathematics</i> , 2017 , 15, 477-485	0.8	3
38	Fibonacci and Lucas numbers, Fibonacci and Lucas polynomials. <i>Mathematica Slovaca</i> , 2017 , 67, 51-70	0.7	3
37	Numerical Procedure for Heat Transfer Coefficient Identification in Solidification of Binary Alloys and Its Experimental Verification. <i>Numerical Heat Transfer, Part B: Fundamentals</i> , 2015 , 68, 93-114	1.3	3
36	Experimental verification of approximate solution of the inverse Stefan problem obtained by applying the invasive weed optimization algorithm. <i>Thermal Science</i> , 2015 , 19, 205-212	1.2	3
35	Application of the Swarm Intelligence Algorithm for Investigating the Inverse Continuous Casting Problem. <i>Studies in Computational Intelligence</i> , 2013 , 157-162	0.8	3
34	APPLICATION OF THE HOMOTOPY ANALYSIS METHOD FOR SOLVING THE SYSTEMS OF LINEAR AND NONLINEAR INTEGRAL EQUATIONS. <i>Mathematical Modelling and Analysis</i> , 2016 , 21, 350-370	1.3	3
33	Solution of the inverse problem in solidification of binary alloy by applying the ACO algorithm. <i>Inverse Problems in Science and Engineering</i> , 2016 , 24, 889-900	1.3	3

32	Parallel Procedure Based on the Swarm Intelligence for Solving the Two-Dimensional Inverse Problem of Binary Alloy Solidification. <i>Lecture Notes in Computer Science</i> , 2016 , 287-297	0.9	3
31	Application of the homotopy analysis method for solving the two-dimensional steady-state heat conduction problem 2014 ,		2
30	Solution of the two-phase Stefan problem by using the Picard's iterative method. <i>Thermal Science</i> , 2011 , 15, 21-26	1.2	2
29	Comparison of the Selected Methods Used for Solving the Ordinary Differential Equations and Their Systems. <i>Mathematics</i> , 2022 , 10, 306	2.3	2
28	Artificial bee colony algorithm in the solution of selected inverse problem of the binary alloy solidification. <i>Thermal Science</i> , 2016 , 20, 1609-1620	1.2	2
27	Application of the Ant Colony Optimization Algorithm for Reconstruction of the Thermal Conductivity Coefficient. <i>Lecture Notes in Computer Science</i> , 2012 , 240-248	0.9	2
26	Inverse Continuous Casting Problem Solved by Applying the Artificial Bee Colony Algorithm. <i>Lecture Notes in Computer Science</i> , 2013 , 431-440	0.9	2
25	Examination of Chaos Occurring in Selected Branched Kinematic Chains of Robot Manipulators. <i>Lecture Notes in Electrical Engineering</i> , 2015 , 109-126	0.2	1
24	Application of the Swarm Intelligence Algorithm for Reconstructing the Cooling Conditions of Steel Ingot Continuous Casting. <i>Energies</i> , 2020 , 13, 2429	3.1	1
23	Some new facts about group φ generated by the family of convergent permutations. <i>Open Mathematics</i> , 2017 , 15, 568-577	0.8	1
22	Generalized Gregory-B series. <i>Applied Mathematics and Computation</i> , 2014 , 237, 203-216	2.7	1
21	An analytical technique for solving general linear integral equations of the second kind and its application in analysis of flash lamp control circuit. <i>Bulletin of the Polish Academy of Sciences: Technical Sciences</i> , 2014 , 62, 413-421		1
20	Determination of the Heat Flux in the Process of Solidification by Applying the Ant Colony Optimization Algorithm. <i>Key Engineering Materials</i> , 2014 , 622-623, 764-771	0.4	1
19	On series whose rearrangements possess discrete sets of limit points. <i>Journal of Applied Analysis</i> , 2014 , 20,	0.5	1
18	Some properties of inverses of the full matrices. <i>Computers and Mathematics With Applications</i> , 2012 , 63, 905-911	2.7	1
17	BOSON STRUCTURE OF THE 1s0d AND 1p0f-SHELL NUCLEI OBTAINED FROM THE SHELL MODEL. <i>International Journal of Modern Physics E</i> , 2006 , 15, 446-451	0.7	1
16	BOSON APPROACH TO THE STRUCTURE OF A = 62 NUCLEI. <i>International Journal of Modern Physics E</i> , 2007 , 16, 592-602	0.7	1
15	Artificial Bee Colony Algorithm Used for Reconstructing the Heat Flux Density in the Solidification Process. <i>Lecture Notes in Computer Science</i> , 2014 , 363-372	0.9	1

14	Solution of the Inverse Continuous Casting Problem with the Aid of Modified Harmony Search Algorithm. <i>Lecture Notes in Computer Science</i> , 2014 , 402-411	0.9	1
13	Reconstruction of the Boundary Condition in the Binary Alloy Solidification Problem with the Macrosegregation and the Material Shrinkage Phenomena Taken into Account. <i>Heat Transfer Engineering</i> , 2021 , 42, 308-318	1.7	1
12	Parametric-vector versions of the Gerschgorin Theorem and the Brauer Theorem 2018 ,		1
11	Intelligent System for Detection of Breathing Disorders. <i>Communications in Computer and Information Science</i> , 2015 , 366-375	0.3	0
10	Solving the Integral Differential Equations with Delayed Argument by Using the DTM Method. <i>Sensors</i> , 2022 , 22, 4124	3.8	0
9	Iterated integrals of polynomials. <i>Applied Mathematics and Computation</i> , 2014 , 249, 389-398	2.7	
8	Artificial Bee Colony Algorithm Used for Solving some Inverse Problem in Solidification of the Binary Alloy. <i>Key Engineering Materials</i> , 2014 , 622-623, 756-763	0.4	
7	On the Three, Five and Other Periodic Orbits of Some Polynomials. <i>Lecture Notes in Electrical Engineering</i> , 2015 , 91-107	0.2	
6	Harmonic Numbers of Any Order and the Wolstenholme's-Type Relations for Harmonic Numbers. <i>Lecture Notes in Electrical Engineering</i> , 2017 , 33-44	0.2	
5	Solution of the Inverse Stefan Problem by Applying the Procedure Based on the Modified Harmony Search Algorithm. <i>Studies in Computational Intelligence</i> , 2013 , 175-180	0.8	
4	On Certain Approximation Problem Connected with the Sums of Subseries. <i>Tatra Mountains Mathematical Publications</i> , 2013 , 55, 37-45	0.4	
3	Clonal Selection Algorithm in Identification of Boundary Condition in the Inverse Stefan Problem. <i>Advances in Intelligent Systems and Computing</i> , 2014 , 511-518	0.4	
2	On Commutation Properties of the Composition Relation of Convergent and Divergent Permutations (Part I). <i>Tatra Mountains Mathematical Publications</i> , 2014 , 58, 13-22	0.4	
1	Identification of the air gap thermal resistance in the model of binary alloy solidification including the macrosegregation and the material shrinkage phenomena. <i>Inverse Problems in Science and Engineering</i> , 1-17	1.3
