

Anya M Reading

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/6853430/anya-m-reading-publications-by-year.pdf>

Version: 2024-04-09

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

82 papers	1,832 citations	24 h-index	41 g-index
87 ext. papers	2,108 ext. citations	2.9 avg, IF	5.14 L-index

#	Paper	IF	Citations
82	Seismic observations of a complex firn structure across the Amery Ice Shelf, East Antarctica. <i>Journal of Glaciology</i> , 2021 , 67, 777-787	3.4	2
81	CCLoc: An Improved Interferometric Seismic Event Location Algorithm Applied to Induced Seismicity. <i>Seismological Research Letters</i> , 2021 ,	3	2
80	Antarctic Geothermal Heat Flow Model: Aq1. <i>Geochemistry, Geophysics, Geosystems</i> , 2021 , 22, e2020GC009428	3.4	4
79	Crustal structure of southeast Australia from teleseismic receiver functions. <i>Solid Earth</i> , 2021 , 12, 463-481	3.1	1
78	Large-Amplitude Elastic Free-Surface Waves: Geometric Nonlinearity and Peakons. <i>Journal of Elasticity</i> , 2021 , 1	1.5	
77	Efficient regional scale 3D potential field geophysical modelling to redefine the geometry of granite bodies beneath prospective, geologically complex, northwest Tasmania. <i>Ore Geology Reviews</i> , 2020 , 127, 103799	3.2	1
76	Separation of tectonic and local components of horizontal GPS station velocities: a case study for glacial isostatic adjustment in East Antarctica. <i>Geophysical Journal International</i> , 2020 , 222, 1555-1569	2.6	3
75	Inverse modeling constrained by potential field data, petrophysics, and improved geologic mapping: A case study from prospective northwest Tasmania. <i>Geophysics</i> , 2020 , 85, K13-K26	3.1	2
74	A Grid for Multidimensional and Multivariate Spatial Representation and Data Processing. <i>Journal of Open Research Software</i> , 2020 , 8,	2.3	2
73	Analytic and numerical solutions to the seismic wave equation in continuous media. <i>Proceedings of the Royal Society A: Mathematical, Physical and Engineering Sciences</i> , 2020 , 476, 20200636	2.4	1
72	The Antarctic Crust and Upper Mantle: A Flexible 3D Model and Software Framework for Interdisciplinary Research. <i>Frontiers in Earth Science</i> , 2020 , 8,	3.5	3
71	Identification of intrusive lithologies in volcanic terrains in British Columbia by machine learning using random forests: The value of using a soft classifier. <i>Geophysics</i> , 2020 , 85, B249-B258	3.1	4
70	Impacts of the Cryosphere and Atmosphere on Observed Microseisms Generated in the Southern Ocean. <i>Journal of Geophysical Research F: Earth Surface</i> , 2020 , 125, e2019JF005354	3.8	2
69	Element mobility and spatial zonation associated with the Archean Hamlet orogenic Au deposit, Western Australia: Implications for fluid pathways in shear zones. <i>Chemical Geology</i> , 2019 , 514, 10-26	4.2	8
68	Insights into the structure and dynamics of the upper mantle beneath Bass Strait, southeast Australia, using shear wave splitting. <i>Physics of the Earth and Planetary Interiors</i> , 2019 , 289, 45-62	2.3	5
67	Short Timescale Analysis of Microseisms and Application to Array Calibration. <i>Journal of Geophysical Research: Solid Earth</i> , 2019 , 124, 2684-2701	3.6	1
66	Lithological mapping in the Central African Copper Belt using Random Forests and clustering: Strategies for optimised results. <i>Ore Geology Reviews</i> , 2019 , 112, 103015	3.2	13

65	Delineation of fault segments in mines using seismic source mechanisms and location uncertainty. <i>Journal of Applied Geophysics</i> , 2019 , 170, 103828	1.7	2
64	Structure of the crust and upper mantle beneath Bass Strait, southeast Australia, from teleseismic body wave tomography. <i>Physics of the Earth and Planetary Interiors</i> , 2019 , 294, 106276	2.3	1
63	A Multivariate Approach for Mapping Lithospheric Domain Boundaries in East Antarctica. <i>Geophysical Research Letters</i> , 2019 , 46, 10404-10416	4.9	9
62	Transdimensional ambient noise tomography of Bass Strait, southeast Australia, reveals the sedimentary basin and deep crustal structure beneath a failed continental rift. <i>Geophysical Journal International</i> , 2019 ,	2.6	4
61	Well-Posed Geoscientific Visualization Through Interactive Color Mapping. <i>Frontiers in Earth Science</i> , 2019 , 7,	3.5	4
60	Improved supervised classification of bedrock in areas of transported overburden: Applying domain expertise at Kerkasha, Eritrea. <i>Applied Computing and Geosciences</i> , 2019 , 3-4, 100001	2.8	4
59	Lithologic mapping using Random Forests applied to geophysical and remote-sensing data: A demonstration study from the Eastern Goldfields of Australia. <i>Geophysics</i> , 2018 , 83, B183-B193	3.1	36
58	Matched Field Processing of Three-Component Seismic Array Data Applied to Rayleigh and Love Microseisms. <i>Journal of Geophysical Research: Solid Earth</i> , 2018 , 123, 6871-6889	3.6	15
57	The Utility of Machine Learning in Identification of Key Geophysical and Geochemical Datasets: A Case Study in Lithological Mapping in the Central African Copper Belt. <i>ASEG Extended Abstracts</i> , 2018 , 2018, 1-4	0.2	1
56	Full wavefield decomposition of high-frequency secondary microseisms reveals distinct arrival azimuths for Rayleigh and Love waves. <i>Journal of Geophysical Research: Solid Earth</i> , 2017 , 122, 4660-4673	3.6	10
55	Animated analysis of geoscientific datasets: An interactive graphical application. <i>Computers and Geosciences</i> , 2017 , 109, 87-94	4.5	1
54	Source locations of teleseismic P, SV, and SH waves observed in microseisms recorded by a large aperture seismic array in China. <i>Earth and Planetary Science Letters</i> , 2016 , 449, 39-47	5.3	34
53	Deconvolution enhanced direction of arrival estimation using one- and three-component seismic arrays applied to ocean induced microseisms. <i>Geophysical Journal International</i> , 2016 , 206, 345-359	2.6	24
52	Lithological mapping via Random Forests: Information Entropy as a proxy for inaccuracy. <i>ASEG Extended Abstracts</i> , 2016 , 2016, 1-4	0.2	3
51	Big Data Techniques for Applied Geoscience: Compute and Communicate. <i>ASEG Extended Abstracts</i> , 2016 , 2016, 1-5	0.2	
50	Inherited crustal deformation along the East Gondwana margin revealed by seismic anisotropy tomography. <i>Geophysical Research Letters</i> , 2016 , 43, 12,082-12,090	4.9	8
49	Spatial-Contextual Supervised Classifiers Explored: A Challenging Example of Lithostratigraphy Classification. <i>IEEE Journal of Selected Topics in Applied Earth Observations and Remote Sensing</i> , 2015 , 8, 1371-1384	4.7	4
48	Linking mainland Australia and Tasmania using ambient seismic noise tomography: Implications for the tectonic evolution of the east Gondwana margin. <i>Gondwana Research</i> , 2015 , 28, 1212-1227	5.1	15

47	TaggerVR: Interactive Data Analytics for Geoscience - A Novel Interface for Interactive Visual Analytics of Large Geoscientific Datasets in Cloud Repositories 2015 ,		2
46	Insights into the continental structure of southeast Australia and Tasmania from passive seismic and magnetic datasets. <i>ASEG Extended Abstracts</i> , 2015 , 2015, 1-4	0.2	1
45	Evidence of micro-continent entrainment during crustal accretion. <i>Scientific Reports</i> , 2015 , 5, 8218	4.9	25
44	The frequency dependence and locations of short-period microseisms generated in the Southern Ocean and West Pacific. <i>Journal of Geophysical Research: Solid Earth</i> , 2015 , 120, 5764-5781	3.6	29
43	Multiple influences on regolith characteristics from continental-scale geophysical and mineralogical remote sensing data using Self-Organizing Maps. <i>Remote Sensing of Environment</i> , 2015 , 165, 86-99	13.2	13
42	Geological knowledge discovery and minerals targeting from regolith using a machine learning approach. <i>ASEG Extended Abstracts</i> , 2015 , 2015, 1-4	0.2	1
41	Combining Machine Learning and Geophysical Inversion for Applied Geophysics. <i>ASEG Extended Abstracts</i> , 2015 , 2015, 1-5	0.2	3
40	Geological mapping using remote sensing data: A comparison of five machine learning algorithms, their response to variations in the spatial distribution of training data and the use of explicit spatial information. <i>Computers and Geosciences</i> , 2014 , 63, 22-33	4.5	278
39	Dominant seismic noise sources in the Southern Ocean and West Pacific, 2000-2012, recorded at the Warramunga Seismic Array, Australia. <i>Geophysical Research Letters</i> , 2014 , 41, 3455-3463	4.9	31
38	Improved implementation of the fk and Capon methods for array analysis of seismic noise. <i>Geophysical Journal International</i> , 2014 , 198, 1045-1054	2.6	14
37	Mapping geology and volcanic-hosted massive sulfide alteration in the Hellyer Mt Charter region, Tasmania, using Random Forests and Self-Organising Maps. <i>Australian Journal of Earth Sciences</i> , 2014 , 61, 287-304	1.4	50
36	Depth to basement and seismic velocity structure from passive seismic soundings in central Australia. <i>ASEG Extended Abstracts</i> , 2013 , 2013, 1-4	0.2	
35	The upside of uncertainty: Identification of lithology contact zones from airborne geophysics and satellite data using random forests and support vector machines. <i>Geophysics</i> , 2013 , 78, WB113-WB126	3.1	57
34	Supervised and unsupervised classification of near-mine soil Geochemistry and Geophysics data. <i>ASEG Extended Abstracts</i> , 2013 , 2013, 1-4	0.2	
33	Crustal architecture of the Capricorn Orogen, Western Australia and associated metallogeny. <i>Australian Journal of Earth Sciences</i> , 2013 , 60, 681-705	1.4	105
32	Constraining depth to basement for mineral exploration using microtremor: A demonstration study from remote inland Australia. <i>Geophysics</i> , 2013 , 78, B227-B242	3.1	7
31	Transdimensional change-point modeling as a tool to investigate uncertainty in applied geophysical inference: An example using borehole geophysical logs. <i>Geophysics</i> , 2013 , 78, WB89-WB99	3.1	6
30	Seismic structure of the crust and uppermost mantle of the Capricorn and Paterson Orogens and adjacent cratons, Western Australia, from passive seismic transects. <i>Precambrian Research</i> , 2012 , 196-197, 295-308	3.9	20

29	Exploiting seismic signal and noise in an intracratonic environment to constrain crustal structure and source parameters of infrequent earthquakes. <i>Geophysical Journal International</i> , 2012 , 188, 1303-1321	3.6	3
28	High-frequency ambient noise tomography of southeast Australia: New constraints on Tasmania's tectonic past. <i>Geophysical Research Letters</i> , 2011 , 38, n/a-n/a	4.9	44
27	AusMoho: the variation of Moho depth in Australia. <i>Geophysical Journal International</i> , 2011 , 187, 946-958	2.6	93
26	Core structure re-examined using new teleseismic data recorded in Antarctica: evidence for, at most, weak cylindrical seismic anisotropy in the inner core. <i>Geophysical Journal International</i> , 2010 , 180, 1329-1343	2.6	22
25	Structure of the Tasmanian lithosphere from 3D seismic tomography. <i>Australian Journal of Earth Sciences</i> , 2010 , 57, 381-394	1.4	23
24	Steps in lithospheric thickness within eastern Australia, evidence from surface wave tomography. <i>Tectonics</i> , 2008 , 27, n/a-n/a	4.3	100
23	Anomalous lithosphere beneath the Proterozoic of western and central Australia: A record of continental collision and intraplate deformation?. <i>Precambrian Research</i> , 2008 , 166, 111-121	3.9	69
22	Seismic anisotropy of East Antarctica from shear-wave splitting: Spatially varying contributions from lithospheric structural fabric and mantle flow?. <i>Earth and Planetary Science Letters</i> , 2008 , 268, 433-443	5.3	9
21	Bouncing continents: insights into the physics of the polar regions of the Earth from the POLENET project in the International Polar Year. <i>Physics Education</i> , 2008 , 43, 383-391	0.8	
20	Combining Seismic Data from Passive and Active Sources for understanding the terrane structure of the Eastern Goldfields, Western Australia. <i>ASEG Extended Abstracts</i> , 2007 , 2007, 1-4	0.2	
19	New constraints on the seismic structure of West Australia: Evidence for terrane stabilization prior to the assembly of an ancient continent?. <i>Geology</i> , 2007 , 35, 379	5	30
18	The seismicity of the Antarctic plate 2007 ,		8
17	Lithospheric structure of Tasmania from a novel form of teleseismic tomography. <i>Journal of Geophysical Research</i> , 2006 , 111, n/a-n/a		86
16	The seismic structure of Precambrian and early Palaeozoic terranes in the Lambert Glacier region, East Antarctica. <i>Earth and Planetary Science Letters</i> , 2006 , 244, 44-57	5.3	43
15	An integrated multi-scale 3D seismic model of the Archaean Yilgarn Craton, Australia. <i>Tectonophysics</i> , 2006 , 420, 75-90	3.1	23
14	On Seismic Strain-Release within the Antarctic Plate 2006 , 351-355		6
13	Contrasts in lithospheric structure within the Australian craton: insights from surface wave tomography. <i>Earth and Planetary Science Letters</i> , 2005 , 231, 163-176	5.3	132
12	Investigating the deep structure of terranes and terrane boundaries: insights from earthquake seismic data. <i>Geological Society Special Publication</i> , 2005 , 246, 293-303	1.7	4

11	Contrasts in mantle structure beneath Australia: relation to Tasman Lines?. <i>Australian Journal of Earth Sciences</i> , 2004 , 51, 563-569	1.4	45
10	The Seismic Structure of Wilkes Land/Terre Adelie, East Antarctica and Comparison with Australia: First Steps in Reconstructing the Deep Lithosphere of Gondwana. <i>Gondwana Research</i> , 2004 , 7, 21-30	5.1	18
9	Seismic structure of the Yilgarn Craton, Western Australia. <i>Australian Journal of Earth Sciences</i> , 2003 , 50, 427-438	1.4	41
8	Lithospheric structure of the Pilbara Craton, Capricorn Orogen and northern Yilgarn Craton, Western Australia, from teleseismic receiver functions. <i>Australian Journal of Earth Sciences</i> , 2003 , 50, 439-445	1.4	37
7	Improved inversion for seismic structure using transformed, S-wavevector receiver functions: Removing the effect of the free surface. <i>Geophysical Research Letters</i> , 2003 , 30,	4.9	42
6	Constraints on the frequency-magnitude relation and maximum magnitudes in the UK from observed seismicity and glacio-isostatic recovery rates. <i>Geophysical Journal International</i> , 2002 , 137, 535-550	2.6	25
5	A multiphase seismic investigation of the shallow subduction zone, southern North Island, New Zealand. <i>Geophysical Journal International</i> , 2001 , 147, 215-226	2.6	12
4	Polarization filtering for automatic picking of seismic data and improved converted phase detection. <i>Geophysical Journal International</i> , 2001 , 147, 227-234	2.6	29
3	Antarctic seismology. <i>Physics Education</i> , 1999 , 34, 175-179	0.8	
2	South Sandwich slices reveal much about arc structure, geodynamics, and composition. <i>Eos</i> , 1998 , 79, 281-281	1.5	14
1	Shallow fault location in coal measures using offset Wenner resistivity profiling ¹ . <i>Geophysical Prospecting</i> , 1994 , 42, 343-356	1.9	2
