

Dipak Mazumdar

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/685604/dipak-mazumdar-publications-by-year.pdf>

Version: 2024-04-19

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
72	Modeling of Fluid Flow and Bulk Liquid Mixing Phenomena in a Mechanically Agitated Ladle. <i>Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science</i> , 2022 , 53, 304-319	2.5	1
71	Fluid Flow and Mixing Phenomena in Mechanically Agitated and Gas Stirred Ladle Systems and Their Comparisons. <i>ISIJ International</i> , 2022 , 62, 112-123	1.7	
70	Review and Analysis of Metallurgical Processes in Blast Furnace Main Trough and Trough Performances. <i>Transactions of the Indian Institute of Metals</i> , 2022 , 75, 589	1.2	0
69	Physical Modelling of Nitrogen Variation in Continuously Cast Blooms Resulting from Atmospheric Exposure of Steel in Tundish during Initial Stages of Teeming. <i>ISIJ International</i> , 2022 , 62, 609-612	1.7	1
68	Tundish Process Performance Parameters and Their Direct Estimation from a New, Plant Measurement-Based Formalism. <i>Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science</i> , 2021 , 52, 23-29	2.5	2
67	Assessment of Tundish Process Performance at Industrial Scale. <i>Transactions of the Indian Institute of Metals</i> , 2020 , 73, 3079-3093	1.2	2
66	Discussion on Review of Physical and Numerical Approaches for the Study of Gas Stirring in Ladle Metallurgy. <i>Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science</i> , 2020 , 51, 412-416	2.5	2
65	Effects of Nozzle Radial Position, Separation Angle, and Gas Flow Partitioning on the Mixing, Eye Area, and Wall Shear Stress in Ladles Fitted with Dual Plugs. <i>Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science</i> , 2019 , 50, 1490-1502	2.5	14
64	Mathematical Modelling of Gas-Liquid, Two-Phase Flows in a Ladle Shroud. <i>Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science</i> , 2019 , 50, 1091-1103	2.5	4
63	Review, Analysis, and Modeling of Continuous Casting Tundish Systems. <i>Steel Research International</i> , 2019 , 90, 1800279	1.6	16
62	Steady-State Materials and Enthalpy Balance: Applications to Ferroalloy Production and Industrial-Scale Validation. <i>Transactions of the Indian Institute of Metals</i> , 2019 , 72, 455-473	1.2	1
61	Numerical Analysis of Turbulence Inhibitor Toward Inclusion Separation Efficiency in Tundish. <i>Transactions of the Indian Institute of Metals</i> , 2019 , 72, 889-898	1.2	6
60	Transient, Multiphase Simulation of Grade Intermixing in a Tundish Under Constant Casting Rate and Validation Against Physical Modeling. <i>Jom</i> , 2018 , 70, 2139-2147	2.1	8
59	A Physical Model Study of Two-Phase Gas-Liquid Flows in a Ladle Shroud. <i>Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science</i> , 2018 , 49, 1945-1962	2.5	7
58	Shrouded Transfer of Molten Steel from Ladle to Tundish: Current Understanding, Mathematical Modelling and New Insight. <i>ISIJ International</i> , 2018 , 58, 1545-1547	1.7	5
57	Modeling and Optimisation of Gas Stirred Ladle Systems. <i>ISIJ International</i> , 2017 , 57, 286-295	1.7	30
56	Heat Flow and Solidification Modeling of Industrial Scale, Ingot Casting Operation. <i>Transactions of the Indian Institute of Metals</i> , 2017 , 70, 1721-1733	1.2	

55	Swirling Flows in Side Blowing Reactors and Possible Advantages. <i>Transactions of the Indian Institute of Metals</i> , 2015 , 68, 669-673	1.2	
54	Measurements of Some Thermal Properties of Steel-Refractory Systems and Heat Losses from Steelmaking Furnaces. <i>Transactions of the Indian Institute of Metals</i> , 2015 , 68, 383-392	1.2	1
53	Modeling and Measurements of Intermixing Time in a Water Model of a Four Strand Steelmaking Tundish System. <i>Transactions of the Indian Institute of Metals</i> , 2013 , 66, 281-295	1.2	12
52	Tundish Metallurgy: Towards Increased Productivity and Clean Steel. <i>Transactions of the Indian Institute of Metals</i> , 2013 , 66, 597-610	1.2	23
51	Reduction of Tundish Skull and Yield Improvement in Steel Plants Through Physical Modeling of Steelmaking Tundish Systems. <i>Transactions of the Indian Institute of Metals</i> , 2011 , 64, 593-605	1.2	15
50	Mixing Models for Slag Covered, Argon Stirred Ladles. <i>ISIJ International</i> , 2010 , 50, 1117-1124	1.7	30
49	Modeling of Slag Eye Area in Argon Stirred Ladles. <i>ISIJ International</i> , 2010 , 50, 1622-1631	1.7	47
48	Modeling Energy Dissipation in Slag-Covered Steel Baths in Steelmaking Ladles. <i>Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science</i> , 2010 , 41, 976-989	2.5	38
47	Mathematical Modeling and Validation of Wall Shear Stress in Gas Stirred Vessels. <i>ISIJ International</i> , 2008 , 48, 1033-1035	1.7	11
46	Modeling of Fluid Flow and Residence Time Distribution in a Four-strand Tundish for Enhancing Inclusion Removal. <i>ISIJ International</i> , 2008 , 48, 38-47	1.7	57
45	Discussion on Modeling of Slag Eye Formation over a Metal Bath Due to Gas Bubbling. <i>Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science</i> , 2007 , 38, 497-499	2.5	5
44	Physical and Mathematical Modeling of Two-Phase Flows in a HOLLOW JET NOZZLE. <i>Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science</i> , 2007 , 38, 819-831	2.5	2
43	Mathematical modeling of particle segregation during centrifugal casting of metal matrix composites. <i>Metallurgical and Materials Transactions A: Physical Metallurgy and Materials Science</i> , 2006 , 37, 1675-1687	2.3	16
42	Modeling of Mixing in Ladles Fitted with Dual Plugs. <i>ISIJ International</i> , 2005 , 45, 677-685	1.7	40
41	Mixing time and correlation for ladles stirred with dual porous plugs. <i>Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science</i> , 2005 , 36, 479-487	2.5	37
40	Experimental validation of flow and tracer-dispersion models in a four-strand billet-casting tundish. <i>Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science</i> , 2005 , 36, 777-785	2.5	12
39	A computational assessment of viscosity measurement in rotating viscometers through detailed numerical simulation. <i>Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science</i> , 2004 , 35, 805-809	2.5	2
38	A model for estimating exposed plume eye area in steel refining ladles covered with thin slag. <i>Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science</i> , 2004 , 35, 400-404	2.5	40

37	Macroscopic Models for Gas Stirred Ladles. <i>ISIJ International</i> , 2004 , 44, 447-461	1.7	50
36	An Assessment of Fluid Flow Modelling and Residence Time Distribution Phenomena in Steelmaking Tundish Systems. <i>ISIJ International</i> , 2004 , 44, 1334-1341	1.7	33
35	Transient Flows in Gas Stirred Vessels during Initial and Post Gas Injection Periods.. <i>ISIJ International</i> , 2003 , 43, 132-134	1.7	8
34	Some Considerations Concerning Empirical Correlations for Plume (Spout) Eye Area in Slag Covered Metallic Melts. <i>ISIJ International</i> , 2003 , 43, 2076-2078	1.7	5
33	Measurement and computation of drag forces in thermogravimetric studies. <i>Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science</i> , 2002 , 33, 891-896	2.5	1
32	On the estimation of plume rise velocity in gas-stirred ladles. <i>Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science</i> , 2002 , 33, 937-941	2.5	17
31	Physical and mathematical modelling of flow and residence time distributions in different tundish designs. <i>Steel Research = Archiv Für Das Eisenhüttenwesen</i> , 2001 , 72, 97-105		19
30	Dimensionless correlations for forced convection in liquid metals: Part II. two-phase flow. <i>Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science</i> , 2001 , 32, 247-252	2.5	8
29	Modelling criteria for flow simulation in gas stirred ladles: experimental study. <i>Ironmaking and Steelmaking</i> , 2000 , 27, 302-309	1.3	31
28	Modeling of composite growth in the directed aluminum melt nitridation process. <i>Metallurgical and Materials Transactions A: Physical Metallurgy and Materials Science</i> , 1999 , 30, 2951-2958	2.3	4
27	Analyses of the dynamic processes of liquid metal filtration. <i>Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science</i> , 1999 , 30, 891-900	2.5	5
26	The Physical and Mathematical Modelling of Continuous Casting Tundish System.. <i>ISIJ International</i> , 1999 , 39, 524-547	1.7	142
25	Dimensional Analysis and Mixing Phenomena in Bubble Stirred Ladles.. <i>ISIJ International</i> , 1998 , 38, 1150-1152	1.7	5
24	Hydrodynamic performance of steelmaking tundish systems: a comparative study of three different tundish designs. <i>Steel Research = Archiv Für Das Eisenhüttenwesen</i> , 1997 , 68, 293-300		30
23	The modeling of flow phenomena in air-agitated pachuka tanks. <i>Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science</i> , 1997 , 28, 727-732	2.5	1
22	Mass transfer between solid and liquid in a gas-stirred vessel. <i>Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science</i> , 1997 , 28, 95-102	2.5	8
21	A correlation for estimation of mass transfer rates of solids in gas stirred ladle systems. <i>Steel Research = Archiv Für Das Eisenhüttenwesen</i> , 1996 , 67, 263-267		
20	A unified representation of the two-phase plume characteristics in gas-stirred ladle systems. <i>Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science</i> , 1996 , 27, 704-708	2.5	5

19	The Physical and Mathematical Modelling of Gas Stirred Ladle Systems.. <i>ISIJ International</i> , 1995 , 35, 1-20	1.7	198
18	Mathematical modelling of fluid flow, heat transfer and solidification phenomena in continuous casting of steel. <i>Steel Research = Archiv Für Das Eisenhüttenwesen</i> , 1995 , 66, 199-205		30
17	Similarity considerations in the physical modelling of steel making tundish systems. <i>Steel Research = Archiv Für Das Eisenhüttenwesen</i> , 1995 , 66, 14-19		21
16	An Assessment of a Two Phase Calculation Procedure for Hydrodynamic Modelling of Submerged Gas Injection in Ladles.. <i>ISIJ International</i> , 1994 , 34, 384-392	1.7	33
15	On mathematical models and numerical solutions of gas stirred ladle systems. <i>Applied Mathematical Modelling</i> , 1993 , 17, 255-262	4.5	37
14	Motions of alloying additions in the CAS steelmaking operations. <i>Metallurgical and Materials Transactions B - Process Metallurgy and Materials Processing Science</i> , 1993 , 24, 649-655		5
13	Mathematical modelling of thermal fields in some heat treatment operations. <i>Steel Research = Archiv Für Das Eisenhüttenwesen</i> , 1992 , 63, 194-200		3
12	Numerical computation of flow phenomena in gas-stirred ladle systems. <i>Steel Research = Archiv Für Das Eisenhüttenwesen</i> , 1991 , 62, 16-23		12
11	Comparison of Several Numerical Prediction Methods for Thermal Fields during Phase Transformation of Plain Carbon Steels.. <i>ISIJ International</i> , 1991 , 31, 1441-1444	1.7	2
10	Mass transfer between solid and liquid in vessels agitated by bubble plume. <i>Steel Research = Archiv Für Das Eisenhüttenwesen</i> , 1990 , 61, 339-346		13
9	Dynamic similarity considerations in gas-stirred ladle systems. <i>Metallurgical and Materials Transactions B - Process Metallurgy and Materials Processing Science</i> , 1990 , 21, 925-928		28
8	Possible roles of upper slag phases on the fluid dynamics of gas stirred ladles. <i>Metallurgical and Materials Transactions B - Process Metallurgy and Materials Processing Science</i> , 1988 , 19, 507-511		30
7	High-pressure studies on lithium fast-ion conductors. <i>Journal of Materials Research</i> , 1987 , 2, 366-373	2.5	1
6	Numerical computation of flow and mixing in ladle metallurgy steelmaking operations (C.A.S. method). <i>Applied Mathematical Modelling</i> , 1986 , 10, 25-32	4.5	16
5	Mixing models for gas stirred metallurgical reactors. <i>Metallurgical and Materials Transactions B - Process Metallurgy and Materials Processing Science</i> , 1986 , 17, 725-733		81
4	Evidence for amphoteric behavior of Ru on CdTe surfaces. <i>Applied Physics Letters</i> , 1986 , 48, 472-474	3.4	12
3	Hydrodynamic modeling of some gas injection procedures in ladle metallurgy operations. <i>Metallurgical and Materials Transactions B - Process Metallurgy and Materials Processing Science</i> , 1985 , 16, 83-90		70
2	Modeling of Steelmaking Processes		38

- 1 Discussion on Numerical Study of Desulphurization Behavior during Kanbara Reactor Hot Metal Treatment *Metallurgical and Materials Transactions B: Process Metallurgy and Materials Processing Science*, 1 2.5
