

Cody Ashby

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/6874519/cody-ashby-publications-by-year.pdf>

Version: 2024-04-24

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
61	Notch3 signaling between myeloma cells and osteocytes in the tumor niche promotes tumor growth and bone destruction.. <i>Neoplasia</i> , 2022 , 28, 100785	6.4	0
60	Chromothripsis as a pathogenic driver of multiple myeloma. <i>Seminars in Cell and Developmental Biology</i> , 2021 ,	7.5	1
59	Improving prognostic assignment in older adults with multiple myeloma using acquired genetic features, clonal hemopoiesis and telomere length. <i>Leukemia</i> , 2021 ,	10.7	3
58	TRIP13 modulates protein deubiquitination and accelerates tumor development and progression of B cell malignancies. <i>Journal of Clinical Investigation</i> , 2021 , 131,	15.9	1
57	High-risk transcriptional profiles in multiple myeloma are an acquired feature that can occur in any subtype and more frequently with each subsequent relapse. <i>British Journal of Haematology</i> , 2021 , 195, 283-286	4.5	2
56	Differential RNA splicing as a potentially important driver mechanism in multiple myeloma. <i>Haematologica</i> , 2021 , 106, 736-745	6.6	7
55	Monitoring treatment response and disease progression in myeloma with circulating cell-free DNA. <i>European Journal of Haematology</i> , 2021 , 106, 230-240	3.8	5
54	The molecular make up of smoldering myeloma highlights the evolutionary pathways leading to multiple myeloma. <i>Nature Communications</i> , 2021 , 12, 293	17.4	20
53	FiNGS: high quality somatic mutations using filters for next generation sequencing. <i>BMC Bioinformatics</i> , 2021 , 22, 77	3.6	1
52	Mutations in CRBN and other cereblon pathway genes are infrequently associated with acquired resistance to immunomodulatory drugs. <i>Leukemia</i> , 2021 , 35, 3017-3020	10.7	3
51	Plasma cells expression from smoldering myeloma to myeloma reveals the importance of the PRC2 complex, cell cycle progression, and the divergent evolutionary pathways within the different molecular subgroups. <i>Leukemia</i> , 2021 ,	10.7	3
50	Genomic analysis of primary plasma cell leukemia reveals complex structural alterations and high-risk mutational patterns. <i>Blood Cancer Journal</i> , 2020 , 10, 70	7	16
49	and Mutations Associate with Adverse Outcome in a Long-term Follow-up of Patients with Multiple Myeloma. <i>Clinical Cancer Research</i> , 2020 , 26, 2422-2432	12.9	17
48	Mutations in CRBN and Other Cereblon Pathway Genes Are Only Associated with Acquired Resistance to Immunomodulatory Drugs in a Subset of Patients and Cell Line Models. <i>Blood</i> , 2020 , 136, 6-7	2.2	
47	Influence of Aging Processes on the Biology and Outcome of Multiple Myeloma. <i>Blood</i> , 2020 , 136, 8-9	2.2	1
46	Bone marrow microenvironments that contribute to patient outcomes in newly diagnosed multiple myeloma: A cohort study of patients in the Total Therapy clinical trials. <i>PLoS Medicine</i> , 2020 , 17, e1003323	11.6	10
45	Accelerated single cell seeding in relapsed multiple myeloma. <i>Nature Communications</i> , 2020 , 11, 3617	17.4	16

44	The functional epigenetic landscape of aberrant gene expression in molecular subgroups of newly diagnosed multiple myeloma. <i>Journal of Hematology and Oncology</i> , 2020 , 13, 108	22.4	8
43	Revealing the impact of structural variants in multiple myeloma. <i>Blood Cancer Discovery</i> , 2020 , 1, 258-273		28
42	Microhomology-mediated end joining drives complex rearrangements and overexpression of and in multiple myeloma. <i>Haematologica</i> , 2020 , 105, 1055-1066	6.6	22
41	TarPan: an easily adaptable targeted sequencing panel viewer for research and clinical use. <i>BMC Bioinformatics</i> , 2020 , 21, 144	3.6	1
40	Clonal evolution in myeloma: the impact of maintenance lenalidomide and depth of response on the genetics and sub-clonal structure of relapsed disease in uniformly treated newly diagnosed patients. <i>Haematologica</i> , 2019 , 104, 1440-1450	6.6	39
39	A high-risk, Double-Hit, group of newly diagnosed myeloma identified by genomic analysis. <i>Leukemia</i> , 2019 , 33, 159-170	10.7	176
38	Analysis of the Sub-Clonal Structure of Smoldering Myeloma over Time Provides a New Means of Disease Monitoring and Highlights Evolutionary Trajectories Leading to Myeloma. <i>Blood</i> , 2019 , 134, 4333-4333 ²	2.2	2
37	The Spectrum of Exomic Mutation in Elderly Myeloma Differs Substantially from Patients at Younger Ages Consistent with a Different Evolutionary Trajectory to Full Blown Disease Based on Age of Onset. <i>Blood</i> , 2019 , 134, 4346-4346	2.2	2
36	Chromoplexy and Chromothripsis Are Important Prognostically in Myeloma and Deregulate Gene Function By a Range of Mechanisms. <i>Blood</i> , 2019 , 134, 3767-3767	2.2	3
35	Poor overall survival in hyperhaploid multiple myeloma is defined by double-hit bi-allelic inactivation of. <i>Oncotarget</i> , 2019 , 10, 732-737	3.3	5
34	Example of a Scalable and Adaptable Approach for NGS Analyses Leveraging High-Performance Computing 2019 , 247-269		
33	The mTOR Component, Rictor, Is Regulated By the Microenvironment to Control Dormancy and Proliferative States in Myeloma Cells. <i>Blood</i> , 2019 , 134, 4412-4412	2.2	
32	Combination of flow cytometry and functional imaging for monitoring of residual disease in myeloma. <i>Leukemia</i> , 2019 , 33, 1713-1722	10.7	66
31	Loss of heterozygosity as a marker of homologous repair deficiency in multiple myeloma: a role for PARP inhibition?. <i>Leukemia</i> , 2018 , 32, 1561-1566	10.7	29
30	DNAP: A Pipeline for DNA-seq Data Analysis. <i>Scientific Reports</i> , 2018 , 8, 6793	4.9	11
29	Long-Term Follow-up Identifies Double Hit and Key Mutations As Impacting Progression Free and Overall Survival in Multiple Myeloma. <i>Blood</i> , 2018 , 132, 110-110	2.2	1
28	Baseline and on-Treatment Bone Marrow Microenvironments Predict Myeloma Patient Outcomes and Inform Potential Intervention Strategies. <i>Blood</i> , 2018 , 132, 1882-1882	2.2	2
27	The Mutational Landscape of Primary Plasma Cell Leukemia. <i>Blood</i> , 2018 , 132, 114-114	2.2	2

26	A High-Risk Multiple Myeloma Group Identified By Integrative Multi-Omics Segmentation of Newly Diagnosed Patients. <i>Blood</i> , 2018 , 132, 3165-3165	2.2	2
25	Chromothripsis and Chromoplexy Are Associated with DNA Instability and Adverse Clinical Outcome in Multiple Myeloma. <i>Blood</i> , 2018 , 132, 408-408	2.2	2
24	Global Expression Changes of Malignant Plasma Cells over Time Reveals the Evolutionary Development of Signatures of Aggressive Clinical Behavior. <i>Blood</i> , 2018 , 132, 4457-4457	2.2	
23	Poor Overall Survival in Hyperhaploid Multiple Myeloma Is Defined By Double-Hit Bi-Allelic Inactivation of TP53. <i>Blood</i> , 2018 , 132, 4441-4441	2.2	
22	Mutations and Copy Number Changes Predict Progression from Smoldering Myeloma to Symptomatic Myeloma in the Era of Novel IMWG Criteria. <i>Blood</i> , 2018 , 132, 4456-4456	2.2	
21	Global 3D-Epigenetic Dysregulation of Cyclin D1 and D2 Actively Controls Their Expression Pattern in Multiple Myeloma. <i>Blood</i> , 2018 , 132, 3904-3904	2.2	
20	Combination of Flow Cytometry and Functional Imaging for Monitoring of Residual Disease in Myeloma. <i>Blood</i> , 2018 , 132, 3185-3185	2.2	
19	Extracting Prognostic Molecular Information from PET-CT Imaging of Multiple Myeloma Using Radiomic Approaches. <i>Blood</i> , 2018 , 132, 1906-1906	2.2	
18	Hotspot Mutations in SF3B1 Result in Increased Alternative Splicing in Multiple Myeloma and Activation of Key Cellular Pathways. <i>Blood</i> , 2018 , 132, 4454-4454	2.2	
17	High Levels of APOBEC3B Gene Expression Contribute to Poor Prognosis in Multiple Myeloma Patients. <i>Blood</i> , 2018 , 132, 3897-3897	2.2	
16	Proliferation and Molecular Risk Score of Low Risk Myeloma Cells Are Increased in High Risk Microenvironment Via Augmented Bioavailability of Growth Factors. <i>Blood</i> , 2018 , 132, 1929-1929	2.2	
15	The genomic landscape of plasma cells in systemic light chain amyloidosis. <i>Blood</i> , 2018 , 132, 2775-2777	2.2	10
14	Bi-allelic inactivation is more prevalent at relapse in multiple myeloma, identifying RB1 as an independent prognostic marker. <i>Blood Cancer Journal</i> , 2017 , 7, e535	7	39
13	The level of deletion 17p and bi-allelic inactivation of has a significant impact on clinical outcome in multiple myeloma. <i>Haematologica</i> , 2017 , 102, e364-e367	6.6	44
12	Spatial genomic heterogeneity in multiple myeloma revealed by multi-region sequencing. <i>Nature Communications</i> , 2017 , 8, 268	17.4	170
11	Extensive Regional Intra-Clonal Heterogeneity in Multiple Myeloma - Implications for Diagnostics, Risk Stratification and Targeted Treatment. <i>Blood</i> , 2016 , 128, 3278-3278	2.2	2
10	The Multiple Myeloma Genome Project: Development of a Molecular Segmentation Strategy for the Clinical Classification of Multiple Myeloma. <i>Blood</i> , 2016 , 128, 196-196	2.2	1
9	High Risk Myeloma Is Characterized By the Bi-Allelic Inactivation of CDKN2C and RB1. <i>Blood</i> , 2016 , 128, 4416-4416	2.2	0

8	Multiple Myeloma with a Deletion of Chromosome 17p: TP53 Mutations Are Highly Prevalent and Negatively Affect Prognosis. <i>Blood</i> , 2016 , 128, 3271-3271	2.2	
7	Clonal selection and double-hit events involving tumor suppressor genes underlie relapse in myeloma. <i>Blood</i> , 2016 , 128, 1735-44	2.2	129
6	Bridger: a new framework for de novo transcriptome assembly using RNA-seq data. <i>Genome Biology</i> , 2015 , 16, 30	18.3	190
5	Enhancing cancer clonality analysis with integrative genomics. <i>BMC Bioinformatics</i> , 2015 , 16 Suppl 13, S7	3.6	3
4	SPARCoC: a new framework for molecular pattern discovery and cancer gene identification. <i>PLoS ONE</i> , 2015 , 10, e0117135	3.7	5
3	eMBI: Boosting Gene Expression-based Clustering for Cancer Subtypes. <i>Cancer Informatics</i> , 2014 , 13, 105-12	2.4	5
2	New enumeration algorithm for protein structure comparison and classification. <i>BMC Genomics</i> , 2013 , 14 Suppl 2, S1	4.5	4
1	Revealing the impact of recurrent and rare structural variants in multiple myeloma		1
