#	ARTICLE	IF	CITATIONS
1	Malignant Mesothelioma Among Employees of a Connecticut Factory That Manufactured Friction Materials Using Chrysotile Asbestos: An Update. <i>Annals of Work Exposures and Health</i> , 2020, 64, 106-109.	0.6	1
2	Letter to the Editor: Re Fordyce et al. (2019) Vermont Talc Miners and Millers Cohort Study Update. <i>Journal of Occupational and Environmental Medicine</i> , 2020, 62, e170-e171.	0.9	0
3	Malignant Mesothelioma and Its Nonasbestos Causes. <i>Archives of Pathology and Laboratory Medicine</i> , 2019, 143, 659-660.	1.2	7
4	A comparison of asbestos fiber potency and elongate mineral particle (EMP) potency for mesothelioma in humans. <i>Toxicology and Applied Pharmacology</i> , 2019, 371, 1-2.	1.3	2
5	Letter concerning: Occupational exposures to cosmetic talc and risk of mesothelioma: an updated pooled cohort and statistical power analysis with consideration of latency period by Gary M. Marsh et al. (<i>Inhal Toxicol.</i> 2019 Aug 5;11. doi:10.1080/08958378.2019.1645768). <i>Inhalation Toxicology</i> , 2019, 31, 429-431.	0.8	0
6	Response to Marsh, G. M., Ierardi, A. M., Benson, S. M., & Finley, B. L. (2019). Occupational exposures to cosmetic talc and risk of mesothelioma: an updated pooled cohort and statistical power analysis with consideration of latency period. <i>Inhalation toxicology</i> , 31(6), 213-223. <i>Inhalation Toxicology</i> , 2019, 31, 385-386.	0.8	1
7	Letter concerning: Burns AM, Barlow CA, Banducci AM, Unice KM, Sahmel J. Potential Airborne Asbestos Exposure and Risk Associated with the Historical Use of Cosmetic Talcum Powder Products. <i>Risk Analysis</i> , 2019, 39, 2601-2603.	1.5	0
8	Comments on "Dimensions of elongated mineral particles with implications for pathogenicity and classification as asbestiform versus cleavage fragments". <i>Ultrastructural Pathology</i> , 2019, 43, 326-329.	0.4	0
9	Reanalysis of non-occupational exposure to asbestos and the risk of pleural mesothelioma. <i>Occupational and Environmental Medicine</i> , 2018, 75, 472-473.	1.3	3
10	Response to: "The epidemiology of malignant mesothelioma in women: gender differences and modalities of asbestos exposure" by Marinaccio et al. <i>Occupational and Environmental Medicine</i> , 2018, 75, 844.1-844.	1.3	1
11	Letter Concerning: Glynn ME, Keeton KA, Gaffney SH, Sahmel J. Ambient Asbestos Fiber Concentrations and Long-Term Trends in Pleural Mesothelioma Incidence Between Urban and Rural Areas in the United States (1973-2012). <i>Risk Analysis</i> 2018;38(3):454-471. <i>Risk Analysis</i> , 2018, 38, 1521-1523.	1.5	3
12	Relationship between income and mortality in a Canadian family practice cohort. <i>Canadian Family Physician</i> , 2018, 64, e181-e189.	0.1	2
13	Re. <i>Journal of Occupational and Environmental Medicine</i> , 2017, 59, e194.	0.9	6
14	Re: Brent L. Finley, Stacey M. Benson & Gary M. Marsh (2017): Cosmetic talc as a risk factor for pleural mesothelioma: a weight of evidence evaluation of the epidemiology, <i>Inhalation Toxicology</i> , DOI: 10.1080/08958378.2017.1336187. <i>Inhalation Toxicology</i> , 2017, 29, 387-388.	0.8	4
15	In reference to "Asbestos exposure and laryngeal cancer mortality". <i>Laryngoscope</i> , 2017, 127, E114.	1.1	1
16	Historical ambient airborne asbestos concentrations in the United States. <i>Inhalation Toxicology</i> , 2016, 28, 429-430.	0.8	0
17	Asbestos Fibres in the Lungs of an American Mechanic Who Drilled, Riveted, and Ground Brake Linings: A Case Report and Discussion. <i>Annals of Occupational Hygiene</i> , 2015, 59, 525-7.	1.9	3
18	Statins and Musculoskeletal Adverse Events. <i>JAMA Internal Medicine</i> , 2014, 174, 302.	2.6	1

#	ARTICLE	IF	CITATIONS
19	Letter concerning the paper by Finley and colleagues: dx.doi.org/10.1016/j.yrtph.2012.05.015 . Regulatory Toxicology and Pharmacology, 2013, 65, 178-179.	1.3	1
20	Letter to the Editor re Bernstein et al: Health risk of chrysotile revisited. Crit Rev Toxicol, 2013; 43(2): 154-183. Critical Reviews in Toxicology, 2013, 43, 707-708.	1.9	5
21	The analysis of asbestos count data with "non-detects": The example of asbestos fiber concentrations in the lungs of brake workers. American Journal of Industrial Medicine, 2013, 56, 1482-1489.	1.0	8
22	Pneumoconiosis and malignant mesothelioma in a family operated metal casting business that used industrial talc from New York state. American Journal of Industrial Medicine, 2013, 56, 550-555.	1.0	4
23	Reply to letter by Nolan and colleagues "re: The carcinogenicity of New York state talc dusts in humans. American Journal of Industrial Medicine, 2013, 56, 1119-1124.	1.0	3
24	Letter re Marsh et al. Inhalation Toxicology, 2012, 24, 139-140.	0.8	1
25	The Association Between Chronic Exposure to Traffic-Related Air Pollution and Ischemic Heart Disease. Journal of Toxicology and Environmental Health - Part A: Current Issues, 2012, 75, 402-411.	1.1	88
26	Malignant mesothelioma incidence among talc miners and millers in New York State. American Journal of Industrial Medicine, 2012, 55, 863-868.	1.0	20
27	Mortality among Subjects with Chronic Obstructive Pulmonary Disease or Asthma at Two Respiratory Disease Clinics in Ontario. Canadian Respiratory Journal, 2011, 18, 327-332.	0.8	5
28	Re: Response to Ross. American Journal of Industrial Medicine, 2011, 54, 497-498.	1.0	0
29	Lung cancer in the melt shops of Ontario steelmakers. American Journal of Industrial Medicine, 2010, 53, 762-762.	1.0	0
30	Absence of radiographic asbestosis and the risk of lung cancer among asbestos-cement workers: Extended follow-up of a cohort. American Journal of Industrial Medicine, 2010, 53, 1065-1069.	1.0	10
31	Malignant Mesothelioma Among Employees of a Connecticut Factory that Manufactured Friction Materials Using Chrysotile Asbestos. Annals of Occupational Hygiene, 2010, 54, 692-6.	1.9	19
32	A Cohort Study of Traffic-Related Air Pollution and Mortality in Toronto, Ontario, Canada. Environmental Health Perspectives, 2009, 117, 772-777.	2.8	190
33	Correlation of nitrogen dioxide with other traffic pollutants near a major expressway. Atmospheric Environment, 2008, 42, 275-290.	1.9	265
34	The Prevalence of Diabetes Among Overweight and Obese Individuals is Higher in Poorer than in Richer Neighbourhoods. Canadian Journal of Diabetes, 2008, 32, 190-197.	0.4	4
35	Asbestos Fibre Concentrations in the Lungs of Brake Workers: Another Look. Annals of Occupational Hygiene, 2008, 52, 455-61.	1.9	29
36	The Relationship Between Diabetes Mellitus and Traffic-Related Air Pollution. Journal of Occupational and Environmental Medicine, 2008, 50, 32-38.	0.9	227

#	ARTICLE	IF	CITATIONS
37	A study of the relationships between Parkinson's disease and markers of traffic-derived and environmental manganese air pollution in two Canadian cities. <i>Environmental Research</i> , 2007, 104, 420-432.	3.7	242
38	A Land Use Regression Model for Predicting Ambient Concentrations of Nitrogen Dioxide in Hamilton, Ontario, Canada. <i>Journal of the Air and Waste Management Association</i> , 2006, 56, 1059-1069.	0.9	100
39	Mortality among Ontario members of the International Union of Bricklayers and Allied Craftworkers. <i>American Journal of Industrial Medicine</i> , 2005, 47, 4-9.	1.0	18
40	Environmental inequality and circulatory disease mortality gradients. <i>Journal of Epidemiology and Community Health</i> , 2005, 59, 481-487.	2.0	114
41	Urinary incontinence: common problem among women over 45. <i>Canadian Family Physician</i> , 2005, 51, 84-5.	0.1	26
42	Ecologic Proxies for Household Income. <i>Canadian Journal of Public Health</i> , 2004, 95, 90-94.	1.1	30
43	Traffic Air Pollution and Mortality Rate Advancement Periods. <i>American Journal of Epidemiology</i> , 2004, 160, 173-177.	1.6	186
44	A cohort study of mortality among Ontario pipe trades workers. <i>Occupational and Environmental Medicine</i> , 2004, 61, 736-742.	1.3	17
45	Ischemic heart disease mortality among heavy equipment operators. <i>American Journal of Industrial Medicine</i> , 2004, 46, 16-22.	1.0	17
46	Current Chemical Exposures Among Ontario Construction Workers. <i>Journal of Occupational and Environmental Hygiene</i> , 2003, 18, 1031-1047.	0.5	31
47	Diesel Exhaust Exposure in the Canadian Railroad Work Environment. <i>Journal of Occupational and Environmental Hygiene</i> , 2003, 18, 25-34.	0.5	24
48	Relation between income, air pollution and mortality: a cohort study. <i>Cmaj</i> , 2003, 169, 397-402.	0.9	48
49	Medical conditions, medications, and urinary incontinence. Analysis of a population-based survey. <i>Canadian Family Physician</i> , 2002, 48, 96-101.	0.1	45
50	Preventive screening. What factors influence testing?. <i>Canadian Family Physician</i> , 2002, 48, 1494-501.	0.1	32
51	Incontinence Quality of Life Instrument in a survey of primary care physicians. <i>Journal of Family Practice</i> , 2002, 51, 952.	0.2	37
52	Exposure Estimation in the Presence of Nondetectable Values: Another Look. <i>AIHAJ: A Journal for the Science of Occupational and Environmental Health and Safety</i> , 2001, 62, 195-198.	0.4	88
53	Obesity, Cigarette Smoking and the Cost of Physicians's Services in Ontario. <i>Canadian Journal of Public Health</i> , 2001, 92, 437-440.	1.1	20
54	RE: Mesothelioma and lung tumors attributable to asbestos among petroleum workers. <i>Am. J. Ind. Med.</i> 2000. 37:275-282. I. Reply to Tsai et al.'s letter to the editor and new evidence. <i>American Journal of Industrial Medicine</i> , 2001, 39, 517-521.	1.0	2

#	ARTICLE	IF	CITATIONS
55	Silica, Silicosis, and Lung Cancer. <i>Journal of Occupational and Environmental Medicine</i> , 2001, 43, 198-200.	0.9	2
56	Mesothelioma and lung tumors attributable to asbestos among petroleum workers. , 2000, 37, 275-282.		38
57	Leukemia after exposure to benzene: temporal trends and implications for standards. <i>American Journal of Industrial Medicine</i> , 2000, 38, 1-7.	1.0	38
58	Silica, silicosis, and lung cancer: a risk assessment. <i>American Journal of Industrial Medicine</i> , 2000, 38, 8-18.	1.0	61
59	Body mass index and quality of life in a survey of primary care patients. <i>Journal of Family Practice</i> , 2000, 49, 734-7.	0.2	33
60	RE: "MAGNETIC FIELD EXPOSURE AND CARDIOVASCULAR DISEASE MORTALITY AMONG ELECTRIC UTILITY WORKERS". <i>American Journal of Epidemiology</i> , 1999, 150, 1258-1258.	1.6	5
61	Maintenance work and asbestos-related cancers in the refinery and petrochemical sector. , 1999, 35, 201-205.		7
62	Inferences on the kinetics of asbestos deposition and clearance among chrysotile miners and millers. , 1999, 35, 401-412.		62
63	Maintenance work and asbestos-related cancers in the refinery and petrochemical sector. , 1999, 36, 326-326.		0
64	Occupational Exposure to Chemical and Biological Agents in the Nonproduction Departments of Pulp, Paper, and Paper Product Mills: An International Study. <i>AIHA Journal</i> , 1999, 60, 73-83.	0.4	1
65	Record linkage as a research tool for office-based medical care. <i>Canadian Family Physician</i> , 1999, 45, 344-51.	0.1	1
66	Cancer incidence among Ontario police officers. <i>American Journal of Industrial Medicine</i> , 1998, 34, 157-162.	1.0	53
67	Radiographic silicosis and lung cancer risk among workers in Ontario. , 1998, 34, 244-251.		19
68	Radiographic silicosis and lung cancer risk among workers in Ontario. , 1998, 34, 244.		1
69	Is brain cancer an occupational disease of cardiologists?. <i>Canadian Journal of Cardiology</i> , 1998, 14, 1385-8.	0.8	78
70	Radiographic asbestosis is not a prerequisite for asbestos-associated lung cancer in Ontario asbestos-cement workers. , 1997, 32, 341-348.		32
71	Radiographic asbestosis is not a prerequisite for asbestos-associated lung cancer in Ontario asbestos-cement workers. <i>American Journal of Industrial Medicine</i> , 1997, 32, 341-348.	1.0	1
72	Asbestos-associated cancers in the Ontario refinery and petrochemical sector. , 1996, 30, 610-615.		24

#	ARTICLE	IF	CITATIONS
73	Silicosis, Radon, and Lung Cancer Risk in Ontario Miners. <i>Health Physics</i> , 1995, 69, 396-399.	0.3	5
74	Occupational associations with lung cancer in two Ontario cities. <i>American Journal of Industrial Medicine</i> , 1995, 27, 127-136.	1.0	22
75	Potential Pitfall in Using Cumulative Exposure in Exposure-Response Relationships: Demonstration and Discussion. <i>American Journal of Industrial Medicine</i> , 1995, 28, 41-47.	1.0	7
76	Silicosis surveillance in ontario: Detection rates, modifying factors, and screening intervals. <i>American Journal of Industrial Medicine</i> , 1994, 25, 257-266.	1.0	16
77	Lung cancer among steelworkers in Ontario. <i>American Journal of Industrial Medicine</i> , 1994, 26, 549-557.	1.0	15
78	Analysis of the Exposure?Response Relationship for Mesothelioma among Asbestos-Cement Factory Workers. <i>Annals of the New York Academy of Sciences</i> , 1991, 643, 85-89.	1.8	6
79	Increased risk of lung cancer in the melting department of a second ontario steel manufacturer. <i>American Journal of Industrial Medicine</i> , 1991, 19, 183-194.	1.0	19
80	Use of "time windows" to investigate lung cancer latency intervals at an ontario steel plant. <i>American Journal of Industrial Medicine</i> , 1991, 19, 229-235.	1.0	23
81	Investigation of a lung cancer cluster in the melt shop of an ontario steel producer. <i>American Journal of Industrial Medicine</i> , 1990, 17, 483-491.	1.0	15
82	Mortality among employees of an ontario factory manufacturing insulation materials from amosite asbestos. <i>American Journal of Industrial Medicine</i> , 1989, 15, 477-481.	1.0	19
83	Mortality among employees of an ontario factory that manufactured construction materials using chrysotile asbestos and coal tar pitch. <i>American Journal of Industrial Medicine</i> , 1989, 16, 281-287.	1.0	7
84	Analysis of mortality patterns and workers' compensation awards among asbestos insulation workers in Ontario. <i>American Journal of Industrial Medicine</i> , 1989, 16, 523-528.	1.0	9
85	Selection bias in occupational case-control studies that use death registries to select subjects: A discussion and demonstration. <i>American Journal of Industrial Medicine</i> , 1987, 12, 21-31.	1.0	6
86	Exposures and mortality among chrysotile asbestos workers. <i>American Journal of Industrial Medicine</i> 4:421-433, 1983. <i>American Journal of Industrial Medicine</i> , 1984, 5, 407-408.	1.0	1
87	Mortality Among Employees of an Ontario Asbestos-Cement Factory ^{1,2} . <i>The American Review of Respiratory Disease</i> , 1984, 129, 754-761.	2.9	92
88	Asbestosis in Long-Term Employees of an Ontario Asbestos-Cement Factory ^{1,2} . <i>The American Review of Respiratory Disease</i> , 1982, 125, 496-501.	2.9	24
89	Mortality Among Miners Receiving Workmen's Compensation for Silicosis in Ontario: 1940-1975. <i>Journal of Occupational and Environmental Medicine</i> , 1982, 24, 663-667.	0.9	52
