#	ARTICLE	IF	CITATIONS
1	A Clinical Sign of Canal Paresis. Archives of Neurology, 1988, 45, 737-739.	4.9	1,167
2	The video head impulse test. Neurology, 2009, 73, 1134-1141.	1.5	669
3	Mechanisms of recovery following unilateral labyrinthectomy: a review. Brain Research Reviews, 1989, 14, 155-180.	9.1	581
4	Planar Relationships Of The Semicircular Canals In Man. Acta Oto-Laryngologica, 1975, 80, 185-196.	0.3	404
5	The Video Head Impulse Test. Frontiers in Neurology, 2017, 8, 258.	1.1	384
6	Head impulse test in unilateral vestibular loss. Neurology, 2008, 70, 454-463.	1.5	380
7	A critical review of the neurophysiological evidence underlying clinical vestibular testing using sound, vibration and galvanic stimuli. Clinical Neurophysiology, 2010, 121, 132-144.	0.7	338
8	Responses of guinea pig primary vestibular neurons to clicks. Experimental Brain Research, 1995, 103, 174-8.	0.7	316
9	The human horizontal vestibulo-ocular reflex in response to high-acceleration stimulation before and after unilateral vestibular neurectomy. Experimental Brain Research, 1990, 81, 479-490.	0.7	313
10	The Video Head Impulse Test (vHIT) of Semicircular Canal Function – Age-Dependent Normative Values of VOR Gain in Healthy Subjects. Frontiers in Neurology, 2015, 6, 154.	1.1	303
11	Neuronal activity in the ipsilateral medial vestibular nucleus of the guinea pig following unilateral labyrinthectomy. Brain Research, 1988, 444, 308-319.	1.1	300
12	Bone conducted vibration selectively activates irregular primary otolithic vestibular neurons in the guinea pig. Experimental Brain Research, 2006, 175, 256-267.	0.7	277
13	Head taps evoke a crossed vestibulo-ocular reflex. Neurology, 2007, 68, 1227-1229.	1.5	265
14	Tonic contraversive ocular tilt reaction due to unilateral meso-encephalic lesion. Neurology, 1990, 40, 1503-1503.	1.5	260
15	Linear acceleration perception in the roll plane before and after unilateral vestibular neurectomy. Experimental Brain Research, 1989, 77, 315-328.	0.7	254
16	Impulsive Testing of Semicircular Canal Function Using Video-oculography. Annals of the New York Academy of Sciences, 2009, 1164, 486-491.	1.8	239
17	Physiological and Anatomical Study of Click-Sensitive Primary Vestibular Afferents in the Guinea Pig. Acta Oto-Laryngologica, 1997, 117, 66-72.	0.3	233
18	Convergence of labyrinthine influences on units in the vestibular nuclei of the cat. I. Natural stimulation. Brain Research, 1971, 35, 469-490.	1.1	230

#	ARTICLE	IF	CITATIONS
19	Neuronal activity in the contralateral medial vestibular nucleus of the guinea pig following unilateral labyrinthectomy. <i>Brain Research</i> , 1988, 444, 295-307.	1.1	230
20	The Video Head Impulse Test (vHIT) Detects Vertical Semicircular Canal Dysfunction. <i>PLoS ONE</i> , 2013, 8, e61488.	1.1	225
21	Semicircular Canal Functional Anatomy in Cat, Guinea Pig and Man. <i>Acta Oto-Laryngologica</i> , 1977, 83, 258-265.	0.3	222
22	Convergence of labyrinthine influences on units in the vestibular nuclei of the cat. II. Electrical stimulation. <i>Brain Research</i> , 1972, 43, 383-396.	1.1	219
23	The contribution of the contralateral labyrinth to second order vestibular neuronal activity in the cat. <i>Brain Research</i> , 1977, 138, 99-109.	1.1	214
24	Semicircular canal plane head impulses detect absent function of individual semicircular canals. <i>Brain</i> , 1998, 121, 699-716.	3.7	197
25	Ocular vestibular evoked myogenic potentials to bone conducted vibration of the midline forehead at Fz in healthy subjects. <i>Clinical Neurophysiology</i> , 2008, 119, 2135-2147.	0.7	195
26	Vestibular compensation and substitution. <i>Current Opinion in Neurology</i> , 2000, 13, 27-30.	1.8	195
27	Three-dimensional vector analysis of the human vestibuloocular reflex in response to high-acceleration head rotations. I. Responses in normal subjects. <i>Journal of Neurophysiology</i> , 1996, 76, 4009-4020.	0.9	188
28	Planar relationships of semicircular canals in the cat. <i>American Journal of Physiology</i> , 1972, 223, 55-62.	5.0	184
29	The effect of visual deprivation on vestibular compensation in the guinea pig. <i>Brain Research</i> , 1986, 364, 195-198.	1.1	180
30	Morphology of physiologically identified second-order vestibular neurons in cat, with intracellularly injected HRP. <i>Journal of Comparative Neurology</i> , 1988, 276, 387-411.	0.9	176
31	Three-dimensional vector analysis of the human vestibuloocular reflex in response to high-acceleration head rotations. II. responses in subjects with unilateral vestibular loss and selective semicircular canal occlusion. <i>Journal of Neurophysiology</i> , 1996, 76, 4021-4030.	0.9	169
32	Vestibular Compensation: A Review of the Oculomotor, Neural, and Clinical Consequences of Unilateral Vestibular Loss. <i>Journal of Vestibular Research: Equilibrium and Orientation</i> , 1995, 5, 67-107.	0.8	169
33	Chapter 32 Postural compensation in the guinea pig following unilateral labyrinthectomy. <i>Progress in Brain Research</i> , 1988, 76, 375-384.	0.9	167
34	Vestibular compensation without brainstem commissures in the guinea pig. <i>Neuroscience Letters</i> , 1986, 65, 209-213.	1.0	158
35	Human ocular torsional position before and after unilateral vestibular neurectomy. <i>Experimental Brain Research</i> , 1991, 85, 218-25.	0.7	157
36	The role of the superior vestibular nerve in generating ocular vestibular-evoked myogenic potentials to bone conducted vibration at Fz. <i>Clinical Neurophysiology</i> , 2009, 120, 588-593.	0.7	149

#	ARTICLE	IF	CITATIONS
37	The interpretation of clinical tests of peripheral vestibular function. <i>Laryngoscope</i> , 2012, 122, 1342-1352.	1.1	141
38	What does the dissociation between the results of video head impulse versus caloric testing reveal about the vestibular dysfunction in Ménière's disease?. <i>Acta Oto-Laryngologica</i> , 2015, 135, 859-865.	0.3	141
39	Direct projection of type II vestibular neurons to eye movement-related pause neurons in the cat pontine reticular formation. <i>Experimental Neurology</i> , 1986, 91, 331-342.	2.0	137
40	The Effect of Ocular Torsional Position on Perception of the Roll-tilt of Visual Stimuli. <i>Vision Research</i> , 1997, 37, 1071-1078.	0.7	133
41	Vestibular function after acute vestibular neuritis. <i>Restorative Neurology and Neuroscience</i> , 2010, 28, 37-46.	0.4	132
42	The ocular vestibular-evoked myogenic potential to air-conducted sound; probable superior vestibular nerve origin. <i>Clinical Neurophysiology</i> , 2011, 122, 611-616.	0.7	131
43	Inferior Vestibular Neuritis. <i>Annals of the New York Academy of Sciences</i> , 2002, 956, 306-313.	1.8	124
44	Application of the Video Head Impulse Test to Detect Vertical Semicircular Canal Dysfunction. <i>Otology and Neurotology</i> , 2013, 34, 974-979.	0.7	118
45	Direct projection of pause neurons to nystagmus-related excitatory burst neurons in the cat pontine reticular formation. <i>Experimental Neurology</i> , 1984, 83, 414-422.	2.0	115
46	Horizontal head impulse test detects gentamicin vestibulotoxicity. <i>Neurology</i> , 2009, 72, 1417-1424.	1.5	113
47	Diagnosing Stroke in Acute Vertigo: The HINTS Family of Eye Movement Tests and the Future of the Eye ECG. <i>Seminars in Neurology</i> , 2015, 35, 506-521.	0.5	112
48	A new saccadic indicator of peripheral vestibular function based on the video head impulse test. <i>Neurology</i> , 2016, 87, 410-418.	1.5	110
49	Ocular Vestibular Evoked Myogenic Potentials in Response to Bone-Conducted Vibration of the Midline Forehead at Fz. <i>Audiology and Neuro-Otology</i> , 2008, 13, 396-404.	0.6	109
50	Responses of primary vestibular neurons to galvanic vestibular stimulation (GVS) in the anaesthetised guinea pig. <i>Brain Research Bulletin</i> , 2004, 64, 265-271.	1.4	107
51	Vestibular primary afferent responses to sound and vibration in the guinea pig. <i>Experimental Brain Research</i> , 2011, 210, 347-352.	0.7	107
52	A geometric basis for measurement of three-dimensional eye position using image processing. <i>Vision Research</i> , 1996, 36, 445-459.	0.7	105
53	The Influence of Semicircular Canal Morphology on Endolymph Flow Dynamics: An Anatomically Descriptive Mathematical Model. <i>Acta Oto-Laryngologica</i> , 1987, 103, 1-13.	0.3	104
54	Planar relationships of the semicircular canals in rhesus and squirrel monkeys. <i>Brain Research</i> , 1985, 340, 315-324.	1.1	99

#	ARTICLE	IF	CITATIONS
55	Clinical Testing of Otolith Function. <i>Annals of the New York Academy of Sciences</i> , 1999, 871, 195-204.	1.8	99
56	The response of guinea pig primary utricular and saccular irregular neurons to bone-conducted vibration (BCV) and air-conducted sound (ACS). <i>Hearing Research</i> , 2016, 331, 131-143.	0.9	99
57	Vestibular compensation: a review of the oculomotor, neural, and clinical consequences of unilateral vestibular loss. <i>Journal of Vestibular Research: Equilibrium and Orientation</i> , 1995, 5, 67-107.	0.8	98
58	Plasticity during Vestibular Compensation: The Role of Saccades. <i>Frontiers in Neurology</i> , 2012, 3, 21.	1.1	97
59	Response of guinea pig vestibular nucleus neurons to clicks. <i>Experimental Brain Research</i> , 1996, 111, 149-52.	0.7	95
60	The development of function of horizontal semicircular canal primary neurons in the rat. <i>Brain Research</i> , 1979, 167, 41-52.	1.1	93
61	Dimensions of the Horizontal Semicircular Duct, Ampulla and Utricle in the Human. <i>Acta Oto-Laryngologica</i> , 1987, 103, 254-261.	0.3	93
62	Ocular vestibular-evoked myogenic potentials to bone-conducted vibration in superior vestibular neuritis show utricular function. <i>Otolaryngology - Head and Neck Surgery</i> , 2010, 143, 274-280.	1.1	91
63	The Active Head-Impulse Test in Unilateral Peripheral Vestibulopathy. <i>Archives of Neurology</i> , 2005, 62, 290.	4.9	90
64	Direct inhibitory projection of pause neurons to nystagmus-related pontomedullary reticular burst neurons in the cat. <i>Experimental Brain Research</i> , 1980, 40, 283-93.	0.7	87
65	A Mathematical Model of Human Semicircular Canal Geometry: A New Basis for Interpreting Vestibular Physiology. <i>JARO - Journal of the Association for Research in Otolaryngology</i> , 2010, 11, 145-159.	0.9	86
66	Semicircular duct and ampulla dimensions in cat, guinea pig and man. <i>Journal of Morphology</i> , 1977, 151, 17-34.	0.6	84
67	Vestibular Compensation. , 1998, 55, 82-110.		84
68	The new vestibular stimuli: sound and vibration“anatomical, physiological and clinical evidence. <i>Experimental Brain Research</i> , 2017, 235, 957-972.	0.7	84
69	Binocular Counterrolling in Humans During Dynamic Rotation. <i>Acta Oto-Laryngologica</i> , 1979, 87, 490-498.	0.3	83
70	VTM “an image-processing system for measuring ocular torsion. <i>Computer Methods and Programs in Biomedicine</i> , 1991, 35, 219-230.	2.6	83
71	Maintained ocular torsion produced by bilateral and unilateral galvanic (DC) vestibular stimulation in humans. <i>Experimental Brain Research</i> , 1998, 122, 453-458.	0.7	83
72	The Orientation Of The Semicircular Canals In The Guinea Pig. <i>Acta Oto-Laryngologica</i> , 1975, 80, 197-205.	0.3	82

#	ARTICLE	IF	CITATIONS
73	Irregular primary otolith afferents from the guinea pig utricular and saccular maculae respond to both bone conducted vibration and to air conducted sound. <i>Brain Research Bulletin</i> , 2012, 89, 16-21.	1.4	82
74	Sustained and Transient Vestibular Systems: A Physiological Basis for Interpreting Vestibular Function. <i>Frontiers in Neurology</i> , 2017, 8, 117.	1.1	82
75	Electrophysiological evidence for vestibular activation of the guinea pig hippocampus. <i>NeuroReport</i> , 2000, 11, 1443-1447.	0.6	80
76	Ocular and cervical vestibular-evoked myogenic potentials to bone conducted vibration in Ménière's disease during quiescence vs during acute attacks. <i>Clinical Neurophysiology</i> , 2010, 121, 1092-1101.	0.7	79
77	What Galvanic Vestibular Stimulation Actually Activates. <i>Frontiers in Neurology</i> , 2012, 3, 117.	1.1	77
78	The response of primary horizontal semicircular canal neurons in the rat and guinea pig to angular acceleration. <i>Experimental Brain Research</i> , 1982, 47, 286-94.	0.7	76
79	Impulsive Testing of Individual Semicircular Canal Function. <i>Annals of the New York Academy of Sciences</i> , 2001, 942, 192-200.	1.8	74
80	Neural basis of new clinical vestibular tests: otolithic neural responses to sound and vibration. <i>Clinical and Experimental Pharmacology and Physiology</i> , 2014, 41, 371-380.	0.9	73
81	The Skull Vibration-Induced Nystagmus Test of Vestibular Function—A Review. <i>Frontiers in Neurology</i> , 2017, 8, 41.	1.1	72
82	An Indicator of Probable Semicircular Canal Dehiscence: Ocular Vestibular Evoked Myogenic Potentials to High Frequencies. <i>Otolaryngology - Head and Neck Surgery</i> , 2013, 149, 142-145.	1.1	67
83	Otolithic Receptor Mechanisms for Vestibular-Evoked Myogenic Potentials: A Review. <i>Frontiers in Neurology</i> , 2018, 9, 366.	1.1	67
84	Cat medial pontine reticular neurons related to vestibular nystagmus: Firing pattern, location and projection. <i>Brain Research</i> , 1981, 222, 75-94.	1.1	66
85	Between-subject variability and within-subject reliability of the human eye-movement response to bilateral galvanic (DC) vestibular stimulation. <i>Experimental Brain Research</i> , 2002, 144, 69-78.	0.7	66
86	What does the head impulse test versus caloric dissociation reveal about vestibular dysfunction in Ménière's disease?. <i>Annals of the New York Academy of Sciences</i> , 2015, 1343, 58-62.	1.8	66
87	Gentamicin Vestibulotoxicity. <i>Otolaryngology - Head and Neck Surgery</i> , 1994, 111, 571-574.	1.1	63
88	Vestibular Responses to Sound. <i>Annals of the New York Academy of Sciences</i> , 2005, 1039, 54-67.	1.8	61
89	Semicircular canal radii of curvature (R) in cat, guinea pig and man. <i>Journal of Morphology</i> , 1977, 151, 1-15.	0.6	60
90	Postnatal developmental changes in the response of rat primary horizontal semicircular canal neurons to sinusoidal angular accelerations. <i>Experimental Brain Research</i> , 1982, 47, 295-300.	0.7	60

#	ARTICLE	IF	CITATIONS
91	Effects of Galvanic vestibular stimulation on cognitive function. <i>Experimental Brain Research</i> , 2012, 216, 275-285.	0.7	60
92	Modeling postural instability with Galvanic vestibular stimulation. <i>Experimental Brain Research</i> , 2006, 172, 208-220.	0.7	59
93	Attachment of the utricular and saccular maculae to the temporal bone. <i>Hearing Research</i> , 2007, 233, 77-85.	0.9	59
94	The basis for using bone-conducted vibration or air-conducted sound to test otolithic function. <i>Annals of the New York Academy of Sciences</i> , 2011, 1233, 231-241.	1.8	59
95	How does high-frequency sound or vibration activate vestibular receptors?. <i>Experimental Brain Research</i> , 2015, 233, 691-699.	0.7	57
96	Vestibular function after vestibular neuritis. <i>International Journal of Audiology</i> , 2013, 52, 713-718.	0.9	56
97	Differential effects of escapable and inescapable footshock on hippocampal theta activity.. <i>Behavioral Neuroscience</i> , 1991, 105, 202-209.	0.6	54
98	Vestibulo-ocular reflex pathways in internuclear ophthalmoplegia. <i>Annals of Neurology</i> , 1999, 45, 529-533.	2.8	54
99	Inter-ocular differences of the horizontal vestibulo-ocular reflex during impulsive testing. <i>Progress in Brain Research</i> , 2008, 171, 195-198.	0.9	53
100	Variability in the control of head movements in seated humans: a link with whiplash injuries?. <i>Journal of Physiology</i> , 2001, 532, 851-868.	1.3	52
101	Eye movement related neurons in the cat pontine reticular formation: projection to the flocculus. <i>Brain Research</i> , 1980, 183, 291-299.	1.1	51
102	Lithium-Induced Downbeat Nystagmus. <i>American Journal of Ophthalmology</i> , 1989, 107, 664-670.	1.7	49
103	High acceleration impulsive rotations reveal severe long-term deficits of the horizontal vestibulo-ocular reflex in the guinea pig. <i>Experimental Brain Research</i> , 1998, 123, 242-254.	0.7	49
104	Anatomy of physiologically identified eye-movement-related pause neurons in the cat: Pontomedullary region. <i>Journal of Comparative Neurology</i> , 1987, 266, 56-72.	0.9	48
105	The Planes of the Utricular and Saccular Maculae of the Guinea Pig. <i>Annals of the New York Academy of Sciences</i> , 1999, 871, 27-34.	1.8	47
106	Visually perceived vertical and visually perceived horizontal are not orthogonal. <i>Vision Research</i> , 1998, 38, 1989-1999.	0.7	46
107	Ocular and Cervical Vestibular Evoked Myogenic Potentials to 500 Hz Fz Bone-Conducted Vibration in Superior Semicircular Canal Dehiscence. <i>Ear and Hearing</i> , 2012, 33, 508-520.	1.0	46
108	Vertical Eye Position—Dependence of the Human Vestibuloocular Reflex During Passive and Active Yaw Head Rotations. <i>Journal of Neurophysiology</i> , 1999, 81, 2415-2428.	0.9	45
