#	ARTICLE	IF	CITATIONS
1	Opportunities and challenges around adapting supported employment interventions for people with chronic low back pain: modified nominal group technique. <i>Disability and Rehabilitation</i> , 2021, 43, 2750-2757.	1.8	2
2	Self-management support activities in primary care: A qualitative study to compare provision across common health problems. <i>Patient Education and Counseling</i> , 2020, 103, 2532-2539.	2.2	6
3	Development and feasibility of an intervention featuring individual supported work placements to aid return to work for unemployed people living with chronic pain. <i>Pilot and Feasibility Studies</i> , 2020, 6, 49.	1.2	4
4	Cost-utility of maintained physical activity and physiotherapy in the management of distal arm pain: an economic evaluation of data from a randomized controlled trial. <i>Family Practice</i> , 2019, 36, 179-186.	1.9	3
5	Maintained physical activity and physiotherapy in the management of distal arm pain: a randomised controlled trial. <i>RMD Open</i> , 2019, 5, e000810.	3.8	6
6	System influences on work disability due to low back pain: An international evidence synthesis. <i>Health Policy</i> , 2017, 121, 903-912.	3.0	58
7	Comparative clinical effectiveness of management strategies for sciatica: systematic review and network meta-analyses. <i>Spine Journal</i> , 2015, 15, 1461-1477.	1.3	112
8	Are the treatment expectations of 'significant others' psychosocial obstacles to work participation for those with persistent low back pain?. <i>Work</i> , 2014, 48, 391-398.	1.1	18
9	Cost-effectiveness of different strategies to manage patients with sciatica. <i>Pain</i> , 2014, 155, 1318-1327.	4.2	17
10	Maintained physical activity and physiotherapy in the management of distal upper limb pain â€” a protocol for a randomised controlled trial (the arm pain trial). <i>BMC Musculoskeletal Disorders</i> , 2014, 15, 71.	1.9	6
11	Illness perceptions in the context of differing work participation outcomes: exploring the influence of significant others in persistent back pain. <i>BMC Musculoskeletal Disorders</i> , 2013, 14, 48.	1.9	24
12	Health impacts of pedestrian head-loading: A review of the evidence with particular reference to women and children in sub-Saharan Africa. <i>Social Science and Medicine</i> , 2013, 88, 90-97.	3.8	51
13	A systematic review and meta-analysis of biological treatments targeting tumour necrosis factor Î± for sciatica. <i>European Spine Journal</i> , 2013, 22, 1921-1935.	2.2	34
14	Measuring illness and exercise beliefs in osteoarthritis of the hip or knee: psychometric properties of the â€”Hip and Knee Beliefs Questionnaireâ€”™ and the â€”Exercise Attitude Questionnaireâ€”™. <i>International Musculoskeletal Medicine</i> , 2012, 34, 13-20.	0.1	0
15	Challenges. <i>Clinical Biomechanics</i> , 2012, 27, 209.	1.2	0
16	Activity Increase Despite Arthritis (AÎ±DA): phase II randomised controlled trial of an active management booklet for hip and knee osteoarthritis in primary care. <i>British Journal of General Practice</i> , 2011, 61, e452-e458.	1.4	19
17	The influence of 'significant others' on persistent back pain and work participation: A qualitative exploration of illness perceptions. <i>BMC Musculoskeletal Disorders</i> , 2011, 12, 236.	1.9	41
18	TheHip and Knee Book:developing an active management booklet for hip and knee osteoarthritis. <i>British Journal of General Practice</i> , 2010, 60, e64-e82.	1.4	11

#	ARTICLE	IF	CITATIONS
19	The effects of timing on the cost-effectiveness of interventions for workers on sick leave due to low back pain. <i>Occupational and Environmental Medicine</i> , 2010, 67, 744-750.	2.8	33
20	Activity Increase Despite Arthritis (AIDA): design of a Phase II randomised controlled trial evaluating an active management booklet for hip and knee osteoarthritis [ISRCTN24554946]. <i>BMC Family Practice</i> , 2009, 10, 62.	2.9	6
21	Heritability of lumbar flexibility and the role of disc degeneration and body weight. <i>Journal of Applied Physiology</i> , 2008, 104, 379-385.	2.5	41
22	A Consensus Approach Toward the Standardization of Back Pain Definitions for Use in Prevalence Studies. <i>Spine</i> , 2008, 33, 95-103.	2.0	537
23	Une simple démarche d'information peut-elle modifier les croyances concernant le traumatisme en coup de fouet cervical? Étude préliminaire menée en établissement de santé. <i>Annales De Réadaptation Et De Médecine Physique: Revue Scientifique De La Société Française De Rééducation Fonctionnelle De Réadaptation Et De Médecine Physique</i> , 2007, 50, 545-551.	0.7	1
24	Could a simple educational intervention modify beliefs about whiplash? A preliminary study among professionals working in a rehabilitation ward. <i>Annales De Réadaptation Et De Médecine Physique: Revue Scientifique De La Société Française De Rééducation Fonctionnelle De Réadaptation Et De Médecine Physique</i> , 2007, 50, 552-557.	0.7	5
25	Neuroreflexotherapy for Nonspecific Low Back Pain. <i>Spine</i> , 2005, 30, E148-E153.	2.0	11
26	A prospective study of psychosocial risk factors and absence due to musculoskeletal disorders—implications for occupational screening. <i>Occupational Medicine</i> , 2005, 55, 375-379.	1.4	19
27	Extracting clinically relevant data from finite element simulations. <i>Clinical Biomechanics</i> , 2005, 20, 451-454.	1.2	271
28	Erratum to "Extracting clinically relevant data from finite element simulations" [<i>Clinical Biomechanics</i> 20 (2005) 451-454]. <i>Clinical Biomechanics</i> , 2005, 20, 1010.	1.2	0
29	Letters. <i>Spine</i> , 2004, 29, 108-109.	2.0	3
30	Title is missing!. <i>Clinical Biomechanics</i> , 1999, 14, 593.	1.2	0
31	Information and Advice to Patients With Back Pain Can Have a Positive Effect. <i>Spine</i> , 1999, 24, 2484.	2.0	471
32	The Natural History of Low Back Pain in Adolescents. <i>Spine</i> , 1996, 21, 2323-2328.	2.0	378
33	Editorial. <i>Clinical Biomechanics</i> , 1994, 9, 3.	1.2	3
34	Measuring flexibility. <i>Applied Ergonomics</i> , 1991, 22, 303-307.	3.1	5
35	Theoretical work in biomedical science. <i>Clinical Biomechanics</i> , 1989, 4, 131-132.	1.2	0
36	Continuing expansion. <i>Clinical Biomechanics</i> , 1988, 3, 197-203.	1.2	0

#	ARTICLE	IF	CITATIONS
37	Rational treatment of low back trouble?. Clinical Biomechanics, 1986, 1, 160-167.	1.2	11
