#	ARTICLE	IF	CITATIONS
1	Activations of muscarinic M1 receptors in the anterior cingulate cortex contribute to the antinociceptive effect via GABAergic transmission. <i>Molecular Pain</i> , 2017, 13, 174480691769233.	2.1	20
2	Involvement of GABA B receptor in the antihypersensitive effect in anterior cingulate cortex of partial sciatic nerve ligation model. <i>Journal of Pharmacological Sciences</i> , 2018, 137, 233-236.	2.5	7
3	Stimulating muscarinic M1 receptors in the anterior cingulate cortex reduces mechanical hypersensitivity via GABAergic transmission in nerve injury rats. <i>Brain Research</i> , 2019, 1704, 187-195.	2.2	7
4	The Spinal Muscarinic M1 Receptors and GABAA Receptors Contribute to the McN-A-343-Induced Antinociceptive Effects During Thermal Stimulation of Mice. <i>Journal of Pharmacological Sciences</i> , 2008, 108, 472-479.	2.5	5
5	Testosterone deficiency promotes the development of pulmonary emphysema in orchietomized mice exposed to elastase. <i>Biochemical and Biophysical Research Communications</i> , 2021, 558, 94-101.	2.1	5
6	Effects of geldanamycin on neurite outgrowth-related proteins and kinases in nerve growth factor-differentiated pheochromocytoma 12 cells. <i>Journal of Pharmacological Sciences</i> , 2019, 140, 255-262.	2.5	2
7	Muscarinic M1 receptors stimulated by intracerebroventricular administration of McN-A-343 reduces the nerve injury-induced mechanical hypersensitivity via GABAB receptors rather than GABAA receptors in mice. <i>Journal of Pharmacological Sciences</i> , 2020, 142, 50-59.	2.5	1
