Dirk Schindler

List of Publications by Year
in descending order

71 papers	2,233 citations	218677 26 h-index	254184 43 g-index
77 all docs	77 docs citations	77 times ranked	2243 citing authors

#	Article	IF	Citations
1	Heat and drought 2003 in Europe: a climate synthesis. Annals of Forest Science, 2006, 63, 569-577.	2.0	253
2	Human thermal comfort in summer within an urban street canyon in Central Europe. Meteorologische Zeitschrift, 2008, 17, 241-250.	1.0	174
3	Global comparison of the goodness-of-fit of wind speed distributions. Energy Conversion and Management, 2017, 133, 216-234.	9.2	89
4	Wind speed distribution selection â€" A review of recent development and progress. Renewable and Sustainable Energy Reviews, 2019, 114, 109290.	16.4	85
5	Assessing environmental and physiological controls over water relations in a Scots pine (Pinus) Tj ETQq1 1 0.784314 rgBT /Overlock 10 Plant, Cell and Environment, 2007, 30, 113-127.	5.7	83
6	Importance of 3-D radiant flux densities for outdoor human thermal comfort on clear-sky summer days in Freiburg, Southwest Germany. Meteorologische Zeitschrift, 2014, 23, 315-330.	1.0	71
7	Introducing a system of wind speed distributions for modeling properties of wind speed regimes around the world. Energy Conversion and Management, 2017, 144, 181-192.	9.2	58
8	National and global wind resource assessment under six wind turbine installation scenarios. Energy Conversion and Management, 2018, 156, 403-415.	9.2	53
9	Microclimate within beech stands?part II: thermal conditions. European Journal of Forest Research, 2004, 123, 13-28.	2.5	50
10	The temporal variability of global wind energy â€" Long-term trends and inter-annual variability. Energy Conversion and Management, 2019, 188, 462-472.	9.2	50
11	The role of air density in wind energy assessment â€" A case study from Germany. Energy, 2019, 171, 385-392.	8.8	50
12	On the spatiotemporal variability and potential of complementarity of wind and solar resources. Energy Conversion and Management, 2020, 218, 113016.	9.2	49
13	Review on the Projections of Future Storminess over the North Atlantic European Region. Atmosphere, 2016, 7, 60.	2.3	47
14	Wind effects on trees. European Journal of Forest Research, 2012, 131, 159-163.	2.5	45
15	Vibration behavior of plantation-grown Scots pine trees in response to wind excitation. Agricultural and Forest Meteorology, 2010, 150, 984-993.	4.8	37
16	Changing wind speed distributions under future global climate. Energy Conversion and Management, 2019, 198, 111841.	9.2	37
17	Development of a statistical bivariate wind speed-wind shear model (WSWS) to quantify the height-dependent wind resource. Energy Conversion and Management, 2017, 149, 303-317.	9.2	34
18	On the inter-annual variability of wind energy generation â€" A case study from Germany. Applied Energy, 2018, 230, 845-854.	10.1	33

#	Article	IF	Citations
19	The role of the power law exponent in wind energy assessment: A global analysis. International Journal of Energy Research, 2021, 45, 8484-8496.	4.5	31
20	Solar radiation transmission in and around canopy gaps in an uneven-aged Nothofagus betuloides forest. International Journal of Biometeorology, 2009, 53, 355-367.	3.0	30
21	Modelling the wind damage probability in forests in Southwestern Germany for the 1999 winter storm â€˜Lotharâ€™. International Journal of Biometeorology, 2009, 53, 543-554.	3.0	29
22	Achieving Germanyâ€™s wind energy expansion target with an improved wind turbine siting approach. Energy Conversion and Management, 2018, 173, 383-398.	9.2	29
23	Introducing a new approach for wind energy potential assessment under climate change at the wind turbine scale. Energy Conversion and Management, 2020, 225, 113425.	9.2	28
24	The motion of trees in the wind: a data synthesis. Biogeosciences, 2021, 18, 4059-4072.	3.3	28
25	Responses of Scots pine trees to dynamic wind loading. Agricultural and Forest Meteorology, 2008, 148, 1733-1742.	4.8	27
26	On the influence of wind speed model resolution on the global technical wind energy potential. Renewable and Sustainable Energy Reviews, 2022, 156, 112001.	16.4	27
27	Evolution of the air pollution in SW Germany evaluated by the long-term air quality index LAQx. Atmospheric Environment, 2008, 42, 5071-5078.	4.1	26
28	Responses of an individual deciduous broadleaved tree to wind excitation. Agricultural and Forest Meteorology, 2013, 177, 69-82.	4.8	26
29	3D statistical mapping of Germanyâ€™s wind resource using WSWS. Energy Conversion and Management, 2018, 159, 96-108.	9.2	25
30	Sensitivity analysis of the system of wind speed distributions. Energy Conversion and Management, 2018, 177, 376-384.	9.2	25
31	GIS-based estimation of the winter storm damage probability in forests: a case study from Baden-Wuerttemberg (Southwest Germany). International Journal of Biometeorology, 2012, 56, 57-69.	3.0	24
32	Analysis of Air Pressure Fluctuations and Topsoil Gas Concentrations within a Scots Pine Forest. Atmosphere, 2016, 7, 125.	2.3	24
33	Copula-based estimation of directional wind energy yield: A case study from Germany. Energy Conversion and Management, 2018, 169, 359-370.	9.2	24
34	From above the forest into the soil â€“ How wind affects soil gas transport through air pressure fluctuations. Agricultural and Forest Meteorology, 2019, 265, 424-434.	4.8	24
35	Integration of small-scale surface properties in a new high resolution global wind speed model. Energy Conversion and Management, 2020, 210, 112733.	9.2	24
36	Development of onshore wind turbine fleet counteracts climate change-induced reduction in global capacity factor. Nature Energy, 2022, 7, 608-619.	39.5	24

#	Article	IF	Citations
37	Using highly resolved maximum gust speed as predictor for forest storm damage caused by the highâ€impact winter storm Lothar in Southwest Germany. Atmospheric Science Letters, 2016, 17, 462-469.	1.9	23
38	Non-oscillatory response to wind loading dominates movement of Scots pine trees. Agricultural and Forest Meteorology, 2018, 250-251, 209-216.	4.8	23
39	Fossil fuel reduction potential in Germany's transport sector by wind-to-hydrogen. International Journal of Hydrogen Energy, 2018, 43, 23161-23167.	7.1	22
40	Modelling monthly nearâ€surface maximum daily gust speed distributions in Southwest Germany. International Journal of Climatology, 2016, 36, 4058-4070.	3.5	21
41	Sounding out the repowering potential of wind energy â€" A scenario-based assessment from Germany. Journal of Cleaner Production, 2021, 293, 126094.	9.3	20
42	No resonant response of Scots pine trees to wind excitation. Agricultural and Forest Meteorology, 2019, 265, 227-244.	4.8	19
43	Simulation of drought for a Scots pine forest (Pinus sylvestris L.) in the southern upper Rhine plain. Meteorologische Zeitschrift, 2005, 14, 143-150.	1.0	18
44	Coherent response of a group of plantation-grown Scots pine trees to wind loading. European Journal of Forest Research, 2012, 131, 191-202.	2.5	18
45	Global Gust Climate Evaluation and Its Influence on Wind Turbines. Energies, 2017, 10, 1474.	3.1	18
46	CO2 fluxes of a Scots pine forest growing in the warm and dry southern upper Rhine plain, SW Germany. European Journal of Forest Research, 2006, 125, 201-212.	2.5	17
47	The Role of Highly-Resolved Gust Speed in Simulations of Storm Damage in Forests at the Landscape Scale: A Case Study from Southwest Germany. Atmosphere, 2016, 7, 7.	2.3	17
48	On the Annual Cycle of Meteorological and Geographical Potential of Wind Energy: A Case Study from Southwest Germany. Sustainability, 2017, 9, 1169.	3.2	17
49	Historical Winter Storm Atlas for Germany (GeWiSA). Atmosphere, 2019, 10, 387.	2.3	17
50	Distance to power grids and consideration criteria reduce global wind energy potential the most. Journal of Cleaner Production, 2021, 317, 128472.	9.3	17
51	A review of recent studies on wind resource projections under climate change. Renewable and Sustainable Energy Reviews, 2022, 165, 112596.	16.4	17
52	Improving empirical storm damage models by coupling with high-resolution gust speed data. Agricultural and Forest Meteorology, 2019, 268, 23-31.	4.8	15
53	Assessment of the Response of a Scots Pine Tree to Effective Wind Loading. Forests, 2020, 11, 145.	2.1	11
54	The annual cycle and intra-annual variability of the global wind power distribution estimated by the system of wind speed distributions. Sustainable Energy Technologies and Assessments, 2020, 42, 100852.	2.7	10

#	Article	IF	Citations
55	A global wind farm potential index to increase energy yields and accessibility. Energy, 2021, 231, 120923.	8.8	10
56	Getting more with less? Why repowering onshore wind farms does not always lead to more wind power generation â€" A German case study. Renewable Energy, 2021, 180, 245-257.	8.9	10
57	Coherent Momentum Exchange above and within a Scots Pine Forest. Atmosphere, 2016, 7, 61.	2.3	9
58	On the spatiotemporal complementarity of the European onshore wind resource. Energy Conversion and Management, 2021, 237, 114098.	9.2	8
59	Analysis and simulation of dynamic response behavior of Scots pine trees to wind loading. International Journal of Biometeorology, 2013, 57, 819-833.	3.0	7
60	Inexpensive highâ€precision system for measuring air pressure fluctuations. Meteorological Applications, 2020, 27, e1815.	2.1	7
61	TreeMMoSys: A low cost sensor network to measure wind-induced tree response. HardwareX, 2021, 9, e00180.	2.2	7
62	Assessment of Effective Wind Loads on Individual Plantation-Grown Forest Trees. Forests, 2022, 13, 1026.	2.1	5
63	Spatio-temporal analysis of present and future precipitation responses over South Germany. Journal of Water and Climate Change, 2018, 9, 490-499.	2.9	4
64	1D Air Pressure Fluctuations Cannot Fully Explain the Natural Pressureâ€Pumping Effect on Soil Gas Transport. Soil Science Society of America Journal, 2019, 83, 1044-1053.	2.2	4
65	Modeling wind turbine-related greenhouse gas payback times in Europe at high spatial resolution. Energy Conversion and Management, 2021, 243, 114334.	9.2	4
66	Does the winter storm-related wind gust intensity in Germany increase under warming climate? â€" A high-resolution assessment. Weather and Climate Extremes, 2021, 33, 100360.	4.1	4
67	Expected Impacts of Mixing European Beech with Silver Fir on Regional Air Quality and Radiation Balance. Climate, 2020, 8, 105.	2.8	3
68	Greenhouse Gas Savings Potential under Repowering of Onshore Wind Turbines and Climate Change: A Case Study from Germany. Wind, 2021, 1, 1-19.	1.5	3
69	On the Potential of Using Air Pressure Fluctuations to Estimate Wind-Induced Tree Motion in a Planted Scots Pine Forest. Forests, 2022, 13, 225.	2.1	3
70	Precipitation Atlas for Germany (GePrA). Atmosphere, 2019, 10, 737.	2.3	2
71	Highly resolved modeling of extreme wind speed in North America and Europe. Atmospheric Science Letters, 0, , .	1.9	2
