

Yanshan Lou

List of Publications by Citations

Source: <https://exaly.com/author-pdf/6932654/yanshan-lou-publications-by-citations.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

46
papers

#	Paper	IF	Citations
46	New ductile fracture criterion for prediction of fracture forming limit diagrams of sheet metals. <i>International Journal of Solids and Structures</i> , 2012 , 49, 3605-3615	3.1	298
45	Modeling of shear ductile fracture considering a changeable cut-off value for stress triaxiality. <i>International Journal of Plasticity</i> , 2014 , 54, 56-80	7.6	219
44	Prediction of ductile fracture for advanced high strength steel with a new criterion: Experiments and simulation. <i>Journal of Materials Processing Technology</i> , 2013 , 213, 1284-1302	5.3	141
43	Asymmetric yield function based on the stress invariants for pressure sensitive metals. <i>International Journal of Plasticity</i> , 2014 , 56, 184-202	7.6	137
42	Extension of a shear-controlled ductile fracture model considering the stress triaxiality and the Lode parameter. <i>International Journal of Solids and Structures</i> , 2013 , 50, 447-455	3.1	129
41	Modeling of ductile fracture from shear to balanced biaxial tension for sheet metals. <i>International Journal of Solids and Structures</i> , 2017 , 112, 169-184	3.1	114
40	Fracture-based forming limit criteria for anisotropic materials in sheet metal forming. <i>International Journal of Plasticity</i> , 2017 , 96, 1-35	7.6	87
39	Anisotropic yield function based on stress invariants for BCC and FCC metals and its extension to ductile fracture criterion. <i>International Journal of Plasticity</i> , 2018 , 101, 125-155	7.6	85
38	Anisotropic ductile fracture criterion based on linear transformation. <i>International Journal of Plasticity</i> , 2017 , 93, 3-25	7.6	65
37	Consideration of strength differential effect in sheet metals with symmetric yield functions. <i>International Journal of Mechanical Sciences</i> , 2013 , 66, 214-223	5.5	45
36	Evaluation of ductile fracture criteria in a general three-dimensional stress state considering the stress triaxiality and the lode parameter. <i>Acta Mechanica Solida Sinica</i> , 2013 , 26, 642-658	2	37
35	Correlation of the maximum shear stress with micro-mechanisms of ductile fracture for metals with high strength-to-weight ratio. <i>International Journal of Mechanical Sciences</i> , 2018 , 146-147, 583-601	5.5	36
34	Application of the modified Mohr-Coulomb fracture criterion in predicting the ballistic resistance of 2024-T351 aluminum alloy plates impacted by blunt projectiles. <i>International Journal of Impact Engineering</i> , 2019 , 123, 26-37	4	33
33	Effect of the Lode parameter in predicting shear cracking of 2024-T351 aluminum alloy Taylor rods. <i>International Journal of Impact Engineering</i> , 2018 , 120, 185-201	4	30
32	Tensile fracture of ultrafine grained aluminum 6061 sheets by asymmetric cryorolling for microforming. <i>International Journal of Damage Mechanics</i> , 2014 , 23, 1077-1095	3	27
31	Alternative approach to model ductile fracture by incorporating anisotropic yield function. <i>International Journal of Solids and Structures</i> , 2019 , 164, 12-24	3.1	18
30	Effect of Lode angle in predicting the ballistic resistance of Weldox 700 E steel plates struck by blunt projectiles. <i>International Journal of Impact Engineering</i> , 2019 , 128, 46-71	4	17

29	Strength modeling of sheet metals from shear to plane strain tension. <i>International Journal of Plasticity</i> , 2020 , 134, 102813	7.6	14
28	Anisotropic Behavior in Plasticity and Ductile Fracture of an Aluminum Alloy. <i>Key Engineering Materials</i> , 2015 , 651-653, 163-168	0.4	13
27	A reduced Yld2004 function for modeling of anisotropic plastic deformation of metals under triaxial loading. <i>International Journal of Mechanical Sciences</i> , 2019 , 161-162, 105027	5.5	13
26	Prediction of fracture forming limit for DP780 steel sheet. <i>Metals and Materials International</i> , 2013 , 19, 697-705	2.4	13
25	Fracture modelling of DP780 sheets using a hybrid experimental-numerical method and two-dimensional digital image correlation. <i>International Journal of Materials and Product Technology</i> , 2014 , 48, 34	1	8
24	Accuracy Analysis of Anisotropic Yield Functions based on the Root-Mean Square Error 2010 ,		6
23	Effect of Anisotropic Yield Functions on the Accuracy of Material Flow and its Experimental Verification. <i>Acta Mechanica Solida Sinica</i> , 2019 , 32, 50-68	2	4
22	Enhanced Constitutive Model for Aeronautic Aluminium Alloy (AA2024-T351) under High Strain Rates and Elevated Temperatures. <i>International Journal of Automotive Technology</i> , 2019 , 20, 79-87	1.6	4
21	Machine learning-based modeling of the coupling effect of strain rate and temperature on strain hardening for 5182-O aluminum alloy. <i>Journal of Materials Processing Technology</i> , 2022 , 302, 117501	5.3	4
20	Prediction of ductile fracture for Al6016-T4 with a ductile fracture criterion: Experiment and simulation. <i>International Journal of Damage Mechanics</i> , 2020 , 29, 1199-1221	3	4
19	Formability Prediction of Advanced High Strength Steel with a New Ductile Fracture Criterion 2011 ,		3
18	A user-friendly anisotropic ductile fracture criterion for sheet metal under proportional loading. <i>International Journal of Solids and Structures</i> , 2021 , 217-218, 48-59	3.1	3
17	Large strain flow curve identification for sheet metals under complex stress states. <i>Mechanics of Materials</i> , 2021 , 161, 103997	3.3	3
16	Strain Rate Effect on the Fracture Behavior of the AA5754 Aluminum Alloy. <i>Procedia Manufacturing</i> , 2020 , 47, 1264-1269	1.5	2
15	Finite Element formulation of a general asymmetrical yield function for pressure sensitive metals. <i>Procedia Engineering</i> , 2017 , 207, 215-220		2
14	J2 - J3 based anisotropic yield function under spatial loading. <i>Procedia Engineering</i> , 2017 , 207, 233-238		2
13	User-friendly anisotropic hardening function with non-associated flow rule under the proportional loadings for BCC and FCC metals. <i>Mechanics of Materials</i> , 2022 , 165, 104190	3.3	2
12	Earing prediction of AA 2008-T4 with anisotropic Drucker yield function based on the second and third stress invariants. <i>Journal of Physics: Conference Series</i> , 2018 , 1063, 012113	0.3	2

11	Linear transformation based orthotropic shear ductile fracture criterion for lightweight metals 2017 ,		1
10	Characterization of plasticity and fracture of an QP1180 steel sheet. <i>Procedia Manufacturing</i> , 2020 , 50, 529-534	1.5	1
9	Material characterization and fracture prediction with advanced constitutive model and Polar EPS fracture diagram for AA 3104-H19. <i>Journal of Physics: Conference Series</i> , 2018 , 1063, 012156	0.3	1
8	A Study on Compressive Anisotropy and Nonassociated Flow Plasticity of the AZ31 Magnesium Alloy in Hot Rolling. <i>Mathematical Problems in Engineering</i> , 2014 , 2014, 1-9	1.1	1
7	Prediction of Strain Path Changing Effect on Forming Limits of AA 6111-T4 Based on a Shear Ductile Fracture Criterion. <i>Metals</i> , 2021 , 11, 546	2.3	1
6	Strain hardening under large deformation for AA5182. <i>IOP Conference Series: Materials Science and Engineering</i> , 2020 , 967, 012030	0.4	
5	A pressure-coupled Drucker function for plasticity and fracture modelling of AA5182. <i>IOP Conference Series: Materials Science and Engineering</i> , 2020 , 967, 012029	0.4	
4	Plastic and Fracture Characteristics of WE43 Mg Alloy Under Complex Stress States. <i>Minerals, Metals and Materials Series</i> , 2021 , 647-655	0.3	
3	Extension of the DF2016 isotropic model into an anisotropic ductile fracture criterion. <i>Journal of Physics: Conference Series</i> , 2018 , 1063, 012148	0.3	
2	Failure Modeling for QP980 Steel by a Shear Ductile Fracture Criterion. <i>Metals</i> , 2022 , 12, 452	2.3	
1	Simulations of plastic deformation by anisotropic hardening yield functions for QP1180. <i>IOP Conference Series: Materials Science and Engineering</i> , 2022 , 1238, 012088	0.4
