#	ARTICLE	IF	CITATIONS
1	River channel and bar patterns explained and predicted by an empirical and a physics-based method. <i>Earth Surface Processes and Landforms</i> , 2011, 36, 721-738.	1.2	248
2	Sedimentary architecture of abandoned channel fills. <i>Earth Surface Processes and Landforms</i> , 2012, 37, 459-472.	1.2	223
3	Splitting rivers at their seams: bifurcations and avulsion. <i>Earth Surface Processes and Landforms</i> , 2013, 38, 47-61.	1.2	204
4	Bifurcation dynamics and avulsion duration in meandering rivers by one-dimensional and three-dimensional models. <i>Water Resources Research</i> , 2008, 44, .	1.7	203
5	Physics-based modeling of large braided sand-bed rivers: Bar pattern formation, dynamics, and sensitivity. <i>Journal of Geophysical Research F: Earth Surface</i> , 2013, 118, 2509-2527.	1.0	155
6	Effects of debris flow composition on runout, depositional mechanisms, and deposit morphology in laboratory experiments. <i>Journal of Geophysical Research F: Earth Surface</i> , 2015, 120, 1949-1972.	1.0	154
7	Predicting incipient motion, including the effect of turbulent pressure fluctuations in the bed. <i>Water Resources Research</i> , 2007, 43, .	1.7	148
8	Flow discharge and sediment transport models for estimating a minimum timescale of hydrological activity and channel and delta formation on Mars. <i>Journal of Geophysical Research</i> , 2005, 110, .	3.3	134
9	Static and dynamic angles of repose in loose granular materials under reduced gravity. <i>Journal of Geophysical Research</i> , 2011, 116, .	3.3	132
10	Bank pull or bar push: What drives scroll-bar formation in meandering rivers?. <i>Geology</i> , 2014, 42, 319-322.	2.0	132
11	Distinct patterns of interaction between vegetation and morphodynamics. <i>Earth Surface Processes and Landforms</i> , 2016, 41, 791-808.	1.2	127
12	Sorting in grain flows at the lee side of dunes. <i>Earth-Science Reviews</i> , 2004, 65, 75-102.	4.0	119
13	Autocyclic behaviour of fan deltas: an analogue experimental study. <i>Sedimentology</i> , 2009, 56, 1569-1589.	1.6	116
14	Experimental meandering river with chute cutoffs. <i>Journal of Geophysical Research</i> , 2012, 117, .	3.3	116
15	Stochastic Prediction of Sediment Transport in Sand-Gravel Bed Rivers. <i>Journal of Hydraulic Engineering</i> , 2002, 128, 412-425.	0.7	104
16	Martian stepped-delta formation by rapid water release. <i>Nature</i> , 2008, 451, 973-976.	13.7	98
17	Debris-flow dominance of alluvial fans masked by runoff reworking and weathering. <i>Geomorphology</i> , 2014, 217, 165-181.	1.1	98
18	Sediment Supply-Limited Bedforms in Sand-Gravel Bed Rivers. <i>Journal of Sedimentary Research</i> , 2002, 72, 629-640.	0.8	97

#	ARTICLE	IF	CITATIONS
19	Flow separation at the inner (convex) and outer (concave) banks of constant-width and widening open-channel bends. <i>Earth Surface Processes and Landforms</i> , 2013, 38, 696-716.	1.2	92
20	Effects of vegetation distribution on experimental river channel dynamics. <i>Water Resources Research</i> , 2013, 49, 7558-7574.	1.7	92
21	The origin and timing of fluvial activity at Eberswalde crater, Mars. <i>Icarus</i> , 2012, 220, 530-551.	1.1	89
22	Bifurcation instability and chute cutoff development in meandering gravel-bed rivers. <i>Geomorphology</i> , 2014, 213, 277-291.	1.1	87
23	Evaluating competing hypotheses for the origin and dynamics of river anastomosis. <i>Earth Surface Processes and Landforms</i> , 2012, 37, 1337-1351.	1.2	86
24	A unified framework for stability of channel bifurcations in gravel and sand fluvial systems. <i>Geophysical Research Letters</i> , 2015, 42, 7521-7536.	1.5	86
25	Quantifiable effectiveness of experimental scaling of river- and delta morphodynamics and stratigraphy. <i>Earth-Science Reviews</i> , 2014, 133, 43-61.	4.0	84
26	Complex variations in sediment transport at three large river bifurcations during discharge waves in the river Rhine. <i>Sedimentology</i> , 2008, 55, 1145-1171.	1.6	83
27	Bar dynamics and bifurcation evolution in a modelled braided sand-bed river. <i>Earth Surface Processes and Landforms</i> , 2015, 40, 1318-1333.	1.2	82
28	Living landscapes: Muddy and vegetated floodplain effects on fluvial pattern in an incised river. <i>Earth Surface Processes and Landforms</i> , 2018, 43, 2948-2963.	1.2	82
29	Meandering channel dynamics in highly cohesive sediment on an intertidal mud flat in the Westerschelde estuary, the Netherlands. <i>Geomorphology</i> , 2009, 105, 261-276.	1.1	75
30	Evolution of a bifurcation in a meandering river with adjustable channel widths, Rhine delta apex, The Netherlands. <i>Earth Surface Processes and Landforms</i> , 2011, 36, 2011-2027.	1.2	75
31	Sea-level-rise-induced threats depend on the size of tide-influenced estuaries worldwide. <i>Nature Climate Change</i> , 2019, 9, 986-992.	8.1	73
32	Asynchronous formation of Hesperian and Amazonian-aged deltas on Mars and implications for climate. <i>Journal of Geophysical Research E: Planets</i> , 2013, 118, 1529-1544.	1.5	72
33	Surface morphology of fans in the high-Arctic periglacial environment of Svalbard: Controls and processes. <i>Earth-Science Reviews</i> , 2015, 146, 163-182.	4.0	72
34	Contrasting morphodynamics in alluvial fans and fan deltas: effect of the downstream boundary. <i>Sedimentology</i> , 2012, 59, 2125-2145.	1.6	67
35	Sedimentary deposits in Xanthe Terra: Implications for the ancient climate on Mars. <i>Planetary and Space Science</i> , 2009, 57, 944-957.	0.9	66
36	Palaeoflow reconstruction from fan delta morphology on Mars. <i>Earth and Planetary Science Letters</i> , 2010, 294, 378-392.	1.8	66

#	ARTICLE	IF	CITATIONS
37	Terra Incognita: Explanation and Reduction in Earth Science. <i>International Studies in the Philosophy of Science</i> , 2005, 19, 289-317.	0.2	65
38	Processes controlling the dynamics of compound sand waves in the North Sea, Netherlands. <i>Journal of Geophysical Research</i> , 2005, 110, n/a-n/a.	3.3	62
39	Autogenic avulsion, channelization and backfilling dynamics of debris-flow fans. <i>Sedimentology</i> , 2016, 63, 1596-1619.	1.6	59
40	Effects of mud supply on large-scale estuary morphology and development over centuries to millennia. <i>Earth Surface Dynamics</i> , 2017, 5, 617-652.	1.0	59
41	Network concepts to describe channel importance and change in multichannel systems: test results for the Jamuna River, Bangladesh. <i>Earth Surface Processes and Landforms</i> , 2014, 39, 766-778.	1.2	57
42	One-dimensional modeling of a recent Ganga avulsion: Assessing the potential effect of tectonic subsidence on a large river. <i>Geomorphology</i> , 2014, 213, 24-37.	1.1	55
43	Upstream control of river anastomosis by sediment overloading, upper Columbia River, British Columbia, Canada. <i>Sedimentology</i> , 2017, 64, 1488-1510.	1.6	55
44	Sediment Transport of Fine Sand to Fine Gravel on Transverse Bed Slopes in Rotating Annular Flume Experiments. <i>Water Resources Research</i> , 2018, 54, 19-45.	1.7	54
45	Critical dependence of morphodynamic models of fluvial and tidal systems on empirical downslope sediment transport. <i>Nature Communications</i> , 2019, 10, 4903.	5.8	54
46	Sediment transport in analogue flume models compared with real-world sedimentary systems: a new look at scaling evolution of sedimentary systems in a flume. <i>Sedimentology</i> , 2008, 55, 1541-1557.	1.6	52
47	Avulsion in action: Reconstruction and modelling sedimentation pace and upstream flood water levels following a Medieval tidal-river diversion catastrophe (Biesbosch, The Netherlands, 1421-1750). <i>Journal of Geophysical Research</i> , 2014, 119, 7843-7857.	1.0	52
48	Observations of sand waves, megaripples, and hummocks in the Dutch coastal area and their relation to currents and combined flow conditions. <i>Journal of Geophysical Research</i> , 2005, 110, n/a-n/a.	3.3	51
49	Combined effects of climate change and dam construction on riverine ecosystems. <i>Ecological Engineering</i> , 2018, 120, 329-344.	1.6	49
50	Formation of a cohesive floodplain in a dynamic experimental meandering river. <i>Earth Surface Processes and Landforms</i> , 2013, 38, 1550-1565.	1.2	47
51	Valley formation by groundwater seepage, pressurized groundwater outbursts and crater-lake overflow in flume experiments with implications for Mars. <i>Icarus</i> , 2014, 232, 97-117.	1.1	46
52	Fluvial Regimes, Morphometry, and Age of Jezero Crater Paleolake Inlet Valleys and Their Exobiological Significance for the 2020 Rover Mission Landing Site. <i>Astrobiology</i> , 2020, 20, 994-1013.	1.5	46
53	The key role of fluvial dunes in transport and deposition of sand-gravel mixtures, a preliminary note. <i>Sedimentary Geology</i> , 2001, 143, 7-13.	1.0	45
54	Discriminating between pore-filling load and bed-structure load: a new porosity-based method, exemplified for the river Rhine. <i>Sedimentology</i> , 2008, 55, 1571-1593.	1.6	45

#	ARTICLE	IF	CITATIONS
55	Earth-like aqueous debris-flow activity on Mars at high orbital obliquity in the last million years. <i>Nature Communications</i> , 2015, 6, 7543.	5.8	42
56	Salt Marsh Establishment and Eco-Engineering Effects in Dynamic Estuaries Determined by Species Growth and Mortality. <i>Journal of Geophysical Research F: Earth Surface</i> , 2019, 124, 2962-2986.	1.0	42
57	Channel belt architecture formed by a meandering river. <i>Sedimentology</i> , 2013, 60, 840-859.	1.6	40
58	Near-bed and surface flow division patterns in experimental river bifurcations. <i>Water Resources Research</i> , 2014, 50, 1506-1530.	1.7	40
59	Observed and predicted bed forms and their effect on suspended sand concentrations. <i>Coastal Engineering</i> , 2004, 51, 351-371.	1.7	39
60	Grain-size sorting in grainflows at the lee side of deltas. <i>Sedimentology</i> , 2005, 52, 291-311.	1.6	39
61	HESS Opinions On the use of laboratory experimentation: "Hydrologists, bring out shovels and garden hoses and hit the dirt". <i>Hydrology and Earth System Sciences</i> , 2010, 14, 369-382.	1.9	39
62	Bank erosion processes measured with UAV-SfM along complex banklines of a straight mid-sized river reach. <i>Earth Surface Dynamics</i> , 2018, 6, 933-953.	1.0	39
63	Human-induced changes in bed shear stress and bed grain size in the River Waal (The Netherlands) during the past 900 years. <i>Earth Surface Processes and Landforms</i> , 2009, 34, 503-514.	1.2	36
64	Groundwater seepage landscapes from distant and local sources in experiments and on Mars. <i>Earth Surface Dynamics</i> , 2015, 3, 389-408.	1.0	35
65	Experimental delta formation in crater lakes and implications for interpretation of Martian deltas. <i>Journal of Geophysical Research E: Planets</i> , 2013, 118, 651-670.	1.5	34
66	Accuracy of Cross-Channel Sampled Sediment Transport in Large Sand-Gravel-Bed Rivers. <i>Journal of Hydraulic Engineering</i> , 2001, 127, 258-269.	0.7	33
67	Topographic forcing of tidal sandbar patterns for irregular estuary planforms. <i>Earth Surface Processes and Landforms</i> , 2018, 43, 172-186.	1.2	33
68	Dimensions of fluvial-tidal meanders: Are they disproportionately large?. <i>Geology</i> , 2018, 46, 923-926.	2.0	32
69	Bed load transport on the shoreface by currents and waves. <i>Coastal Engineering</i> , 2006, 53, 983-996.	1.7	31
70	Local late Amazonian boulder breakdown and denudation rate on Mars. <i>Geophysical Research Letters</i> , 2013, 40, 3527-3531.	1.5	31
71	Turning the tide: Growth and dynamics of a tidal basin and inlet in experiments. <i>Journal of Geophysical Research F: Earth Surface</i> , 2015, 120, 95-119.	1.0	30
72	Magnetic Resonance Imaging of coarse sediment. <i>Sedimentary Geology</i> , 2008, 208, 69-78.	1.0	28

#	ARTICLE	IF	CITATIONS
73	Sedimentological analyses of martian gullies: The subsurface as the key to the surface. <i>Icarus</i> , 2015, 258, 92-108.	1.1	28
74	Modeling invasive alien plant species in river systems: Interaction with native ecosystem engineers and effects on hydro-morphodynamic processes. <i>Water Resources Research</i> , 2017, 53, 6945-6969.	1.7	28
75	Growing Forced Bars Determine Nonideal Estuary Planform. <i>Journal of Geophysical Research F: Earth Surface</i> , 2018, 123, 2971-2992.	1.0	28
76	Network response to disturbances in large sand-bed braided rivers. <i>Earth Surface Dynamics</i> , 2016, 4, 25-45.	1.0	26
77	Amazonian-aged fluvial system and associated ice-related features in Terra Cimmeria, Mars. <i>Icarus</i> , 2016, 277, 286-299.	1.1	25
78	Sustained fluvial deposition recorded in Mars' Noachian stratigraphic record. <i>Nature Communications</i> , 2020, 11, 2067.	5.8	25
79	Mangrove diversity loss under sea-level rise triggered by bio-morphodynamic feedbacks and anthropogenic pressures. <i>Environmental Research Letters</i> , 2020, 15, 114033.	2.2	25
80	Morphodynamic assessment of side channel systems using a simple one-dimensional bifurcation model and a comparison with aerial images. <i>Earth Surface Processes and Landforms</i> , 2018, 43, 1169-1182.	1.2	24
81	Controls on mud distribution and architecture along the fluvial-to-marine transition. <i>Geology</i> , 2018, 46, 971-974.	2.0	24
82	Autogenic cyclicity of foreset sorting in experimental Gilbert-type deltas. <i>Sedimentary Geology</i> , 2005, 181, 215-224.	1.0	23
83	Response of braiding channel morphodynamics to peak discharge changes in the Upper Yellow River. <i>Earth Surface Processes and Landforms</i> , 2018, 43, 1648-1662.	1.2	23
84	Effects of estuarine mudflat formation on tidal prism and large-scale morphology in experiments. <i>Earth Surface Processes and Landforms</i> , 2019, 44, 417-432.	1.2	23
85	What Came First, Mud or Biostabilizers? Elucidating Interacting Effects in a Coupled Model of Mud, Saltmarsh, Microphytobenthos, and Estuarine Morphology. <i>Water Resources Research</i> , 2020, 56, e2019WR026945.	1.7	23
86	Scour holes and ripples occur below the hydraulic smooth to rough transition of movable beds. <i>Sedimentology</i> , 2017, 64, 1381-1401.	1.6	22
87	Ediacaran life close to land: Coastal and shoreface habitats of the Ediacaran macrobiota, the Central Flinders Ranges, South Australia. <i>Journal of Sedimentary Research</i> , 2020, 90, 1463-1499.	0.8	22
88	Catastrophic ice lake collapse in Aram Chaos, Mars. <i>Icarus</i> , 2014, 236, 104-121.	1.1	21
89	Swiftness of biomorphodynamics in Lilliput- to Giant-sized rivers and deltas. <i>Geomorphology</i> , 2015, 244, 56-73.	1.1	21
90	Archimetrics: a quantitative tool to predict three-dimensional meander belt sandbody heterogeneity. <i>Depositional Record</i> , 2016, 2, 22-46.	0.8	21

#	ARTICLE	IF	CITATIONS
91	Anthropogenic Effects on the Contemporary Sediment Budget of the Lower Rhineâ€Meuse Delta Channel Network. <i>Earth's Future</i> , 2021, 9, e2020EF001869.	2.4	21
92	Effects of Shoal Margin Collapses on the Morphodynamics of a Sandy Estuary. <i>Journal of Geophysical Research F: Earth Surface</i> , 2019, 124, 195-215.	1.0	20
93	Estimated Minimum Life Span of the Jezero Fluvial Delta (Mars). <i>Astrobiology</i> , 2020, 20, 977-993.	1.5	20
94	Pressurized groundwater outflow experiments and numerical modeling for outflow channels on Mars. <i>Journal of Geophysical Research E: Planets</i> , 2014, 119, 2668-2693.	1.5	19
95	A Modelling Framework to Assess the Effect of Pressures on River Abiotic Habitat Conditions and Biota. <i>PLoS ONE</i> , 2015, 10, e0130228.	1.1	19
96	The vulnerability of tidal flats and multi-channel estuaries to dredging and disposal. <i>Anthropocene Coasts</i> , 2021, 4, 36-60.	0.6	19
97	Upstream perturbation and floodplain formation effects on chuteâ€cutoffâ€dominated meandering river pattern and dynamics. <i>Earth Surface Processes and Landforms</i> , 2019, 44, 2156-2169.	1.2	18
98	Turning the tide: mutually evasive ebb- and flood-dominant channels and bars in an experimental estuary. <i>Advances in Geosciences</i> , 0, 39, 21-26.	12.0	18
99	Salt marshes create more extensive channel networks than mangroves. <i>Nature Communications</i> , 2022, 13, 2017.	5.8	18
