#	ARTICLE	IF	CITATIONS
1	Noninvasive ventilation for acute hypoxemic respiratory failure in patients with COVID-19. American Journal of Emergency Medicine, 2021, 39, 154-157.	0.7	48
2	Lung ultrasound can predict response to the prone position in awake non-intubated patients with COVID-19 associated acute respiratory distress syndrome. Critical Care, 2021, 25, 35.	2.5	23
3	Possibilities of ultrasound research of the diaphragm. Terapevticheskii Arkhiv, 2019, 91, 86-92.	0.2	14
4	Recombinant tissue plasminogen activator treatment for COVID-19 associated ARDS and acute cor pulmonale. International Journal of Infectious Diseases, 2021, 104, 108-110.	1.5	8
5	Using TAPSE (tricuspid annular plane systolic excursion) as a predictor of poor prognosis of COVID-19: is it enough?. International Journal of Infectious Diseases, 2021, 107, 164.	1.5	5
6	An impact of cardiovascular comorbidity on course and prognosis of chronic obstructive pulmonary disease. Pulmonologiya, 2019, 29, 35-42.	0.2	4
7	Nitrogen leaching in multiple breathing and structural changes in the bronchopulmonary system in adult patients with cystic fibrosis. Pulmonologiya, 2020, 30, 193-203.	0.2	4
8	Impulse oscillometry in the diagnosis of respiratory mechanics defects in chronic obstructive pulmonary disease. Pulmonologiya, 2020, 30, 285-294.	0.2	4
9	Inhaled Treprostinil in Group 3 Pulmonary Hypertension. New England Journal of Medicine, 2021, 384, 1869-1872.	13.9	3
10	Lung ultrasound presentation of covid-19 patients: phenotypes and correlations – comment. Internal and Emergency Medicine, 2021, 16, 1417-1418.	1.0	2
11	Can lung ultrasound predict histologic pattern of lung injury in critically ill patients with COVID-19?. Intensive Care Medicine, 2021, 47, 629-630.	3.9	1
12	Mobile cardiorespiratory and metabolic laboratory: diagnosis of chronic obstructive pulmonary disease, cardiovascular and metabolic diseases. Pulmonologiya, 2016, 26, 215-221.	0.2	1
13	Change in lung function of patients with cystic fibrosis underwent lung transplantation. Pulmonologiya, 2017, 27, 206-215.	0.2	1
14	Ultrasound diagnostic opportunities in pulmonology. Pulmonologiya, 2017, 27, 283-290.	0.2	1
15	Lung function in athletes involved in skiing and speed skating. Pulmonologiya, 2019, 29, 62-69.	0.2	1
16	A high prevalence of airway hyperresponsiveness in cross country skiers. Pulmonologiya, 2019, 29, 403-410.	0.2	1
17	Pulmonary function test in patients with idiopathic pulmonary fibrosis: data from the National Registry for Moscow and Moscow region. Pulmonologiya, 2020, 30, 31-41.	0.2	1
18	Mobile cardio-respiratory metabolic laboratory as effective tool in early diagnosis of COPD and other chronic non-communicable diseases (CNCDs) in organized busy groups of employees. , 2015, , .		0

#	ARTICLE	IF	CITATIONS
19	Respiratory function in systemic sclerosis patients. , 2015, , .		0
20	Lung function of idiopathic pulmonary fibrosis: Russian IPF registry (Moscow region). , 2019, , .		0
21	Parameter estimation of pulmonary function tests (PFTs): Comparison of two body plethysmographs. , 2019, , .		0
22	Impulse Oscillometry in Chronic Obstructive Pulmonary Disease. , 2019, , .		0
23	Opportunities of ultrasound diagnostics of lung injury in SARS-CoV-2 infection (COVID-19): a clinical case. Tuberculosis and Lung Diseases, 2020, 98, 51-56.	0.2	0
24	Lung ultrasound: the possibilities of diagnosing of lung damage associated with the new coronavirus infection COVID-19. Pulmonologiya, 2020, 30, 577-586.	0.2	0
25	Multiple-breath washout and pulmonary function tests versus high-resolution computed tomography scores in adults with cystic fibrosis. , 2020, , .		0
26	Estimation of lung functional residual capacity by the multiple-breath washout test versus bodyplethysmography in healthy subjects. , 2020, , .		0
27	Pulmonary hypertension associated with definitive and probable usual interstitial pneumonia. , 2020, , .		0
