

Jinshan Wu

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/6946/jinshan-wu-publications-by-year.pdf>

Version: 2024-04-25

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

42
papers

648

#	Paper	IF	Citations
42	Serial Interval and Generation Interval for Imported and Local Infectors, Respectively, Estimated Using Reported Contact-Tracing Data of COVID-19 in China. <i>Frontiers in Public Health</i> , 2020 , 8, 577431	6	6
41	Large enough sample size to rank two groups of data reliably according to their means. <i>Scientometrics</i> , 2019 , 118, 653-671	3	1
40	Node2vec Representation for Clustering Journals and as A Possible Measure of Diversity. <i>Journal of Data and Information Science</i> , 2019 , 4, 79-92	1.2	6
39	Infrastructure of Scientometrics: The Big and Network Picture. <i>Journal of Data and Information Science</i> , 2019 , 4, 1-12	1.2	19
38	Are Contributions from Chinese Physicists Undercited?. <i>Journal of Data and Information Science</i> , 2019 , 4, 84-95	1.2	1
37	Is there an intrinsic logical error in null hypothesis significance tests? Commentary on: Null hypothesis significance tests. A mix-up of two different theories: the basis for widespread confusion and numerous misinterpretations. <i>Scientometrics</i> , 2018 , 115, 621-625	3	2
36	A Comprehensive Risk Analysis of Transportation Networks Affected by Rainfall-Induced Multihazards. <i>Risk Analysis</i> , 2018 , 38, 1618-1633	3.9	13
35	Lognormal distribution of citation counts is the reason for the relation between Impact Factors and Citation Success Index. <i>Journal of Informetrics</i> , 2018 , 12, 153-157	3.1	2
34	Vulnerability analysis of an urban gas pipeline network considering pipeline-road dependency. <i>International Journal of Critical Infrastructure Protection</i> , 2018 , 23, 79-89	4.1	16
33	Minimum Representative Size in Comparing Research Performance of Universities: the Case of Medicine Faculties in Romania. <i>Journal of Data and Information Science</i> , 2018 , 3, 32-42	1.2	
32	Allometric scaling in scientific fields. <i>Scientometrics</i> , 2017 , 112, 583-594	3	2
31	Do mathematicians, economists and biomedical scientists trace large topics more strongly than physicists?. <i>Journal of Informetrics</i> , 2017 , 11, 598-607	3.1	2
30	The science of science: From the perspective of complex systems. <i>Physics Reports</i> , 2017 , 714-715, 1-73	27.7	147
29	Interrelations among scientific fields and their relative influences revealed by an input-output analysis. <i>Journal of Informetrics</i> , 2016 , 10, 82-97	3.1	17
28	The correlation between editorial delay and the ratio of highly cited papers in Nature, Science and Physical Review Letters. <i>Scientometrics</i> , 2016 , 107, 1457-1464	3	14
27	Games on graphs: A minor modification of payoff scheme makes a big difference. <i>Europhysics Letters</i> , 2014 , 107, 10002	1.6	
26	From sparse to dense and from assortative to disassortative in online social networks. <i>Scientific Reports</i> , 2014 , 4, 4861	4.9	8

25	Stability of mixed-strategy-based iterative logit quantal response dynamics in game theory. <i>PLoS ONE</i> , 2014 , 9, e105391	3.7	6
24	Rényi information flow in the Ising model with single-spin dynamics. <i>Physical Review E</i> , 2014 , 90, 063308	2.4	4
23	Money creation process in a random redistribution model. <i>Physica A: Statistical Mechanics and Its Applications</i> , 2014 , 394, 217-225	3.3	5
22	Logical gaps in the approximate solutions of the social learning game and an exact solution. <i>PLoS ONE</i> , 2014 , 9, e115706	3.7	
21	Do scientists trace hot topics?. <i>Scientific Reports</i> , 2013 , 3, 2207	4.9	17
20	PHASE TRANSITIONS IN ISING MODEL INDUCED BY WEIGHT REDISTRIBUTION ON WEIGHTED REGULAR NETWORKS. <i>International Journal of Modern Physics B</i> , 2013 , 27, 1350146	1.1	3
19	Efficient learning strategy of Chinese characters based on network approach. <i>PLoS ONE</i> , 2013 , 8, e69745	3.7	9
18	Heat transport in quantum spin chains: Relevance of integrability. <i>Physical Review B</i> , 2011 , 83,	3.3	18
17	Emergence of global preferential attachment from local interaction. <i>New Journal of Physics</i> , 2010 , 12, 043029	2.9	13
16	Kubo formula for open finite-size systems. <i>Europhysics Letters</i> , 2010 , 92, 30003	1.6	8
15	Non-equilibrium stationary states from the equation of motion of open systems. <i>New Journal of Physics</i> , 2010 , 12, 083042	2.9	8
14	Enhance the efficiency of heuristic algorithms for maximizing the modularity Q. <i>Europhysics Letters</i> , 2009 , 85, 18009	1.6	5
13	Accuracy and precision of methods for community identification in weighted networks. <i>Physica A: Statistical Mechanics and Its Applications</i> , 2007 , 377, 363-372	3.3	37
12	The effect of weight on community structure of networks. <i>Physica A: Statistical Mechanics and Its Applications</i> , 2007 , 378, 583-590	3.3	25
11	Evolving model of weighted networks inspired by scientific collaboration networks. <i>Physica A: Statistical Mechanics and Its Applications</i> , 2007 , 375, 355-364	3.3	49
10	Small-world effect induced by weight randomization on regular networks. <i>Physics Letters, Section A: General, Atomic and Solid State Physics</i> , 2007 , 364, 488-493	2.3	11
9	Enhancing synchronizability by weight randomization on regular networks. <i>European Physical Journal B</i> , 2007 , 57, 423-428	1.2	7
8	Econophysicists Collaboration Networks: Empirical Studies and Evolutionary Model 2007 , 173-182		

7	Modelling weighted networks using connection count. <i>New Journal of Physics</i> , 2006 , 8, 72-72	2.9	11
6	The analysis and dissimilarity comparison of community structure. <i>Physica A: Statistical Mechanics and Its Applications</i> , 2006 , 367, 577-585	3.3	18
5	Weighted networks of scientific communication: the measurement and topological role of weight. <i>Physica A: Statistical Mechanics and Its Applications</i> , 2005 , 350, 643-656	3.3	66
4	NETWORK OF ECONOPHYSICISTS: A WEIGHTED NETWORK TO INVESTIGATE THE DEVELOPMENT OF ECONOPHYSICS. <i>International Journal of Modern Physics B</i> , 2004 , 18, 2505-2511	1.1	38
3	The spread of infectious disease on complex networks with household-structure. <i>Physica A: Statistical Mechanics and Its Applications</i> , 2004 , 341, 273-280	3.3	26
2	Division of labor as the result of phase transition. <i>Physica A: Statistical Mechanics and Its Applications</i> , 2003 , 323, 663-676	3.3	4
1	Serial interval and generation interval for respectively the imported and local infectors estimated using reported contact-tracing data of COVID-19 in China		4
