| # | ARTICLE                                                                                                                                                                      | IF  | CITATIONS |
|---|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1 | A transient peak in marine sulfate after the 635-Ma snowball Earth. Proceedings of the National Academy of Sciences of the United States of America, 2022, 119, e2117341119. | 7.1 | 12        |
| 2 | Deciphering the sulfur and oxygen isotope patterns of sulfate-driven anaerobic oxidation of methane. Chemical Geology, 2021, 581, 120394.                                    | 3.3 | 7         |
| 3 | Claypool continued: Extending the isotopic record of sedimentary sulfate. Chemical Geology, 2019, 513, 200-225.                                                              | 3.3 | 102       |
| 4 | Triple sulfur isotope relationships during sulfate-driven anaerobic oxidation of methane. Earth and Planetary Science Letters, 2018, 504, 13-20.                             | 4.4 | 23        |
| 5 | A carbonate-based proxy for sulfate-driven anaerobic oxidation of methane. Geology, 2016, 44, 999-1002.                                                                      | 4.4 | 73        |
