VUELIN EU

#	Article	IF	CITATIONS
1	microRNA-34 family: From mechanism to potential applications. International Journal of Biochemistry and Cell Biology, 2022, 144, 106168.	2.8	17
2	Ac106/107 affects production of infectious progeny <scp>BV</scp> by regulating transcription of late viral genes and host cell energy metabolism. Pest Management Science, 2021, 77, 4758-4769.	3.4	5
3	Development of an in vivo methylation system for transformation of Ruminiclostridium cellulolyticum. Journal of Applied Microbiology, 2021, , .	3.1	0
4	Ac154 carried out anti-apoptotic role during AcMNPV infection process in the host insect cells. Molecular and Cellular Biochemistry, 2020, 463, 79-90.	3.1	6
5	Age-related copy number variations and expression levels of F-box protein FBXL20 predict ovarian cancer prognosis. Translational Oncology, 2020, 13, 100863.	3.7	6
6	Insect-resistant Mechanism of Recombinant Baculovirus AcMNPV-PK2-EGFP against Spodoptera exigua Larvae. Biotechnology and Bioprocess Engineering, 2019, 24, 638-645.	2.6	0
7	Ac25 in Autographa californica multiple nucleopolyhedrovirus was crucial for progeny budded virion production. Biotechnology Letters, 2019, 41, 1121-1131.	2.2	2
8	Ac34 protein of AcMNPV promoted progeny virus production and induced the apoptosis in host Sf9 cells. Biotechnology Letters, 2019, 41, 147-158.	2.2	8
9	BmK CT enhances the sensitivity of temozolomide-induced apoptosis of malignant glioma U251 cells inĀ <sup>-</sup> ¿¹⁄2vitro through blocking the AKT signaling pathway. Oncology Letters, 2018, 15, 1537-1544.	1.8	6
10	Function analysis of Ac-PCNA and Sf-PCNA during the Autographa californica multiple nucleopolyhedrovirus infection process. Molecular and Cellular Biochemistry, 2018, 443, 57-68.	3.1	4
11	Function and Application Analysis of Ac132 Protein in Autographa californica Multiple Nucleopolyhedrovirus. Biotechnology and Bioprocess Engineering, 2018, 23, 655-661.	2.6	0
12	Expression of Ac-PK2 protein from AcMNPV improved the progeny virus production via regulation of energy metabolism and protein synthesis. RSC Advances, 2018, 8, 31071-31080.	3.6	1
13	Transcriptome analysis of Spodoptera frugiperda 9 (Sf9) cells infected with baculovirus, AcMNPV or AcMNPV-BmK IT. Biotechnology Letters, 2017, 39, 1129-1139.	2.2	19
14	Expression of a MORN repeat protein from Euplotes octocarinatus requires a +1 programmed ribosomal frameshifting. Bioscience, Biotechnology and Biochemistry, 2017, 81, 1327-1334.	1.3	0
15	Function analysis and application of IAP1/2 ofÂAutographa californica multiple nucleopolyhedrovirus. RSC Advances, 2017, 7, 22424-22432.	3.6	0
16	Baculovirus antiapoptotic protein P35 regulated the host apoptosis to enhance virus multiplication. Molecular and Cellular Biochemistry, 2016, 423, 67-73.	3.1	12
17	SfP53 and filamentous actin (F-actin) are the targets of viral pesticide AcMNPV-BmK IT (P10/PH) in host Spodoptera frugiperda 9 cells. Biotechnology Letters, 2016, 38, 2059-2069.	2.2	3
18	Large-scale mass spectrometry-based analysis of Euplotes octocarinatus supports the high frequency of +1 programmed ribosomal frameshift. Scientific Reports, 2016, 6, 33020.	3.3	13

Υυεյυν Fu

#	Article	IF	CITATIONS
19	AcMNPV-BmK IT improves the progeny virus production via baculovirus GP64 envelope fusion protein. Biotechnology Letters, 2016, 38, 1673-1681.	2.2	3
20	Effects of recombinant baculovirus AcMNPV-BmK IT on the formation of early cables and nuclear polymerization of actin in Sf9 cells. Cytotechnology, 2016, 68, 381-387.	1.6	6
21	Combination of lithium chloride and pEGFP-N1-BmK CT effectively decreases proliferation and migration of C6 glioma cells. Cytotechnology, 2016, 68, 197-202.	1.6	7
22	Classification and identification of bacteria in the soil treated by AcMNPV using high-throughput sequencing technique. Biotechnology and Bioprocess Engineering, 2015, 20, 931-936.	2.6	13
23	Regulation analysis of AcMNPV-mediated expression of a Chinese scorpion neurotoxin under the IE1, P10 and PH promoter in vivo and its use as a potential bio-insecticide. Biotechnology Letters, 2015, 37, 1929-1936.	2.2	2
24	Enzymology and thermal stability of phytase appA mutants. RSC Advances, 2015, 5, 43863-43872.	3.6	8
25	Lithium chloride decreases proliferation and migration of C6 glioma cells harboring isocitrate dehydrogenase 2 mutant via GSK-3β. Molecular Biology Reports, 2014, 41, 3907-3913.	2.3	15
26	Functional study of active residues scorpion insect toxin BmK IT from Buthus martensii Karsch. Biotechnology and Bioprocess Engineering, 2014, 19, 320-326.	2.6	0
27	Cancer stem cell hypothesis: a brief summary and two proposals. Cytotechnology, 2013, 65, 505-512.	1.6	24
28	pEGFP-N1-mediated BmK CT expression suppresses the migration of glioma. Cytotechnology, 2013, 65, 533-539.	1.6	6
29	BmK CT-conjugated fluorescence nanodiamond as potential glioma-targeted imaging and drug. Diamond and Related Materials, 2012, 21, 73-76.	3.9	27
30	Glioma derived isocitrate dehydrogenase-2 mutations induced up-regulation of HIF-11± and 1²-catenin signaling: Possible impact on glioma cell metastasis and chemo-resistance. International Journal of Biochemistry and Cell Biology, 2012, 44, 770-775.	2.8	48
31	Chlorotoxin-conjugated nanoparticles as potential glioma-targeted drugs. Journal of Neuro-Oncology, 2012, 107, 457-462.	2.9	32
32	A potential strategy for high-grade gliomas: combination treatment with lithium chloride and BmK CT. Biotechnology Letters, 2012, 34, 9-17.	2.2	12
33	Mutations in isocitrate dehydrogenase 2 accelerate glioma cell migration via matrix metalloproteinase-2 and 9. Biotechnology Letters, 2012, 34, 441-446.	2.2	16
34	Glioma-derived mutations in isocitrate dehydrogenase 2 beneficial to traditional chemotherapy. Biochemical and Biophysical Research Communications, 2011, 410, 218-223.	2.1	16
35	Recombinant scorpion insect excitatory toxin BmK IT accelerates the growth of insect Spodoptera frugiperda 9 cells. Molecular and Cellular Biochemistry, 2011, 351, 93-98.	3.1	5
36	βâ€catenin as a potential key target for tumor suppression. International Journal of Cancer, 2011, 129, 1541-1551.	5.1	93

#	Article	IF	CITATIONS
37	Glioma-derived mutations in IDH: From mechanism to potential therapy. Biochemical and Biophysical Research Communications, 2010, 397, 127-130.	2.1	42
38	Baculovirus-mediated expression of a Chinese scorpion neurotoxin improves insecticidal efficacy. Science Bulletin, 2008, 53, 1855-1860.	9.0	11
