

Victoria Arrandale

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/6982823/victoria-arrandale-publications-by-year.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
46	Sun Protection Use at Work and Leisure by Outdoor Workers in Alberta, Canada. <i>Journal of Occupational and Environmental Medicine</i> , 2021 , 63, e138-e144	2	0
45	Exploratory study to determine if risk factors for occupational skin disease vary by type of food processing operation. <i>Work</i> , 2021 , 68, 1113-1119	1.6	
44	Economic evaluation of interventions to reduce solar ultraviolet radiation (UVR) exposure among construction workers. <i>Journal of Occupational and Environmental Hygiene</i> , 2021 , 18, 250-264	2.9	0
43	Estimating Historical Exposure to Respirable Crystalline Silica in the Mining Industry in Ontario, Canada Using a Newly Developed Exposure Database. <i>Annals of Work Exposures and Health</i> , 2021 , 65, 1040-1049	2.4	0
42	Health and Safety in Nail Salons: A Cross-Sectional Survey. <i>Annals of Work Exposures and Health</i> , 2021 , 65, 225-229	2.4	1
41	Skin Exposure to Acrylates in Nail Salons. <i>Annals of Work Exposures and Health</i> , 2021 , 65, 162-166	2.4	0
40	A Qualitative Study to Identify Characteristics of a Desirable Training Program for Prevention of Occupational Skin Disease. <i>Annals of Work Exposures and Health</i> , 2021 , 65, 230-238	2.4	2
39	Break-even Analysis of Respirable Crystalline Silica (RCS) Exposure Interventions in the Construction Sector. <i>Journal of Occupational and Environmental Medicine</i> , 2021 , 63, e792-e800	2	
38	Estimating the burden of lung cancer in Canada attributed to occupational radon exposure using a novel exposure assessment method. <i>International Archives of Occupational and Environmental Health</i> , 2020 , 93, 871-876	3.2	3
37	A scoping review to identify strategies that work to prevent four important occupational diseases. <i>American Journal of Industrial Medicine</i> , 2020 , 63, 490-516	2.7	5
36	A qualitative descriptive study of underground workers who received aluminum dust treatment and its organizational level impact. <i>Journal of Inorganic Biochemistry</i> , 2020 , 204, 110935	4.2	
35	Solar ultraviolet radiation exposure among outdoor workers in Alberta, Canada. <i>Environmental Research</i> , 2020 , 189, 109902	7.9	4
34	Can Silicone Passive Samplers be Used for Measuring Exposure of e-Waste Workers to Flame Retardants?. <i>Environmental Science & Technology</i> , 2020 , 54, 15277-15286	10.3	6
33	Neurodegenerative diseases among miners in Ontario, Canada, using a linked cohort. <i>Occupational and Environmental Medicine</i> , 2020 ,	2.1	1
32	Silicone wristbands integrate dermal and inhalation exposures to semi-volatile organic compounds (SVOCs). <i>Environment International</i> , 2019 , 132, 105104	12.9	41
31	Using health insurance administrative data to explore patch testing utilization in Ontario, Canada-An untapped resource. <i>Contact Dermatitis</i> , 2019 , 80, 386-390	2.7	3
30	Exposure of Canadian electronic waste dismantlers to flame retardants. <i>Environment International</i> , 2019 , 129, 95-104	12.9	31

29	The impact of night shift work on breast cancer: Results from the Burden of Occupational Cancer in Canada Study. <i>American Journal of Industrial Medicine</i> , 2019 , 62, 635-642	2.7	4
28	The current burden of cancer attributable to occupational exposures in Canada. <i>Preventive Medicine</i> , 2019 , 122, 128-139	4.3	22
27	Flame retardants and plasticizers in a Canadian waste electrical and electronic equipment (WEEE) dismantling facility. <i>Science of the Total Environment</i> , 2019 , 675, 594-603	10.2	26
26	Adult Asthma among Workers in Ontario. Results from the Occupational Disease Surveillance System. <i>Annals of the American Thoracic Society</i> , 2019 , 16, 563-571	4.7	7
25	Burden of non-melanoma skin cancer attributable to occupational sun exposure in Canada. <i>International Archives of Occupational and Environmental Health</i> , 2019 , 92, 1151-1157	3.2	12
24	Dermatitis among workers in Ontario: results from the Occupational Disease Surveillance System. <i>Occupational and Environmental Medicine</i> , 2019 , 76, 625-631	2.1	5
23	Electronic Waste Recycling: Occupational Exposures and Work-Related Health Effects. <i>Current Environmental Health Reports</i> , 2019 , 6, 256-268	6.5	12
22	Urinary bisphenol A and incidence of metabolic syndrome among Chinese men: a prospective cohort study from 2013 to 2017. <i>Occupational and Environmental Medicine</i> , 2019 , 76, 758-764	2.1	0
21	Health and Work in Women and Men in the Welding and Electrical Trades: How Do They Differ?. <i>Annals of Work Exposures and Health</i> , 2018 , 62, 393-403	2.4	7
20	Alternative Flame Retardant, 2,4,6-Tris(2,4,6-tribromophenoxy)-1,3,5-triazine, in an E-waste Recycling Facility and House Dust in North America. <i>Environmental Science & Technology</i> , 2018 , 52, 3599-3607	10.3	24
19	Gaps in Workplace Education For Prevention of Occupational Skin Disease. <i>Annals of Work Exposures and Health</i> , 2018 , 62, 243-247	2.4	6
18	Silica exposure in a mining exploration operation. <i>Archives of Environmental and Occupational Health</i> , 2018 , 73, 351-354	2	2
17	Burden of lung cancer attributable to occupational diesel engine exhaust exposure in Canada. <i>Occupational and Environmental Medicine</i> , 2018 , 75, 617-622	2.1	12
16	Examining lung cancer risks across different industries and occupations in Ontario, Canada: the establishment of the Occupational Disease Surveillance System. <i>Occupational and Environmental Medicine</i> , 2018 , 75, 545-552	2.1	15
15	Tri(2,4-di- t-butylphenyl) Phosphate: A Previously Unrecognized, Abundant, Ubiquitous Pollutant in the Built and Natural Environment. <i>Environmental Science & Technology</i> , 2018 , 52, 12997-13003	10.3	37
14	Polydimethylsiloxane (silicone rubber) brooch as a personal passive air sampler for semi-volatile organic compounds. <i>Chemosphere</i> , 2018 , 208, 1002-1007	8.4	23
13	Preventing Occupational Skin Disease: A Review of Training Programs. <i>Dermatitis</i> , 2017 , 28, 169-182	2.6	14
12	Historical occupational isocyanate exposure levels in two Canadian provinces. <i>Journal of Occupational and Environmental Hygiene</i> , 2017 , 14, 1-8	2.9	5

11	Workers with hand dermatitis and workplace training experiences: A qualitative perspective. <i>American Journal of Industrial Medicine</i> , 2017 , 60, 69-76	2.7	5
10	Designing exposure registries for improved tracking of occupational exposure and disease. <i>Canadian Journal of Public Health</i> , 2016 , 107, e119-e125	3.2	4
9	Urinary metal concentrations among female welders. <i>Annals of Occupational Hygiene</i> , 2015 , 59, 52-61		7
8	Skin symptoms in bakery and auto body shop workers: associations with exposure and respiratory symptoms. <i>International Archives of Occupational and Environmental Health</i> , 2013 , 86, 167-75	3.2	8
7	Occupational urticaria and allergic contact dermatitis 2013 , 418-434		
6	Occupational contact allergens: are they also associated with occupational asthma?. <i>American Journal of Industrial Medicine</i> , 2012 , 55, 353-60	2.7	28
5	Skin and respiratory symptoms among workers with suspected work-related disease. <i>Occupational Medicine</i> , 2012 , 62, 420-6	2.1	5
4	Educational intervention among farmers in a community health care setting. <i>Occupational Medicine</i> , 2012 , 62, 458-61	2.1	20
3	Exposure assessment in cohort studies of childhood asthma. <i>Environmental Health Perspectives</i> , 2011 , 119, 591-7	8.4	16
2	Longitudinal analysis of respiratory symptoms in population studies with a focus on dyspnea in marine transportation workers. <i>International Archives of Occupational and Environmental Health</i> , 2009 , 82, 1097-105	3.2	15
1	Repeated Mechanical Trauma to the Hands: The Use of Anti-Impaction Gloves for Treatment and Return to Work. <i>Dermatitis</i> , 2009 , 20, 278-283	2.6	9
