

# Heno F Lopes

## List of Publications by Year in Descending Order

**Source:** <https://exaly.com/author-pdf/6984704/heno-f-lobes-publications-by-year.pdf>

**Version:** 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

45  
papers

990  
citations

| #  | Paper                                                                                                                                                                                                                                                                             | IF  | Citations |
|----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 45 | Acute physical and mental stress resulted in an increase in fatty acids, norepinephrine, and hemodynamic changes in normal individuals: A possible pathophysiological mechanism for hypertension-Pilot study. <i>Journal of Clinical Hypertension</i> , <b>2021</b> , 23, 888-894 | 2.3 | 3         |
| 44 | Visceral adiposity syndrome and cardiometabolism. <i>Scripta Medica</i> , <b>2021</b> , 52, 144-150                                                                                                                                                                               | 0.3 |           |
| 43 | Is hepatojugular reflux a good predictor of heart failure with preserved ejection fraction?. <i>Revista Da Associação Médica Brasileira</i> , <b>2019</b> , 65, 592-595                                                                                                           | 1.4 | 0         |
| 42 | Dysregulation of insulin levels in Chagas heart disease is associated with altered adipocytokine levels. <i>Canadian Journal of Physiology and Pharmacology</i> , <b>2019</b> , 97, 140-145                                                                                       | 2.4 | 1         |
| 41 | Hypertensive heart disease: Benefit of carvedilol in hemodynamic, left ventricular remodeling, and survival. <i>SAGE Open Medicine</i> , <b>2019</b> , 7, 2050312118823582                                                                                                        | 2.4 | 3         |
| 40 | Predictors of Obstructive Sleep Apnea in Consecutive Patients with Metabolic Syndrome. <i>Metabolic Syndrome and Related Disorders</i> , <b>2018</b> , 16, 2-5                                                                                                                    | 2.6 | 4         |
| 39 | Metabolic Syndrome-Related Features in Controlled and Resistant Hypertensive Subjects. <i>Arquivos Brasileiros De Cardiologia</i> , <b>2018</b> , 110, 514-521                                                                                                                    | 1.2 | 8         |
| 38 | Does Obstructive Sleep Apnea Influence Blood Pressure and Arterial Stiffness in Response to Antihypertensive Treatment?. <i>Hypertension</i> , <b>2018</b> , 72, 399-407                                                                                                          | 8.5 | 7         |
| 37 | Association of obstructive sleep apnea with arterial stiffness and nondipping blood pressure in patients with hypertension. <i>Journal of Clinical Hypertension</i> , <b>2017</b> , 19, 910-918                                                                                   | 2.3 | 24        |
| 36 | 3rd Guideline for Perioperative Cardiovascular Evaluation of the Brazilian Society of Cardiology. <i>Arquivos Brasileiros De Cardiologia</i> , <b>2017</b> , 109, 1-104                                                                                                           | 1.2 | 11        |
| 35 | Galantamine alleviates inflammation and insulin resistance in patients with metabolic syndrome in a randomized trial. <i>JCI Insight</i> , <b>2017</b> , 2,                                                                                                                       | 9.9 | 36        |
| 34 | Visceral adiposity syndrome. <i>Diabetology and Metabolic Syndrome</i> , <b>2016</b> , 8, 40                                                                                                                                                                                      | 5.6 | 64        |
| 33 | Abnormalities of Anthropometric, Hemodynamic, and Autonomic Variables in Offspring of Hypertensive Parents. <i>Journal of Clinical Hypertension</i> , <b>2016</b> , 18, 942-8                                                                                                     | 2.3 | 2         |
| 32 | Dysregulation of Autonomic Nervous System in Chagas Heart Disease Is Associated with Altered Adipocytokines Levels. <i>PLoS ONE</i> , <b>2015</b> , 10, e0131447                                                                                                                  | 3.7 | 13        |
| 31 | Prevalence of cardiovascular risk factors among truck drivers in the South of Brazil. <i>BMC Public Health</i> , <b>2014</b> , 14, 1063                                                                                                                                           | 4.1 | 31        |
| 30 | Influence of acute hyperlipidemia to adipocyte-derived hormones in lean normotensive and subjects with metabolic syndrome. <i>Diabetology and Metabolic Syndrome</i> , <b>2014</b> , 6, 132                                                                                       | 5.6 | 2         |
| 29 | Prevalence of metabolic syndrome and associated factors in women aged 35 to 65 years who were enrolled in a family health program in Brazil. <i>Menopause</i> , <b>2013</b> , 20, 470-6                                                                                           | 2.5 | 13        |

|    |                                                                                                                                                                                                                                  |     |     |
|----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----|
| 28 | I Brazilian position statement on arterial hypertension and diabetes mellitus. <i>Arquivos Brasileiros De Cardiologia</i> , <b>2013</b> , 100, 491-501                                                                           | 1.2 | 10  |
| 27 | The impact of metabolic syndrome on metabolic, pro-inflammatory and prothrombotic markers according to the presence of high blood pressure criterion. <i>Clinics</i> , <b>2013</b> , 68, 1495-501                                | 2.3 | 11  |
| 26 | Cardiovascular autonomic dysfunction in sickle cell anemia. <i>Autonomic Neuroscience: Basic and Clinical</i> , <b>2012</b> , 166, 54-9                                                                                          | 2.4 | 13  |
| 25 | Blood pressure, metabolic and autonomic responses to insulin and intralipid infusion in chagasic patients. <i>Arquivos Brasileiros De Cardiologia</i> , <b>2012</b> , 98, 225-33                                                 | 1.2 | 2   |
| 24 | Monosodium glutamate neonatal treatment induces cardiovascular autonomic function changes in rodents. <i>Clinics</i> , <b>2012</b> , 67, 1209-14                                                                                 | 2.3 | 7   |
| 23 | II Diretriz de Avaliaçã Perioperatã da Sociedade Brasileira de Cardiologia. <i>Arquivos Brasileiros De Cardiologia</i> , <b>2011</b> , 96, 1-68                                                                                  | 1.2 | 3   |
| 22 | II Guidelines for perioperative evaluation of the Brazilian Society of Cardiology. <i>Arquivos Brasileiros De Cardiologia</i> , <b>2011</b> , 96, 1-68                                                                           | 1.2 | 23  |
| 21 | The impact of obstructive sleep apnea on metabolic and inflammatory markers in consecutive patients with metabolic syndrome. <i>PLoS ONE</i> , <b>2010</b> , 5, e12065                                                           | 3.7 | 171 |
| 20 | Body mass index has a good correlation with proatherosclerotic profile in children and adolescents. <i>Arquivos Brasileiros De Cardiologia</i> , <b>2009</b> , 93, 261-7                                                         | 1.2 | 15  |
| 19 | Obstructive sleep apnea is highly prevalent and correlates with impaired glycemic control in consecutive patients with the metabolic syndrome. <i>Journal of the Cardiometabolic Syndrome</i> , <b>2009</b> , 4, 89-95           |     | 25  |
| 18 | Increased sympathetic activity in normotensive offspring of malignant hypertensive parents compared to offspring of normotensive parents. <i>Brazilian Journal of Medical and Biological Research</i> , <b>2008</b> , 41, 849-53 | 2.8 | 17  |
| 17 | Autonomic dysregulation and the metabolic syndrome: pathologic partners in an emerging global pandemic. <i>Arquivos Brasileiros De Cardiologia</i> , <b>2006</b> , 87, 538-47                                                    | 1.2 | 11  |
| 16 | Endothelial function is preserved in Chagasdheart disease patients without heart failure. <i>Endothelium: Journal of Endothelial Cell Research</i> , <b>2004</b> , 11, 241-6                                                     |     | 5   |
| 15 | Frequent nurse visits decrease white coat effect in stage III hypertension. <i>American Journal of Hypertension</i> , <b>2004</b> , 17, 523-8                                                                                    | 2.3 | 7   |
| 14 | DASH diet lowers blood pressure and lipid-induced oxidative stress in obesity. <i>Hypertension</i> , <b>2003</b> , 41, 422-30                                                                                                    | 8.5 | 170 |
| 13 | Hypercholesterolemia blunts forearm vasorelaxation and enhances the pressor response during acute systemic hypoxia. <i>Arteriosclerosis, Thrombosis, and Vascular Biology</i> , <b>2003</b> , 23, 1660-6                         | 9.4 | 14  |
| 12 | Acute hyperlipidemia increases oxidative stress more in African Americans than in white Americans. <i>American Journal of Hypertension</i> , <b>2003</b> , 16, 331-6                                                             | 2.3 | 39  |
| 11 | Increasing plasma fatty acids elevates F2-isoprostanes in humans: implications for the cardiovascular risk factor cluster. <i>Journal of Hypertension</i> , <b>2002</b> , 20, 1215-21                                            | 1.9 | 61  |

|    |                                                                                                                                                                                                                 |      |    |
|----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|----|
| 10 | Moderate sodium restriction enhances the pressor response to hyperlipidemia in obese, hypertensive patients. <i>Journal of Clinical Hypertension</i> , <b>2002</b> , 4, 173-80                                  | 2.3  | 2  |
| 9  | Hemodynamic and metabolic profile in offspring of malignant hypertensive parents. <i>Hypertension</i> , <b>2001</b> , 38, 616-20                                                                                | 8.5  | 23 |
| 8  | Dysregulation of peripheral and central chemoreflex responses in Chagasdheart disease patients without heart failure. <i>Circulation</i> , <b>2001</b> , 104, 1792-8                                            | 16.7 | 19 |
| 7  | The pressor response to acute hyperlipidemia is enhanced in lean normotensive offspring of hypertensive parents. <i>American Journal of Hypertension</i> , <b>2001</b> , 14, 1032-7                             | 2.3  | 9  |
| 6  | Autonomic abnormalities demonstrable in young normotensive subjects who are children of hypertensive parents. <i>Brazilian Journal of Medical and Biological Research</i> , <b>2000</b> , 33, 51-4              | 2.8  | 23 |
| 5  | Decreased cardiopulmonary baroreflex sensitivity in Chagasdheart disease. <i>Hypertension</i> , <b>2000</b> , 36, 1035-8                                                                                        | 5.5  | 17 |
| 4  | Blood pressure and the risk of complex arrhythmia in renal insufficiency, hemodialysis, and renal transplant patients. <i>American Journal of Hypertension</i> , <b>1999</b> , 12, 204-8                        | 2.3  | 28 |
| 3  | Lack of effect of a single oral dose of cyclosporine on systemic blood pressure and on forearm blood flow and vascular resistance in humans. <i>American Journal of Hypertension</i> , <b>1998</b> , 11, 1371-5 | 2.3  | 1  |
| 2  | Lipid metabolism alterations in normotensive subjects with positive family history of hypertension. <i>Hypertension</i> , <b>1997</b> , 30, 629-31                                                              | 8.5  | 18 |
| 1  | Blood pressure influences the occurrence of complex ventricular arrhythmia in hemodialysis patients. <i>Hypertension</i> , <b>1995</b> , 26, 1200-3                                                             | 8.5  | 20 |
