#	ARTICLE	IF	CITATIONS
1	Retropubic TFS Minisling for Postprostatectomy Male Incontinence: First Report. <i>Urologia Internationalis</i> , 2022, 106, 249-255.	0.6	0
2	The biomechanics of uterine prolapse impact rectal intussusception, ODS and surgical restoration. <i>Techniques in Coloproctology</i> , 2022, 26, 161-162.	0.8	2
3	Vulvodinia: a neuroinflammatory pain syndrome originating in pelvic visceral nerve plexuses due to mechanical factors. <i>Archives of Gynecology and Obstetrics</i> , 2022, 306, 1411-1415.	0.8	4
4	Overactive bladder (OAB): a failed concept needing revision to accommodate an external anatomical control system. <i>World Journal of Urology</i> , 2022, , 1.	1.2	2
5	An anatomical pathogenesis of lower urinary tract definitions from the 2002 ICS report symptoms, conditions, syndromes, urodynamics. <i>Neurourology and Urodynamics</i> , 2022, 41, 740-755.	0.8	8
6	The emperor has no clothes: OAB can be cured surgically. <i>International Urogynecology Journal</i> , 2022, , 1.	0.7	2
7	Integral Theory Diagnostic System artificial intelligence "Wayfinding" software helps unravel the complexity of multiple symptom causation prior to ligament surgery. <i>Pelvipерineology</i> , 2022, 41, .	0.1	0
8	Ultrasound studies demonstrate weak pubourethral ligaments cause urinary tract opening on effort, restored by ligament support. <i>International Urogynecology Journal</i> , 2022, , 1.	0.7	0
9	Minimally invasive Fothergill -Manchester operation with connective tissue conservation. <i>Gynecology and Obstetrics Clinical Medicine</i> , 2022, 2, 52-56.	0.2	0
10	Non-Hunner™s Interstitial Cystitis Is Different from Hunner™s Interstitial Cystitis and May Be Curable by Uterosacral Ligament Repair. <i>Urologia Internationalis</i> , 2022, 106, 649-657.	0.6	5
11	Pressure transmission theory "The Rasputin of incontinence". <i>Neurourology and Urodynamics</i> , 2022, 41, 1216-1223.	0.8	5
12	Defining urge as an uncontrolled micturition explains pathogenesis, informs cure and helps solve the burgeoning OAB crisis. <i>Neurourology and Urodynamics</i> , 2022, 41, 1281-1292.	0.8	4
13	THE CASE AGAINST urethral failure is not a critical factor in female urinary incontinence. Now what? The integral theory system. <i>Neurourology and Urodynamics</i> , 2022, 41, 1270-1280.	0.8	3
14	Understanding the mechanics of closure is key to optimal midurethral sling technique. <i>International Urogynecology Journal</i> , 2021, 32, 39-45.	0.7	4
15	Cure of Interstitial Cystitis and Non-Ulcerating Hunner™s Ulcer by Cardinal/Uterosacral Ligament Repair. <i>Urologia Internationalis</i> , 2021, 105, 920-923.	0.6	6
16	Mechanically Supporting Uterosacral Ligaments for the Relief of Provoked Vulvodinia: A Randomized Pilot Trial. <i>Journal of Pain Research</i> , 2021, Volume 14, 1281-1288.	0.8	1
17	Pathogenesis of overactive bladder and surgical treatment according to the Integral Theory Paradigm. <i>Gynecology and Obstetrics Clinical Medicine</i> , 2021, 1, 55-61.	0.2	0
18	Re: The pathophysiology of stress urinary incontinence: a systematic review and meta-analysis. <i>Int Urogynecol J</i> 32, 501-552 (2021). <i>International Urogynecology Journal</i> , 2021, 32, 2881-2881.	0.7	0

#	ARTICLE	IF	CITATIONS
19	Provoked vulvodynia: diagnosis of perplexing pain condition. <i>Pelviperrineology</i> , 2021, 39, 115-122.	0.1	1
20	A follow-up study confirms day/night enuresis cure in children by squatting-based exercises. <i>Pelviperrineology</i> , 2021, 40, 39-42.	0.1	0
21	Micturition requires active opening of the posterior urethral wall by directional striated muscles. <i>Pelviperrineology</i> , 2021, 40, 58-60.	0.1	0
22	FOWLER'S SYNDROME: WHAT IT IS AND WHAT IT'S NOT. <i>Pelviperrineology</i> , 2021, 39, 107-114.	0.1	0
23	A ligament-based repair method gives high cure rates for descending perineal syndrome and fecal incontinence. <i>Techniques in Coloproctology</i> , 2021, 25, 1173-1174.	0.8	0
24	Slings operations work very differently from mesh sheet implantations and should not be banned. <i>Pelviperrineology</i> , 2021, 40, 8-10.	0.1	0
25	Vale Catherin Hamlin - a personal homage. <i>Pelviperrineology</i> , 2021, 39, 40-41.	0.1	0
26	Pelvic-floor function, dysfunction, and treatment. <i>European Journal of Obstetrics, Gynecology and Reproductive Biology</i> , 2021, 265, 143-149.	0.5	35
27	The innervation of the bladder, the pelvic floor, and emotion: A review. <i>Autonomic Neuroscience: Basic and Clinical</i> , 2021, 235, 102868.	1.4	6
28	Cure of enuresis/bowel dysfunction in children may provide insights for adult dysfunctions. <i>Techniques in Coloproctology</i> , 2021, 25, 351-353.	0.8	0
29	A watershed paper for surgical cure of overactive bladder and nocturia. <i>Central European Journal of Urology</i> , 2021, 74, 379-381.	0.2	3
30	Re "Levator ani and puborectalis muscle rupture: diagnosis and repair for perineal instability" by Alketbi, M. S. Gh. J. Meyer J. Robert Yap J et al.: an alternative technique for reattachment of puborectalis to symphysis. <i>Techniques in Coloproctology</i> , 2021, 25, 1345-1346.	0.8	0
31	The Pelvic Floor: Neurocontrol and Functional Concepts. , 2021, , 57-70.		0
32	The Integral System of Pelvic Floor Function and Dysfunction. , 2021, , 31-55.		0
33	Idiopathic Chronic Pelvic Pain: A Different Perspective. , 2021, , 951-961.		0
34	Pelvic ligament repair with slings "a foundation stone for solution of the ageing crisis in female pelvic urology. <i>Central European Journal of Urology</i> , 2021, 74, 563-565.	0.2	1
35	A Review of Chronic Pelvic Pain in Women. <i>JAMA - Journal of the American Medical Association</i> , 2021, 326, 2207.	3.8	0
36	Re: A Comprehensive Review of Overactive Bladder Pathophysiology: On the Way to Tailored Treatment. <i>European Urology</i> , 2020, 77, 134-135.	0.9	1

#	ARTICLE	IF	CITATIONS
37	Passive management of labour may predispose to anal sphincter injury. <i>International Urogynecology Journal</i> , 2020, 31, 1943-1947.	0.7	6
38	Urethral closure is by a reflex musculoelastic mechanism not pressure transmission. <i>International Urogynecology Journal</i> , 2020, 31, 2445-2445.	0.7	1
39	A biomechanically based concept for a stronger obstetric anal sphincter repair. <i>International Urogynecology Journal</i> , 2020, 31, 2399-2403.	0.7	0
40	Bladder/urethral smooth muscle contraction is adjunctive to external striated muscle forces. <i>International Urogynecology Journal</i> , 2020, 31, 851-852.	0.7	2
41	The mechanics and biomechanics of OASIS POP and incontinence – is active management of labour protective?. <i>International Urogynecology Journal</i> , 2020, 31, 1727-1728.	0.7	2
42	Re: The mess of mesh. <i>BJOG: an International Journal of Obstetrics and Gynaecology</i> , 2020, 127, 650-651.	1.1	0
43	A four month squatting-based pelvic exercise regime cures day/night enuresis and bowel dysfunction in children 7-11 years. <i>Central European Journal of Urology</i> , 2020, 73, 307-314.	0.2	8
44	A low cost artisan tension-free tape technique cures pelvic organ prolapse and stress urinary incontinence – proof of concept. <i>Central European Journal of Urology</i> , 2020, 73, 490-497.	0.2	7
45	The mechanics of urethral closure, incontinence and midurethral sling repair. Part 1 original experimental studies. (1990). <i>Neurourology and Urodynamics</i> , 2019, 38, 809-813.	0.8	3
46	Some anatomical explanations for mesh complications. <i>European Journal of Obstetrics, Gynecology and Reproductive Biology</i> , 2019, 236, 249-251.	0.5	2
47	RE: Da Silva et al The histological composition of this site: A cadaveric study. <i>Neurourology and Urodynamics</i> , 2019, 38, 1176-1177.	0.8	0
48	An anatomical rationale for a squatting-based pelvic floor regime to address bladder and bowel problems. <i>Journal of Pediatric Surgery</i> , 2019, 54, 1094-1095.	0.8	0
49	International Continence Society (ICS) report on the terminology for nocturia and nocturnal lower urinary tract function. <i>Neurourology and Urodynamics</i> , 2019, 38, 499-508.	0.8	161
50	The mechanics of urethral closure, incontinence and midurethral sling repair. Part 2 further experimental validation (1993-2003). <i>Neurourology and Urodynamics</i> , 2019, 38, 814-817.	0.8	3
51	The mechanics of urethral closure, incontinence, and midurethral sling repair Part 3 surgical applications (1990-2016). <i>Neurourology and Urodynamics</i> , 2019, 38, 818-824.	0.8	3
52	On collagen, ageing and surgical treatment options following commercial kit withdrawals - a critical analysis. <i>Pelvipereineology</i> , 2019, , 58-60.	0.1	1
53	Comment on the Levin hypothesis on the role of detrusor rigidity in the lower urinary tract dysfunction. <i>Pelvipereineology</i> , 2019, , 61-62.	0.1	0
54	Re: Repair of Damaged Ligaments with Tissue Fixation System Minisling Is Sufficient to Cure Major Prolapse in All Three Compartments: 5-yr Data. <i>European Urology</i> , 2018, 73, 982-983.	0.9	0

#	ARTICLE	IF	CITATIONS
55	A constricted midurethral sling needs loosening within 48â€“72 hours. <i>International Urogynecology Journal</i> , 2018, 29, 609-610.	0.7	2
56	The integral theory and its tethered vagina syndrome revisited: vaginal scarring may cause massive urinary incontinence. <i>BJU International</i> , 2018, 122, 532-534.	1.3	6
57	Anatomy and surgical cure of descending perineal syndrome. <i>International Urogynecology Journal</i> , 2018, 29, 605-606.	0.7	2
58	Re: Retropubic Tissue Fixation System Tensioned Mini-sling Carried out Under Local Anesthesia Cures Stress Urinary Incontinence and Intrinsic Sphincter Deficiency: 1-year Data. <i>European Urology</i> , 2018, 74, 117-118.	0.9	0
59	Should surgeons continue to implant mesh sheets behind the vagina?. <i>International Urogynecology Journal</i> , 2018, 29, 777-779.	0.7	4
60	Update of the Integral Theory and System for Management of Pelvic Floor Dysfunction in Females. <i>European Urology Supplements</i> , 2018, 17, 100-108.	0.1	25
61	Skin flap vaginal augmentation helps prevent and cure post obstetric fistula repair urine leakage: a critical anatomical analysis. <i>BJOG: an International Journal of Obstetrics and Gynaecology</i> , 2018, 125, 745-749.	1.1	16
62	The retropubic sling more precisely restores the urethral closure mechanisms. <i>International Urogynecology Journal</i> , 2018, 29, 169-170.	0.7	1
63	Retention of urine in women is alleviated by uterosacral ligament repair: implications for Fowler's syndrome. <i>Central European Journal of Urology</i> , 2018, 71, 436-443.	0.2	10
64	In defense of J Marion Sims. <i>International Urogynecology Journal</i> , 2018, 29, 1563-1564.	0.7	3
65	Mechanical support of cardinal/uterosacral ligaments improves OAB symptoms: implications for management. <i>International Urogynecology Journal</i> , 2018, 29, 1231-1231.	0.7	0
66	A ligamentous explanation for overactive bladder symptoms as defined by International Continence Society in the female. <i>Central European Journal of Urology</i> , 2018, 71, 105-107.	0.2	7
67	Underactive bladder may be caused by uterosacral ligament laxity - a critical review of two paradigms. <i>Central European Journal of Urology</i> , 2018, 71, 444-447.	0.2	4
68	Pathways to causation and surgical cure of chronic pelvic pain of unknown origin, bladder and bowel dysfunction - an anatomical analysis. <i>Central European Journal of Urology</i> , 2018, 71, 448-452.	0.2	3
69	Knowledge of urethral closure mechanics helps to optimize surgical methodology of the midurethral sling operation. <i>Central European Journal of Urology</i> , 2018, 71, 334-337.	0.2	1
70	Origin of the midurethral sling operation. <i>International Urogynecology Journal</i> , 2017, 28, 801-801.	0.7	0
71	A critical analysis of high-stiffness versus low-stiffness tape used for midurethral slings. <i>International Urogynecology Journal</i> , 2017, 28, 653-654.	0.7	0
72	Preservation of vaginal elasticity is essential for avoiding mesh complications after prolapse surgery. <i>Techniques in Coloproctology</i> , 2017, 21, 589-590.	0.8	1

73	Liedl B, Inoue H, Sekigichi Y, et al. Is overactive bladder in the female surgically curable by ligament repair? Cent European J Urol. 2017; 70: 53-59. Central European Journal of Urology, 2017, 70, 454.	0.2	2
74	The pelvic floor muscle training manoeuvre works by increasing intraurethral resistance. Comment on "Influence of voluntary pelvic floor muscle contraction and pelvic floor muscle training on urethral closure pressures: a systematic literature review". International Urogynecology Journal, 2016, 27, 1943-1944.	0.7	0
75	Tissue Fixation System Perineal Body Repair: A Minimally Invasive Method for Repair of Descending Perineal Syndrome. Diseases of the Colon and Rectum, 2016, 59, e455-e455.	0.7	1
76	Targeted therapy for stress urinary incontinence: a systematic review based on clinical trials. Expert Opinion on Biological Therapy, 2016, 16, 233-242.	1.4	17
77	Rapid nonlinear bladder and bowel evacuation: an evolutionary survival mechanism?. Techniques in Coloproctology, 2015, 19, 661-662.	0.8	0
78	On cosmetic vaginal surgery - an anatomical and biomechanical perspective. Acta Obstetrica Et Gynecologica Scandinavica, 2015, 94, 1027-1028.	1.3	3
79	A critical analysis of the trampoline test for diagnosis of SUI. Re: Rimstad L, Larsen ES, Schiotz HA, Kulseng-Hansen S, Pad tests with increasing load for the diagnosis of stress incontinence, Neurourology and Urodynamics, 2014; 33:1135-1139. Neurourology and Urodynamics, 2015, 34, 393-394.	0.8	0
80	On the role of competent ligaments in vaginal surgery, pelvic floor and sexual function. Acta Obstetrica Et Gynecologica Scandinavica, 2015, 94, 1397-1397.	1.3	0
81	Gold standard: a failed concept. International Urogynecology Journal, 2015, 26, 1555-1555.	0.7	1
82	A possible explanation for relaxin and oxytocin receptors in the uterosacral ligaments. Acta Obstetrica Et Gynecologica Scandinavica, 2015, 94, 440-440.	1.3	1
83	Effects of posture and squatting on the dynamics of micturition. International Urogynecology Journal, 2015, 26, 779-780.	0.7	3
84	Creating a gold standard surgical device: scientific discoveries leading to TVT and beyond. International Urogynecology Journal, 2015, 26, 471-476.	0.7	19
85	A finite element model validates an external mechanism for opening the urethral tube prior to micturition in the female. World Journal of Urology, 2015, 33, 1151-1157.	1.2	20
86	Urinary incontinence during pregnancy: a function of collagen depolymerisation by relaxin?. European Journal of Obstetrics, Gynecology and Reproductive Biology, 2015, 186, 111-112.	0.5	4
87	Re: Vulvodynia: integrating current knowledge into clinical practice. The Obstetrician and Gynaecologist, 2015, 17, 138-139.	0.2	0
88	An anatomical explanation for "urodynamic features and artefacts". Re: Hogan S, Gammie A, Abrams P. Urodynamic features and artefacts. Neurourol Urodyn 2012; 31:1104-1107. Neurourology and Urodynamics, 2014, 33, 153-154.	0.8	0
89	Re: Gammie, A. Re: An anatomical explanation for "urodynamic features and artefacts". Neurourol Urodyn 2014; 33:155. Neurourology and Urodynamics, 2014, 33, 156-158.	0.8	1
90	Female urethra is actively opened out by an external striated muscle mechanism during micturition, exponentially reducing intraurethral resistance to flow. International Journal of Urology, 2014, 21, 1292-1293.	0.5	3
