citing authors

#	ARTICLE	IF	CITATIONS
1	XPF expression and its relationship with the risk and prognosis of colorectal cancer. <i>Cancer Cell International</i> , 2021, 21, 12.	4.1	2
2	Interleukin 20 receptor A expression in colorectal cancer and its clinical significance. <i>PeerJ</i> , 2021, 9, e12467.	2.0	6
3	The Involvement of TRIB3 and FABP1 and Their Potential Functions in the Dynamic Process of Gastric Cancer. <i>Frontiers in Molecular Biosciences</i> , 2021, 8, 790433.	3.5	9
4	Profiles of PD-1, PD-L1, PD-L2 in Gastric Cancer and Their Relation with Mutation, Immune Infiltration, and Survival. <i>BioMed Research International</i> , 2020, 2020, 1-11.	1.9	11
5	Screening of Pathogenic Genes for Colorectal Cancer and Deep Learning in the Diagnosis of Colorectal Cancer. <i>IEEE Access</i> , 2020, 8, 114916-114929.	4.2	7
6	A Systematic Review and Meta-Analysis for the Association of Gene Polymorphisms in RAN with Cancer Risk. <i>Disease Markers</i> , 2020, 2020, 1-11.	1.3	4
7	Four novel polymorphisms in long non-coding RNA HOTTIP are associated with the risk and prognosis of colorectal cancer. <i>Bioscience Reports</i> , 2019, 39, .	2.4	14
8	Competitive Endogenous RNA (ceRNA) Regulation Network of lncRNAâ€“miRNAâ€“mRNA in Colorectal Carcinogenesis. <i>Digestive Diseases and Sciences</i> , 2019, 64, 1868-1877.	2.3	50
9	Epigenetic Alternations of MicroRNAs and DNA Methylation Contribute to Liver Metastasis of Colorectal Cancer. <i>Digestive Diseases and Sciences</i> , 2019, 64, 1523-1534.	2.3	31
10	<sc>DNA</sc> repair protein <sc>XPA</sc> is differentially expressed in colorectal cancer and predicts better prognosis. <i>Cancer Medicine</i> , 2018, 7, 2339-2349.	2.8	12
11	<sc>SNP</sc> interactions of <sc>PGC</sc> with its neighbor lnc<sc>RNA</sc>s enhance the susceptibility to gastric cancer/atrophic gastritis and influence the expression of involved molecules. <i>Cancer Medicine</i> , 2018, 7, 5252-5271.	2.8	10
12	The Differential Expression of Core Genes in Nucleotide Excision Repair Pathway Indicates Colorectal Carcinogenesis and Prognosis. <i>BioMed Research International</i> , 2018, 2018, 1-10.	1.9	11
13	Expression of DDB2 Protein in the Initiation, Progression, and Prognosis of Colorectal Cancer. <i>Digestive Diseases and Sciences</i> , 2018, 63, 2959-2968.	2.3	9
14	Long non-coding RNA polymorphisms in 6p21.1 are associated with atrophic gastritis risk and gastric cancer prognosis. <i>Oncotarget</i> , 2017, 8, 95303-95315.	1.8	9
15	Nucleotide excision repair related gene polymorphisms and genetic susceptibility, chemotherapeutic sensitivity and prognosis of gastric cancer. <i>Mutation Research - Fundamental and Molecular Mechanisms of Mutagenesis</i> , 2014, 765, 11-21.	1.0	28
