#	ARTICLE	IF	CITATIONS
1	Assessing the quality of evidence in studies estimating prevalence of exposure to occupational risk factors: The QoE-SPEO approach applied in the systematic reviews from the WHO/ILO Joint Estimates of the Work-related Burden of Disease and Injury. <i>Environment International</i> , 2022, 161, 107136.	10.0	6
2	Identifying environmental factors that influence immune response to SARS-CoV-2: Systematic evidence map protocol. <i>Environment International</i> , 2022, 164, 107230.	10.0	5
3	Authors' rebuttal to Integrated Risk Information System (IRIS) response to "Assessing risk of bias in human environmental epidemiology studies using three tools: different conclusions from different tools". <i>Systematic Reviews</i> , 2022, 11, 53.	5.3	2
4	Reviews in environmental health: How systematic are they?. <i>Environment International</i> , 2021, 152, 106473.	10.0	9
5	Evidence-to-decision frameworks: a review and analysis to inform decision-making for environmental health interventions. <i>Environmental Health</i> , 2021, 20, 124.	4.0	5
6	The effect of occupational exposure to welding fumes on trachea, bronchus and lung cancer: A protocol for a systematic review and meta-analysis from the WHO/ILO Joint Estimates of the Work-related Burden of Disease and Injury. <i>Environment International</i> , 2020, 145, 106089.	10.0	21
7	Assessing risk of bias in human environmental epidemiology studies using three tools: different conclusions from different tools. <i>Systematic Reviews</i> , 2020, 9, 249.	5.3	43
8	"It's Not Smooth Sailing": Bridging the Gap Between Methods and Content Expertise in Public Health Guideline Development. <i>International Journal of Health Policy and Management</i> , 2020, 9, 335-343.	0.9	2
9	Association of food industry ties with findings of studies examining the effect of dairy food intake on cardiovascular disease and mortality: systematic review and meta-analysis. <i>BMJ Open</i> , 2020, 10, e039036.	1.9	6
10	Association of industry ties with outcomes of studies examining the effect of wholegrain foods on cardiovascular disease and mortality: systematic review and meta-analysis. <i>BMJ Open</i> , 2019, 9, e022912.	1.9	11
11	The risk of bias in observational studies of exposures (ROBINS-E) tool: concerns arising from application to observational studies of exposures. <i>Systematic Reviews</i> , 2018, 7, 242.	5.3	146
12	Reporting bias in the literature on the associations of health-related behaviors and statins with cardiovascular disease and all-cause mortality. <i>PLoS Biology</i> , 2018, 16, e2005761.	5.6	7
13	Study sponsorship and the nutrition research agenda: analysis of randomized controlled trials included in systematic reviews of nutrition interventions to address obesity. <i>Public Health Nutrition</i> , 2017, 20, 1306-1313.	2.2	23
14	Study sponsorship and the nutrition research agenda: analysis of cohort studies examining the association between nutrition and obesity. <i>Public Health Nutrition</i> , 2017, 20, 3193-3199.	2.2	7
15	Association of Industry Sponsorship With Outcomes of Nutrition Studies. <i>JAMA Internal Medicine</i> , 2016, 176, 1769.	5.1	67
