#	ARTICLE	IF	CITATIONS
1	Acute coronary syndrome in patients with prior coronary artery bypass grafting. Literature review. Russian Journal of Cardiology, 2022, 27, 4659.	0.4	0
2	Machine learning for detection of aortic root landmarks. PrikladnaĀ Informatika, 2022, 17, 73-83.	0.2	0
3	The methodological approach to the assessment of the neurophysiological status in patients with transcatheter aortic valve implantation. Complex Issues of Cardiovascular Diseases, 2022, 11, 6-17.	0.3	0
4	Is there a place for a multidisciplinary "Heart Team" approach to the selection of myocardial revascularization method in patients with acute coronary syndromes?. Russian Journal of Cardiology, 2021, 26, 4210.	0.4	1
5	Outcome of extracorporeal membrane oxygenation support for high-risk percutaneous coronary intervention in non-ST-segment elevation acute coronary syndrome. Journal of Cardiovascular Medicine, 2021, 22, 423-424.	0.6	2
6	The analysis of in-hospital and long-term results of percutaneous coronary intervention supported by extracorporeal membrane oxygenation in patients with coronary artery disease. Complex Issues of Cardiovascular Diseases, 2021, 10, 96-105.	0.3	0
7	Randomized Clinical Trial of Surgical vs. Percutaneous vs. Hybrid Revascularization in Multivessel Coronary Artery Disease: Residual Myocardial Ischemia and Clinical Outcomes at One Year"Hybrid coronary REvascularization Versus Stenting or Surgery (HREVS). Journal of Interventional Cardiology, 2020, 2020, 1-11.	0.5	37
8	The randomized study of preventive revascularization of vulnerable coronary artery plaques in patients with stable coronary artery disease. Complex Issues of Cardiovascular Diseases, 2020, 8, 104-110.	0.3	1
9	Neurophysiological status of patients with non-valve atrial fibrillation. Complex Issues of Cardiovascular Diseases, 2020, 8, 22-31.	0.3	0
10	Transseptal transcatheter mitral valve replacement. Russian Journal of Cardiology, 2020, 25, 3842.	0.4	1
11	HOSPITAL OUTCOMES IN PATIENTS WITH NON-ST-SEGMENT ELEVATION ACUTE CORONARY SYNDROME ACCORDING TO CLINICAL PRACTICE. Complex Issues of Cardiovascular Diseases, 2019, 8, 23-29.	0.3	3
12	The results of percutaneous intervention in acute coronary syndrome depending on the type of mechanical hemodynamic support of blood circulation. Patologiya Krovoobrashcheniya I Kardiokhirurgiya, 2019, 23, S34-S43.	0.5	3
13	Cardiogenic shock: an update. Complex Issues of Cardiovascular Diseases, 2019, 8, 127-137.	0.3	3
14	Results of endovascular correction of atrial septal defect and early heart remodeling in children of preschool and school age. Russian Journal of Cardiology, 2018, , 27-33.	0.4	2
15	Regional aspects of associations of the CYP2C19 gene polymorphism with coronary atherosclerosis in acute coronary syndrome. Russian Journal of Cardiology, 2018, , 28-32.	0.4	1
16	CYP2C19 polymorphism frequency in Russian patients in Central Russia and Siberia with acute coronary syndrome. Pharmacogenomics and Personalized Medicine, 2017, Volume10, 107-114.	0.4	14
17	Outcome of extracorporeal membrane oxygenation support for complex high-risk elective percutaneous coronary interventions: A single-center experience. Heart and Lung: Journal of Acute and Critical Care, 2015, 44, 309-313.	0.8	51
18	High risk percutaneous coronary interventions-significance of left ventricular assist device for clinical practice. Journal of Thoracic Disease, 2015, 7, 1716-8.	0.6	1

#	ARTICLE	IF	CITATIONS
19	Successful antegrade revascularization by the innovation of composite core dual coil in a three-vessel total occlusive disease for cardiac arrest patient using extracorporeal membrane oxygenation. European Heart Journal, 2014, 35, 2009-2009.	1.0	23
20	Extracorporeal Membrane Oxygenation Support for Complex Percutaneous Coronary Interventions in Patients without Cardiogenic Shock. , 0, , .		2
21	Long-Term Outcome of High-Risk Percutaneous Coronary Interventions with Extracorporeal Membrane Oxygenation Support for Patients Without Cardiogenic Shock. , 0, , .		1
