#	ARTICLE	IF	CITATIONS
1	The early Aurignacian dispersal of modern humans into westernmost Eurasia. Proceedings of the National Academy of Sciences of the United States of America, 2020, 117, 25414-25422.	7.1	42
2	Technical note: The effect of midshaft location on the error ranges of femoral and tibial cross-sectional parameters. American Journal of Physical Anthropology, 2010, 141, 325-332.	2.1	36
3	SPIN enables high throughput species identification of archaeological bone by proteomics. Nature Communications, 2022, 13, 2458.	12.8	31
4	Right for the Wrong Reasons. Current Anthropology, 2014, 55, 696-724.	1.6	19
5	Late Pleistocene site formation and paleoclimate at Lapa do Picareiro, Portugal. Geoarchaeology - an International Journal, 2019, 34, 698-726.	1.5	19
6	Applicability and limitations of sex assessment based on foramen magnum. Forensic Science International, 2017, 271, 126.e1-126.e9.	2.2	16
7	Hominoid humeral morphology: 3D morphometric analysis. American Journal of Physical Anthropology, 2013, 152, 506-515.	2.1	12
8	Re-evaluation of Pleistocene and Holocene long bone robusticity trends with regards to age-at-death estimates and size standardization procedures. Journal of Human Evolution, 2016, 97, 109-122.	2.6	10
9	Femoral neck and shaft structure in Homo naledi from the Dinaledi Chamber (Rising Star System,) Tj ETQq1 1 0.784314 rgBT ₆ /Overl	2.6	6
10	Human adaptive responses to climate and environmental change during the Gravettian of Lapa do Picareiro (Portugal). Quaternary International, 2021, 587-588, 4-18.	1.5	6
11	Impact of 3D surface scanning protocols on the Os coxae digital data: Implications for sex and age-at-death assessment. Journal of Clinical Forensic and Legal Medicine, 2019, 68, 101866.	1.0	4
12	Neanderthal palaeoecology in the late Middle Palaeolithic of western Iberia: a stable isotope analysis of ungulate teeth from Lapa do Picareiro (Portugal). Journal of Quaternary Science, 0, , .	2.1	3
13	The early Aurignacian at Lapa do Picareiro really is that old: A comment on "The late persistence of the Middle Palaeolithic and Neandertals in Iberia: A review of the evidence for and against the "Ebro Frontier" model". Quaternary Science Reviews, 2021, 274, 107261.	3.0	1
