

V Wright

List of Publications by Citations

Source: <https://exaly.com/author-pdf/7043549/v-wright-publications-by-citations.pdf>

Version: 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

78
papers

1,514
citations

| # | Paper | IF | Citations |
|----|--|-----|-----------|
| 78 | Test-retest reliability of the 10-metre fast walk test and 6-minute walk test in ambulatory school-aged children with cerebral palsy. <i>Developmental Medicine and Child Neurology</i> , 2008 , 50, 370-6 | 3.3 | 166 |
| 77 | How do changes in body functions and structures, activity, and participation relate in children with cerebral palsy?. <i>Developmental Medicine and Child Neurology</i> , 2008 , 50, 283-9 | 3.3 | 99 |
| 76 | Distinction of quality of life, health related quality of life, and health status in children referred for rheumatologic care. <i>Journal of Rheumatology</i> , 2000 , 27, 226-33 | 4.1 | 80 |
| 75 | The Gross Motor Performance Measure: validity and responsiveness of a measure of quality of movement. <i>Physical Therapy</i> , 1995 , 75, 603-13 | 3.3 | 72 |
| 74 | Addressing the challenges of collaborative goal setting with children and their families. <i>Physical and Occupational Therapy in Pediatrics</i> , 2014 , 34, 138-52 | 2.1 | 62 |
| 73 | Children's and parents' beliefs regarding the value of walking: rehabilitation implications for children with cerebral palsy. <i>Child: Care, Health and Development</i> , 2012 , 38, 61-9 | 2.8 | 57 |
| 72 | Evaluation of the validity of the prosthetic upper extremity functional index for children. <i>Archives of Physical Medicine and Rehabilitation</i> , 2003 , 84, 518-27 | 2.8 | 49 |
| 71 | Measuring quality of movement in cerebral palsy: a review of instruments. <i>Physical Therapy</i> , 1991 , 71, 813-9 | 3.3 | 47 |
| 70 | Reliability of the Gross Motor Performance Measure. <i>Physical Therapy</i> , 1995 , 75, 597-602 | 3.3 | 46 |
| 69 | Pilot study of fitness training and exercise testing in polyarticular childhood arthritis. <i>Arthritis and Rheumatism</i> , 2006 , 55, 364-72 | | 44 |
| 68 | Measurement of Functional Outcome With Individuals Who Use Upper Extremity Prosthetic Devices: Current and Future Directions. <i>Journal of Prosthetics and Orthotics</i> , 2006 , 18, 46-56 | 0.7 | 40 |
| 67 | The Bobath (NDT) concept in adult neurological rehabilitation: what is the state of the knowledge? A scoping review. Part I: conceptual perspectives. <i>Disability and Rehabilitation</i> , 2015 , 37, 1793-807 | 2.4 | 38 |
| 66 | Validation of the Actiheart activity monitor for measurement of activity energy expenditure in children and adolescents with chronic disease. <i>European Journal of Clinical Nutrition</i> , 2010 , 64, 1494-500 | 5.2 | 36 |
| 65 | A Joint Hyperextensometer for the Quantification of Joint Laxity. <i>Engineering in Medicine</i> , 1979 , 8, 103-104 | | 34 |
| 64 | The Bobath (NDT) concept in adult neurological rehabilitation: what is the state of the knowledge? A scoping review. Part II: intervention studies perspectives. <i>Disability and Rehabilitation</i> , 2015 , 37, 1909-28 [†] | | 33 |
| 63 | The youth report version of the Child and Adolescent Scale of Participation (CASP): assessment of psychometric properties and comparison with parent report. <i>Child: Care, Health and Development</i> , 2013 , 39, 512-22 | 2.8 | 33 |
| 62 | The concept of a toolbox of outcome measures for children with cerebral palsy: why, what, and how to use?. <i>Journal of Child Neurology</i> , 2014 , 29, 1055-65 | 2.5 | 31 |

| | | | |
|----|---|-----|----|
| 61 | Development and preliminary evaluation of a structured family system intervention for adolescents with brain injury and their families. <i>Brain Injury</i> , 2010 , 24, 651-63 | 2.1 | 29 |
| 60 | Development and pilot testing of the challenge module: a proposed adjunct to the Gross Motor Function Measure for high-functioning children with cerebral palsy. <i>Physical and Occupational Therapy in Pediatrics</i> , 2011 , 31, 135-49 | 2.1 | 29 |
| 59 | An evaluation of the responsiveness of a comprehensive set of outcome measures for children and adolescents with traumatic brain injuries. <i>Developmental Neurorehabilitation</i> , 2006 , 9, 14-23 | | 29 |
| 58 | Exploring the comparative responsiveness of a core set of outcome measures in a school-based conductive education programme. <i>Child: Care, Health and Development</i> , 2005 , 31, 291-302 | 2.8 | 29 |
| 57 | Outcomes measurement of assistive technologies: an institutional case study. <i>Assistive Technology</i> , 1996 , 8, 110-20 | 1.5 | 26 |
| 56 | Reliability of the Community Balance and Mobility Scale (CB&M) in high-functioning school-aged children and adolescents who have an acquired brain injury. <i>Brain Injury</i> , 2010 , 24, 1585-94 | 2.1 | 25 |
| 55 | Should the Gross Motor Function Classification System be used for children who do not have cerebral palsy?. <i>Developmental Medicine and Child Neurology</i> , 2018 , 60, 147-154 | 3.3 | 24 |
| 54 | Quality of Life and Self-Determination: Youth with Chronic Health Conditions Make the Connection. <i>Applied Research in Quality of Life</i> , 2016 , 11, 571-599 | 2.3 | 22 |
| 53 | "You gotta try it all": Parents' Experiences with Robotic Gait Training for their Children with Cerebral Palsy. <i>Physical and Occupational Therapy in Pediatrics</i> , 2015 , 35, 327-41 | 2.1 | 21 |
| 52 | Clinical responsiveness of self-report functional assessment measures for children with juvenile idiopathic arthritis undergoing intraarticular corticosteroid injections. <i>Arthritis and Rheumatism</i> , 2005 , 53, 897-904 | | 21 |
| 51 | Evaluation of the effectiveness of robotic gait training and gait-focused physical therapy programs for children and youth with cerebral palsy: a mixed methods RCT. <i>BMC Neurology</i> , 2016 , 16, 86 | 3.1 | 20 |
| 50 | What is it like to walk with the help of a robot? Children's perspectives on robotic gait training technology. <i>Disability and Rehabilitation</i> , 2015 , 37, 2272-81 | 2.4 | 17 |
| 49 | Measuring advanced motor skills in children with cerebral palsy: further development of the Challenge module. <i>Pediatric Physical Therapy</i> , 2014 , 26, 201-13 | 0.9 | 17 |
| 48 | A Scoping Review of Inclusive Out-of-School Time Physical Activity Programs for Children and Youth With Physical Disabilities. <i>Adapted Physical Activity Quarterly</i> , 2018 , 35, 111-138 | 1.7 | 16 |
| 47 | The Quality Function Measure: reliability and discriminant validity of a new measure of quality of gross motor movement in ambulatory children with cerebral palsy. <i>Developmental Medicine and Child Neurology</i> , 2014 , 56, 770-8 | 3.3 | 15 |
| 46 | The significance of uprightiness: parents' reflections on children's responses to a hands-free walker for children. <i>Disability and Society</i> , 2013 , 28, 380-392 | 1.8 | 14 |
| 45 | Biomechanical Aspects of the Elbow: Joint Forces Related to Prosthesis Design. <i>Engineering in Medicine</i> , 1981 , 10, 65-68 | | 13 |
| 44 | Comparison of a robotic-assisted gait training program with a program of functional gait training for children with cerebral palsy: design and methods of a two group randomized controlled cross-over trial. <i>SpringerPlus</i> , 2016 , 5, 1886 | | 12 |

| | | | |
|----|---|-----|----|
| 43 | Closed neural tube defects: neurologic, orthopedic, and gait outcomes. <i>Pediatric Physical Therapy</i> , 2007 , 19, 288-95 | 0.9 | 12 |
| 42 | A Pilot Evaluation of the Test-Retest Score Reliability of the Dimensions of Mastery Questionnaire in Preschool-Aged Children. <i>Infants and Young Children</i> , 2011 , 24, 280-291 | 1 | 11 |
| 41 | Long-term clinical evaluation of the automatic stance-phase lock-controlled prosthetic knee joint in young adults with unilateral above-knee amputation. <i>Disability and Rehabilitation: Assistive Technology</i> , 2017 , 12, 378-384 | 1.8 | 10 |
| 40 | Reliability of the Motor Learning Strategies Rating Instrument in physiotherapy intervention for children with cerebral palsy. <i>Developmental Medicine and Child Neurology</i> , 2019 , 61, 1061-1066 | 3.3 | 9 |
| 39 | Igniting Fitness Possibilities: a case study of an inclusive community-based physical literacy program for children and youth. <i>Leisure/Loisir</i> , 2018 , 42, 69-92 | 0.5 | 8 |
| 38 | Evaluation of the longer-term use of the David Hart Walker Orthosis by children with cerebral palsy: a 3-year prospective evaluation. <i>Disability and Rehabilitation: Assistive Technology</i> , 2006 , 1, 155-66 | 1.8 | 8 |
| 37 | Rheumatology education in the late 20th century. <i>Rheumatology</i> , 1989 , 28, 95-7 | 3.9 | 8 |
| 36 | Development of the family needs questionnaire - pediatric version [FNQ-P] - phase I. <i>Brain Injury</i> , 2019 , 33, 623-632 | 2.1 | 7 |
| 35 | Optimization of fMRI methods to determine laterality of cortical activation during ankle movements of children with unilateral cerebral palsy. <i>International Journal of Developmental Neuroscience</i> , 2018 , 66, 54-62 | 2.7 | 7 |
| 34 | Evaluation of the Reliability of the Challenge when used to Measure Advanced Motor Skills of Children with Cerebral Palsy. <i>Physical and Occupational Therapy in Pediatrics</i> , 2018 , 38, 382-394 | 2.1 | 7 |
| 33 | A qualitative study of fitness instructors' experiences leading an exercise program for children with juvenile idiopathic arthritis. <i>Physical and Occupational Therapy in Pediatrics</i> , 2009 , 29, 409-25 | 2.1 | 7 |
| 32 | What needs to happen before an International Classification of Function, Disability and Health Core Set is ready for clinical use?. <i>Developmental Medicine and Child Neurology</i> , 2015 , 57, 112-3 | 3.3 | 6 |
| 31 | Mothers' experiences with the Pediatric Evaluation of Disability Inventory (PEDI). <i>Physical and Occupational Therapy in Pediatrics</i> , 2014 , 34, 271-88 | 2.1 | 6 |
| 30 | Exploring Physiotherapists' Use of Motor Learning Strategies in Gait-Based Interventions for Children with Cerebral Palsy. <i>Physical and Occupational Therapy in Pediatrics</i> , 2020 , 40, 79-92 | 2.1 | 6 |
| 29 | Three-year trajectories of global perceived quality of life for youth with chronic health conditions. <i>Quality of Life Research</i> , 2016 , 25, 3157-3171 | 3.7 | 5 |
| 28 | A Finger Arthrograph for the Quantification of Joint Stiffness. <i>Engineering in Medicine</i> , 1981 , 10, 85-88 | | 5 |
| 27 | The cafftalk: a discussion of the process of developing a creative non-fiction. <i>Qualitative Research in Sport, Exercise and Health</i> , 2020 , 1-17 | 7 | 4 |
| 26 | Development of Child and Family-Centered Engagement Guidelines for Clinical Administration of the Challenge to Measure Advanced Gross Motor Skills: A Qualitative Study. <i>Physical and Occupational Therapy in Pediatrics</i> , 2018 , 38, 417-426 | 2.1 | 4 |

| | | | |
|----|---|-----|---|
| 25 | Children and youth with impairments in social skills and cognition in out-of-school time inclusive physical activity programs: a scoping review. <i>International Journal of Developmental Disabilities</i> , 2019 , 67, 79-93 | 1.5 | 4 |
| 24 | Construct validity of the family impact of assistive technology scale for augmentative and alternative communication. <i>AAC: Augmentative and Alternative Communication</i> , 2018 , 34, 335-347 | 3.5 | 4 |
| 23 | Documenting change with the Canadian Occupational Performance Measure for children with cerebral palsy. <i>Developmental Medicine and Child Neurology</i> , 2020 , 62, 1154-1160 | 3.3 | 3 |
| 22 | Reliability and validity of the acquired brain injury challenge assessment (ABI-CA) in children. <i>Brain Injury</i> , 2014 , 28, 1734-43 | 2.1 | 3 |
| 21 | Social anxiety symptoms among youth with chronic health conditions: trajectories and related factors. <i>Disability and Rehabilitation</i> , 2020 , 42, 3293-3305 | 2.4 | 3 |
| 20 | Opening the Door to Physical Activity for Children With Cerebral Palsy: Experiences of Participants in the BeFAST or BeSTRONG Program. <i>Adapted Physical Activity Quarterly</i> , 2019 , 36, 202-222 | 1.7 | 2 |
| 19 | Comparison of sports skills movement training to lower limb strength training for independently ambulatory children with cerebral palsy: a randomised feasibility trial. <i>Disability and Rehabilitation</i> , 2020 , 1-9 | 2.4 | 2 |
| 18 | Biomechanical responses of young adults with unilateral transfemoral amputation using two types of mechanical stance control prosthetic knee joints. <i>Prosthetics and Orthotics International</i> , 2020 , 44, 314-322 | 1.5 | 2 |
| 17 | Further development of the response scales of the Acquired Brain Injury Challenge Assessment (ABI-CA). <i>Brain Injury</i> , 2013 , 27, 1271-80 | 2.1 | 2 |
| 16 | Measurement Properties and Translation to Brazilian-Portuguese of the Challenge for Children and Adolescents with Cerebral Palsy. <i>Physical and Occupational Therapy in Pediatrics</i> , 2021 , 41, 372-389 | 2.1 | 2 |
| 15 | Reliability of the Revised Motor Learning Strategies Rating Instrument and Its Role in Describing the Motor Learning Strategy Content of Physiotherapy Sessions in Paediatric Acquired Brain Injury. <i>Physiotherapy Canada</i> <i>Physiotherapie Canada</i> , 2021 , 73, 381-390 | 0.8 | 2 |
| 14 | A measure of parent engagement: plan appropriateness, partnering, and positive outcome expectancy in pediatric rehabilitation sessions. <i>Disability and Rehabilitation</i> , 2021 , 1-10 | 2.4 | 2 |
| 13 | Psoriatic Arthritis DIP or not DIP? That is the Question <i>Rheumatology</i> , 1992 , 31, 431-431 | 3.9 | 1 |
| 12 | What is the best treatment approach for a patient with the mutilating pattern of psoriatic peripheral arthritis?. <i>Rheumatology</i> , 1989 , 28, 382 | 3.9 | 1 |
| 11 | Balance confidence and physical activity participation of independently ambulatory youth with cerebral palsy: an exploration of youths' and parents' perspectives. <i>Disability and Rehabilitation</i> , 2020 , 1-12 | 2.4 | 1 |
| 10 | Application of the behaviour change technique taxonomy (BCTTv1) to an inclusive physical literacy-based sport program for children and youth. <i>International Journal of Sports Science and Coaching</i> , 174795412110165 | 1.8 | 1 |
| 9 | Use of Motor Learning Strategies in Occupational Therapy for Children and Youth with Acquired Brain Injury. <i>Physical and Occupational Therapy in Pediatrics</i> , 2022 , 42, 30-45 | 2.1 | 1 |
| 8 | Reliability and minimal detectable change of the , an advanced motor skills test for children with cerebral palsy, Danish version. <i>Disability and Rehabilitation</i> , 2021 , 1-8 | 2.4 | 1 |

| | | |
|---|---|-----|
| 7 | First stage international validation of the pediatric family needs questionnaire (FNQ-P). <i>Brain Injury</i> , 2020 , 34, 1074-1083 | 2.1 |
| 6 | Measurement of Health Outcomes in Pediatric Neurologic Disorders 2017 , 1289-1294 | |
| 5 | Commentary on "Comparative Effectiveness Research and Children With Cerebral Palsy: Identifying a Conceptual Framework and Specifying Measures". <i>Pediatric Physical Therapy</i> , 2016 , 28, 70 | 0.9 |
| 4 | Clinician's Commentary. <i>Physiotherapy Canada Physiotherapie Canada</i> , 2011 , 63, 209-11 | 0.8 |
| 3 | 'It's more than just a running leg': a qualitative study of running-specific prosthesis use by children and youth with lower limb absence. <i>Disability and Rehabilitation</i> , 2021 , 1-9 | 2.4 |
| 2 | The switch access measure: development and evaluation of the reliability and clinical utility of a switching assessment for children with severe and multiple disabilities. <i>Disability and Rehabilitation: Assistive Technology</i> , 2021 , 1-12 | 1.8 |
| 1 | Development of the gait outcomes assessment list for lower-limb differences (GOAL-LD) questionnaire: a child and parent reported outcome measure. <i>Health and Quality of Life Outcomes</i> , 2021 , 19, 139 | 3 |
