

Mark Gieles

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/7044812/mark-gieles-publications-by-year.pdf>

Version: 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
134	The star cluster age function in the Galactic disc with Gaia DR2. <i>Astronomy and Astrophysics</i> , 2021 , 645, L2	5.1	10
133	Weighing stars from birth to death: mass determination methods across the HRD. <i>Astronomy and Astrophysics Review</i> , 2021 , 29, 1	28.8	12
132	A supra-massive population of stellar-mass black holes in the globular cluster Palomar 5. <i>Nature Astronomy</i> , 2021 , 5, 957-966	12.1	8
131	The dynamics of the globular cluster NGC 3201 out to the Jacobi radius. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021 , 502, 4513-4525	4.3	10
130	MUSE narrow field mode observations of the central kinematics of M15. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021 , 503, 1680-1687	4.3	4
129	Massive stars in extremely metal-poor galaxies: a window into the past. <i>Experimental Astronomy</i> , 2021 , 51, 887	1.3	0
128	Merger rate of black hole binaries from globular clusters: Theoretical error bars and comparison to gravitational wave data from GWTC-2. <i>Physical Review D</i> , 2020 , 102,	4.9	24
127	The Physics of Star Cluster Formation and Evolution. <i>Space Science Reviews</i> , 2020 , 216, 1	7.5	24
126	Time-domain Study of the Young Massive Cluster Westerlund 2 with the Hubble Space Telescope. I. <i>Astrophysical Journal</i> , 2020 , 891, 182	4.7	4
125	Star Clusters Near and Far. <i>Space Science Reviews</i> , 2020 , 216, 1	7.5	33
124	On the black hole content and initial mass function of 47 Tuc. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020 , 491, 113-128	4.3	17
123	Population synthesis of black hole binary mergers from star clusters. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020 , 492, 2936-2954	4.3	34
122	A closer look at the spur, blob, wiggle, and gaps in GD-1. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020 , 494, 5315-5332	4.3	19
121	Globular clusters as probes of dark matter cusp-core transformations. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019 , 488, 2977-2988	4.3	6
120	Spherical models of star clusters with potential escapers. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019 , 487, 147-160	4.3	13
119	Mass modelling globular clusters in theGaiaera: a method comparison using mock data from anN-body simulation of M 4. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019 , 483, 1400-1425	4.3	18
118	Black hole growth through hierarchical black hole mergers in dense star clusters: implications for gravitational wave detections. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019 , 486, 5008-5021	4.3	88

117	The effect of stellar-mass black holes on the central kinematics of ICen: a cautionary tale for IMBH interpretations. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019 , 482, 4713-4725	4.3	41
116	Globular cluster number density profiles using Gaia DR2. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019 , 485, 4906-4935	4.3	38
115	Modelling the Effects of Dark Matter Substructure on Globular Cluster Evolution with the Tidal Approximation. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019 ,	4.3	3
114	Supermassive stars as the origin of the multiple populations in globular clusters. <i>Proceedings of the International Astronomical Union</i> , 2019 , 14, 297-301	0.1	2
113	The VLT-FLAMES Tarantula Survey. <i>Astronomy and Astrophysics</i> , 2019 , 624, A129	5.1	12
112	Linking the rotation of a cluster to the spins of its stars: the kinematics of NGC 6791 and NGC 6819 in 3D. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019 , 483, 2197-2206	4.3	11
111	The devil is in the tails: the role of globular cluster mass evolution on stream properties. <i>Monthly Notices of the Royal Astronomical Society</i> , 2018 , 474, 2479-2492	4.3	49
110	New insights into the origin and evolution of the old, metal-rich open cluster NGC 6791. <i>Monthly Notices of the Royal Astronomical Society</i> , 2018 , 474, 32-44	4.3	15
109	Probing dark matter with star clusters: a dark matter core in the ultra-faint dwarf Eridanus II. <i>Monthly Notices of the Royal Astronomical Society</i> , 2018 , 476, 3124-3136	4.3	31
108	Mass models of NGC 6624 without an intermediate-mass black hole. <i>Monthly Notices of the Royal Astronomical Society</i> , 2018 , 473, 4832-4839	4.3	28
107	An excess of massive stars in the local 30 Doradus starburst. <i>Science</i> , 2018 , 359, 69-71	33.3	122
106	Response to Comment on "An excess of massive stars in the local 30 Doradus starburst". <i>Science</i> , 2018 , 361,	33.3	4
105	Concurrent formation of supermassive stars and globular clusters: implications for early self-enrichment. <i>Monthly Notices of the Royal Astronomical Society</i> , 2018 , 478, 2461-2479	4.3	94
104	From Giant H ii regions and H ii galaxies to globular clusters and compact dwarf ellipticals. <i>Monthly Notices of the Royal Astronomical Society</i> , 2018 , 481, 268-276	4.3	3
103	The VLT-FLAMES Tarantula Survey. <i>Astronomy and Astrophysics</i> , 2018 , 618, A73	5.1	39
102	Extending the globular cluster system halo mass relation to the lowest galaxy masses. <i>Monthly Notices of the Royal Astronomical Society</i> , 2018 , 481, 5592-5605	4.3	59
101	A clustered origin for isolated massive stars. <i>Monthly Notices of the Royal Astronomical Society</i> , 2018 , 474, 3582-3592	4.3	5
100	Globular cluster formation and evolution in the context of cosmological galaxy assembly: open questions. <i>Proceedings of the Royal Society A: Mathematical, Physical and Engineering Sciences</i> , 2018 , 474, 20170616	2.4	78

99	The Tarantula Massive Binary Monitoring. <i>Astronomy and Astrophysics</i> , 2017 , 598, A84	5.1	68
98	The contribution of dissolving star clusters to the population of ultra faint objects in the outer halo of the Milky Way. <i>Monthly Notices of the Royal Astronomical Society</i> , 2017 , 466, 1741-1756	4.3	12
97	The origin of the Milky Way globular clusters. <i>Monthly Notices of the Royal Astronomical Society</i> , 2017 , 465, 3622-3636	4.3	71
96	The properties of energetically unbound stars in stellar clusters. <i>Monthly Notices of the Royal Astronomical Society</i> , 2017 , 466, 3937-3950	4.3	32
95	Testing lowered isothermal models with direct N-body simulations of globular clusters III. Multimass models. <i>Monthly Notices of the Royal Astronomical Society</i> , 2017 , 470, 2736-2761	4.3	11
94	Radial anisotropy in Ω Cen limiting the room for an intermediate-mass black hole. <i>Monthly Notices of the Royal Astronomical Society</i> , 2017 , 468, 4429-4440	4.3	38
93	AHUBBLE SPACE TELESCOPE STUDY OF THE ENIGMATIC MILKY WAY HALO GLOBULAR CLUSTER CRATER. <i>Astrophysical Journal</i> , 2016 , 822, 32	4.7	27
92	A stellar-mass black hole population in the globular cluster NGC 6101?. <i>Monthly Notices of the Royal Astronomical Society</i> , 2016 , 462, 2333-2342	4.3	53
91	Testing lowered isothermal models with direct N-body simulations of globular clusters. <i>Monthly Notices of the Royal Astronomical Society</i> , 2016 , 462, 696-714	4.3	26
90	No evidence for younger stellar generations within the intermediate-age massive clusters NGC 1783, NGC 1806 and NGC 411. <i>Monthly Notices of the Royal Astronomical Society</i> , 2016 , 459, 4218-4223	4.3	15
89	Properties of the cluster population of NGC 1566 and their implications. <i>Monthly Notices of the Royal Astronomical Society</i> , 2016 , 460, 2087-2102	4.3	13
88	Evolution of star clusters on eccentric orbits. <i>Monthly Notices of the Royal Astronomical Society</i> , 2016 , 455, 596-602	4.3	19
87	If it does not kill them, it makes them stronger: collisional evolution of star clusters with tidal shocks. <i>Monthly Notices of the Royal Astronomical Society: Letters</i> , 2016 , 463, L103-L107	4.3	40
86	A flexible method to evolve collisional systems and their tidal debris in external potentials. <i>Monthly Notices of the Royal Astronomical Society</i> , 2015 , 448, 3416-3422	4.3	20
85	Biases in the inferred mass-to-light ratio of globular clusters: no need for variations in the stellar mass function. <i>Monthly Notices of the Royal Astronomical Society: Letters</i> , 2015 , 448, L94-L98	4.3	36
84	Multiple populations in globular clusters: the distinct kinematic imprints of different formation scenarios. <i>Monthly Notices of the Royal Astronomical Society</i> , 2015 , 450, 1164-1198	4.3	50
83	A family of lowered isothermal models. <i>Monthly Notices of the Royal Astronomical Society</i> , 2015 , 454, 576-592	4.3	68
82	The inefficiency of satellite accretion in forming extended star clusters. <i>Monthly Notices of the Royal Astronomical Society: Letters</i> , 2015 , 447, L40-L44	4.3	22

81	Inverting the dynamical evolution of globular clusters: clues to their origin. <i>Proceedings of the International Astronomical Union</i> , 2015 , 12, 214-221	0.1	
80	The effect of secular galactic growth on the evolution of star clusters. <i>Monthly Notices of the Royal Astronomical Society</i> , 2015 , 449, 2734-2740	4.3	13
79	The initial conditions of observed star clusters II. Method description and validation. <i>Monthly Notices of the Royal Astronomical Society</i> , 2015 , 453, 605-637	4.3	8
78	Biases in the determination of dynamical parameters of star clusters: today and in the Gaia era. <i>Monthly Notices of the Royal Astronomical Society</i> , 2015 , 451, 2185-2197	4.3	31
77	On the uniqueness of kinematical signatures of intermediate-mass black holes in globular clusters. <i>Proceedings of the International Astronomical Union</i> , 2014 , 10, 197-200	0.1	
76	A prescription and fast code for the long-term evolution of star clusters III. Unbalanced and core evolution. <i>Monthly Notices of the Royal Astronomical Society</i> , 2014 , 437, 916-929	4.3	16
75	The effect of spatial resolution on optical and near-IR studies of stellar clusters: implications for the origin of the red excess. <i>Monthly Notices of the Royal Astronomical Society</i> , 2014 , 444, 3829-3836	4.3	10
74	A prescription and fast code for the long-term evolution of star clusters III. Unequal masses and stellar evolution. <i>Monthly Notices of the Royal Astronomical Society</i> , 2014 , 442, 1265-1285	4.3	29
73	Precession of the Sagittarius stream. <i>Monthly Notices of the Royal Astronomical Society</i> , 2014 , 437, 116-121	4.3	140
72	Constraining the initial conditions of globular clusters using their radius distribution. <i>Monthly Notices of the Royal Astronomical Society: Letters</i> , 2013 , 432, L1-L5	4.3	17
71	Search for associations containing young stars: chemical tagging IC 2391 and the Argus association. <i>Monthly Notices of the Royal Astronomical Society</i> , 2013 , 431, 1005-1018	4.3	57
70	Early disc accretion as the origin of abundance anomalies in globular clusters. <i>Monthly Notices of the Royal Astronomical Society</i> , 2013 , 436, 2398-2411	4.3	205
69	The role of galaxy mergers on the evolution of star clusters. <i>Monthly Notices of the Royal Astronomical Society: Letters</i> , 2013 , 431, L83-L87	4.3	34
68	The evolution of the global stellar mass function of star clusters: an analytic description. <i>Monthly Notices of the Royal Astronomical Society</i> , 2013 , 433, 1378-1388	4.3	22
67	The VLT-FLAMES Tarantula Survey. <i>Astronomy and Astrophysics</i> , 2013 , 550, A107	5.1	293
66	A prescription and fast code for the long-term evolution of star clusters. <i>Monthly Notices of the Royal Astronomical Society</i> , 2012 , 422, 3415-3432	4.3	43
65	Do all stars in the solar neighbourhood form in clusters? A cautionary note on the use of the distribution of surface densities. <i>Monthly Notices of the Royal Astronomical Society: Letters</i> , 2012 , 426, L11-L15	4.3	40
64	Binary interaction dominates the evolution of massive stars. <i>Science</i> , 2012 , 337, 444-6	33.3	1058

63	A DOUBLE CLUSTER AT THE CORE OF 30 DORADUS. <i>Astrophysical Journal Letters</i> , 2012 , 754, L37	7.9	62
62	Spectroscopic constraints on the form of the stellar cluster mass function. <i>Astronomy and Astrophysics</i> , 2012 , 541, A25	5.1	13
61	Outer density profiles of 19 Galactic globular clusters from deep and wide-field imaging. <i>Monthly Notices of the Royal Astronomical Society</i> , 2012 , 419, 14-28	4.3	59
60	Stellar clusters in M83: formation, evolution, disruption and the influence of the environment. <i>Monthly Notices of the Royal Astronomical Society</i> , 2012 , 419, 2606-2622	4.3	114
59	The VLT-FLAMES Tarantula Survey. <i>Astronomy and Astrophysics</i> , 2012 , 542, A49	5.1	52
58	The VLT-FLAMES Tarantula Survey. <i>Astronomy and Astrophysics</i> , 2012 , 546, A73	5.1	48
57	THE SAGITTARIUS STREAMS IN THE SOUTHERN GALACTIC HEMISPHERE. <i>Astrophysical Journal</i> , 2012 , 750, 80	4.7	117
56	The VLT-FLAMES Tarantula Survey. <i>Astronomy and Astrophysics</i> , 2012 , 545, L1	5.1	44
55	Dynamical Expansion of Star Clusters. <i>Thirty Years of Astronomical Discovery With UKIRT</i> , 2012 , 241-243	0.3	
54	The VLT-FLAMES Tarantula Survey. <i>Astronomy and Astrophysics</i> , 2011 , 530, A108	5.1	180
53	GLIMPSE-CO1: the most massive intermediate-age stellar cluster in the Galaxy. <i>Monthly Notices of the Royal Astronomical Society</i> , 2011 , 411, 1386-1394	4.3	43
52	The evolution of stellar structures in dwarf galaxies. <i>Monthly Notices of the Royal Astronomical Society</i> , 2011 , 412, 1539-1551	4.3	31
51	The life cycle of star clusters in a tidal field. <i>Monthly Notices of the Royal Astronomical Society</i> , 2011 , 413, 2509-2524	4.3	130
50	Evolution of star clusters in arbitrary tidal fields. <i>Monthly Notices of the Royal Astronomical Society</i> , 2011 , 418, 759-769	4.3	78
49	The distinction between star clusters and associations. <i>Monthly Notices of the Royal Astronomical Society: Letters</i> , 2011 , 410, L6-L7	4.3	99
48	Evidence for environmentally dependent cluster disruption in M83. <i>Monthly Notices of the Royal Astronomical Society: Letters</i> , 2011 , 417, L6-L10	4.3	42
47	On the mass-radius relation of hot stellar systems. <i>Monthly Notices of the Royal Astronomical Society: Letters</i> , 2010 , 408, L16-L20	4.3	75
46	The tidal tails of the ultrafaint globular cluster Palomar 1. <i>Monthly Notices of the Royal Astronomical Society: Letters</i> , 2010 , 408, L66-L70	4.3	33

45	Mass-loss rates and the mass evolution of star clusters. <i>Monthly Notices of the Royal Astronomical Society</i> , 2010 , 409, 305-328	4.3	82
44	Evidence for two populations of Galactic globular clusters from the ratio of their half-mass to Jacobi radii. <i>Monthly Notices of the Royal Astronomical Society</i> , 2010 , 401, 1832-1838	4.3	70
43	On the velocity dispersion of young star clusters: super-virial or binaries?. <i>Monthly Notices of the Royal Astronomical Society</i> , 2010 , 402, 1750-1757	4.3	51
42	VLT-MAD observations of the core of 30 Doradus. <i>Monthly Notices of the Royal Astronomical Society</i> , 2010 ,	4.3	9
41	Young Massive Star Clusters. <i>Annual Review of Astronomy and Astrophysics</i> , 2010 , 48, 431-493	31.7	711
40	The VLT-FLAMES Tarantula survey. <i>Proceedings of the International Astronomical Union</i> , 2010 , 6, 296-297	0.1	
39	A MAD view of Trumpler 14. <i>Astronomy and Astrophysics</i> , 2010 , 515, A26	5.1	47
38	Hierarchical star formation in M33: properties of the star-forming regions. <i>Astrophysics and Space Science</i> , 2009 , 324, 293-297	1.6	3
37	What determines the mass of the most massive star cluster in a galaxy: statistics, physics or disruption?. <i>Astrophysics and Space Science</i> , 2009 , 324, 299-304	1.6	5
36	The spatial evolution of stellar structures in the Large Magellanic Cloud. <i>Monthly Notices of the Royal Astronomical Society</i> , 2009 , 392, 868-878	4.3	90
35	The early evolution of the star cluster mass function. <i>Monthly Notices of the Royal Astronomical Society</i> , 2009 , 394, 2113-2126	4.3	80
34	Star cluster disruption. <i>Proceedings of the International Astronomical Union</i> , 2009 , 5, 69-80	0.1	
33	Constraining star cluster disruption mechanisms. <i>Proceedings of the International Astronomical Union</i> , 2009 , 5, 433-437	0.1	
32	The VLT-FLAMES Tarantula Survey. <i>Proceedings of the International Astronomical Union</i> , 2009 , 5, 35-40	0.1	1
31	The Maximum Mass of Star Clusters. <i>Globular Clusters - Guides To Galaxies</i> , 2009 , 63-67		
30	The Radii of Thousands of Star Clusters in M51 with HST/ACS. <i>Globular Clusters - Guides To Galaxies</i> , 2009 , 103-106		1
29	The Effect of Giant Molecular Clouds on Star Clusters. <i>Globular Clusters - Guides To Galaxies</i> , 2009 , 375-376		1
28	The early expansion of cluster cores. <i>Monthly Notices of the Royal Astronomical Society</i> , 2008 , 389, 223-230	10.5	68

27	Mass segregation in young star clusters - can it be detected from the integrated photometric properties?. <i>Monthly Notices of the Royal Astronomical Society</i> , 2008 , 391, 190-196	4.3	13
26	The spatial evolution of stellar structures in the LMC/SMC. <i>Proceedings of the International Astronomical Union</i> , 2008 , 4, 45-50	0.1	
25	An alternative method to study star cluster disruption. <i>Astronomy and Astrophysics</i> , 2008 , 482, 165-171	5.1	61
24	ACS imaging of star clusters in M 51. <i>Astronomy and Astrophysics</i> , 2008 , 487, 937-949	5.1	22
23	Lifetimes of tidally limited star clusters with different radii. <i>Monthly Notices of the Royal Astronomical Society: Letters</i> , 2008 , 389, L28-L32	4.3	105
22	Evolution of stellar structure in the Small Magellanic Cloud. <i>Monthly Notices of the Royal Astronomical Society: Letters</i> , 2008 , 391, L93-L97	4.3	42
21	ACS imaging of star clusters in M 51. <i>Astronomy and Astrophysics</i> , 2007 , 469, 925-940	5.1	84
20	The effect of spiral arm passages on the evolution of stellar clusters. <i>Monthly Notices of the Royal Astronomical Society</i> , 2007 , 376, 809-819	4.3	69
19	Hierarchical star formation in M33: fundamental properties of the star-forming regions. <i>Monthly Notices of the Royal Astronomical Society</i> , 2007 , 379, 1302-1312	4.3	81
18	The Young Cluster Population of M82 Region B. <i>Astrophysical Journal</i> , 2007 , 667, L145-L149	4.7	31
17	On the Interpretation of the Age Distribution of Star Clusters in the Small Magellanic Cloud. <i>Astrophysical Journal</i> , 2007 , 668, 268-274	4.7	65
16	Star Cluster Life-times: Dependence on Mass, Radius and Environment. <i>Proceedings of the International Astronomical Union</i> , 2007 , 3, 171-175	0.1	2
15	Integrated Properties of Mass Segregated Star Clusters. <i>Proceedings of the International Astronomical Union</i> , 2007 , 3, 193-194	0.1	
14	Observational evidence for a truncation of the star cluster initial mass function at the high mass end. <i>Astronomy and Astrophysics</i> , 2006 , 446, L9-L12	5.1	72
13	Star cluster disruption by giant molecular clouds. <i>Monthly Notices of the Royal Astronomical Society</i> , 2006 , 371, 793-804	4.3	190
12	The luminosity function of young star clusters: implications for the maximum mass and luminosity of clusters. <i>Astronomy and Astrophysics</i> , 2006 , 450, 129-145	5.1	106
11	Accurate photometry of extended spherically symmetric sources. <i>Astronomy and Astrophysics</i> , 2006 , 451, 375-375	5.1	13
10	Clusters in the solar neighbourhood: how are they destroyed?. <i>Astronomy and Astrophysics</i> , 2006 , 455, L17-L20	5.1	93

9	The star cluster population of M 51. <i>Astronomy and Astrophysics</i> , 2005 , 431, 905-924	5.1	160
8	An analytical description of the disruption of star clusters in tidal fields with an application to Galactic open clusters. <i>Astronomy and Astrophysics</i> , 2005 , 441, 117-129	5.1	214
7	The star cluster population of M 51. <i>Astronomy and Astrophysics</i> , 2005 , 441, 949-960	5.1	73
6	Hierarchical star formation in M 51: star/cluster complexes. <i>Astronomy and Astrophysics</i> , 2005 , 443, 79-90	5.1	109
5	Disruption time scales of star clusters in different galaxies. <i>Astronomy and Astrophysics</i> , 2005 , 429, 173-179	5.1	118
4	New type of brightness variations of the colliding wind WO4 + O5((f)) binary WR 30a. <i>Astronomy and Astrophysics</i> , 2003 , 404, L29-L32	5.1	1
3	Monte Carlo simulations of pinhole imaging accelerated by kernel-based forced detection. <i>Physics in Medicine and Biology</i> , 2002 , 47, 1853-67	3.8	38
2	A black hole detected in the young massive LMC cluster NGC 1850. <i>Monthly Notices of the Royal Astronomical Society</i> ,	4.3	6
1	HAYDN. <i>Experimental Astronomy</i> , 1	1.3	3
