#	Article	IF	CITATIONS
1	Hypertension and chronic ethanol consumption: What do we know after a century of study?. World Journal of Cardiology, 2014, 6, 283.	0.5	72
2	Functional characterization and expression of endothelin receptors in rat carotid artery: involvement of nitric oxide, a vasodilator prostanoid and the opening of K+ channels in ETB -induced relaxation. British Journal of Pharmacology, 2005, 146, 903-912.	2.7	67
3	Hypotensive action of naturally occurring diterpenes: A therapeutic promise for the treatment of hypertension. Fìtoterapìâ, 2010, 81, 690-702.	1.1	60
4	Analysis of the mechanisms underlying the vasorelaxant action of kaurenoic acid in the isolated rat aorta. European Journal of Pharmacology, 2004, 492, 233-241.	1.7	59
5	Antispasmodic and relaxant effects of the hidroalcoholic extract of Pimpinella anisum (Apiaceae) on rat anococcygeus smooth muscle. Journal of Ethnopharmacology, 2007, 110, 23-29.	2.0	58
6	Cannabidiol prevents haloperidol-induced vacuos chewing movements and inflammatory changes in mice via PPARÎ ³ receptors. Brain, Behavior, and Immunity, 2018, 74, 241-251.	2.0	58
7	Acute ethanol intake induces superoxide anion generation and mitogen-activated protein kinase phosphorylation in rat aorta: A role for angiotensin type 1 receptor. Toxicology and Applied Pharmacology, 2012, 264, 470-478.	1.3	55
8	Quercetin decreases the activity of matrix metalloproteinase-2 and ameliorates vascular remodeling in renovascular hypertension. Atherosclerosis, 2018, 270, 146-153.	0.4	49
9	Doxycycline Doseâ€dependently Inhibits MMPâ€2â€Mediated Vascular Changes in 2K1C Hypertension. Basic and Clinical Pharmacology and Toxicology, 2011, 108, 318-325.	1.2	48
10	Angiotensin type 1 receptor mediates chronic ethanol consumption-induced hypertension and vascular oxidative stress. Vascular Pharmacology, 2015, 74, 49-59.	1.0	48
11	Kaurane and pimarane-type diterpenes from the Viguiera species inhibit vascular smooth muscle contractility. Life Sciences, 2006, 79, 925-933.	2.0	47
12	Effects of melatonin on thymic and oxidative stress dysfunctions during <i>Trypanosoma cruzi</i> infection. Journal of Pineal Research, 2018, 65, e12510.	3.4	46
13	Ethanol-induced vasoconstriction is mediated via redox-sensitive cyclo-oxygenase-dependent mechanisms. Clinical Science, 2010, 118, 657-668.	1.8	41
14	Acute restraint stress induces endothelial dysfunction: role of vasoconstrictor prostanoids and oxidative stress. Stress, 2015, 18, 233-243.	0.8	41
15	Chronic Ethanol Consumption Enhances Phenylephrine-Induced Contraction in the Isolated Rat Aorta. Journal of Pharmacology and Experimental Therapeutics, 2006, 316, 233-241.	1.3	40
16	Acute ethanol intake induces mitogen-activated protein kinase activation, platelet-derived growth factor receptor phosphorylation, and oxidative stress in resistance arteries. Journal of Physiology and Biochemistry, 2014, 70, 509-523.	1.3	40
17	Pyrrolidine dithiocarbamate down-regulates vascular matrix metalloproteinases and ameliorates vascular dysfunction and remodelling in renovascular hypertension. British Journal of Pharmacology, 2011, 164, 372-381.	2.7	37
18	Diterpenes: A Therapeutic Promise for Cardiovascular Diseases. Recent Patents on Cardiovascular Drug Discovery, 2008, 3, 1-8.	1.5	36

#	Article	IF	CITATIONS
19	Chronic ethanol consumption alters cardiovascular functions in conscious rats. Life Sciences, 2006, 78, 2179-2187.	2.0	35
20	Ethanol Consumption Enhances Endothelin-1-Induced Contraction in the Isolated Rat Carotid. Journal of Pharmacology and Experimental Therapeutics, 2006, 318, 819-827.	1.3	35
21	Ethanol withdrawal increases oxidative stress and reduces nitric oxide bioavailability in the vasculature of rats. Alcohol, 2015, 49, 47-56.	0.8	35
22	Melatonin: Antioxidant and modulatory properties in ageâ€related changes during <i>Trypanosoma cruzi</i> infection. Journal of Pineal Research, 2017, 63, e12409.	3.4	35
23	Mechanisms Underlying the Endothelium-Independent Relaxation Induced by Angiotensin II in Rat Aorta. Journal of Cardiovascular Pharmacology, 2005, 45, 136-143.	0.8	33
24	Ethanol consumption increases blood pressure and alters the responsiveness of the mesenteric vasculature in rats. Journal of Pharmacy and Pharmacology, 2010, 60, 331-341.	1.2	33
25	Inhibitory action of kaurenoic acid from Viguiera robusta (Asteraceae) on phenylephrine-induced rat carotid contraction. Fìtoterapìâ, 2002, 73, 56-62.	1.1	29
26	Apocynin reduces blood pressure and restores the proper function of vascular endothelium in SHR. Vascular Pharmacology, 2016, 87, 38-48.	1.0	29
27	NADPH Oxidase Plays a Role on Ethanol-Induced Hypertension and Reactive Oxygen Species Generation in the Vasculature. Alcohol and Alcoholism, 2016, 51, 522-534.	0.9	29
28	Effect of ethanol consumption on blood pressure and rat mesenteric arterial bed, aorta and carotid responsiveness. Journal of Pharmacy and Pharmacology, 2010, 59, 985-993.	1.2	28
29	Reactive oxygen species derived from NAD(P)H oxidase play a role on ethanol-induced hypertension and endothelial dysfunction in rat resistance arteries. Journal of Physiology and Biochemistry, 2017, 73, 5-16.	1.3	28
30	Chronic Ethanol Consumption Induces Cavernosal Smooth Muscle Dysfunction in Rats. Urology, 2009, 74, 1250-1256.	0.5	27
31	Pharmacological comparison of the vasorelaxant action displayed by kaurenoic acid and pimaradienoic acid. Journal of Pharmacy and Pharmacology, 2010, 57, 997-1004.	1.2	26
32	Pimarane diterpene from Viguiera arenaria (Asteraceae) inhibit rat carotid contraction. Fìtoterapìâ, 2002, 73, 484-489.	1.1	25
33	Evidence for the Mechanisms Underlying the Effects of Pimaradienoic Acid Isolated from the Roots of <i>Viguiera arenaria </i> on Rat Aorta. Pharmacology, 2004, 70, 31-38.	0.9	25
34	Genderâ€specific vascular effects elicited by chronic ethanol consumption in rats: a role for inducible nitric oxide synthase. British Journal of Pharmacology, 2008, 153, 468-479.	2.7	25
35	Mechanisms Underlying the Vascular Actions of Endothelin 1, Angiotensin II and Bradykinin in the Rat Carotid. Pharmacology, 2009, 84, 111-126.	0.9	25
36	Ethanol-induced erectile dysfunction and increased expression of pro-inflammatory proteins in the rat cavernosal smooth muscle are mediated by NADPH oxidase-derived reactive oxygen species. European Journal of Pharmacology, 2017, 804, 82-93.	1.7	25

#	Article	IF	CITATIONS
37	The role of reactive oxygen species in the modulation of the contraction induced by angiotensin II in carotid artery from diabetic rat. European Journal of Pharmacology, 2012, 678, 15-25.	1.7	24
38	Ethanol induces vascular relaxation via redox-sensitive and nitric oxide-dependent pathways. Vascular Pharmacology, 2012, 56, 74-83.	1.0	24
39	Interleukinâ€17, oxidative stress, and inflammation: role of melatonin during <i>Trypanosoma cruzi</i> infection. Journal of Pineal Research, 2015, 59, 488-496.	3.4	24
40	Tumor necrosis factor- $\hat{l}\pm$ receptor 1 contributes to ethanol-induced vascular reactive oxygen species generation and hypertension. Journal of the American Society of Hypertension, 2017, 11, 684-696.e3.	2.3	24
41	Vascular Oxidative Stress: A Key Factor in the Development of Hypertension Associated with Ethanol Consumption. Current Hypertension Reviews, 2015, 10, 213-222.	0.5	24
42	Ethanol consumption increases the expression of endothelial nitric oxide synthase, inducible nitric oxide synthase and metalloproteinases in the rat kidney. Journal of Pharmacy and Pharmacology, 2011, 64, 68-76.	1.2	23
43	Contribution of oxidative stress and prostanoids in endothelial dysfunction induced by chronic fluoxetine treatment. Vascular Pharmacology, 2015, 73, 124-137.	1.0	23
44	Nebivolol prevents ethanol-induced reactive oxygen species generation and lipoperoxidation in the rat kidney by regulating NADPH oxidase activation and expression. European Journal of Pharmacology, 2017, 799, 33-40.	1.7	23
45	Kaurene diterpene induces apoptosis in U87 human malignant glioblastoma cells by suppression of anti-apoptotic signals and activation of cysteine proteases. Brazilian Journal of Medical and Biological Research, 2013, 46, 71-80.	0.7	22
46	Studies of ent-kaurane diterpenes from Oyedaea verbesinoides for their inhibitory activity on vascular smooth muscle contraction. Phytochemistry, 2003, 63, 391-396.	1.4	21
47	Chronic ethanol consumption induces erectile dysfunction: Role of oxidative stress. Life Sciences, 2015, 141, 44-53.	2.0	21
48	Nebivolol prevents vascular oxidative stress and hypertension in rats chronically treated with ethanol. Atherosclerosis, 2018, 274, 67-76.	0.4	21
49	Benefits of Ascorbic Acid in Association with Low-Dose Benznidazole in Treatment of Chagas Disease. Antimicrobial Agents and Chemotherapy, 2018, 62, .	1.4	21
50	Chronic ethanol intake modulates vascular levels of endothelinâ€1 receptor and enhances the pressor response to endothelinâ€1 in anaesthetized rats. British Journal of Pharmacology, 2008, 154, 971-981.	2.7	20
51	Role of the carboxylic group in the antispasmodic and vasorelaxant action displayed by kaurenoic acid. Journal of Pharmacy and Pharmacology, 2010, 56, 1407-1413.	1.2	20
52	Bed nucleus of the stria terminalis NMDA receptors and nitric oxide modulate contextual fear conditioning in rats. Neuropharmacology, 2017, 112, 135-143.	2.0	20
53	Chronic Methionine Load-Induced Hyperhomocysteinemia Enhances Rat Carotid Responsiveness for Angiotensin II. Pharmacology, 2004, 70, 91-99.	0.9	19
54	Analysis of the mechanisms underlying the vasorelaxant action of angiotensin II in the isolated rat carotid. Life Sciences, 2006, 78, 2676-2682.	2.0	18

CARLOS RENATO TIRAPELLI

#	Article	IF	CITATIONS
55	Pimaradienoic acid inhibits vascular contraction and induces hypotension in normotensive rats. Journal of Pharmacy and Pharmacology, 2010, 60, 453-459.	1.2	17
56	Ethanol Consumption Increases Endothelin-1 Expression and Reactivity in the Rat Cavernosal Smooth Muscle. Alcohol and Alcoholism, 2013, 48, 657-666.	0.9	17
57	Mechanisms underlying the vascular and hypotensive actions of the labdane ent-3-acetoxy-labda-8(17),13-dien-15-oic acid. European Journal of Pharmacology, 2014, 726, 66-76.	1.7	17
58	Perivascular adipose tissue contributes to lethal sepsis-induced vasoplegia in rats. European Journal of Pharmacology, 2019, 863, 172706.	1.7	17
59	Chronic ethanol consumption increases reactive oxygen species generation and the synthesis of pro-inflammatory proteins in the heart through TNFR1-dependent mechanisms. Cytokine, 2019, 121, 154734.	1.4	17
60	Melatonin reverses the loss of the anticontractile effect of perivascular adipose tissue in obese rats. Journal of Pineal Research, 2021, 70, e12710.	3.4	17
61	Enzymatic pathways involved in the generation of endothelin-1(1-31) from exogenous big endothelin-1 in the rabbit aorta. British Journal of Pharmacology, 2006, 148, 527-535.	2.7	16
62	Mechanisms underlying the vasorelaxant action of the pimarane ent-8(14),15-pimaradien-3β-ol in the isolated rat aorta. European Journal of Pharmacology, 2009, 616, 183-191.	1.7	16
63	Chronic ethanol consumption induces histopathological changes and increases nitric oxide generation in the rat liver. Tissue and Cell, 2011, 43, 384-391.	1.0	16
64	Chronic ethanol consumption increases vascular oxidative stress and the mortality induced by sub-lethal sepsis: Potential role of iNOS. European Journal of Pharmacology, 2018, 825, 39-47.	1.7	16
65	Pharmacological characterization of the mechanisms underlying the vascular effects of succinate. European Journal of Pharmacology, 2016, 789, 334-343.	1.7	15
66	Decreased reactive oxygen species production and NOX1, NOX2, NOX4 expressions contribute to hyporeactivity to phenylephrine in aortas of pregnant SHR. Life Sciences, 2016, 144, 178-184.	2.0	15
67	Perivascular adipose tissue protects against the vascular dysfunction induced by acute ethanol intake: Role of hydrogen peroxide. Vascular Pharmacology, 2018, 111, 44-53.	1.0	15
68	Biotransformation of ent-pimaradienoic acid by cell cultures of Aspergillus niger. Bioorganic and Medicinal Chemistry, 2013, 21, 5870-5875.	1.4	14
69	Vitamin C prevents the endothelial dysfunction induced by acute ethanol intake. Life Sciences, 2015, 141, 99-107.	2.0	14
70	Pharmacological characterisation of the mechanisms underlying the relaxant effect of adrenomedullin in the rat carotid artery. Journal of Pharmacy and Pharmacology, 2014, 66, 1734-1746.	1.2	14
71	Functional characterization of the mechanisms underlying bradykinin-induced relaxation in the isolated rat carotid artery. Life Sciences, 2007, 80, 1799-1805.	2.0	13
72	Chronic ethanol consumption reduces adrenomedullin-induced relaxation in the isolated rat aorta. Alcohol, 2011, 45, 805-814.	0.8	12

#	Article	IF	CITATIONS
73	Ansiedade e consumo de ansiolÃticos entre estudantes de enfermagem de uma universidade pública. Revista Eletrônica De Enfermagem, 2013, 15, .	0.1	12
74	Chronic ethanol consumption compromises neutrophil function in acute pulmonary Aspergillus fumigatus infection. ELife, 2020, 9, .	2.8	12
75	Consumption of benzodiazepines without prescription among first-year nursing students at the University of Guayaquil, school of nursing, Ecuador. Revista Latino-Americana De Enfermagem, 2008, 16, 634-639.	0.4	11
76	Chronic alcoholism associated with diabetes impairs erectile function in rats. BJU International, 2010, 105, 1592-1597.	1.3	11
77	Vitamin K1 (phylloquinone) induces vascular endothelial dysfunction: Role of oxidative stress. Toxicology and Applied Pharmacology, 2006, 213, 10-17.	1.3	10
78	Chronic methionine load-induced hyperhomocysteinemia impairs the relaxation induced by bradykinin in the isolated rat carotid. Amino Acids, 2009, 37, 617-627.	1.2	10
79	Ethanol withdrawal induces anxiety-like effects: Role of nitric oxide synthase in the dorsal raphe nucleus of rats. Alcohol, 2016, 52, 1-8.	0.8	10
80	Data on the effects of losartan on protein expression, vascular reactivity and antioxidant capacity in the aorta of ethanol-treated rats. Data in Brief, 2017, 11, 111-116.	0.5	10
81	Mechanisms underlying sodium nitroprusside-induced tolerance in the mouse aorta: Role of ROS and cyclooxygenase-derived prostanoids. Life Sciences, 2017, 176, 26-34.	2.0	10
82	Direct renin inhibition is not enough to prevent reactive oxygen species generation and vascular dysfunction in renovascular hypertension. European Journal of Pharmacology, 2018, 821, 97-104.	1.7	10
83	Nonselective ETA/ETB-receptor blockade increases systemic blood pressure of Bio 14.6 cardiomyopathic hamstersThis article is one of a selection of papers published in the special issue (part 1 of 2) on Forefronts in Endothelin Canadian Journal of Physiology and Pharmacology, 2008, 86, 394-401.	0.7	9
84	Hyperhomocysteinemia induced by feeding rats diets rich in dl-homocysteine thiolactone promotes alterations on carotid reactivity independent of arterial structure. Vascular Pharmacology, 2009, 51, 291-298.	1.0	9
85	The semi-synthetic kaurane ent-16α-methoxykauran-19-oic acid induces vascular relaxation and hypotension in rats. European Journal of Pharmacology, 2011, 660, 402-410.	1.7	9
86	Ethanol Consumption Alters the Expression and Reactivity of Adrenomedullin in the Rat Mesenteric Arterial Bed. Alcohol and Alcoholism, 2012, 47, 9-17.	0.9	9
87	Ethanol withdrawal increases blood pressure and vascular oxidative stress: a role for angiotensin type 1 receptors. Journal of the American Society of Hypertension, 2018, 12, 561-573.	2.3	9
88	Apocynin alters redox signaling in conductance and resistance vessels of spontaneously hypertensive rats. Free Radical Biology and Medicine, 2019, 134, 53-63.	1.3	9
89	Nebivolol Prevents Up-Regulation of Nox2/NADPH Oxidase and Lipoperoxidation in the Early Stages of Ethanol-Induced Cardiac Toxicity. Cardiovascular Toxicology, 2021, 21, 224-235.	1.1	8
90	Inducible nitric oxide synthase (iNOS) mediates ethanol-induced redox imbalance and upregulation of inflammatory cytokines in the kidney. Canadian Journal of Physiology and Pharmacology, 2021, 99, 1016-1025.	0.7	8

#	Article	IF	CITATIONS
91	Mechanisms underlying the biphasic effect of vitamin K1 (phylloquinone) on arterial blood pressureâ€. Journal of Pharmacy and Pharmacology, 2010, 60, 889-893.	1.2	7
92	Chronic restraint stress increases angiotensin II potency in the rat carotid: role of cyclooxygenases and reactive oxygen species. Journal of Pharmacy and Pharmacology, 2016, 69, 52-65.	1.2	7
93	Mechanisms underlying vascular hypocontractility induced by ethanol withdrawal: Role of cyclooxygenase 2-derived prostacyclin. European Journal of Pharmacology, 2019, 847, 103-112.	1.7	7
94	Dengue virus infection induces inflammation and oxidative stress on the heart. Heart, 2022, 108, 388-396.	1.2	7
95	Vitamin K ₁ Prevents the Effect of Hypoxia on Phenylephrine-Induced Contraction in the Carotid Artery. Pharmacology, 2002, 66, 36-43.	0.9	6
96	Characterization of the nonâ€adrenergic/nonâ€cholinergic response to perivascular nerve stimulation in the doubleâ€perfused mesenteric bed of the mouse. British Journal of Pharmacology, 2007, 152, 1049-1059.	2.7	6
97	Consequence of hyperhomocysteinaemia on α1-adrenoceptor-mediated contraction in the rat corpus cavernosum: the role of reactive oxygen species. Journal of Pharmacy and Pharmacology, 2016, 68, 63-75.	1.2	6
98	Acute restraint stress increases blood pressure and oxidative stress in the cardiorenal system of rats: a role for AT ₁ receptors. Stress, 2020, 23, 328-337.	0.8	6
99	Melatonin regulates antioxidant defense and inflammatory response by activating Nrf2–dependent mechanisms and inhibiting NFkappaB expression in middle-aged T. cruzi infected rats. Experimental Gerontology, 2022, 167, 111895.	1.2	6
100	VITAMIN K1 ATTENUATES HYPOXIA-INDUCED RELAXATION OF RAT CAROTID ARTERY. Pharmacological Research, 2002, 46, 483-490.	3.1	5
101	Effect of chronic ethanol consumption on endothelin-1 generation and conversion of exogenous big-endothelin-1 by the rat carotid artery. Alcohol, 2007, 41, 77-85.	0.8	5
102	Antidepressants: knowledge and use among nursing students. Revista Latino-Americana De Enfermagem, 2010, 18, 421-428.	0.4	5
103	Cytokine modulation, oxidative stress and thymic dysfunctions: Role of age-related changes in the experimental Trypanosoma cruzi infection. Cytokine, 2018, 111, 88-96.	1.4	5
104	Treatment with nitrite prevents reactive oxygen species generation in the corpora cavernosa and restores intracavernosal pressure in hypertensive rats. Nitric Oxide - Biology and Chemistry, 2020, 94, 19-26.	1.2	5
105	Quality of life and depressive symptoms in Parkinson's disease. Revista Brasileira De Psiquiatria, 2011, 33, 99-101.	0.9	5
106	Acute Ethanol Intake Induces NAD(P)H Oxidase Activation and Rhoa Translocation in Resistance Arteries. Arquivos Brasileiros De Cardiologia, 2016, 107, 427-436.	0.3	5
107	Ageing is not associated with an altered immune response during Trypanosoma cruzi infection. Experimental Gerontology, 2017, 90, 43-51.	1.2	4
108	Are Reactive Oxygen Species Important Mediators of Vascular Dysfunction?. Current Hypertension Reviews, 2021, 16, 163-165.	0.5	4

#	Article	IF	CITATIONS
109	Total stenosis triggers compensatory responsiveness of carotid and basilar arteries to endothelin-1 and phenylephrine. Pharmacological Research, 2008, 57, 32-42.	3.1	3
