#	ARTICLE	IF	CITATIONS
1	Sexually Dimorphic Expression of Fear-conditioned Analgesia in Rats and Associated Alterations in the Endocannabinoid System in the Periaqueductal Grey. <i>Neuroscience</i> , 2022, 480, 117-130.	2.3	4
2	Cannabinoid drugs against chemotherapy-induced adverse effects: focus on nausea/vomiting, peripheral neuropathy and chemofog in animal models. <i>Behavioural Pharmacology</i> , 2022, 33, 105-129.	1.7	9
3	Sex Differences in a Rat Model of Peripheral Neuropathic Pain and Associated Levels of Endogenous Cannabinoid Ligands. <i>Frontiers in Pain Research</i> , 2021, 2, 673638.	2.0	9
4	Cannabinoid Drugs-Related Neuroprotection as a Potential Therapeutic Tool Against Chemotherapy-Induced Cognitive Impairment. <i>Frontiers in Pharmacology</i> , 2021, 12, 734613.	3.5	9
5	Pharmacological Blockade of PPAR Isoforms Increases Conditioned Fear Responding in the Presence of Nociceptive Tone. <i>Molecules</i> , 2020, 25, 1007.	3.8	9
6	Sex-dependent effects of neonatal maternal deprivation on endocannabinoid levels in the adipose tissue: influence of diet. <i>Journal of Physiology and Biochemistry</i> , 2016, 73, 349-357.	3.0	4
7	Neonatal Treatment with a Pegylated Leptin Antagonist Induces Sexually Dimorphic Effects on Neurones and Glial Cells, and on Markers of Synaptic Plasticity in the Developing Rat Hippocampal Formation. <i>Journal of Neuroendocrinology</i> , 2015, 27, 658-669.	2.6	4
8	The maternal deprivation animal model revisited. <i>Neuroscience and Biobehavioral Reviews</i> , 2015, 51, 151-163.	6.1	104
9	2-AG promotes the expression of conditioned fear via cannabinoid receptor type 1 on GABAergic neurons. <i>Psychopharmacology</i> , 2015, 232, 2811-2825.	3.1	91
10	Sex-dependent long-term effects of adolescent exposure to <sc>THC</sc> and/or <sc>MDMA</sc> on neuroinflammation and serotonergic and cannabinoid systems in rats. <i>British Journal of Pharmacology</i> , 2014, 171, 1435-1447.	5.4	44
11	Sex-dependent effects of early maternal deprivation on MDMA-induced conditioned place preference in adolescent rats: Possible neurochemical correlates. <i>Toxicology</i> , 2013, 311, 78-86.	4.2	19
12	Sex-dependent changes in brain CB1R expression and functionality and immune CB2R expression as a consequence of maternal deprivation and adolescent cocaine exposure. <i>Pharmacological Research</i> , 2013, 74, 23-33.	7.1	36
13	Sex-Dependent Psychoneuroendocrine Effects of THC and MDMA in an Animal Model of Adolescent Drug Consumption. <i>PLoS ONE</i> , 2013, 8, e78386.	2.5	30
14	The endocannabinoid system in critical neurodevelopmental periods: sex differences and neuropsychiatric implications. <i>Journal of Psychopharmacology</i> , 2012, 26, 164-176.	4.0	110
15	Neurobehavioral and metabolic long-term consequences of neonatal maternal deprivation stress and adolescent olanzapine treatment in male and female rats. <i>Neuropharmacology</i> , 2012, 62, 1332-1341.	4.1	50
16	Maternal deprivation and adolescent cannabinoid exposure impact hippocampal astrocytes, CB1 receptors and brain-derived neurotrophic factor in a sexually dimorphic fashion. <i>Neuroscience</i> , 2012, 204, 90-103.	2.3	65
17	Maternal Deprivation Exacerbates the Response to a High Fat Diet in a Sexually Dimorphic Manner. <i>PLoS ONE</i> , 2012, 7, e48915.	2.5	40
18	Sex-dependent effects of maternal deprivation and adolescent cannabinoid treatment on adult rat behaviour. <i>Addiction Biology</i> , 2011, 16, 624-637.	2.6	71

#	ARTICLE	IF	CITATIONS
19	Consequences of Cannabinoid and Monoaminergic System Disruption in a Mouse Model of Autism Spectrum Disorders. <i>Current Neuropharmacology</i> , 2011, 9, 209-214.	2.9	33
20	Sex-dependent maternal deprivation effects on brain monoamine content in adolescent rats. <i>Neuroscience Letters</i> , 2010, 479, 112-117.	2.1	44
21	Species differences in cannabinoid receptor 2 (<i>CNR2</i> gene): identification of novel human and rodent CB2 isoforms, differential tissue expression and regulation by cannabinoid receptor ligands. <i>Genes, Brain and Behavior</i> , 2009, 8, 519-530.	2.2	214
22	Early maternal deprivation in rats induces gender-dependent effects on developing hippocampal and cerebellar cells. <i>International Journal of Developmental Neuroscience</i> , 2009, 27, 233-241.	1.6	89
23	Gender-dependent cellular and biochemical effects of maternal deprivation on the hippocampus of neonatal rats: A possible role for the endocannabinoid system. <i>Developmental Neurobiology</i> , 2008, 68, 1334-1347.	3.0	80
24	Neuronal and glial alterations in the cerebellar cortex of maternally deprived rats: Gender differences and modulatory effects of two inhibitors of endocannabinoid inactivation. <i>Developmental Neurobiology</i> , 2008, 68, 1429-1440.	3.0	38
