#	Article	lF	CITATIONS
1	Short-Term Adolescent Nicotine Exposure has Immediate and Persistent Effects on Cholinergic Systems: Critical Periods, Patterns of Exposure, Dose Thresholds. Neuropsychopharmacology, 2003, 28, 1935-1949.	2.8	137
2	Developmental neurotoxicity of succeeding generations of insecticides. Environment International, 2017, 99, 55-77.	4.8	132
3	Developmental aspects of the cholinergic system. Behavioural Brain Research, 2011, 221, 367-378.	1.2	130
4	Nicotine is a neurotoxin in the adolescent brain: critical periods, patterns of exposure, regional selectivity, and dose thresholds for macromolecular alterations. Brain Research, 2003, 979, 114-128.	1.1	107
5	Prenatal Nicotine Exposure Alters the Response to Nicotine Administration in Adolescence: Effects on Cholinergic Systems During Exposure and Withdrawal. Neuropsychopharmacology, 2004, 29, 879-890.	2.8	104
6	Influences of Handedness and Gender on the Grooved Pegboard Test. Brain and Cognition, 2000, 44, 445-454.	0.8	93
7	Chlorpyrifos exposure during neurulation: cholinergic synaptic dysfunction and cellular alterations in brain regions at adolescence and adulthood. Developmental Brain Research, 2004, 148, 43-52.	2.1	72
8	Does Prenatal Nicotine Exposure Sensitize the Brain to Nicotine-Induced Neurotoxicity in Adolescence?. Neuropsychopharmacology, 2004, 29, 1440-1450.	2.8	67
9	Individual differences in novelty-seeking behavior but not in anxiety response to a new environment can predict nicotine consumption in adolescent C57BL/6 mice. Behavioural Brain Research, 2006, 167, 175-182.	1.2	66
10	Increased apoptosis and reduced neuronal and glial densities in the hippocampus due to nicotine and ethanol exposure in adolescent mice. International Journal of Developmental Neuroscience, 2009, 27, 539-548.	0.7	58
11	Neonatal nicotine exposure causes insulin and leptin resistance and inhibits hypothalamic leptin signaling in adult rat offspring. Journal of Endocrinology, 2010, 206, 55-63.	1.2	58
12	Impact of adolescent nicotine exposure on adenylyl cyclase-mediated cell signaling: enzyme induction, neurotransmitter-specific effects, regional selectivities, and the role of withdrawal. Brain Research, 2003, 988, 164-172.	1.1	52
13	Combined Exposure to Nicotine and Ethanol in Adolescent Mice Differentially Affects Anxiety Levels during Exposure, Short-Term, and Long-Term Withdrawal. Neuropsychopharmacology, 2008, 33, 599-610.	2.8	51
14	Mood Disorders Hospitalizations, Suicide Attempts, and Suicide Mortality Among Agricultural Workers and Residents in an Area With Intensive Use of Pesticides in Brazil. Journal of Toxicology and Environmental Health - Part A: Current Issues, 2010, 73, 866-877.	1.1	47
15	Anxiety-like behavior during nicotine withdrawal predict subsequent nicotine consumption in adolescent C57BL/6 mice. Behavioural Brain Research, 2008, 193, 216-224.	1.2	44
16	Exposure to nicotine and ethanol in adolescent mice: Effects on depressive-like behavior during exposure and withdrawal. Behavioural Brain Research, 2011, 221, 282-289.	1.2	41
17	Nicotine and ethanol interact during adolescence: Effects on the central cholinergic systems. Brain Research, 2008, 1232, 48-60.	1.1	35
18	Combined exposure to nicotine and ethanol in adolescent mice differentially affects memory and learning during exposure and withdrawal. Behavioural Brain Research, 2007, 181, 136-146.	1.2	34

YAEL ABREU-VILLAçA

#	Article	IF	CITATIONS
19	Acute administration of vinpocetine, a phosphodiesterase type 1 inhibitor, ameliorates hyperactivity in a mice model of fetal alcohol spectrum disorder. Drug and Alcohol Dependence, 2011, 119, 81-87.	1.6	34
20	Modeling the developmental neurotoxicity of nicotine in vitro: cell acquisition, growth and viability in PC12 cells. Developmental Brain Research, 2005, 154, 239-246.	2.1	30
21	Exposure to tobacco smoke containing either high or low levels of nicotine during adolescence: Differential effects on choline uptake in the cerebral cortex and hippocampus. Nicotine and Tobacco Research, 2010, 12, 776-780.	1.4	26
22	Exposure to methamidophos at adulthood adversely affects serotonergic biomarkers in the mouse brain. NeuroToxicology, 2011, 32, 718-724.	1.4	26
23	Effect of tobacco smoke exposure during pregnancy and preschool age on growth from birth to adolescence: a cohort study. BMC Pediatrics, 2014, 14, 99.	0.7	25
24	Maternal prolactin inhibition at the end of lactation affects learning/memory and anxiety-like behaviors but not novelty-seeking in adult rat progeny. Pharmacology Biochemistry and Behavior, 2011, 100, 165-173.	1.3	24
25	Combined exposure to tobacco smoke and ethanol during adolescence leads to short- and long-term modulation of anxiety-like behavior. Drug and Alcohol Dependence, 2013, 133, 52-60.	1.6	24
26	Nicotine Exposure during the Third Trimester Equivalent of Human Gestation: Time Course of Effects on the Central Cholinergic System of Rats. Toxicological Sciences, 2011, 123, 144-154.	1.4	23
27	Exposure to methamidophos at adulthood elicits depressive-like behavior in mice. NeuroToxicology, 2009, 30, 471-478.	1.4	22
28	Nicotine affects cutaneous wound healing in stressed mice. Experimental Dermatology, 2013, 22, 524-529.	1.4	21
29	Combined Exposure to Tobacco Smoke and Ethanol in Adolescent Mice Elicits Memory and Learning Deficits Both During Exposure and Withdrawal. Nicotine and Tobacco Research, 2013, 15, 1211-1221.	1.4	20
30	Tobacco and alcohol use during adolescence: Interactive mechanisms in animal models. Biochemical Pharmacology, 2017, 144, 1-17.	2.0	20
31	Tobacco smoke containing high or low levels of nicotine during adolescence: effects on novelty-seeking and anxiety-like behaviors in mice. Psychopharmacology, 2015, 232, 1693-1703.	1.5	17
32	Methamidophos Exposure During the Early Postnatal Period of Mice: Immediate and Late-Emergent Effects on the Cholinergic and Serotonergic Systems and Behavior. Toxicological Sciences, 2013, 134, 125-139.	1.4	16
33	Anxiety-like, novelty-seeking and memory/learning behavioral traits in male Wistar rats submitted to early weaning. Physiology and Behavior, 2014, 124, 100-106.	1.0	16
34	Early ethanol exposure in mice increases laterality of rotational side preference in the free-swimming test. Pharmacology Biochemistry and Behavior, 2009, 93, 148-154.	1.3	15
35	A ten fold reduction of nicotine yield in tobacco smoke does not spare the central cholinergic system in adolescent mice. International Journal of Developmental Neuroscience, 2016, 52, 93-103.	0.7	14
36	Energy drink enhances the behavioral effects of alcohol in adolescent mice. Neuroscience Letters, 2017, 651, 102-108.	1.0	14

YAEL ABREU-VILLAçA

#	Article	IF	CITATIONS
37	Hyperactivity and memory/learning deficits evoked by developmental exposure to nicotine and/or ethanol are mitigated by cAMP and cGMP signaling cascades activation. NeuroToxicology, 2018, 66, 150-159.	1.4	14
38	Unilateral hemispherectomy at adulthood asymmetrically affects immobile behavior of male Swiss mice. Behavioural Brain Research, 2006, 172, 33-38.	1.2	13
39	Novelty affects paw preference performance in adult mice. Animal Behaviour, 2010, 80, 51-57.	0.8	13
40	Profiling of behavioral effects evoked by ketamine and the role of 5HT2 and D2 receptors in ketamine-induced locomotor sensitization in mice. Progress in Neuro-Psychopharmacology and Biological Psychiatry, 2020, 97, 109775.	2.5	13
41	Early callosal absence disrupts the establishment of normal neocortical structure in Swiss mice. International Journal of Developmental Neuroscience, 2006, 24, 15-21.	0.7	12
42	Critical developmental periods for effects of low-level tobacco smoke exposure on behavioral performance. NeuroToxicology, 2018, 68, 81-87.	1.4	12
43	The ventral hippocampal muscarinic cholinergic system plays a key role in sexual dimorphisms of spatial working memory in rats. Neuropharmacology, 2017, 117, 106-113.	2.0	11
44	Tobacco smoke and ethanol during adolescence: Both combined- and single-drug exposures lead to short- and long-term disruption of the serotonergic system in the mouse brain. Brain Research Bulletin, 2019, 146, 94-103.	1.4	11
45	Effects of prenatal gamma irradiation on the development of the corpus callosum of Swiss mice. International Journal of Developmental Neuroscience, 1999, 17, 693-704.	0.7	10
46	Locomotor response to acute nicotine in adolescent mice is altered by maternal undernutrition during lactation. International Journal of Developmental Neuroscience, 2015, 47, 278-285.	0.7	10
47	Neonatal transection of the corpus callosum affects rotational side preference in adult Swiss mice. Neuroscience Letters, 2007, 415, 159-163.	1.0	9
48	Unilateral hemispherectomy at adulthood asymmetrically affects motor performance of male Swiss mice. Experimental Brain Research, 2012, 218, 465-476.	0.7	8
49	Mood-related behavioral and neurochemical alterations in mice exposed to low chlorpyrifos levels during the brain growth spurt. PLoS ONE, 2020, 15, e0239017.	1.1	6
50	GABAA overactivation potentiates the effects of NMDA blockade during the brain growth spurt in eliciting locomotor hyperactivity in juvenile mice. Neurotoxicology and Teratology, 2015, 50, 43-52.	1.2	5
51	Maternal undernutrition during lactation alters nicotine reward and DOPAC/dopamine ratio in cerebral cortex in adolescent mice, but does not affect nicotineâ€induced nAChRs upregulation. International Journal of Developmental Neuroscience, 2018, 65, 45-53.	0.7	5
52	Lifelong exposure to caffeine increases anxiety-like behavior in adult mice exposed to tobacco smoke during adolescence. Neuroscience Letters, 2019, 696, 146-150.	1.0	5
53	Ethanol exposure during the brain growth spurt affects social behavior and increases susceptibility to acute ethanol effects during adolescence in male mice. International Journal of Developmental Neuroscience, 2020, 80, 197-207.	0.7	4
54	Maternal protein-free diet during lactation programs male Wistar rat offspring for increased novelty-seeking, locomotor activity, and visuospatial performance Behavioral Neuroscience, 2018, 132, 114-127.	0.6	4

#	Article	IF	CITATIONS
55	Exposure to varenicline protects against locomotor alteration in a MPTP mouse model of Parkinson's disease. Brazilian Journal of Medical and Biological Research, 2021, 54, e11679.	0.7	4
56	Developmental Neurotoxicity ofÂNicotine and Tobacco. , 2018, , 439-452.		3
57	Developmental Neurobehavioral Neurotoxicity of Insecticides. , 2018, , 453-466.		3
58	Ethanol exposure during the brain growth spurt impairs habituation and promotes locomotor hyperactivity of infant mice in the tail suspension test Psychology and Neuroscience, 2021, 14, 82-93.	0.5	3
59	Does nicotine exposure during adolescence modify the course of schizophrenia-like symptoms? Behavioral analysis in a phencyclidine-induced mice model. PLoS ONE, 2021, 16, e0257986.	1.1	3
60	Time course of the effects of prenatal gamma irradiation on the dorsal lateral geniculate nucleus of Swiss mice. International Journal of Developmental Neuroscience, 2001, 19, 639-647.	0.7	2
61	Ethanol exposure during the brain growth spurt period increases ethanolâ€induced aggressive behavior in adolescent male mice. International Journal of Developmental Neuroscience, 2020, 80, 657-666.	0.7	2
62	Sex- and age-dependent differences in nicotine susceptibility evoked by developmental exposure to to tobacco smoke and/or ethanol in mice. Journal of Developmental Origins of Health and Disease, 2021, 12, 940-951.	0.7	2
63	Ontogenetic analysis of behavior in the tail suspension test: Temporal differences in the emergence of within―and betweenâ€session habituation in Swiss mice. Developmental Psychobiology, 2014, 56, 850-856.	0.9	1
64	Reduction of Nicotine in Tobacco and Impact. , 2019, , 33-40.		0
