#	ARTICLE	IF	CITATIONS
1	Hexagonal Nano and Micro Boron Nitride: Properties and Lubrication Applications. <i>Materials</i> , 2022, 15, 955.	2.9	11
2	Experimental investigations on electrorheological properties of lubricating oils containing ionic liquid. Part 2. Testing in dielectric spectroscopy. <i>Bulletin of the Military University of Technology</i> , 2020, 69, 43-69.	0.0	0
3	Research on tribological properties of oil containing graphene oxide or hexagonal boron nitride. <i>Bulletin of the Military University of Technology</i> , 2020, 68, 29-55.	0.0	0
4	Analysis of standards for testing lubricity properties on a four-ball apparatus used in Poland. <i>Bulletin of the Military University of Technology</i> , 2020, 69, 129-152.	0.0	1
5	Evaluation of the influence of granulation of hexagonal boron nitride on the lubricity properties of the base grease. <i>Bulletin of the Military University of Technology</i> , 2020, 69, 109-128.	0.0	1
6	Research on lubricity of oils containing the hexagonal boron nitride. <i>Bulletin of the Military University of Technology</i> , 2019, 68, 131-151.	0.0	2
7	Evaluation of tribological properties of lubricants based on Hersey's "Stribeck's characteristics. <i>Bulletin of the Military University of Technology</i> , 2019, 68, 109-143.	0.0	0
8	Application of graphene materials in tribology – analysis of state of the problem and the preliminary research. <i>Bulletin of the Military University of Technology</i> , 2019, 68, 81-108.	0.0	0
9	Experimental investigations on electrorheological properties of lubricating oils containing ionic liquid. Part 1. Investigations with modified Brookfield DV-III Ultra Viscosimeter. <i>Bulletin of the Military University of Technology</i> , 2019, 68, 35-63.	0.0	0
10	Tribological properties of grease containing graphene oxide or hexagonal boron nitride. <i>Bulletin of the Military University of Technology</i> , 2019, 68, 65-93.	0.0	0
11	IRON POROUS SLIDE BEARINGS IMPREGNATED WITH A SELECTED IONIC LIQUID. <i>Tribologia</i> , 2018, 282, 43-50.	0.2	0
12	The Effect of Deposition Parameters on the Structural and Mechanical Properties of BN Coatings Deposited onto High-Speed Steel by the PLD Method. <i>Solid State Phenomena</i> , 2015, 220-221, 737-742.	0.3	0
13	The effect of hexagonal boron nitride additive on the effectiveness of grease-based lubrication of a steel surface. <i>Industrial Lubrication and Tribology</i> , 2012, 64, 84-89.	1.3	25
14	The Wear Resistance of HVOF Sprayed Composite Coatings. <i>Tribology Letters</i> , 2011, 41, 103-111.	2.6	8
15	Modeling of Moment of Friction under Increasing Load Using Artificial Neural Networks. <i>Solid State Phenomena</i> , 2008, 144, 130-135.	0.3	0
16	Problem of the Service Life of Self-Lubricated Friction Couples. <i>Solid State Phenomena</i> , 2006, 113, 399-404.	0.3	2
17	Physicochemical Self - Lubricating Mechanism of Porous Sliding Bearings. <i>Solid State Phenomena</i> , 2006, 113, 405-410.	0.3	1
18	Triboelectrical Effects in Frictional Contacts. <i>Solid State Phenomena</i> , 2006, 113, 411-414.	0.3	2

#	ARTICLE	IF	CITATIONS
19	Continuous Method for Assessment of Wear under Conditions of Technically Dry Friction. Solid State Phenomena, 2006, 113, 415-419.	0.3	0
