#	ARTICLE	IF	CITATIONS
1	Utilization of alkaline Aluminosilicate activation in heavy metals immobilization and producing dense hybrid composites. Arabian Journal for Science and Engineering, 2021, 46, 6333-6348.	3.0	9
2	Evaluation of chloride resistance of silica fume and glass waste MWCNT- geopolymer composite. $\text{\AA}\%o\text{\AA}\text{\AA}'anyag$: Journal of Silicate Based and Composite Materials, 2021, 73, 44-53.	0.2	0
3	Impact of alkali activated mortar incorporating different heavy metals on immobilization proficiency using gamma rays attenuation. Progress in Nuclear Energy, 2021, 137, 103729.	2.9	13
4	Combination between organic polymer and geopolymer for production of eco-friendly metakaolin composite. Journal of the Australian Ceramic Society, 2020, 56, 599-608.	1.9	10
5	Towards a clean environment: The potential application of eco-friendly magnesia-silicate cement in CO ₂ sequestration. Journal of Cleaner Production, 2020, 252, 119875.	9.3	33
6	Optimization of geopolymer mortar incorporating heavy metals in producing dense hybrid composites. Journal of Building Engineering, 2020, 32, 101684.	3.4	13
7	Preparation of sustainable of eco-friendly MWCNT-geopolymer composites with superior sulfate resistance. Advanced Composites and Hybrid Materials, 2020, 3, 375-389.	21.1	22
8	PRODUCTION OF LOW-COST BIOCOMPOSITE MADE OF PALM FIBERS WASTE AND GYPSUM PLASTER. , 2020, 36, .		2
9	Hybrid slag geopolymer composites with durable characteristics activated by cement kiln dust. Construction and Building Materials, 2019, 228, 116708.	7.2	23
10	Development and characterization of sustainable lightweight geopolymer composites. Ceramica, 2019, 65, 153-161.	0.8	11
11	Valorization of cement kiln dust in activation and production of hybrid geopolymer composites with durable characteristics. Advanced Composites and Hybrid Materials, 2019, 2, 301-311.	21.1	8
12	Preparation and characterization of engineered stones based geopolymer composites. Journal of Building Engineering, 2018, 20, 493-500.	3.4	11
13	Preparation and characterization of lightweight geopolymer composites using different aluminium precursors. $\text{\AA}\%o\text{\AA}\text{\AA}'anyag$: Journal of Silicate Based and Composite Materials, 2018, 70, 186-194.	0.2	0
14	Synthesis and characterization of MK /Slag geopolymer composites enhanced by various ratios of nano kaolin. $\text{\AA}\%o\text{\AA}\text{\AA}'anyag$: Journal of Silicate Based and Composite Materials, 2017, 69, 40-48.	0.2	1
15	Effect of nano-silica on microstructure formation of low-cost geopolymer binder. Nanocomposites, 2016, 2, 84-97.	4.2	35
16	Coupled effect of alkali concentration and metakaolin content on accelerated ageing of slag. Geosystem Engineering, 2016, 19, 125-132.	1.4	8
17	Characterization of alkali activated geopolymer mortar doped with MWCNT. Construction and Building Materials, 2016, 102, 329-337.	7.2	127
18	Nano-Silica effect on the physicomechanical properties of geopolymer composites. Advances in Nano Research, 2016, 4, 181-195.	0.9	7

#	ARTICLE	IF	CITATIONS
19	Production of geopolymer composites enhanced by nano-kaolin material. Journal of Advanced Ceramics, 2015, 4, 245-252.	17.4	39
20	Characterization of alkali activated geopolymer mortar doped with MWCNT. Advances in Materials Research (South Korea), 2015, 4, 45-60.	0.6	12
21	Effect of firing temperatures on alkali activated Geopolymer mortar doped with MWCNT. Advances in Nano Research, 2015, 3, 225-242.	0.9	11
22	Influence of electric arc furnace slag on characterisation of the produced geopolymer composites. <i>Journal of Silicate Based and Composite Materials</i> , 2015, 67, 82-88.	0.2	5
23	Characterization of alkali activated geopolymer mortar doped with MWCNT. <i>Journal of Silicate Based and Composite Materials</i> , 2015, 67, 38-47.	0.2	74
24	Physicomechanical Characteristic of Slag Geopolymer Mortar Enhanced with Multiwall Carbon Nano-tube. SSRG International Journal of Engineering Trends and Technology, 2015, 21, 52-60.	0.5	0
25	Studying the effect of thermal and acid exposure on alkali-activated slag geopolymer. <i>Advances in Cement Research</i> , 2014, 26, 1-9.	1.6	38
26	Physico-mechanical properties of high performance concrete using different aggregates in presence of silica fume. <i>HBRC Journal</i> , 2014, 10, 43-48.	0.7	37
27	Studying the effect of thermal and acid exposure on alkali activated slag Geopolymer. <i>MATEC Web of Conferences</i> , 2014, 11, 01032.	0.2	4
28	Effect of silica fume on the characterization of the geopolymer materials. <i>International Journal of Advanced Structural Engineering</i> , 2013, 5, 12.	1.3	90
29	Effect of cement kiln dust on geopolymer composition and its resistance to sulfate attack. <i>Green Materials</i> , 2013, 1, 36-46.	2.1	25
30	Effect of Calcium on Geopolymerization of Aluminosilicate Wastes. <i>Journal of Materials in Civil Engineering</i> , 2012, 24, 92-101.	2.9	120
31	Influence of Metakaolin on Resistivity of Cement Mortar to Magnesium Chloride Solution. <i>Journal of Materials in Civil Engineering</i> , 2011, 23, 1295-1301.	2.9	18
