| #  | Article                                                                                                                                                                                                                 | IF           | CITATIONS |
|----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|-----------|
| 1  | Breaking the scaling relationship via thermally stable Pt/Cu single atom alloys for catalytic dehydrogenation. Nature Communications, 2018, 9, 4454.                                                                    | 5.8          | 451       |
| 2  | Stabilizing High Metal Loadings of Thermally Stable Platinum Single Atoms on an Industrial Catalyst Support. ACS Catalysis, 2019, 9, 3978-3990.                                                                         | 5 <b>.</b> 5 | 233       |
| 3  | Nanoceria-Supported Single-Atom Platinum Catalysts for Direct Methane Conversion. ACS Catalysis, 2018, 8, 4044-4048.                                                                                                    | 5.5          | 214       |
| 4  | Propane Dehydrogenation on Single-Site [PtZn4] Intermetallic Catalysts. CheM, 2021, 7, 387-405.                                                                                                                         | 5.8          | 116       |
| 5  | Engineering catalyst supports to stabilize PdOx two-dimensional rafts for water-tolerant methane oxidation. Nature Catalysis, 2021, 4, 830-839.                                                                         | 16.1         | 86        |
| 6  | Origin of Electronic Modification of Platinum in a Pt <sub>3</sub> V Alloy and Its Consequences for Propane Dehydrogenation Catalysis. ACS Applied Energy Materials, 2020, 3, 1410-1422.                                | 2.5          | 41        |
| 7  | Isolated Metal Sites in Cu–Zn–Y/Beta for Direct and Selective Butene-Rich C <sub>3+</sub> Olefin Formation from Ethanol. ACS Catalysis, 2021, 11, 9885-9897.                                                            | 5.5          | 24        |
| 8  | Structural trends in the dehydrogenation selectivity of palladium alloys. Chemical Science, 2020, 11, 5066-5081.                                                                                                        | 3.7          | 23        |
| 9  | Multiple Promotional Effects of Vanadium Oxide on Boron Nitride for Oxidative Dehydrogenation of Propane. Jacs Au, 2022, 2, 1096-1104.                                                                                  | 3.6          | 20        |
| 10 | Kinetically Controlled Linker Binding in Rare Earth-2,5-Dihydroxyterepthalic Acid Metal–Organic Frameworks and Its Predicted Effects on Acid Gas Adsorption. ACS Applied Materials & Diterfaces, 2021, 13, 56337-56347. | 4.0          | 15        |
| 11 | Selective Butene Formation in Direct Ethanol-to-C <sub>3+</sub> -Olefin Valorization over Zn–Y/Beta and Single-Atom Alloy Composite Catalysts Using In Situ-Generated Hydrogen. ACS Catalysis, 2021, 11, 7193-7209.     | 5.5          | 13        |
| 12 | Sulfur Tolerant Subnanometer Fe/Alumina Catalysts for Propane Dehydrogenation. ACS Applied Nano Materials, 2021, 4, 10055-10067.                                                                                        | 2.4          | 13        |
| 13 | Catalytic activity and water stability of the MgO( $111$ ) surface for 2-pentanone condensation. Applied Catalysis B: Environmental, 2021, 294, 120234.                                                                 | 10.8         | 9         |
| 14 | Structure Evolution of Chemically Degraded ZIF-8. Journal of Physical Chemistry C, 2022, 126, 9736-9741.                                                                                                                | 1.5          | 7         |
| 15 | Controlled Demolition and Reconstruction of Imidazolate and Carboxylate Metal–Organic Frameworks by Acid Gas Exposure and Linker Treatment. Industrial & Engineering Chemistry Research, 2021, 60, 15582-15592.         | 1.8          | 4         |
| 16 | Detailed total scattering analysis of disorder in ZIF-8. Journal of Applied Crystallography, 2021, 54, 759-767.                                                                                                         | 1.9          | 3         |
