citing authors

| #  | ARTICLE   | IF  | CITATIONS |
|----|---|-----|-----------|
| 1  | Coccolithophorid blooms in the global ocean. <i>Journal of Geophysical Research</i> , 1994, 99, 7467.   | 3.3 | 415       |
| 2  | A model system approach to biological climate forcing. The example of <i>Emiliana huxleyi</i> . <i>Global and Planetary Change</i> , 1993, 8, 27-46.  | 3.5 | 302       |
| 3  | Environmental signatures associated with cholera epidemics. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2008, 105, 17676-17681.                                      | 7.1 | 255       |
| 4  | Representing key phytoplankton functional groups in ocean carbon cycle models: Coccolithophorids. <i>Global Biogeochemical Cycles</i> , 2002, 16, 47-1-47-20.   | 4.9 | 234       |
| 5  | Effects of increased pCO <sub>2</sub> and temperature on the North Atlantic spring bloom. I. The phytoplankton community and biogeochemical response. <i>Marine Ecology - Progress Series</i> , 2009, 388, 13-25. | 1.9 | 227       |
| 6  | Pelagic functional group modeling: Progress, challenges and prospects. <i>Deep-Sea Research Part II: Topical Studies in Oceanography</i> , 2006, 53, 459-512.   | 1.4 | 200       |
| 7  | Modeling of HABs and eutrophication: Status, advances, challenges. <i>Journal of Marine Systems</i> , 2010, 83, 262-275.  | 2.1 | 171       |
| 8  | Light backscattering properties of marine phytoplankton: relationships to cell size, chemical composition and taxonomy. <i>Journal of Plankton Research</i> , 2004, 26, 191-212.                                  | 1.8 | 162       |
| 9  | Detecting <i>Trichodesmium</i> blooms in SeaWiFS imagery. <i>Deep-Sea Research Part II: Topical Studies in Oceanography</i> , 2001, 49, 107-121.  | 1.4 | 148       |
| 10 | The effect of primary productivity and seasonality on the distribution of deep-sea benthic foraminifera in the North Atlantic. <i>Deep-Sea Research Part I: Oceanographic Research Papers</i> , 2006, 53, 28-47.  | 1.4 | 116       |
| 11 | Poleward expansion of the coccolithophore <i>Emiliana huxleyi</i> . <i>Journal of Plankton Research</i> , 2014, 36, 316-325.  | 1.8 | 112       |
| 12 | Impact of chromophoric dissolved organic matter on UV inhibition of primary productivity in the sea. <i>Marine Ecology - Progress Series</i> , 1996, 140, 207-216.  | 1.9 | 109       |
| 13 | Predicting the distribution of the scyphomedusa <i>Chrysaora quinquecirrha</i> in Chesapeake Bay. <i>Marine Ecology - Progress Series</i> , 2007, 329, 99-113.  | 1.9 | 88        |
| 14 | Predicting potentially toxigenic <i>Pseudo-nitzschia</i> blooms in the Chesapeake Bay. <i>Journal of Marine Systems</i> , 2010, 83, 127-140.  | 2.1 | 81        |
| 15 | Estimating oceanic chlorophyll concentrations with neural networks. <i>International Journal of Remote Sensing</i> , 1999, 20, 189-194.   | 2.9 | 79        |
| 16 | Climate Forcing and Salinity Variability in Chesapeake Bay, USA. <i>Estuaries and Coasts</i> , 2012, 35, 237-261.   | 2.2 | 67        |
| 17 | Advancing Marine Biogeochemical and Ecosystem Reanalyses and Forecasts as Tools for Monitoring and Managing Ecosystem Health. <i>Frontiers in Marine Science</i> , 2019, 6, .                                     | 2.5 | 62        |
| 18 | Ecological forecasting in Chesapeake Bay: Using a mechanisticâ€“empirical modeling approach. <i>Journal of Marine Systems</i> , 2013, 125, 113-125.   | 2.1 | 59        |

| #  | ARTICLE   | IF   | CITATIONS |
|----|---|------|-----------|
| 19 | Distribution pattern of coccolithophorid blooms in the western North Atlantic Ocean. <i>Continental Shelf Research</i> , 1994, 14, 175-197.   | 1.8  | 56        |
| 20 | Analysis of satellite imagery for <i>Emiliana huxleyi</i> blooms in the Bering Sea before 1997. <i>Geophysical Research Letters</i> , 2003, 30, .   | 4.0  | 56        |
| 21 | Establishing a global climatology of marine phytoplankton phenological characteristics. <i>Journal of Geophysical Research</i> , 2012, 117, .   | 3.3  | 55        |
| 22 | Remote sensing of coccolithophore blooms in the Western South Atlantic Ocean. <i>Remote Sensing of Environment</i> , 1997, 60, 83-91.   | 11.0 | 54        |
| 23 | Predicting the Distribution of <i>Vibrio</i> spp. in the Chesapeake Bay: A <i>Vibrio cholerae</i> Case Study. <i>EcoHealth</i> , 2009, 6, 378-389.  | 2.0  | 51        |
| 24 | Distribution of calcifying and silicifying phytoplankton in relation to environmental and biogeochemical parameters during the late stages of the 2005 North East Atlantic Spring Bloom. <i>Biogeosciences</i> , 2009, 6, 2155-2179.          | 3.3  | 50        |
| 25 | Coccolithophore surface distributions in the North Atlantic and their modulation of the air-sea flux of CO <sub>2</sub> from 10 years of satellite Earth observation data. <i>Biogeosciences</i> , 2013, 10, 2699-2709.                       | 3.3  | 45        |
| 26 | Phenology of marine phytoplankton from satellite ocean color measurements. <i>Geophysical Research Letters</i> , 2009, 36, .  | 4.0  | 37        |
| 27 | Modeling and forecasting the distribution of <i>Vibrio vulnificus</i> in Chesapeake Bay. <i>Journal of Applied Microbiology</i> , 2014, 117, 1312-1327.   | 3.1  | 33        |
| 28 | Relationship between the distribution pattern of right whales, <i>Eubalaena glacialis</i> , and satellite-derived sea surface thermal structure in the Great South Channel. <i>Continental Shelf Research</i> , 1989, 9, 247-260.             | 1.8  | 31        |
| 29 | Blooms of <i>Emiliana huxleyi</i> (Prymnesiophyceae) in surface waters of the Nova Scotian Shelf and the Grand Bank. <i>Journal of Plankton Research</i> , 1993, 15, 1429-1438.   | 1.8  | 29        |
| 30 | The influence of tropical instability waves on phytoplankton blooms in the wake of the Marquesas Islands during 1998 and on the currents observed during the drift of the Kon-Tiki in 1947. <i>Geophysical Research Letters</i> , 2004, 31, . | 4.0  | 28        |
| 31 | Modeling Rappahannock River Basin Using SWAT - Pilot for Chesapeake Bay Watershed. <i>Applied Engineering in Agriculture</i> , 2010, 26, 795-805.   | 0.7  | 25        |
| 32 | Strong sea surface cooling in the eastern equatorial Pacific and implications for Galápagos Penguin conservation. <i>Geophysical Research Letters</i> , 2015, 42, 6432-6437.  | 4.0  | 25        |
| 33 | Geostationary satellites reveal motions of ocean surface fronts. <i>Journal of Marine Systems</i> , 2002, 37, 3-15.   | 2.1  | 23        |
| 34 | Satellite remote sensing observations and aerial photography of storm-induced neritic carbonate transport from shallow carbonate platforms. <i>International Journal of Remote Sensing</i> , 2002, 23, 2853-2868.                             | 2.9  | 17        |
| 35 | Decadal time-series of SeaWiFS retrieved CDOM absorption and estimated CO <sub>2</sub> photoproduction on the continental shelf of the eastern United States. <i>Geophysical Research Letters</i> , 2009, 36, .                               | 4.0  | 17        |
| 36 | An Advanced Data Assimilation System for the Chesapeake Bay: Performance Evaluation. <i>Journal of Atmospheric and Oceanic Technology</i> , 2012, 29, 1542-1557.  | 1.3  | 17        |

| #  | ARTICLE   | IF   | CITATIONS |
|----|---|------|-----------|
| 37 | Forecasting system predicts presence of sea nettles in Chesapeake Bay. <i>Eos</i> , 2002, 83, 321.  | 0.1  | 14        |
| 38 | Interannual and Decadal Variability in Tropical Pacific Chlorophyll from a Statistical Reconstruction: 1958â€”2008. <i>Journal of Climate</i> , 2017, 30, 7293-7315.                              | 3.2  | 13        |
| 39 | Predicting phytoplankton composition from spaceâ€”Using the ratio of euphotic depth to mixed-layer depth: An evaluation. <i>Remote Sensing of Environment</i> , 1995, 53, 172-176.                | 11.0 | 12        |
| 40 | Seasonality of oceanic primary production and its interannual variability from 1998 to 2007. <i>Deep-Sea Research Part I: Oceanographic Research Papers</i> , 2014, 90, 166-175.                  | 1.4  | 12        |
| 41 | Incorporating environmental data in abundance-based algorithms for deriving phytoplankton size classes in the Atlantic Ocean. <i>Remote Sensing of Environment</i> , 2020, 240, 111689.           | 11.0 | 12        |
| 42 | The Significance of the South Atlantic Equatorial Countercurrent to the Ecology of the Green Turtle Breeding Population of Ascension Island. <i>Journal of Herpetology</i> , 1990, 24, 81.        | 0.5  | 10        |
| 43 | The Roles of Emerging Technology and Modeling Techniques in Operational Ecological Forecasting at NOAA. <i>Marine Technology Society Journal</i> , 2015, 49, 193-203.                             | 0.4  | 7         |
| 44 | Assessing satellite sea surface salinity from ocean color radiometric measurements for coastal hydrodynamic model data assimilation. <i>Journal of Applied Remote Sensing</i> , 2016, 10, 036003. | 1.3  | 5         |
| 45 | Towards operational forecasts of algal blooms and pathogens. , 2012, , 345-368.   |      | 4         |
| 46 | The 'CORSAGE' programme: Continuous orbital remote sensing of archipelagic geochemical effects. <i>International Journal of Remote Sensing</i> , 1997, 18, 305-321.                               | 2.9  | 3         |
| 47 | Modeling Hypoxia and Its Ecological Consequences in Chesapeake Bay. , 2017, , 119-147.  |      | 2         |
| 48 | Satellites Reveal the Influence of Equatorial Currents and Tropical Instability Waves on the Drift of the Kon-Tiki in the Pacific. <i>Oceanography</i> , 2004, 17, 166-175.                       | 1.0  | 2         |
| 49 | Monitoring a Sentinel Species from Satellites: Detecting <i>Emiliana huxleyi</i> in 25 Years of AVHRR Imagery. , 2013, , 277-288.   |      | 1         |
| 50 | An Introduction to Satellite Sensors, Observations and Techniques. , 2007, , 21-50.   |      | 0         |
