

Joan S Ash

List of Publications by Citations

Source: <https://exaly.com/author-pdf/7189395/joan-s-ash-publications-by-citations.pdf>

Version: 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
94	Some unintended consequences of information technology in health care: the nature of patient care information system-related errors. <i>Journal of the American Medical Informatics Association: JAMIA</i> , 2004 , 11, 104-12	8.6	1070
93	Personal health records: definitions, benefits, and strategies for overcoming barriers to adoption. <i>Journal of the American Medical Informatics Association: JAMIA</i> , 2006 , 13, 121-6	8.6	912
92	Types of unintended consequences related to computerized provider order entry. <i>Journal of the American Medical Informatics Association: JAMIA</i> , 2006 , 13, 547-56	8.6	571
91	The extent and importance of unintended consequences related to computerized provider order entry. <i>Journal of the American Medical Informatics Association: JAMIA</i> , 2007 , 14, 415-23	8.6	354
90	Factors and forces affecting EHR system adoption: report of a 2004 ACMI discussion. <i>Journal of the American Medical Informatics Association: JAMIA</i> , 2005 , 12, 8-12	8.6	236
89	Categorizing the unintended sociotechnical consequences of computerized provider order entry. <i>International Journal of Medical Informatics</i> , 2007 , 76 Suppl 1, S21-7	5.3	188
88	Computerized physician order entry in U.S. hospitals: results of a 2002 survey. <i>Journal of the American Medical Informatics Association: JAMIA</i> , 2004 , 11, 95-9	8.6	188
87	A consensus statement on considerations for a successful CPOE implementation. <i>Journal of the American Medical Informatics Association: JAMIA</i> , 2003 , 10, 229-34	8.6	187
86	The unintended consequences of computerized provider order entry: findings from a mixed methods exploration. <i>International Journal of Medical Informatics</i> , 2009 , 78 Suppl 1, S69-76	5.3	149
85	A cross-site qualitative study of physician order entry. <i>Journal of the American Medical Informatics Association: JAMIA</i> , 2003 , 10, 188-200	8.6	141
84	Extending the understanding of computerized physician order entry: implications for professional collaboration, workflow and quality of care. <i>International Journal of Medical Informatics</i> , 2007 , 76 Suppl 1, S4-13	5.3	131
83	Implementing computerized physician order entry: the importance of special people. <i>International Journal of Medical Informatics</i> , 2003 , 69, 235-50	5.3	124
82	Organizational factors that influence information technology diffusion in academic health sciences centers. <i>Journal of the American Medical Informatics Association: JAMIA</i> , 1997 , 4, 102-11	8.6	121
81	Some unintended consequences of clinical decision support systems 2007 , 26-30	0.7	118
80	Anticipating and addressing the unintended consequences of health IT and policy: a report from the AMIA 2009 Health Policy Meeting. <i>Journal of the American Medical Informatics Association: JAMIA</i> , 2011 , 18, 82-90	8.6	111
79	Lessons from "Unexpected increased mortality after implementation of a commercially sold computerized physician order entry system". <i>Pediatrics</i> , 2006 , 118, 797-801	7.4	111
78	Clinical decision support capabilities of commercially-available clinical information systems. <i>Journal of the American Medical Informatics Association: JAMIA</i> , 2009 , 16, 637-44	8.6	110

77	Computerized provider order entry adoption: implications for clinical workflow. <i>Journal of General Internal Medicine</i> , 2009 , 24, 21-6	4	108
76	Development and evaluation of a comprehensive clinical decision support taxonomy: comparison of front-end tools in commercial and internally developed electronic health record systems. <i>Journal of the American Medical Informatics Association: JAMIA</i> , 2011 , 18, 232-42	8.6	91
75	The state of the art in clinical knowledge management: an inventory of tools and techniques. <i>International Journal of Medical Informatics</i> , 2010 , 79, 44-57	5.3	76
74	A systematic review of the types and causes of prescribing errors generated from using computerized provider order entry systems in primary and secondary care. <i>Journal of the American Medical Informatics Association: JAMIA</i> , 2017 , 24, 432-440	8.6	68
73	Emotional aspects of computer-based provider order entry: a qualitative study. <i>Journal of the American Medical Informatics Association: JAMIA</i> , 2005 , 12, 561-7	8.6	67
72	Integrating Patient-Generated Health Data Into Clinical Care Settings or Clinical Decision-Making: Lessons Learned From Project HealthDesign. <i>JMIR Human Factors</i> , 2016 , 3, e26	2.5	66
71	Governance for clinical decision support: case studies and recommended practices from leading institutions. <i>Journal of the American Medical Informatics Association: JAMIA</i> , 2011 , 18, 187-94	8.6	63
70	Physician experiences transitioning between an older versus newer electronic health record for electronic prescribing. <i>International Journal of Medical Informatics</i> , 2012 , 81, 539-48	5.3	61
69	Recommended practices for computerized clinical decision support and knowledge management in community settings: a qualitative study. <i>BMC Medical Informatics and Decision Making</i> , 2012 , 12, 6	3.6	59
68	People and organizational issues in research systems implementation. <i>Journal of the American Medical Informatics Association: JAMIA</i> , 2008 , 15, 283-9	8.6	49
67	The SAFER guides: empowering organizations to improve the safety and effectiveness of electronic health records. <i>American Journal of Managed Care</i> , 2014 , 20, 418-23	2.1	39
66	Clinical decision support alert malfunctions: analysis and empirically derived taxonomy. <i>Journal of the American Medical Informatics Association: JAMIA</i> , 2018 , 25, 496-506	8.6	38
65	Comparison of clinical knowledge management capabilities of commercially-available and leading internally-developed electronic health records. <i>BMC Medical Informatics and Decision Making</i> , 2011 , 11, 13	3.6	38
64	Adding insight: a qualitative cross-site study of physician order entry. <i>International Journal of Medical Informatics</i> , 2005 , 74, 623-8	5.3	36
63	Unrealized potential and residual consequences of electronic prescribing on pharmacy workflow in the outpatient pharmacy. <i>Journal of the American Medical Informatics Association: JAMIA</i> , 2014 , 21, 481-6	8.6	32
62	A qualitative study of the activities performed by people involved in clinical decision support: recommended practices for success. <i>Journal of the American Medical Informatics Association: JAMIA</i> , 2014 , 21, 464-72	8.6	30
61	Lessons learned from implementing service-oriented clinical decision support at four sites: A qualitative study. <i>International Journal of Medical Informatics</i> , 2015 , 84, 901-11	5.3	28
60	Standard practices for computerized clinical decision support in community hospitals: a national survey. <i>Journal of the American Medical Informatics Association: JAMIA</i> , 2012 , 19, 980-7	8.6	28

59	Principles for a successful computerized physician order entry implementation 2003 , 36-40	0.7	28
58	Perceptions of physician order entry: results of a cross-site qualitative study. <i>Methods of Information in Medicine</i> , 2003 , 42, 313-23	1.5	27
57	Bringing science to medicine: an interview with Larry Weed, inventor of the problem-oriented medical record. <i>Journal of the American Medical Informatics Association: JAMIA</i> , 2014 , 21, 964-8	8.6	26
56	The story behind the development of the first whole-body computerized tomography scanner as told by Robert S. Ledley. <i>Journal of the American Medical Informatics Association: JAMIA</i> , 2006 , 13, 465-9	8.6	26
55	Qualitative evaluation of health information exchange efforts. <i>Journal of Biomedical Informatics</i> , 2007 , 40, S33-9	10.2	25
54	An unintended consequence of CPOE implementation: shifts in power, control, and autonomy 2006 , 11-5	0.7	25
53	Identifying best practices for clinical decision support and knowledge management in the field. <i>Studies in Health Technology and Informatics</i> , 2010 , 160, 806-10	0.5	25
52	Safety Assurance Factors for Electronic Health Record Resilience (SAFER): study protocol. <i>BMC Medical Informatics and Decision Making</i> , 2013 , 13, 46	3.6	24
51	A qualitative study of the implementation of a bioinformatics tool in a biological research laboratory. <i>International Journal of Medical Informatics</i> , 2007 , 76, 821-8	5.3	24
50	Assessing the anticipated consequences of Computer-based Provider Order Entry at three community hospitals using an open-ended, semi-structured survey instrument. <i>International Journal of Medical Informatics</i> , 2008 , 77, 440-7	5.3	23
49	Managing change: analysis of a hypothetical case. <i>Journal of the American Medical Informatics Association: JAMIA</i> , 2000 , 7, 125-34	8.6	23
48	A rapid assessment process for clinical informatics interventions 2008 , 26-30	0.7	23
47	Exploring the unintended consequences of computerized physician order entry. <i>Studies in Health Technology and Informatics</i> , 2007 , 129, 198-202	0.5	23
46	The effects of hands-free communication device systems: communication changes in hospital organizations. <i>Journal of the American Medical Informatics Association: JAMIA</i> , 2010 , 17, 91-8	8.6	20
45	An evaluation of five bedside information products using a user-centered, task-oriented approach. <i>Journal of the Medical Library Association: JMLA</i> , 2006 , 94, 435-41, e206-7	1.4	20
44	Does failure breed success: narrative analysis of stories about computerized provider order entry. <i>International Journal of Medical Informatics</i> , 2003 , 72, 9-15	5.3	17
43	Report of conference Track 4: socio-technical issues of HIS. <i>International Journal of Medical Informatics</i> , 2003 , 69, 305-6	5.3	15
42	Developing a model for understanding patient collection of observations of daily living: A qualitative meta-synthesis of the Project HealthDesign Program. <i>Personal and Ubiquitous Computing</i> , 2015 , 19, 91-102	2.1	14

41	Factors contributing to medication errors made when using computerized order entry in pediatrics: a systematic review. <i>Journal of the American Medical Informatics Association: JAMIA</i> , 2018 , 25, 575-584	8.6	14
40	Best practices for preventing malfunctions in rule-based clinical decision support alerts and reminders: Results of a Delphi study. <i>International Journal of Medical Informatics</i> , 2018 , 118, 78-85	5.3	13
39	Resilient Practices in Maintaining Safety of Health Information Technologies. <i>Journal of Cognitive Engineering and Decision Making</i> , 2014 , 8, 265-282	2.5	13
38	Clinical decision support in small community practice settings: a case study. <i>Journal of the American Medical Informatics Association: JAMIA</i> , 2011 , 18, 879-82	8.6	13
37	The Evolving Role of Medical Scribe: Variation and Implications for Organizational Effectiveness and Safety. <i>Studies in Health Technology and Informatics</i> , 2017 , 234, 382-388	0.5	13
36	Multiple perspectives on clinical decision support: a qualitative study of fifteen clinical and vendor organizations. <i>BMC Medical Informatics and Decision Making</i> , 2015 , 15, 35	3.6	12
35	Effect of computerized prescriber order entry on pharmacy: experience of one health system. <i>American Journal of Health-System Pharmacy</i> , 2015 , 72, 133-42	2.2	12
34	Evaluation of risk communication in a mammography patient decision aid. <i>Patient Education and Counseling</i> , 2016 , 99, 1240-1248	3.1	12
33	Safe use of the EHR by medical scribes: a qualitative study. <i>Journal of the American Medical Informatics Association: JAMIA</i> , 2021 , 28, 294-302	8.6	10
32	Health Information Technology Systems profoundly impact users: a case study in a dental school. <i>Journal of Dental Education</i> , 2010 , 74, 434-45	1.6	10
31	Health Information Technology Systems Profoundly Impact Users: A Case Study in a Dental School. <i>Journal of Dental Education</i> , 2010 , 74, 434-445	1.6	9
30	Outreach to Oregon physicians and hospitals: 5000 by 2000. <i>Annals of the New York Academy of Sciences</i> , 1992 , 670, 91-7	6.5	9
29	A survey of U.S.A. acute care hospitals' computer-based provider order entry system infusion levels. <i>Studies in Health Technology and Informatics</i> , 2007 , 129, 252-6	0.5	9
28	Orders on file but no labs drawn: investigation of machine and human errors caused by an interface idiosyncrasy. <i>Journal of the American Medical Informatics Association: JAMIA</i> , 2017 , 24, 958-963	8.6	8
27	The effects of a hands-free communication device system in a surgical suite. <i>Journal of the American Medical Informatics Association: JAMIA</i> , 2011 , 18, 70-2	8.6	8
26	Perspectives and Uses of the Electronic Health Record Among US Pediatricians: A National Survey. <i>Journal of Ambulatory Care Management</i> , 2017 , 40, 59-68	0.8	7
25	Patient narratives representing patient voices to inform research: a pilot qualitative study. <i>Studies in Health Technology and Informatics</i> , 2015 , 208, 55-60	0.5	7
24	Texting 4 Sexual Health: Improving Attitudes, Intention, and Behavior Among American Indian and Alaska Native Youth. <i>Health Promotion Practice</i> , 2018 , 19, 833-843	1.8	6

23	Recognition of the Relationship Between Patients' Work and Health: A Qualitative Evaluation of the Need for Clinical Decision Support (CDS) for Worker Health in Five Primary Care Practices. <i>Journal of Occupational and Environmental Medicine</i> , 2017 , 59, e245-e250	2	6
22	Adding insight: a qualitative cross-site study of physician order entry. <i>Studies in Health Technology and Informatics</i> , 2004 , 107, 1013-7	0.5	6
21	Using Simulations to Improve Electronic Health Record Use, Clinician Training and Patient Safety: Recommendations From A Consensus Conference 2016 , 2016, 904-913	0.7	5
20	Do You Know What Your Scribe Did Last Spring? The Impact of COVID-19 on Medical Scribe Workflow. <i>Applied Clinical Informatics</i> , 2020 , 11, 807-811	3.1	5
19	Ambulatory computerized physician order entry implementation 2005 , 11-5	0.7	4
18	Essential activities for electronic health record safety: A qualitative study. <i>Health Informatics Journal</i> , 2020 , 26, 3140-3151	3	4
17	Studying Readiness for Clinical Decision Support for Worker Health Using the Rapid Assessment Process and Mixed Methods Interviews 2016 , 2016, 285-294	0.7	3
16	How can we partner with electronic health record vendors on the complex journey to safer health care?. <i>Journal of Healthcare Risk Management: the Journal of the American Society for Healthcare Risk Management</i> , 2020 , 40, 34-43	0.9	3
15	Organizational and Behavioral Issues 2017 , 115-130		2
14	Organizational and cultural change considerations 2007 , 385-402		2
13	Clinical Decision Support for Worker Health: A Five-Site Qualitative Needs Assessment in Primary Care Settings. <i>Applied Clinical Informatics</i> , 2020 , 11, 635-643	3.1	2
12	Performing Subjectivist Studies in the Qualitative Traditions Responsive to Users 2006 , 267-300		2
11	A Quality, Benefit, Cost, and Financial Framework for Health Information Technology, E-Prescribing: A Delphi Study. <i>Studies in Health Technology and Informatics</i> , 2017 , 241, 69-75	0.5	2
10	How Stakeholder Assessment of E-Prescribing Can Help Determine Incentives to Facilitate Management of Care: A Delphi Study. <i>Journal of Managed Care & Specialty Pharmacy</i> , 2017 , 23, 1130-1139 ¹	1.9	1
9	The future of medical scribes documenting in the electronic health record: results of an expert consensus conference. <i>BMC Medical Informatics and Decision Making</i> , 2021 , 21, 204	3.6	0
8	A qualitative study of provider burnout: do medical scribes hinder or help?. <i>JAMIA Open</i> , 2021 , 4, ooab0479	4.9	0
7	Barriers to Information Access in Electronic Health Records during Initial Patient Visits: A Qualitative Study. <i>Proceedings of the International Symposium of Human Factors and Ergonomics in Healthcare</i> , 2015 , 4, 143-149	0.5	
6	Organizational and Cultural Change 2014 , 641-663		

- 5 IAIMS perspectives. *Journal of the Association for Information Science and Technology*, **1997**, 48, 1153-1153
- 4 The Panorama of Evaluation Approaches **2022**, 25-41
- 3 Mixed Methods Studies **2022**, 403-421
- 2 Lessons From Unexpected Increased Mortality After Implementation of a Commercially Sold Computerized Physician Order Entry System **2013**, 359-368
- 1 Describing Evaluations of Decision Support Interventions in Electronic Health Records. *Joint Commission Journal on Quality and Patient Safety*, **2021**, 47, 814-816 1.4
