| # | ARTICLE                                                                                                                                                        | IF  | CITATIONS |
|---|----------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1 | Efficient Design and Control for Network-Assisted Device-to-Device Content Delivery Network. IEEE Transactions on Multimedia, 2021, 23, 2442-2456.             | 7.2 | 1         |
| 2 | Efficient Content Replacement in Wireless Content Delivery Network with Cooperative Caching. , 2016, , .                                                       |     | 12        |
| 3 | Efficient Cache Placement Strategy in Two-Tier Wireless Content Delivery Network. IEEE Transactions on Multimedia, 2016, 18, 1163-1174.                        | 7.2 | 40        |
| 4 | Energy-aware algorithms for network-assisted device-to-device content delivery networks. , 2015, , .                                                           |     | 5         |
| 5 | Joint optimization of cache server deployment and request routing with cooperative content replication. , 2014, , .                                            |     | 9         |
| 6 | Lightweight caching strategy for wireless content delivery networks. IEICE Communications Express, 2014, 3, 150-155.                                           | 0.4 | 3         |
| 7 | Efficient cache placement strategy for wireless content delivery networks. , 2013, , .                                                                         |     | 1         |
| 8 | One-touch caching for content delivery in wireless consumer networks. , 2012, , .                                                                              |     | 1         |
| 9 | Greedy Local Routing Strategy for Autonomous Global Load Balancing Based on Three-Dimensional Potential Field. IEEE Communications Letters, 2010, 14, 839-841. | 4.1 | 6         |
