

Shahadat Uddin

List of Publications by Citations

Source: <https://exaly.com/author-pdf/7224773/shahadat-uddin-publications-by-citations.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

105

#	Paper	IF	Citations
105	Comparing different supervised machine learning algorithms for disease prediction. <i>BMC Medical Informatics and Decision Making</i> , 2019 , 19, 281	3.6	215
104	Trend and efficiency analysis of co-authorship network. <i>Scientometrics</i> , 2012 , 90, 687-699	3	88
103	Network effects on scientific collaborations. <i>PLoS ONE</i> , 2013 , 8, e57546	3.7	81
102	Evolutionary dynamics of scientific collaboration networks: multi-levels and cross-time analysis. <i>Scientometrics</i> , 2011 , 89, 687-710	3	78
101	A machine learning model to identify early stage symptoms of SARS-Cov-2 infected patients. <i>Expert Systems With Applications</i> , 2020 , 160, 113661	7.8	57
100	The impact of author-selected keywords on citation counts. <i>Journal of Informetrics</i> , 2016 , 10, 1166-1177	3.1	50
99	Longitudinal trends in global obesity research and collaboration: a review using bibliometric metadata. <i>Obesity Reviews</i> , 2016 , 17, 377-85	10.6	43
98	Effect of physician collaboration network on hospitalization cost and readmission rate. <i>European Journal of Public Health</i> , 2012 , 22, 629-33	2.1	42
97	Machine Learning-Based Models for Early Stage Detection of Autism Spectrum Disorders. <i>IEEE Access</i> , 2019 , 7, 166509-166527	3.5	38
96	A study of physician collaborations through social network and exponential random graph. <i>BMC Health Services Research</i> , 2013 , 13, 234	2.9	33
95	TClustVID: A novel machine learning classification model to investigate topics and sentiment in COVID-19 tweets. <i>Knowledge-Based Systems</i> , 2021 , 226, 107126	7.3	32
94	Comorbidity network for chronic disease: A novel approach to understand type 2 diabetes progression. <i>International Journal of Medical Informatics</i> , 2018 , 115, 1-9	5.3	30
93	Time-aware link prediction to explore network effects on temporal knowledge evolution. <i>Scientometrics</i> , 2016 , 108, 745-776	3	29
92	A framework to explore the knowledge structure of multidisciplinary research fields. <i>PLoS ONE</i> , 2015 , 10, e0123537	3.7	25
91	A Network-Based Bioinformatics Approach to Identify Molecular Biomarkers for Type 2 Diabetes that Are Linked to the Progression of Neurological Diseases. <i>International Journal of Environmental Research and Public Health</i> , 2020 , 17,	4.6	25
90	Quantifying topological robustness of networks under sustained targeted attacks. <i>Social Network Analysis and Mining</i> , 2013 , 3, 939-952	2.2	21
89	Exploring the impact of different multi-level measures of physician communities in patient-centric care networks on healthcare outcomes: A multi-level regression approach. <i>Scientific Reports</i> , 2016 , 6, 20222	4.9	20

88	Power-law behavior in complex organizational communication networks during crisis. <i>Physica A: Statistical Mechanics and Its Applications</i> , 2011 , 390, 2845-2853	3.3	19
87	Machine Learning Approach to Predicting COVID-19 Disease Severity Based on Clinical Blood Test Data: Statistical Analysis and Model Development. <i>JMIR Medical Informatics</i> , 2021 , 9, e25884	3.6	19
86	Mapping and modeling of physician collaboration network. <i>Statistics in Medicine</i> , 2013 , 32, 3539-51	2.3	18
85	How did socio-demographic status and personal attributes influence compliance to COVID-19 preventive behaviours during the early outbreak in Japan? Lessons for pandemic management. <i>Personality and Individual Differences</i> , 2021 , 175, 110692	3.3	18
84	Bioinformatics Methodologies to Identify Interactions Between Type 2 Diabetes and Neurological Comorbidities. <i>IEEE Access</i> , 2019 , 7, 183948-183970	3.5	17
83	A Comparative Performance Analysis of Data Resampling Methods on Imbalance Medical Data. <i>IEEE Access</i> , 2021 , 9, 109960-109975	3.5	17
82	Chronic disease prediction using administrative data and graph theory: The case of type 2 diabetes. <i>Expert Systems With Applications</i> , 2019 , 136, 230-241	7.8	16
81	Social networks enabled coordination model for cost management of patient hospital admissions. <i>Journal for Healthcare Quality: Official Publication of the National Association for Healthcare Quality</i> , 2011 , 33, 37-48	1	16
80	Emotion Recognition From EEG Signal Focusing on Deep Learning and Shallow Learning Techniques. <i>IEEE Access</i> , 2021 , 9, 94601-94624	3.5	16
79	Exploring communication networks to understand organizational crisis using exponential random graph models. <i>Computational and Mathematical Organization Theory</i> , 2013 , 19, 25-41	2.1	15
78	Analysis of stakeholders networks of infant and young child nutrition programmes in Sri Lanka, India, Nepal, Bangladesh and Pakistan. <i>BMC Public Health</i> , 2017 , 17, 405	4.1	15
77	Static versus dynamic topology of complex communications network during organizational crisis. <i>Complexity</i> , 2011 , 16, 27-36	1.6	15
76	Communication network dynamics during organizational crisis. <i>Journal of Informetrics</i> , 2013 , 7, 16-35	3.1	14
75	Disaster coordination preparedness of soft-target organisations. <i>Disasters</i> , 2011 , 35, 623-38	2.8	14
74	Use of Electronic Health Data for Disease Prediction: A Comprehensive Literature Review. <i>IEEE/ACM Transactions on Computational Biology and Bioinformatics</i> , 2021 , 18, 745-758	3	14
73	Dynamics of email communications among university students throughout a semester. <i>Computers and Education</i> , 2013 , 64, 95-103	9.5	13
72	Anomaly Detection on Big Data in Financial Markets 2017 ,		13
71	Policy content and stakeholder network analysis for infant and young child feeding in India. <i>BMC Public Health</i> , 2017 , 17, 461	4.1	12

70	Design patterns: coordination in complex and dynamic environments. <i>Disaster Prevention and Management</i> , 2012 , 21, 336-350	1.5	12
69	Network-Based Genetic Profiling Reveals Cellular Pathway Differences Between Follicular Thyroid Carcinoma and Follicular Thyroid Adenoma. <i>International Journal of Environmental Research and Public Health</i> , 2020 , 17,	4.6	11
68	Topological analysis of longitudinal networks 2013 ,		11
67	Network analytics and machine learning for predictive risk modelling of cardiovascular disease in patients with type 2 diabetes. <i>Expert Systems With Applications</i> , 2021 , 164, 113918	7.8	11
66	Comparative performance analysis of K-nearest neighbour (KNN) algorithm and its different variants for disease prediction.. <i>Scientific Reports</i> , 2022 , 12, 6256	4.9	11
65	A set of measures to quantify the dynamicity of longitudinal social networks. <i>Complexity</i> , 2016 , 21, 309-320	3.0	10
64	A Framework to Understand the Progression of Cardiovascular Disease for Type 2 Diabetes Mellitus Patients Using a Network Approach. <i>International Journal of Environmental Research and Public Health</i> , 2020 , 17,	4.6	10
63	The impact of study load on the dynamics of longitudinal email communications among students. <i>Computers and Education</i> , 2014 , 72, 209-219	9.5	10
62	Measuring topological robustness of networks under sustained targeted attacks 2012 ,		10
61	A framework for administrative claim data to explore healthcare coordination and collaboration. <i>Australian Health Review</i> , 2016 , 40, 500-510	1.8	10
60	Administrative Claim Data to Learn about Effective Healthcare Collaboration and Coordination through Social Network 2015 ,		9
59	A patient network-based machine learning model for disease prediction: The case of type 2 diabetes mellitus. <i>Applied Intelligence</i> , 1	4.9	9
58	Predicting the Future of Project Management Research. <i>Procedia, Social and Behavioral Sciences</i> , 2016 , 226, 27-34		9
57	A Deep Convolutional Neural Network Method to Detect Seizures and Characteristic Frequencies Using Epileptic Electroencephalogram (EEG) Data. <i>IEEE Journal of Translational Engineering in Health and Medicine</i> , 2021 , 9, 2000112	3	9
56	Policy content and stakeholder network analysis for infant and young child feeding in Nepal. <i>BMC Public Health</i> , 2017 , 17, 421	4.1	8
55	A topological framework to explore longitudinal social networks. <i>Computational and Mathematical Organization Theory</i> , 2015 , 21, 48-68	2.1	8
54	The optimal window size for analysing longitudinal networks. <i>Scientific Reports</i> , 2017 , 7, 13389	4.9	7
53	Modeling networked systems using the topologically distributed bounded rationality framework. <i>Complexity</i> , 2016 , 21, 123-137	1.6	7

52	Policy content and stakeholder network analysis for infant and young child feeding in Bangladesh. <i>BMC Public Health</i> , 2017 , 17, 402	4.1	7
51	Application of network analysis on healthcare 2014 ,		7
50	Socioeconomic analysis of patient-centric networks: effects of patients and hospitalsT characteristics and network structure on hospitalization costs. <i>European Journal of Health Economics</i> , 2012 , 13, 267-76	3.6	7
49	Capturing actor-level dynamics of longitudinal networks 2012 ,		7
48	Onslaught of COVID-19: How Did Governments React and at What Point of the Crisis?. <i>Population Health Management</i> , 2021 , 24, 13-19	1.8	7
47	Spatiotemporal association patterns in a supergroup of Rwenzori black-and-white colobus (<i>Colobus angolensis ruwenzorii</i>) are consistent with a multilevel society. <i>American Journal of Primatology</i> , 2020 , 82, e23127	2.5	6
46	Adapting graph theory and social network measures on healthcare data 2016 ,		6
45	Influence of vaccination strategies and topology on the herd immunity of complex networks. <i>Social Network Analysis and Mining</i> , 2014 , 4, 1	2.2	6
44	Overview of the infant and young child feeding policy environment in Pakistan: Federal, Sindh and Punjab context. <i>BMC Public Health</i> , 2017 , 17, 474	4.1	6
43	New Direction in Degree Centrality Measure: Towards a Time-Variant Approach. <i>International Journal of Information Technology and Decision Making</i> , 2014 , 13, 865-878	2.8	6
42	A deep learning approach using effective preprocessing techniques to detect COVID-19 from chest CT-scan and X-ray images. <i>Computers in Biology and Medicine</i> , 2021 , 139, 105014	7	6
41	Dyad and Triad Census Analysis of Crisis Communication Network. <i>Social Networking</i> , 2013 , 02, 32-41	0.7	6
40	Impact of Physician Community Structure on Healthcare Outcomes. <i>Studies in Health Technology and Informatics</i> , 2015 , 214, 152-8	0.5	6
39	TClustVID: A Novel Machine Learning Classification Model to Investigate Topics and Sentiment in COVID-19 Tweets		5
38	Adverse effects of COVID-19 vaccination: machine learning and statistical approach to identify and classify incidences of morbidity and post-vaccination reactivity		5
37	Few research fields play major role in interdisciplinary grant success. <i>Scientometrics</i> , 2019 , 119, 237-246	3	4
36	Policy and stakeholder analysis of infant and young child feeding programmes in Sri Lanka. <i>BMC Public Health</i> , 2017 , 17, 522	4.1	4
35	Exponential random graph modeling of communication networks to understand organizational crisis 2011 ,		4

34	Towards Coordination Preparedness of Soft-Target Organisation. <i>Lecture Notes in Computer Science</i> , 2009 , 54-64	0.9	4
33	Evolutionary Community Mining for Link Prediction in Dynamic Networks. <i>Studies in Computational Intelligence</i> , 2018 , 127-138	0.8	4
32	Time Scale Degree Centrality: A Time-Variant Approach to Degree Centrality Measures 2011 ,		3
31	Community evolution and engagement through assortative mixing in online social networks 2012 ,		3
30	A disease network-based recommender system framework for predictive risk modelling of chronic diseases and their comorbidities. <i>Applied Intelligence</i> ,1	4.9	3
29	Identifying molecular insight of synergistic complexities for SARS-CoV-2 infection with pre-existing type 2 diabetes. <i>Computers in Biology and Medicine</i> , 2021 , 136, 104668	7	3
28	Understanding chronic disease comorbidities from baseline networks 2017 ,		2
27	A research framework to explore knowledge evolution and scholarly quantification of collaborative research. <i>Scientometrics</i> , 2019 , 119, 789-803	3	2
26	Understanding the Comorbidity of Multiple Chronic Diseases Using a Network Approach 2019 ,		2
25	A Systematic Review of Network Studies Based on Administrative Health Data. <i>International Journal of Environmental Research and Public Health</i> , 2020 , 17,	4.6	2
24	Optimisation of strategy placements for public good in complex networks 2014 ,		2
23	Conceptual Quantification of the Dynamicity of Longitudinal Social Networks 2013 ,		2
22	Transitivity, hierarchy and reciprocity of organizational communication network during crisis. <i>International Journal of Organizational Analysis</i> , 2015 , 23, 2-20	2.1	2
21	Exploring physical, mental and psychological health for elders through their personal networks 2009 ,		2
20	Understanding the Progression of Congestive Heart Failure of Type 2 Diabetes Patient Using Disease Network and Hospital Claim Data. <i>Studies in Computational Intelligence</i> , 2020 , 774-788	0.8	2
19	Evolution Similarity for Dynamic Link Prediction in Longitudinal Networks. <i>Springer Proceedings in Complexity</i> , 2017 , 109-118	0.3	2
18	Research interdisciplinarity: STEM versus non-STEM. <i>Scientometrics</i> , 2020 , 126, 1-16	3	2
17	The implementation of public health and economic measures during the first wave of COVID-19 by different countries with respect to time, infection rate and death rate 2021 ,		2

16	Triad Census and Subgroup Analysis of Patient-Sharing Physician Collaborations. <i>IEEE Access</i> , 2018 , 6, 72233-72240	3.5	2
15	Machine learning and network-based models to identify genetic risk factors to the progression and survival of colorectal cancer. <i>Computers in Biology and Medicine</i> , 2021 , 135, 104539	7	2
14	How do economic and public finance statuses affect policy responses during a pandemic? - learning from the COVID-19 first wave.. <i>BMC Public Health</i> , 2022 , 22, 785	4.1	2
13	Actor-Level Dynamicity: Its Distribution Analysis Eases Anomaly Detection in Longitudinal Networks. <i>IEEE Access</i> , 2019 , 7, 69422-69433	3.5	1
12	Mining Actor-level Structural and Neighborhood Evolution for Link Prediction in Dynamic Networks 2017 ,		1
11	Systemic Consultation in Intellectual Disability Case Management. <i>Australian and New Zealand Journal of Family Therapy</i> , 2015 , 36, 258-272	1.1	1
10	Situated Response and Learning of Distributed Bushfire Coordinating Teams. <i>Journal of Homeland Security and Emergency Management</i> , 2013 , 10,	1.2	1
9	Assessing online community-building through assortativity, density and centralization in social networks 2013 ,		1
8	A weighted patient network-based framework for predicting chronic diseases using graph neural networks. <i>Scientific Reports</i> , 2021 , 11, 22607	4.9	1
7	Intelligent type 2 diabetes risk prediction from administrative claim data. <i>Informatics for Health and Social Care</i> , 2021 , 1-15	2.7	1
6	Suburban Road Networks to Explore COVID-19 Vulnerability and Severity.. <i>International Journal of Environmental Research and Public Health</i> , 2022 , 19,	4.6	1
5	A Social Network Framework to Explore Healthcare Collaboration. <i>Advances in Healthcare Information Systems and Administration Book Series</i> , 2015 , 44-66	0.3	0
4	A Social Network Framework to Explore Healthcare Collaboration 2017 , 12-34		0
3	Comorbidity progression patterns of major chronic diseases: The impact of age, gender and time-window.. <i>Chronic Illness</i> , 2022 , 17423953221087647	1.4	0
2	Comparing the Impact of Road Networks on COVID-19 Severity between Delta and Omicron Variants: A Study Based on Greater Sydney (Australia) Suburbs. <i>International Journal of Environmental Research and Public Health</i> , 2022 , 19, 6551	4.6	0
1	Fast COVID-19 versus H1N1 screening using Optimized Parallel Inception. <i>Expert Systems With Applications</i> , 2022 , 204, 117551	7.8	0
