

Catharina Mc Mels

List of Publications by Citations

Source: <https://exaly.com/author-pdf/7246992/catharina-mc-mels-publications-by-citations.pdf>

Version: 2024-04-25

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
67	Are behavioural risk factors to be blamed for the conversion from optimal blood pressure to hypertensive status in Black South Africans? A 5-year prospective study. <i>International Journal of Epidemiology</i> , 2012 , 41, 1114-23	7.8	76
66	Defensive coping facilitates higher blood pressure and early sub-clinical structural vascular disease via alterations in heart rate variability: the SABPA study. <i>Atherosclerosis</i> , 2013 , 227, 391-7	3.1	34
65	The African Prospective study on the Early Detection and Identification of Cardiovascular disease and Hypertension (African-PREDICT): Design, recruitment and initial examination. <i>European Journal of Preventive Cardiology</i> , 2019 , 26, 458-470	3.9	31
64	Recent advances in understanding hypertension development in sub-Saharan Africa. <i>Journal of Human Hypertension</i> , 2017 , 31, 491-500	2.6	25
63	Masked hypertension and its associated cardiovascular risk in young individuals: the African-PREDICT study. <i>Hypertension Research</i> , 2016 , 39, 158-65	4.7	24
62	Quantification of systemic renin-angiotensin system peptides of hypertensive black and white African men established from the RAS-Fingerprint. <i>JRAAS - Journal of the Renin-Angiotensin-Aldosterone System</i> , 2016 , 17,	3	22
61	Exploring the link between cardiovascular reactivity and end-organ damage in African and Caucasian men: the SABPA study. <i>American Journal of Hypertension</i> , 2013 , 26, 68-75	2.3	21
60	The link between vascular deterioration and branched chain amino acids in a population with high glycated haemoglobin: the SABPA study. <i>Amino Acids</i> , 2013 , 45, 1405-13	3.5	19
59	Ethnicity-specific differences in L-arginine status in South African men. <i>Journal of Human Hypertension</i> , 2012 , 26, 737-43	2.6	16
58	Attenuated IGF-1 predicts all-cause and cardiovascular mortality in a Black population: A five-year prospective study. <i>European Journal of Preventive Cardiology</i> , 2016 , 23, 1690-1699	3.9	13
57	Nitric oxide synthesis capacity, ambulatory blood pressure and end organ damage in a black and white population: the SABPA study. <i>Amino Acids</i> , 2016 , 48, 801-810	3.5	13
56	The relationship of nitric oxide synthesis capacity, oxidative stress, and albumin-to-creatinine ratio in black and white men: the SABPA study. <i>Age</i> , 2016 , 38, 9		13
55	Alkaline phosphatase and arterial structure and function in hypertensive African men: the SABPA study. <i>International Journal of Cardiology</i> , 2013 , 167, 1995-2001	3.2	13
54	The association of oxidative stress with arterial compliance and vascular resistance in a bi-ethnic population: the SABPA study. <i>Free Radical Research</i> , 2016 , 50, 920-8	4	13
53	8-Oxo-7,8-dihydro-2'-deoxyguanosine, reactive oxygen species and ambulatory blood pressure in African and Caucasian men: the SABPA study. <i>Free Radical Research</i> , 2014 , 48, 1291-9	4	12
52	L-carnitine and long-chain acylcarnitines are positively correlated with ambulatory blood pressure in humans: the SABPA study. <i>Lipids</i> , 2013 , 48, 63-73	1.6	11
51	Morning blood pressure surge in young black and white adults: The African-PREDICT Study. <i>Journal of Human Hypertension</i> , 2019 , 33, 22-33	2.6	10

50	Compromised bioavailable IGF-1 of black men relates favourably to ambulatory blood pressure: The SABPA study. <i>Atherosclerosis</i> , 2014 , 233, 139-44	3.1	10
49	Testosterone and acute stress are associated with fibrinogen and von Willebrand factor in African men: the SABPA study. <i>International Journal of Cardiology</i> , 2013 , 168, 4638-42	3.2	10
48	Ethnic-specific relationships between haemostatic and oxidative stress markers in black and white South Africans: The SABPA study. <i>Clinical and Experimental Hypertension</i> , 2015 , 37, 511-7	2.2	9
47	Serum selenium levels, the selenoprotein glutathione peroxidase and vascular protection: The SABPA study. <i>Food Research International</i> , 2018 , 104, 69-76	7	9
46	Urinary albumin excretion from spot urine samples predict all-cause and stroke mortality in Africans. <i>American Journal of Hypertension</i> , 2014 , 27, 811-8	2.3	9
45	Increased excretion of c4-carnitine species after a therapeutic acetylsalicylic Acid dose: evidence for an inhibitory effect on short-chain Fatty Acid metabolism. <i>ISRN Pharmacology</i> , 2011 , 2011, 851870		9
44	Retinal vessel caliber and its relationship with nocturnal blood pressure dipping status: the SABPA study. <i>Hypertension Research</i> , 2016 , 39, 730-736	4.7	9
43	Antioxidant enzyme activity is associated with blood pressure and carotid intima media thickness in black men and women: The SABPA study. <i>Atherosclerosis</i> , 2016 , 248, 91-6	3.1	8
42	The association of endothelin-1 with markers of oxidative stress in a biethnic South African cohort: the SABPA study. <i>Hypertension Research</i> , 2017 , 40, 189-195	4.7	8
41	Cardiometabolic markers to identify cardiovascular disease risk in HIV-infected black South Africans. <i>South African Medical Journal</i> , 2014 , 104, 195-9	1.5	8
40	Leptin is positively associated with blood pressure in african men with a low body mass index: the SAfrEIC study. <i>Hormone and Metabolic Research</i> , 2015 , 47, 145-51	3.1	7
39	Thiobarbituric acid-reactive substances relate to arterial stiffness and blood pressure in 6 to 8-year-old boys stratified by maternal risk. <i>Free Radical Research</i> , 2018 , 52, 180-187	4	7
38	Carotid cross-sectional wall area is significantly associated with serum leptin levels, independent of body mass index: the SABPA study. <i>Hypertension Research</i> , 2012 , 35, 1185-92	4.7	7
37	Cardiovascular function is not associated with creatine kinase activity in a black African population: The SABPA study. <i>BMC Cardiovascular Disorders</i> , 2016 , 16, 134	2.3	7
36	The Association of Endothelin-1 with Markers of Arterial Stiffness in Black South African Women: The SABPA Study. <i>Journal of Amino Acids</i> , 2015 , 2015, 481517		6
35	The Exercise, Arterial Modulation and Nutrition in Youth South Africa Study (ExAMIN Youth SA). <i>Frontiers in Pediatrics</i> , 2020 , 8, 212	3.4	5
34	Asymmetric dimethylarginine and symmetric dimethylarginine prospectively relates to carotid wall thickening in black men: the SABPA study. <i>Amino Acids</i> , 2017 , 49, 1843-1853	3.5	5
33	Low testosterone and hyperkinetic blood pressure responses in a cohort of South African men: the SABPA Study. <i>Clinical and Experimental Hypertension</i> , 2013 , 35, 228-35	2.2	5

32	Sex hormones associated with subclinical kidney damage and atherosclerosis in South African men: the SABPA study. <i>Journal of Hypertension</i> , 2012 , 30, 2387-94	1.9	5
31	Association of 25-hydroxyvitamin D and parathyroid hormone with the metabolic syndrome in black South African women. <i>Applied Physiology, Nutrition and Metabolism</i> , 2017 , 42, 413-419	3	4
30	Chronic distress and acute vascular stress responses associated with ambulatory blood pressure in low-testosterone African men: the SABPA Study. <i>Journal of Human Hypertension</i> , 2014 , 28, 393-8	2.6	4
29	Selenium and large artery structure and function: a 10-year prospective study. <i>European Journal of Nutrition</i> , 2019 , 58, 3313-3323	5.2	4
28	Three-year change in oxidative stress markers is linked to target organ damage in black and white men: the SABPA study. <i>Hypertension Research</i> , 2019 , 42, 1961-1970	4.7	3
27	Cardiovascular reactivity and oxidative stress in young and older adults: the African-PREDICT and SABPA studies. <i>Blood Pressure</i> , 2019 , 28, 229-238	1.7	3
26	Asymmetric dimethylarginine and L-homoarginine prospectively relate to carotid wall thickness in a South African cohort. <i>Amino Acids</i> , 2020 , 52, 965-973	3.5	3
25	Morning Blood Pressure Surge Relates to Autonomic Neural Activity in Young Non-Dipping Adults: The African-PREDICT Study. <i>Heart Lung and Circulation</i> , 2019 , 28, 1197-1205	1.8	3
24	A comparison of the association between glomerular filtration and L-arginine status in HIV-infected and uninfected African men: the SAfrEIC study. <i>Journal of Human Hypertension</i> , 2013 , 27, 557-63	2.6	3
23	L-homoarginine is associated with decreased cardiovascular- and all-cause mortality. <i>European Journal of Clinical Investigation</i> , 2021 , 51, e13472	4.6	3
22	A comparative analysis of blood pressure in HIV-infected patients versus uninfected controls residing in Sub-Saharan Africa: a narrative review. <i>Journal of Human Hypertension</i> , 2020 , 34, 692-708	2.6	3
21	Central systolic blood pressure relates inversely to nitric oxide synthesis in young black adults: the African-PREDICT study. <i>Journal of Human Hypertension</i> , 2021 , 35, 985-993	2.6	3
20	Nitric oxide-related markers link inversely to blood pressure in black boys and men: the ASOS and African-PREDICT studies. <i>Amino Acids</i> , 2020 , 52, 639-648	3.5	3
19	The renin-angiotensin-system and left ventricular mass in young adults: the African-PREDICT study. <i>Blood Pressure</i> , 2021 , 30, 98-107	1.7	3
18	Defensive coping and essential amino acid markers as possible predictors for structural vascular disease in an African and Caucasian male cohort: The SABPA study. <i>Psychophysiology</i> , 2017 , 54, 696-705	4.1	2
17	The Association of Measures of the Micro- and Macro-Vasculature with Selenium and GPx Activity in a Young Bi-Ethnic Population: The African-PREDICT Study. <i>Journal of the American College of Nutrition</i> , 2019 , 38, 614-622	3.5	2
16	Cornell product relates to albuminuria in hypertensive black adults independently of blood pressure: the SABPA study. <i>Journal of the American Society of Hypertension</i> , 2015 , 9, 115-22		2
15	The relation of blood pressure and carotid intima-media thickness with the glutathione cycle in a young bi-ethnic population: the African-PREDICT study. <i>Journal of Human Hypertension</i> , 2018 , 32, 268-277	2.6	2

14	Iron loading, alcohol and mortality: A prospective study. <i>Clinical Nutrition</i> , 2019 , 38, 1262-1268	5.9	2
13	Change in renin, cardiovascular and inflammatory markers over three years in a black and white population: the SABPA study. <i>BMC Cardiovascular Disorders</i> , 2017 , 17, 104	2.3	2
12	Unbalanced biotransformation metabolism and oxidative stress status: implications for deficient fatty acid oxidation. <i>Health</i> , 2011 , 03, 43-48	0.4	2
11	The relationship of blood pressure with uric acid and bilirubin in young lean and overweight/obese men and women: the African-PREDICT study. <i>Journal of Human Hypertension</i> , 2020 , 34, 648-656	2.6	2
10	Bioavailable IGF-1 is beneficially associated with biomarkers of endothelial function in young healthy adults: The African-PREDICT study. <i>Growth Hormone and IGF Research</i> , 2018 , 41, 28-33	2	2
9	Urinary proteomics combined with home blood pressure telemonitoring for health care reform trial: rationale and protocol. <i>Blood Pressure</i> , 2021 , 30, 269-281	1.7	2
8	Characterization of the Renin-Angiotensin-Aldosterone System in Young Healthy Black Adults: The African Prospective Study on the Early Detection and Identification of Hypertension and Cardiovascular Disease (African-PREDICT Study). <i>Hypertension</i> , 2021 , 78, 400-410	8.5	2
7	Cardiac Troponin T as Early Marker of Subclinical Cardiovascular Deterioration in Black Hypertensive Women. <i>Heart Lung and Circulation</i> , 2017 , 26, 825-832	1.8	1
6	Three-year change in endothelin-1 and markers of vascular remodelling in a bi-ethnic South African cohort: the SABPA study. <i>Journal of Human Hypertension</i> , 2017 , 31, 708-714	2.6	1
5	Aldosterone and angiotensin II profiles in young black and white women using different hormonal contraceptives: the African-PREDICT study. <i>Journal of Human Hypertension</i> , 2021 ,	2.6	1
4	Urinary albumin-to-creatinine ratio is inversely related to nitric oxide synthesis in young black adults: the African-PREDICT study. <i>Hypertension Research</i> , 2021 , 44, 71-79	4.7	1
3	Left ventricular mass and urinary metabolomics in young black and white adults: The African-PREDICT study. <i>Nutrition, Metabolism and Cardiovascular Diseases</i> , 2020 , 30, 2051-2062	4.5	0
2	Blood pressure and nitric oxide synthesis capacity in physically active and inactive groups: the SABPA study. <i>Journal of Human Hypertension</i> , 2021 , 35, 325-333	2.6	0
1	The association between serum vitamin D and body composition in South African HIV-infected women. <i>Southern African Journal of HIV Medicine</i> , 2021 , 22, 1284	1.4
