#	Article	IF	CITATIONS
1	Genome-wide association analyses identify 44 risk variants and refine the genetic architecture of major depression. Nature Genetics, 2018, 50, 668-681.	21.4	2,224
2	Meta-analysis of Genome-wide Association Studies for Neuroticism, and the Polygenic Association With Major Depressive Disorder. JAMA Psychiatry, 2015, 72, 642.	11.0	289
3	Meta-analysis of Genome-Wide Association Studies for Extraversion: Findings from the Genetics of Personality Consortium. Behavior Genetics, 2016, 46, 170-182.	2.1	178
4	The General Factor of Personality and Evaluation. European Journal of Personality, 2012, 26, 292-302.	3.1	110
5	The contribution of common genetic risk variants for ADHD to a general factor of childhood psychopathology. Molecular Psychiatry, 2020, 25, 1809-1821.	7.9	105
6	Different neurodevelopmental symptoms have a common genetic etiology. Journal of Child Psychology and Psychiatry and Allied Disciplines, 2013, 54, 1356-1365.	5.2	101
7	Birth weight as an independent predictor of <scp>ADHD</scp> symptoms: a withinâ€ŧwin pair analysis. Journal of Child Psychology and Psychiatry and Allied Disciplines, 2015, 56, 453-459.	5.2	85
8	Childhood neurodevelopmental disorders and risk of coercive sexual victimization in childhood and adolescence – a populationâ€based prospective twin study. Journal of Child Psychology and Psychiatry and Allied Disciplines, 2018, 59, 957-965.	5.2	57
9	Genetic and environmental contribution to the overlap between ADHD and ASD trait dimensions in young adults: a twin study. Psychological Medicine, 2019, 49, 1713-1721.	4.5	56
10	Criterion Validity and Utility of the General Factor of Psychopathology in Childhood: Predictive Associations With Independently Measured Severe Adverse Mental Health Outcomes in Adolescence. Journal of the American Academy of Child and Adolescent Psychiatry, 2018, 57, 372-383.	0.5	43
11	Association of Fetal Growth With General and Specific Mental Health Conditions. JAMA Psychiatry, 2019, 76, 536.	11.0	37
12	Do maladaptive behaviors exist at one or both ends of personality traits?. Psychological Assessment, 2014, 26, 433-446.	1.5	33
13	Association study between autistic-like traits and polymorphisms in the autism candidate regions RELN, CNTNAP2, SHANK3, and CDH9/10. Molecular Autism, 2014, 5, 55.	4.9	28
14	Brief Report: Association Between Autism Spectrum Disorder, Gastrointestinal Problems and Perinatal Risk Factors Within Sibling Pairs. Journal of Autism and Developmental Disorders, 2017, 47, 2621-2627.	2.7	27
15	The general factor of psychopathology: a comparison with the general factor of intelligence with respect to magnitude and predictive validity. World Psychiatry, 2020, 19, 206-213.	10.4	24
16	Approach temperament, anger, and evaluation: Resolving a paradox Journal of Personality and Social Psychology, 2013, 105, 285-300.	2.8	21
17	Overlap between attention-deficit hyperactivity disorder and neurodevelopmental, externalising and internalising disorders: separating unique from general psychopathology effects. British Journal of Psychiatry, 2021, 218, 35-42.	2.8	19
18	Childhood attentionâ€deficit/hyperactivity disorder symptoms and the development of adolescent alcohol problems: A prospective, populationâ€based study of Swedish twins. American Journal of Medical Genetics Part B: Neuropsychiatric Genetics, 2016, 171, 958-970.	1.7	17

Erik Pettersson

#	Article	IF	CITATIONS
19	Associations between conduct problems in childhood and adverse outcomes in emerging adulthood: a longitudinal Swedish nationwide twin cohort. Journal of Child Psychology and Psychiatry and Allied Disciplines, 2020, 61, 798-806.	5.2	17
20	Modeling daily variation in the affective circumplex: A dynamical systems approach. Journal of Research in Personality, 2013, 47, 57-69.	1.7	15
21	Volitional eye movement control and ADHD traits: a twin study. Journal of Child Psychology and Psychiatry and Allied Disciplines, 2020, 61, 1309-1316.	5.2	14
22	A Co-Twin Control Study of the Association Between Bullying Victimization and Self-Harm and Suicide Attempt in Adolescence. Journal of Adolescent Health, 2021, 69, 272-279.	2.5	14
23	The association between general childhood psychopathology and adolescent suicide attempt and self-harm: A prospective, population-based twin study Journal of Abnormal Psychology, 2020, 129, 364-375.	1.9	13
24	The association between childhood autistic traits and adolescent psychotic experiences is explained by general neuropsychiatric problems. American Journal of Medical Genetics Part B: Neuropsychiatric Genetics, 2016, 171, 153-159.	1.7	12
25	Sexual orientation and adolescent suicide attempt and selfâ€harm: a coâ€ŧwin control study. Journal of Child Psychology and Psychiatry and Allied Disciplines, 2021, 62, 834-841.	5.2	11
26	Childhood neurodevelopmental problems and adolescent bully victimization: population-based, prospective twin study in Sweden. European Child and Adolescent Psychiatry, 2015, 24, 1049-1059.	4.7	10
27	Higher Dispositional Optimism Predicts Better Health-Related Quality of Life After Esophageal Cancer Surgery: A Nationwide Population-Based Longitudinal Study. Annals of Surgical Oncology, 2021, 28, 7196-7205.	1.5	8
28	Visual Disengagement: Genetic Architecture and Relation to Autistic Traits in the General Population. Journal of Autism and Developmental Disorders, 2020, 50, 2188-2200.	2.7	6
29	Associations between psychiatric polygenic risk scores and general and specific psychopathology symptoms in childhood and adolescence between and within dizygotic twin pairs. Journal of Child Psychology and Psychiatry and Allied Disciplines, 2022, 63, 1513-1522.	5.2	6
30	Psychometrics, interpretation and clinical implications of hierarchical models of psychopathology. World Psychiatry, 2021, 20, 68-69.	10.4	5
31	Psychological distress after esophageal cancer surgery and the predictive effect of dispositional optimism: a nationwide population-based longitudinal study. Supportive Care in Cancer, 2022, 30, 1315-1322.	2.2	5
32	Neurodevelopmental disorders and subsequent risk of violent victimization: exploring sex differences and mechanisms. Psychological Medicine, 2023, 53, 1510-1517.	4.5	5
33	Difficulties maintaining prolonged fixation and attention-deficit/hyperactivity symptoms share genetic influences in childhood. Psychiatry Research, 2020, 293, 113384.	3.3	4
34	Exploring the Association of Sex Differences and Exposure to Maternal Smoking With Low Fetal Growth—Reply. JAMA Psychiatry, 2019, 76, 767.	11.0	3
35	Associations of Resting Heart Rate and Intelligence With General and Specific Psychopathology: A Prospective Population Study of 899,398 Swedish Men. Clinical Psychological Science, 2021, 9, 524-532.	4.0	3
